One unit of the plant of the Mount Royal Brick Company at Varennes, Quebec, is completed.

A motor bus company is a new project for Vancouver. The company will have a capital of $50,000, divided into 50,000 shares of $10 each.

The number of arrivals in Montreal of ocean steamers during September was 65, as compared with 57 for September 1912, an increase of 8 for the month.

Lord St. Davids, chairman of the Associated Portland Cement Company, addressing the shareholders in London, referred to the interest acquired in British Columbia, says Montreal Star cable. He regretted that the financial stringency forbade municipalities to raise money to make improvements requiring cement, yet he was extremely sanguine of the future. British Columbia investments would prove one of the best eggs in the company's basket. He especially commended activities of Director Bamber in British Columbia.

The Upper Canada College property, Toronto, has been sold to the Suydam Realty Company for about $1,100,000, and the college will be moved to Norval. The property of 160 acres on Avenue Road, Toronto, will be subdivided into building lots.

Messrs. Fleming and Marvin, Toronto, have been successful in securing the capital needed to establish a cafeteria in Montreal along the lines of the two in Toronto. The amount asked for $50,000, has been over-subscribed. One of the last investments made by the late Mr. Ross was to take a substantial interest in this concern.

The meeting in Toronto of the Lake Superior Corporation leads the London Times to publish a column analysis of the company's progress, which it declares satisfactory. It says there is little doubt that the first mortgage fives are sure of their interest in the future. It is impossible to say when the share capital will get a dividend, but the future of the Canadian steel industry seems promising.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

1914 ANNUAL REVIEW

OF THE

Monetary Times of Canada

The Monetary Times Annual Review which has now been issued each year for forty-six years has become recognized not only throughout Canada, but in all countries which have investment and commercial interest in Canada as the most reliable, most complete and comprehensive source of information concerning the financial and commercial possibilities of the Dominion.

In many offices the Annual Review will be found as a work of reference and its value in this connection has been demonstrated over and over again.

While previous Annual Reviews have had wide circulations, our plans for the Review of 1914 insure a wider and more valuable circulation. Editorially, too, it will have new features introduced that will make it more useful and attractive.

In spite of these larger plans for editorial and distribution purposes, the advertising rates will remain the same as in previous years. All advertisements will be placed on right hand pages and opposite reading matter.

In order to insure your securing the best position, it would be well if we were to receive your order as early as possible.

The Annual Review has been endorsed by the leading business men and financiers of Canada. Read what a few of them had to say about the Annual Review of 1913:—

"The Annual number is a credit to The Monetary Times."—T. BRADSHAW, Toronto.

"The Monetary Times improves steadily, and has become a valuable document to the business world."—(SIR) EDMUND WALKER.

"I have seen the copy of your Annual Statistical Review and the outlook number of The Monetary Times. There is no doubt that this special issue contains a large amount of information that will be useful, not only at home, but in British and Foreign financial and commercial spheres. I congratulate you on its excellence."—(SIR) T. J. SHAUGHNESSY.

"The 46th Annual Review of The Monetary Times will, I am sure, be very much appreciated by business men and investors, as it affords a handy book of reference, dealing as it does with every important interest throughout every section of Canada."—C. R. HOSMER, Montreal.

"Allow me to congratulate you upon the splendid issue of The Monetary Times Annual. It is an exceptionally interesting publication, full of valuable information, and one which will no doubt be retained by business and financial men in their libraries for reference purposes."—G. T. SOMERS, Toronto, Canada.

"I am obliged for your favor of Jan. 8th, and for your kindness in sending me a copy of the Annual Statistical Review of The Monetary Times. From a glance through its pages it seems a very useful number and containing much information that makes it of value in financial circles." (SIR) RICHARD MCBRIDE, Prime Minister, Victoria, B.C.

"We earnestly hope that all the endeavours you make in such an interesting way to encourage the financial relations between the two countries will be crowned with success. It is to the mutual benefit of your beautiful country and Holland. If at any time we can assist you in any way we will be only too pleased."—L. D. FORTUYN, Managing Director, Netherlands Transatlantic Mortgage Co., Winnipeg.

"With reference to your letter of the 9th inst., I may say that I have received a copy of your Annual Statistical Review and am very much pleased with it. It is very full and covers an immense deal of ground, and gives information to the seeker of knowledge that is valuable, and which it would be almost impossible for anyone to gather together without an expenditure of a vast deal of time and effort. I think you are to be congratulated on the issue, and I have no doubt it will prove of great value to our own and British traders."—(HON.) GEORGE E. FOSTER, Ottawa.

"I have this morning received the monumental number of The Monetary Times, for which I am much obliged. I do not pretend to have read it all, but I have read enough to be able to congratulate you on having produced such a compendious and detailed record of Canadian progress and prosperity."—(LORD) DESBOROUGH

"Referring to your letter of 8th instant, I have now had an opportunity of perusing the contents of the Annual Statistical Review of The Monetary Times, and it affords me pleasure to congratulate you upon the production of such a valuable record of financial events in Canada during the past year. We will keep a copy on file for reference. The letterpress and general appearance of the number are excellent. Wishing your journal the success its high standing and excellent tone deserve, and with kind regards to you personally."—(SIR) F. WILLIAMS-TAYLOR.

"I wish to congratulate you on the issue of the Annual Review. It is even better than the one issued a year ago, although when that was issued I thought it would be no easy task to improve on it. Every interest is dealt with and the amount of information given on each interest leaves hardly anything to be desired. It is a valuable encyclopedia of commercial, industrial, banking, insurance, transportation, etc., etc., interests of the Dominion."—(SIR) W. WHYTE.

1914 ANNUAL REVIEW

Read it for interest, then keep it for reference!

STOCKS AND BONDS TABLE—NOTES

(u) Unlisted

† Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1000. Steel Company of Canada, $100, $500 and $1,000. Sherwin Williams, $100, $500 and $1,000. Penmans, Ltd., $100, $500 and $1,000. Canadian Cottons, $100, $500 and $1.000.

‡ Quarterly.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

** Trethewey pays no regular dividend. They have paid:—1906, 4%; 1907, 4%; 1908, 15%; 1909, 25%; 1910, 10%; 1911, 20%; 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Company, 12 St. Sacrament Street, Montreal.

* $20,000 of this was redeemed April 1st, 1913.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.

(1) Sept. 15-Oct. 1 (3) Aug. 30-Oct. 2

PAT ON THE BACK FOR FINANCE MINISTER

In the London Times' series of sketches on representative Canadians the Hon. W. T. White, finance minister, is spoken of as a self-made man, physically, intellectually, and a good job was made of him, says the writer, who, however, admits that the boast of being self-made is not regarded in Canada as a moral or political asset. That species of vanity seems to belong peculiarly to the republic to the south. But it is recognized in Canada that great places can well be filled by men who have achieved their own fortunes. There is no intoleration or self-vaunting about Hon. Mr. White, continues the writer. He has an exceptional familiarity with social and industrial problems, and thoroughly understands the position of Canada as a borrowing country. The Dominion has no more devoted servant than the Minister of Finance.

CONDITIONS IN MOOSE JAW

September has shown improvement in all lines of trade in Moose Jaw, and business should be good this fall, for the farmers have, in that district, good crops, and weather conditions have been all that could be desired.

The real estate market is getting better, especially in the west end.

On September 15th the International Linseed Oil Company commenced the erection of the largest linseed oil mill in Canada which they expect to have in operation by December 15th, 1913.

The Canadian Pacific Railway Company are grading along the main line to build spur-track to the interior elevators, the linseed oil plant and the exhibition grounds, which are located in Britannia Park, in the west end of the city.

CANADA'S SEPTEMBER MUNICIPAL BOND SALES

Several Issues Sold to United States Firms—Five Provinces Were in Market

The municipal bond sales in Canada for September, as compiled by *The Monetary Times*, amounted to $1,663,260, compared with $661,300 for August, and $1,998,605 for the corresponding period of last year, and making a total for the year of $14,686,829.

The Ottawa issue appeared in the August total. Since then this issue was floated in London. It has been deducted therefore from the August bond sales in Canada.

Among the municipal bonds sold in the United States during September, according to *The Monetary Times'* record, were:—

Westmount, Que.	$486,000	4½	....
Sault Ste. Marie, Ont.	48,000	5	....
Hanley, Sask.	15,000	6	....
Total	$549,000		

Five provinces were in the market. The largest issues were made by Lachine and Sarnia.

The following are the particulars by provinces:—

Ontario	$ 817,892
Quebec	410,000
Saskatchewan	258,368
Alberta	172,000
Manitoba	5,000
Total	$1,663,260

The following are the monthly totals during 1910, 1911, 1912 and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	383,826

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Welland, Ont.—Up to October 20, for $60,000 5 per cent. 30-year school debentures. J. H. Burgar, treasurer.

Alsask, Sask.—Tenders will be received for $6,000 20 instalment debentures. J. L. Spicer, secretary-treasurer.

Stellarton, N.S.—Up to October 25th, for $15,000 5 per cent. school debentures and $10,000 water debentures. J. W. Henderson, town clerk.

Chauvin, Alta.—Up to October 30th, for $1,800 5 per cent. 10-year debentures. R. A. Cowan, secretary-treasurer. (Official advertisement appears on another page.)

Pembroke, Ont.—Up to October 15th, for $35,911 debentures. Offers to be addressed to W. H. Bromley. A. J. Fortier, town clerk. (Official advertisement appears on another page.)

Neepawa, Man.—Tenders are invited for $7,038.44 5 per cent. 20-year local improvement debentures. J. W. Bradley, secretary-treasurer. (Official advertisement appears on another page.)

London, Ont.—By-lays to issue $70,000 debentures for the purpose of constructing and equipping the London and Port Stanley Railway as an electric road, and $25,000 debentures for constructing and extending a permanent breakwater in London west, will be voted upon October 22.

◆

LAKE OF WOODS ANNUAL MEETING.

The profits of the year of the Lake of the Woods Milling Company, after the payment of preferred dividend, but before making provision for the $50,000 written off property valuation and a similar amount to good-will, etc., amounted to $345,677, or about 16.50 per cent., as against about 12 per cent. a year ago. The company's annual meeting was this week.

The following is a summary of the annual statement for the year ended August 31st, together with comparisons with a year ago:—

Profit for year		$549,677	Inc.	$92,665
Bond interest		99,000	Dec.	1,141
		450,677	Inc.	93,806
Preferred dividend		105,000		....
		345,677		....
Common dividend		168,000		....
		177,677	Inc.	93,806
2% bonus on common stock		42,000	Inc.	42,000
		135,677	Inc	51,806
Written off property	$50,000			
Written off trade marks	50,000			
		100,000	Dec.	9,370
Surplus for year		35,677	Inc.	61,176
Surplus for Sept. 1, 1912		817,458		
Surplus for Aug. 31, 1913		$853,135	Inc.	61,176

The bonus on the common stock was announced a few weeks ago, but as it arose out of the past year's operations, it has been provided by the company out of the proper year.

An examination of the assets and liabilities shows that the capital liability remains as a year ago. Accounts payable are $288,490, which is about $10,000 less than a year ago, while bills payable are $225,000, or $275,000 less than a year ago. The liability to the bank, however, amounts to $357,933, or about $55,000 more than a year ago, making total current liabilities about $230,000 less than a year ago.

In the assets, the cash shows a decrease of $29,000, at $13,124, while the bills and accounts receivable are about $25,000 less, at a total of about $530,000, while the value of wheat, flour, etc., is $1,050,154 or $113,000 less than a year ago. This makes a total falling off in these current assets of about $165,000, and leaves the company in a good position.

NOT FOR INVESTMENT

The Northern Consolidated Holding Company, Montreal, is offering 5,000 $100 shares at $30 a share. This company states it controls the Canadian Northern Quebec Railway. The stock of that railroad has been the dazzling bait dangled by more than one financial angler during the past few years. It was peddled throughout Western Canada not long ago, many Canadian Northern Railway station agents being induced to purchase the stock. A month or so back, it bobbed up as a stock offering by a Boston firm. Now a Montreal concern tries its luck with the stock.

When one asks a reputable bond man, stock broker or banker, what he thinks of this stock, he usually smiles significantly in reply. When the shares were offered in Western Canada, the Canadian Northern Railway proper, found it necessary to issue the following statement:—

> "The Canadian Northern Railway Company hereby gives notice that neither it nor any of its allied companies control, or are in any way interested in, or have at any time controlled, or had any interest in the Canadian Railways Bond Corporation, or the Canadian Northern Securities and Lands Corporation, or any other such company by which, whether as owner or agent, there has by circular or otherwise been offered in Canada for subscription or purchase, on instalment basis, any of the Canadian Northern Railway Company's 5 per cent. income charge convertible debenture stock, or any of the statutory or common stock of the Canadian Northern Quebec Railway Company, and that no such company acts as agent for the Canadian Northern Railway Company or any of its allied companies. This notice is given as the result of various inquiries received by the Canadian Northern Railway Company on the subject."

The Canadian Northern Quebec stock skeleton is certainly doing yeoman service to individuals and companies who apparently have little sympathy for the "small" investor.

WHY THE INVESTOR WILL HESITATE

According to the forty-fourth annual report of the Imperial Loan and Investment Company of Canada for the year ended December 31st, 1912, "during the year, all the sterling debentures of the company were paid off, and arrangements entered into with European bankers and agents for issues of first mortgage debentures, but owing to the monetary situation arising from the Balkan War, the public offer of these debentures has been deferred, but it is expected to be made at an early date."

A few weeks ago, it was stated that the company would issue debentures in London. *The Monetary Times* inquired of the company whether this was true. The reply was that "the debenture issue to which you allude is not yet in a shape that would justify us in giving any particulars."

Apparently the issue is to be made at some time or other. If the British investor is to be asked to subscribe he may be expected to hesitate when he finds that Mr. H. Pollman Evans, who was connected with the Union Life Insurance Company and other enterprises which have badly collapsed, is still a director of the Imperial Loan and Investment Company, according to the company's notehead. The record of Mr. Evans as an organizer and financier and the retention of his directorial help, by no means add prestige to the reputation of the Imperial Loan and Investment Company. This is a matter to which the company may well give attention.

FOX FARMING INVESTMENTS

The fox ranching industry in Prince Edward Island is attracting considerable attention. Not the least interesting part of the industry, so far as concerns prospective investors, particularly those who live away from the Island, are the first dividends declared this year by various companies and posted at a well-known fox exchange in Charlottetown. The dividends vary from 20 to 900 per cent. It is not often that one finds even 20 per cent. on an investment looking for a home, and many investors, therefore, are turning their eyes towards Prince Edward Island. *The Monetary Times* has printed several articles regarding the industry in which undoubtedly there are good profits. On the other hand, it is just as easy to lose money in fox farms as it is in silver mines and wireless telegraph companies.

Mr. J. E. B. McCready, the enterprising man who tells the world all about Prince Edward Island and its capital Charlottetown, says that confidence in the future of the industry rests upon the following well-established facts:—

"That the native silver fox of Prince Edward Island produces the most valuable pelt known to commerce and has broken all previous records on the London fur market.

"That the strain has been improved by careful breeding so as to ensure the reproduction of high pelt values from generation to generation.

"That the conditions of soil and climate here are unequalled elsewhere for the production of the silver fox at its best.

"That 85 per cent. of all the silver foxes in captivity are in the ranches in Prince Edward Island.

"That elaborate reports on the silver fox industry here have been made to the Canadian Commission of Conservation by J. Walter Jones, B.A.; to the Russian Government by their special commissioner, M. Vladimir Generosoff, sent to Prince Edward Island in the autumn of 1912, and by Wesley Frost, American Consul at Charlottetown, these reports having created a very wide interest throughout the world.

"That the production of all the more valuable furs has fallen off by 50 per cent. during the past twenty years with a general advance in values of 200 per cent. to 300 per cent. during the same time, and that the constantly increasing demand and the decreasing supply from the wilds can only be met by breeding fur-bearing animals in captivity.

"That, as stated by Mr. J. Walter Jones in Fur Farming in Canada, it is desirable to breed the species producing the most valuable fur rather than those whose fur does not produce such a high price. The sea otter, the silver fox, the Russian sable and the chinchilla are the precious fur-bearers of modern times. All of these except the silver fox are now off the market because of a restrictive close season established by law to enable them to recuperate in numbers. None of these except the silver fox is bred in captivity.

"That the entire production of raw furs in the world amounts to a value of $110,000,000 yearly and the manufactured furs to a yearly value of $350,000,000 and that of 1,827,000 fox skins included in the above in the year 1909 but 4,300 were skins of the silver fox. These facts demonstrate the great importance and value of the silver fox-farming industry, of which Prince Edward Island is the centre."

Over $10,000,000 are said to represent the value of the foxes and ranches in Prince Edward Island. This is about 25 per cent. in excess of the value of all the horses, cattle, sheep, swine and poultry on the well-stocked farms of the province. Prices have been advancing for years past and have never receded. Most of the young foxes born last spring had been optioned in advance of their birth at $10,000 or more per pair. As the demand considerably exceeded the supply, the price advanced to $12,000 and $14,000 up to $16,000 per pair for choice stock, and many intending purchasers were unable to obtain the foxes desired. Already options are being purchased (10 per cent. down and balance on delivery in September, 1914), on the young foxes to be born next spring. The selling value of the proved breeding foxes ranges from $20,000 to $30,000 per pair, although there are single foxes of high fur value and large litter record that could not be bought for $30,000.

These figures indicate that there is plenty of risk in the business, and for the investor too, in fox company shares. Mr. J. Walter Jones, quoted above, says: "Although there is ample basis for a sound industry in fox-farming, it is necessary that the general public should realize that the industry is becoming a highly speculative one, and that the individual who puts his money in companies loaded with a heavy burden of capitalization assumes a great risk."

The present activity in this industry centres largely upon the demand for breeders and not so much upon the fur. This should be borne in mind by those who contemplate investments in fox-farming companies. In addition there are the usual precautions to be observed respecting honest management, moderate capitalization, etc.

THE MADE-IN-BRITAIN TRAIN

At Belfast the Canadian Associated Press learns that the idea of running a "Made-in-Ireland" train through Canada to bring the Irish manufacturers before the notice of the Dominion has been abandoned in favor of an exhibition train, embracing the manufactures of every part of the United Kingdom. Such a combination of interests was suggested by *The Monetary Times* last week. The scheme has been received favorably by manufacturers' associations in Great Britain. The Canadian trade boards have already extended a hearty welcome, and addresses will shortly be delivered in British industrial districts setting forth the scheme fully.

Whatever be the tariff policy of the Dominion government and the difference of tariff opinion in various parts of the country, it is safe to assert that Canada, east and west, will do everything possible here to make the proposed British enterprise a success.

CANADIAN PACIFIC RAILWAY LANDS

The land holdings of the Canadian Pacific Railway are one of the company's most valuable assets, and one which has caused much discussion of late. The suggestion has been made, more than once, that the company should segregate its land and subsidiary holdings. Sir Thomas Shaughnessy explained some months ago that the expenses of operating the system would be increased if the Canadian Pacific Railway, as now constituted, were split into two corporations. If a new corporation were formed and the land asset and various other extraneous property transferred to it, there would be necessitated the creation of a new set of executive offices, and an increase of expenses might be in evidence as regards taxes, operating outlays and other matters.

Writing in a recent issue of the Montreal Financial Times on the subject, Mr. H. M. P. Eckardt says: "It is argued that segregation would be beneficial to the stockholders inasmuch as it would make it possible to increase their return in unostentatious manner. Instead of the Canadian Pacific Railway stock as now existing, the stockholders would perhaps have two separate securities. For instance, assuming that the dividend return remained unchanged, instead of the single 10 per cent. stock, there might be one paying 7 per cent. and one paying 3 per cent. The 3 per cent. represented by special income is derived from proceeds of land sales and deferred payments and from investments of surplus funds. If to the subsidiary company were allotted the hotels, dining and parlor car service, express business and steamships, the stock by which it was represented could pay more than 3 per cent., thus permitting a corresponding reduction in the rate of dividend pertaining to the railway stock proper.

"When the one corporation paid 4 and the other 6, the public, it is presumed, would not have so strong a desire to regulate the rates and reduce the profits as it would have in the case of a company paying 10 per cent. It is quite possible that this argument gets more attention than it deserves. It derives its strength largely from the presumption that the public will almost at once forget the fact that the stock has been split. Nowadays the public has plenty of champions who are only too glad to remind it from day to day of these operations of high finance. So, if the aggregate of dividends from the subdivisions of Canadian Pacific Railway stock were to rise to 12 per cent. or 13 per cent. per annum, this aggregate rate would be given full publicity, just the same as if there had been no subdivision. Another point in favor of segregation is that if the stock were split into two parts, each one would be much more adapted for stock market trading on a large scale, than is the case with the composite stock at present."

Sir Thomas Shaughnessy dealt with the question at the company's annual meeting last week. His remarks not only answered those who have suggested the formation of another company by the Canadian Pacific Railway, but also the strong criticism of the Frankfurter Zeitung, a leading German paper, last month as to the scanty information regarding land holdings and miscellaneous revenue of the company in its annual reports. Respecting the subsidiary company idea, he stated that the directors had been considering the desirability of conveying the lands, townsites and other interests to a company in exchange for all its capital stock, to be held in the treasury and taken into the balance sheet with the other assets. "A conveyance of that description has its disadvantages," said Sir Thomas, "particularly with reference to the lands, and it is probable that the same end may be accomplished by the creation of an investment fund to be administered by trustees or by officers of the company specially designated." In any event, the directors will endeavor, before the next annual report is published, to devise some plan for reconstructing the special income account and showing the extraneous assets in more definite and tangible form. Meanwhile, while the present policy, in dealing with the land sales, will remain unchanged and the proceeds will be conserved as heretofore, it was felt that the cash proceeds of sales in the townsites, which, last year, amounted to $1,409,747.44, might, with propriety, be taken into special income, to be dealt with as the directors, in their discretion, deemed best.

The ownership by the Canadian Pacific Railway of 6,287,250 acres of land in Manitoba, Saskatchewan and Alberta is mentioned in a footnote to the balance sheet, but it plays no part in the accounts, excepting when the lands are sold. "With established conditions in Western Canada and the experience of the last few years," said Sir Thomas, "there would appear to be no difficulty about determining, with a fair degree of accuracy, the present value of this asset. As the lands are disposed of and the country becomes more thickly populated, the market value of the remaining areas will naturally tend upwards, but, in order to be on the safe side, let us adopt a figure that is somewhat below the average of the last few years, namely, $14 per acre. On this basis the unsold lands are worth [illegible]00, but you have spent a large sum on irrigation works in the Calgary district, with the result that 500,000 acres of the irrigable land should bring an average of $25 per acre above the price mentioned, or $12,500,000 additional. The unsold Esquimalt and Nanaimo lands on Vancouver Island, and the residuary interest in other lands acquired with railway lines constituting a portion of the system, will realize at least $7,000,000. Then there are over six hundred townsites, including Vancouver, appraised by the officers of the land department at $21,300,000. The present estimated market value of these lands and townsites still belonging to the company is, therefore, $129,021,500."

The next annual report of the Canadian Pacific Railway, therefore, should prove even a more interesting one than its predecessors. Incidentally, some of those who attended the annual meeting came away asking whether the remarks of Sir Thomas Shaughnessy concerning the treatment of receipts from sales of townsites, might or might not mean that another distribution to shareholders is a possibility of the near future.

SMALL CHANGE

Every western grain movement has a meaning of its own.

* * * *

Successful candidate to-day at Chateauguay should vote for reformed spelling.

* * * *

There seems about as much low temperature in Spanish River as in White of that ilk.

* * * *

Canada had £9,766,500 from London last month—a successful tickling of John Bull's fancy.

* * * *

Hogs ate $300 of Councillor Morrison, Queensbury, Nova Scotia,—another case of tainted money.

* * * *

Radium is now $52,000,000 a pound. At that price, the average man could afford about half a sniff.

* * * *

Montreal baker said he couldn't live without love. Office boy says a little dough is necessary too.

* * * *

Less than 3,000 voted in Winnipeg to spend $13,000,000. It would be too bad to point a moral.

* * * *

Grapes are being bought by the Ontario canning factories by the ton. That is the way Canada grows fruit.

* * * *

There is quite a blank since "Canadians returning from Europe" have failed to explain the whys of tight money.

* * * *

If criticism could freeze a cabinet minister, William Jennings Bryan and Hon. Robert Rogers would be tinkling with icicles.

* * * *

Cyril Maude, English actor, used to farm at Oakville, Ont.—which proves again how few folks know a good thing when they have it.

* * * *

"La Rose broke through two dollars," says report. So long as it keeps clear of its nearly two million dollars surplus, no one will complain.

* * * *

Latest bulletin from Fire Commissioner Lindback, of Manitoba, starts this way: "Do you ever think?" Fire waste is evidently going to the head.

* * * *

Sir Thomas Shaughnessy said there would be no fireworks at the annual meeting. Canadian Pacific Railway shareholders certainly want a lot for their money.

* * * *

In the opinion of Professor J. G. Ritchert of the Stockholm Technical School, who is staying at Montreal, Canada is behind in its cold storage facilities. Professor should try a winter's day at White River, Ont.

* * * *

Controller Thomas Church, Toronto, referred to his colleagues confidentially as "a bunch of stiffs." Such diction will be of considerable help when, as mayor of Toronto, he goes to London to borrow money for the city.

LONDON MARKET IS STILL IN PICKSOME MOOD

Underwriters Take Fairly Large Shares of Recent Canadian Loans—Canada is a Prominent Borrower Just Now

(Central News cables are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement)

CANADIAN CROPS AND LONDON MARKET.

(Central News cable to *The Monetary Times.*)

London, October 9.—There has been no increase in business on the Stock Exchange this week. The investment demand has not been sufficient to absorb new issues, which is illustrated by the return to the underwriters unsubscribed of 87 per cent. of the £460,000 Vancouver City 4½ per cent. loan, offered at 95. It will be seen, therefore, that there is no surplus of funds to be used for trading in the stock market, and the feeling among speculators is not one of confidence.

The belief prevails that the marking up of the Bank of England rate to 5 per cent. on October 2 has checked plans for additional new issues of securities, although some bankers expect that the city of St. Petersburg 4½ per cent. loan of £2,300,000, which is being offered at 93½, will meet with a fair response.

Money is not tight, but discount rates are firm. Obstacles are still being placed in the way of the Bank of England obtaining the weekly arrivals of gold from South Africa. It is expected, however, that the withdrawals of the precious metal for Egypt will be lighter from now on.

Canadian Pacific shares have been the most active feature of the markets during the week, owing to Canada's good crops, which have created confidence here in the earning power of the road and the general outlook for the property.

The chairman of the Colonial Bank yesterday predicted big developments in the commerce between Canada and the West Indies, following the reductions in the cable rates between those countries and the new steamship service between the West Indies and Halifax.

There has been selling of stocks here by Paris, presumably in preparation for Balkan and other loans in the French capital. London bankers are not in favor of lending to the Balkan States, although the situation in south-eastern Europe appears to be better.

BRITISH TRADE FIGURES.

(Central News cable to *The Monetary Times.*)

London, October 7.—According to the monthly report of the British Board of Trade, issued to-day, the imports of the United Kingdom in September increased £4,180,399 and the exports decreased £780,469, as compared with the corresponding month last year.

The subjoined table shows the trade of the United Kingdom in September and since January 1 this year and last year:—

	1913.	1912.
Imports	£61,359,000	£57,178,601
Exports	42,424,000	43,204,469
Excess of imports	£18,935,000	£13,974,132
From January 1 to September 30:—		
Imports	£557,850,964	£528,996,965
Exports	390,754,745	354,282,595
Excess of imports	£167,096,219	£174,714,370

RESULT OF DOMINION LOAN.

†London, October 6.—All financial writers in papers agree that the result of the Canadian Government loan was not surprising under the circumstances. The Financial Times says underwriters are confident public will eventually relieve them, perhaps at higher figure. Fifty per cent. of the Edmonton city 5 per cent. issue was left with the underwriters.

WANT FREIGHT RATES REDUCED

*London, October 6.—The Batley Chamber of Commerce, consisting chiefly of Yorkshire woolen manufacturers, has decided to support the request of the British government to bring about a reduction in the freight rates on British manufactures to Canada. Mr. David Fon, a member of the chamber, alleged that the freights on woolen goods had increased from 15 to 30 shillings per ton, and carpets from ten shillings to 25 shillings. Canadian importers complain that the increases affected the selling price in Canada.

VANCOUVER'S ISSUE IN LONDON

*London, October 6.—The Financial News says: Business is getting lively again, thanks chiefly to the certainty of a bountiful crop, and undeterred by the results of the Canadian Government and Edmonton loans.

Brown and Shipley are advertising £461,200 Vancouver 4½ per cent. at 95. The object of the issue is to provide bridges, hospitals and roads. The Times recalls the final instalment of Vancouver's last loan, paid only eleven days ago. It is interesting to note the comparison. St. Petersburg is about to offer two million sterling four and a halves at 94. Edmonton's new issue is quoted at 1¾ discount.

The Financial Review calls investors' attention to the particularly attractive yields of these high grade loans of progressive, growing, Canadian cities.

ALBERTA FLOATS MILLION POUND LOAN

*London, October 6.—The province of Alberta's new £1,000,000 four and a halves at 95 is being widely advertised today, while at the same time the Financial Times remarks upon the healthy, vigorous state of affairs which enables the province to offer such excellent securities.

The city of Vancouver to-day advertises a loan of £416,200 4½ per cent. bonds at 95.

The British Columbia Electric Railway will also issue 4½ per cent. debentures.

St. Petersburg, Russia, wants £2,000,000. The Interborough is offering $5,000,000 here. Further borrowing for Australian states and cities is contemplated, while industrial offerings are also being arranged that will require fully £2,000,000.

VANCOUVER POWER COMPANY'S ISSUE

*London, October 7.—The new £650,000 4½ per cent. Vancouver Power debenture issue at 88, which was guaranteed unconditionally by British Columbia Electric Company has been well received here as has Calgary Brewing Company's issue of £246,000 fives, which have been listed.

The Dominion Government loan has dropped to three-quarters discount; Edmonton fives, 1¾ discount; Ottawa 4½, quarter premium. The Calgary Brewing and Malting fives are now quoted in official list.

It is learned here that new loans by Regina and Saskatoon are not to be made at present.

REGINA, SASKATOON, MONTREAL AND BURNABY LOANS.

†London, October 7.—The new Dominion Government loan dropped to ¾ discount to-day, with Edmonton fives, 1¾ discount; Ottawa 4½, quarter premium; Calgary Brewing and Malting fives are now quoted in the official list.

New issue of Vancouver Power Company 4½ guaranteed by British Columbia Electric offered to-day is favorably noticed. The Canadian Associated Press learns that there are to be new loans by the city of Regina.

Saskatoon loans are not to be made at present. The amount of Montreal's outstanding treasury bills has been exaggerated. The Daily Mail's financial editor to-day says that people in the market seem very chary underwriting the proposed 5 per cent. issue by the municipality of Burnaby adjoining Vancouver, but authorities appear to have got the matter arranged outside the Stock Exchange.

It is not surprising that the market holds aloof in view of the 4½ debentures placed by this municipality in July, 1911, which are now quoted only 77½, a fall of 22½ per cent. in a little more than two years.

**Montreal Star* cable.

†Canadian Associated Press cable.

BRITISH COLUMBIA'S LONDON BUILDING.

*London, October 8.—Sir Richard McBride sails by the Laurentic on Saturday. He says the first business in Canada to which he will attend will be the interprovincial conference at Ottawa on October 27. In view of the suggestion that British Columbia is contemplating a fresh loan, Sir Richard McBride was asked whether the chief object of his visit to England was finance. He replied:—

"No, not particularly finance. My chief concern has been our new British Columbia building in the West End, overlooking plans, etc. The fact that British Columbia is arranging a separate building close to the Canadian Pacific Railway, the Grand Trunk, the Allan Line, the Montreal Star, and other Canadian centres in the West End, must gravely militate against Earl Grey's All Canada building scheme, further east, at Aldwych."

BORROWING CONDITIONS IN LONDON.

*London, October 8.—New Zealand is now preparing to borrow £3,500,000 in 4 per cent. 10-year bonds at 98½, with option of conversion into stock, which makes the price really 97.

Considering that Canada's recent loan was 99, there is proof positive that Canada can borrow easier than any of the other Dominions. Canada's loan is now hovering about ⅞ discount.

The previous New Zealand loan was made last February at 98, of which 90 per cent. went to the underwriters. First went to half discount, but soon rallied to two premium.

Underwriters have taken 86 per cent. of Vancouver's new £416,200 four and a half.

SCRAMBLE FOR ENGLISH CAPITAL.

*London, October 9.—Lord Milner evidently had Canada very much in mind when in discussing the scramble for English capital in his presidential address at the Midland Institute, Birmingham, last night. He said:—Capital had struck for higher wages and was now getting them.

This fact is eloquently attested to by the rates of interest which municipalities and others are now forced to pay. The change doubtless has come in time, but a long while before the repetition of the former glut in capital.

The Times disputes Lord Milner's right to include United States among the borrowing nations. It says United States houses sometimes speculate in foreign securities, but rarely invest in them. In their recent United States purchases of Canadian municipals, a case in point, is cited by the Times, which adds that companies, cities, and countries which had discovered the fatal facility with which short term notes could be placed up to quite recent date, had not yet realized the dangerous character of those seductive pieces of paper.

Less than one hundred years ago only Governments or wealthy people could command large amounts of capital. Even if they were often obliged to pay dearly for it, the people did not dream of borrowing for purposes to which loans are now often applied by states and cities, but nowadays ability, and even the right to be supplied with capital, is assumed as an axiom by every townlet in Canada and a good many other countries. It is no wonder capital is getting dearer.

"The whole vast continent of South America lies open. The twentieth century may see competition there on even a greater scale than in the United States. Germany's dash into the front rank of industrial nations has been stupefying.

"Really only Britain, France and the United States have any surplus capital."

FISHERIES COMPANY SHAREHOLDERS DEMAND INQUIRY.

*London. October 9.—Certain British shareholders of British Columbia Fisheries, Limited, of which Sir George Doughty is chairman, are demanding a strenuous inquiry into the causes of the failure of £125,000 preference shares, which were offered to the public in December, 1911. At the meeting in January last, Sir George Doughty spoke of the prospects glowingly.

The Financial Times says:—"Sharp criticism is not to be wondered at, since British Columbia is badly in need of more capital to develop its resources. Every such failure adds difficulty to obtaining it, and it is hoped that this failure will not slip into oblivion in the receiver's hands, as sometimes happens."

BRITISH BUYERS, ALBERTA AND PANAMA

*London, October 9.—Alberta's new agent, Mr. Reid, is using the press to explain Alberta's special claims on business and financial matters new to London, leaving the emigration propaganda to the Canadian Government, who, says Mr. Reid, can adequately cover that field for Alberta. Mr. Reid is seeking to prepare British buyers for the increased exportation of Alberta produce via Panama and Hudson Bay. He is also seeking to give London financiers and investors a better understanding of the solid character of civic enterprises to which British loans are devoted.

STOCK EXCHANGE QUOTATIONS ASKED

*London, October 9.—Application has been made for a special settling day and quotation asked on new Dominion fours and Edmonton fives. Application has also been made to allow Lethbridge four and a halves to appear on official list.

A FEW WORDS ON THANKSGIVING DAY

"Whereas it hath pleased . . . . to vouchsafe this year unto our Dominion of Canada a bountiful harvest and other blessings; we, therefore, considering that these blessings enjoyed by our people throughout the said Dominion do call for a solemn and public acknowledgment, have thought fit, by and with the advice of our privy council of Canada, to appoint, and we do hereby appoint Monday, the twentieth day of October next, as a day of general thanksgiving to Almighty God for the bountiful harvest and other blessings with which Canada has been favored this year; and we do invite all our loving subjects throughout Canada to observe the said day as a day of general thanksgiving. Of all which our loving subjects and all others whom these presents may concern, are hereby required to take notice and to govern themselves accordingly." Which, being translated from the official government gazette, means that Thanksgiving day falls on October 20th.

THE PACKING OF FRUIT.

Canadian fruits, than which there are none better, are now regarded in the markets of the world at their true worth. Through the operations of the Inspection and Sale Act, the packing of Canadian fruit has been greatly improved and the development of the trade accelerated. From time to time since its enactment, as experience has indicated, the Act has been improved in order to more completely encourage and protect the industry. The latest amendment to the Act, which was passed during the past session of Parliament, extends inspection to imported fruit thereby placing it on an equal footing with that grown in Canada. The amendment provides that the Governor-in-Council by regulation may prescribe the kinds of imported fruit the packages containing which must be branded or marked; the brands or marks to be used thereon, as well as the methods and places where such branding shall be done. Other minor changes were effected in the Act.

For the information of those interested in the fruit trade, there has been issued by the dairy and cold storage commissioner, a pamphlet designated bulletin No. 40 of the dairy and cold storage branch containing the Inspection and Sale Act, Part 9 (the fruit marks act and fruit packages), as amended. Copies of this bulletin are available to those who apply for them to the publications branch of the Department of Agriculture at Ottawa.

OGILVIE FLOUR MILLS REPORT

One of the most commendable features of the annual report of the Ogilvie Flour Mills Company is the reduction of the goodwill in the assets to the nominal value of $1. Goodwill too frequently appears in Canadian annual reports at highly inflated values, and the step taken by the Ogilvie Company is good. The company's properties also show a surplus of $2,000,000 over book values. The balance-sheet appears in detail on another page, and reflects a satisfactory year's business and present position.

The company's new mill at Medicine Hat is completed, and as Mr. W. A. Black, the vice-president and managing director, says, it will not only provide the grain grower with a ready cash market for his wheat, but in supplying him with offal feed for his stock, will assist in that section becoming the centre of an important dairying and stock industry, so essential to the permanent success of the Canadian West

CANNOT STOP, SAYS SHAUGHNESSY

New Stock Issue Was a Help—Future Construction Expenditures Will Be Modified

"The issue of additional capital stock early in the year, while it bore rather severely on shareholders, who had to find money to meet their calls during the period of stringency that prevailed in Europe and elsewhere, was of great advantage, because it enabled the company to proceed with important works essential to the future welfare of the property, and it was a distinct boon to the country, providing as it did wages for thousands who would otherwise have been unemployed, and furnishing circulation in a large way when it was most useful," remarked Sir Thomas Shaughnessy in his address at the annual meeting of the Canadian Pacific Railway.

"The constant demand for additional railway mileage, the recurring necessity for providing second tracks, larger stations shops, yards and more cars and locomotives, to cope with the enormous traffic, involve expenditures that are almost startling but we cannot afford to stop. In ten years the annual gross income has grown from $43,000,000 to $139,000,000, and if Canada is to meet our expectations in point of population and prosperity, as beyond doubt it will, there should be a proportionate increase during the next ten years, provided that we have the roadbed, equipment and facilities to handle the traffic as against all comers.

Will be Ahead of Requirements.

"This does not mean that the expenditures for these purposes during the next few years need be anything approaching those of the past, because, when the lines now being built are completed, our construction programme may be substantially modified, and, with the exception of important improvements at one or two points in Eastern Canada, where congestion during the busy season is annoying as well as expensive, and the completion of a second track on portions of the main line, we will, by the end of this season, be well ahead of our requirements.

Represent No Capital Liability.

"This year the company's bond, debenture and share capital, including the recent issue of $60,000,000, is $283,000,000 more than it was in 1903. Of this, the amount of $124,000,000 was expended in the construction and acquisition of additional mileage and the purchase of ocean, lake and river steamers; and the additions to the car and locomotive equipment absorbed $101,000,000. The balance of $58,000,000 was used for the general improvement of the property, but this amount was supplemented by premiums on stock issues and appropriations from surplus earnings to the amount of $105,000,000, nearly all of which will have been expended by the end of the current year, so that those interested will have invested in the property in those ten or eleven years this large sum of $105,000,000 that will represent no capital liability, and will consequently make no draft upon the revenue."

NEW METHOD OF EXTRACTING CONTENTS OF WOOD-WASTE

An English company has recently commenced the commercially successful production of acetone and fusel oil from sawdust by a simple process of fermentation. From these two products isoprene can be derived, which latter can be changed into rubber, merely by allowing it to lie in contact with a small quantity of the metal sodium. This synthetical rubber vulcanizes readily and compares favorably with the natural product in resilience, durability and price.

Acetone is used in the manufacture of cordite, and fusel oil is used in the manufacture of artificial leather cloth. Previously it was chiefly obtained as a by-product in the manufacture of whiskey, brandy and vodka, but by this new process it can now be extracted much more cheaply, making possible a large profit. It is calculated that these by-products of sawdust are worth almost $400 a ton. As it takes only ten tons of sawdust to yield a ton of these valuable constituents, the resultant profit is obvious.

In Europe, with its densely populated regions contiguous to the forests, the elimination of wood-waste is an economic essentiality, and hence methods have been evolved which, in some cases, utilize even the leaves and roots of trees. While this is not essential in America at present, it is desirable to reduce the waste which takes place in the different processes of transforming the standing timber into finished product, which amounts to something like fifty per cent. of the total volume of the tree. To this end, the Canadian Government is establishing a fully equipped wood products laboratory at McGill University in charge of Mr. A. G. McIntyre, B.A., B.Sc., under whose direction experiments will be conducted to discover new uses for common Canadian trees and for the enormous quantities of sawdust and other forms of waste wood which now represent a money loss to the country of millions of dollars annually.

OIL AND GAS PROSPECTS

Report on Western Canada Conditions—Much Work to Be Done Yet

Oil and gas prospects of Canada's western provinces are treated by Mr. Wyatt Malcolm in a memoir of the Department of Mines, Ottawa. Mr. Wyatt summarizes his investigation as follows:—

The plains of western Canada are underlain by a great body of sediments, nearly horizontal in attitude, and resting on a Pre-Cambrian base. The eastern contact between the Pre-Cambrian rocks and the later formations runs in a generally northwest direction from Lake Manitoba past Athabaska, Great Slave, and Great Bear Lakes. In the eastern part of the plains a great unconformity exists between the Palæozoic systems, consisting of limestones, dolomites, and shales, and the Cretaceous system, consisting of shales and sandstones, so that we find the Dakota sandstones of the Cretaceous system resting directly upon limestones of the Devonian system. The Palæozoic strata are exposed by faulting in the Rocky Mountains, and much of the later sediments has been eroded, only traces of the lower members being left. In the west, deposition during Carboniferous, Triassic, and Jurassic times has to a great extent bridged over the unconformity seen in the east, and the geological column includes formations found in nearly all the great systems, from the Cambrian to the Recent. In western Alberta and in some parts of south Saskatchewan the Cretaceous sediments are overlain by Tertiary deposits. Overlying all is a mantle of unconsolidated Pleistocene and Recent deposits.

Little Testing Done.

Little has been done yet to test the gas and oil possibilities of the district. A few wells have been sunk, and in a number of these gas in commercial quantities has been struck. Prospecting for oil has been less successful.

Prospecting for oil has been carried on in two different areas in the Pincher Creek district, southwestern Alberta, one on the south branch of the south fork of Oldman River, and the other on Oil Creek, which flows into Waterton Lake. This has apparently resulted in no great measure of success. In northern Alberta the Dakota sandstone, where exposed along the Athabaska and its tributaries, is impregnated with a bituminous substance believed to be a petroleum product, and it is thought that liquid petroleum exists in this porous rock at some distance from the outcrop. To test the validity of this belief, wells were drilled during the nineties by the Dominion Government at Victoria, on the Saskatchewan, at Athabaska Landing, and at the mouth of Pelican River. In the first two wells the Dakota sandstone was not reached, while in the last it was reached at a depth of 750 feet, penetrated about 87 feet, and found to carry maltha or heavy tarry petroleum.

Prospecting for Gas.

Prospecting for gas has been much more encouraging. The boring at the mouth of Pelican River, although disappointing so far as oil is concerned, proved the presence of a great reservoir of gas in the Dakota sandstones, and heavy flows were struck at 820 and 837 feet. In southern Alberta, also, gas is found in paying quantities. A good field exists at Medicine Hat, and flows have been obtained at several different points west of that city. At Bow Island a flow of several million feet is obtained.

Thus, while the presence of oil in commercial quantities remains to be proved, boring operations have demonstrated beyond a doubt the existence of large reservoirs of natural gas, and it seems probable that further exploratory work throughout the wide area underlain by the Cretaceous rocks should lead to the discovery of other reservoirs.

It is believed that the Devonian limestone is the source of the gas and petroleum products of northern Alberta, while the porous Dakota sandstone forms the reservoir into which they have risen and in which they have been obtained by the overlying shales. The Dakota sandstone is the productive formation at the mouth of Pelican River, and it is also believed to be the gas-bearing formation at Bow Island, in southern Alberta. As the Devonian limestone and Dakota sandstone are of wide distribution, and probably underlie the western part of Manitoba and a great part of Saskatchewan and Alberta, the prospects for the discovery of other gas fields seem favorable. On account of the great thickness of sediments overlying these formations, the driller, however, must be prepared to go to a considerable depth.

◆

Canada will be represented with the United States in an endeavor to obtain uniform laws pertaining to road building, if the proposal meets the approval of Premier Borden, according to an announcement made at the American Road Congress at Detroit by Mr. A. W. Campbell, deputy minister of railways and canals for the Canadian Government.

MANITOBA'S LIVE STOCK INDUSTRY

Was Once Mainstay of Province's Agriculture—Demand for Domestic Animals

In the early days of the settlement of Manitoba, live stock was considered the mainstay of agriculture, for some little time was necessary to enable the settlers to discover the possibilities of soil and climate for the production of wheat. Many of the early pioneers brought with them a foundation stock, and in not a few of the best studs and herds of to-day can be traced a descent from these early importations. Needless to say, the stock imported from the older provinces throve wonderfully on the nutritious prairie grasses, which for many generations had sustained vast herds of buffalo. The pioneer delights to recall the big steers he produced when the herds fed on the short, sweet upland pastures or revelled belly-deep in vetches and wild pea-vine. An opening having been made for the export of wheat by the completion of the railroad between the prairies and the lake ports, the wealth-producing possibilities of grain-growing were quickly recognized. It happened that the open prairie was easily brought under cultivation.

Gave Place to Wheat.

No expensive equipment was required, and easy credit system prevailed, wonderful returns were obtained, and settlement rapidly increased. As a result the live stock interests were neglected, and wheat became the one thing considered worthy of attention.

Many a traveller has marvelled at the myriad beacon fires that illuminate the autumn sky from the far-reaching stubble fields, where the straw piles are burned as soon as the threshers have completed their task. This improvident waste, coupled with careless methods, encouraging the introduction and spread of weeds, is causing the pendulum to swing slowly back again. In order to improve the mechanical condition of the soil, to restore exhausted fertility, and to control noxious weeds, grasses and clovers are being introduced, farms are being fenced, and the rearing of live stock is again receiving serious attention.

The following figures, taken from government statistics, will give some idea of the growth of the live-stock industry:—

Government Statistics Give Idea.

Year.	Horses.	Cattle.	Sheep.	Pigs.
1899	102,655	220,248	33,092	66,011
1900	118,629	237,560	25,813	77,912
1901	141,080	263,168	22,960	94,680
1902	146,591	282,343	20,518	95,598
1903	161,250	310,577	22,569	105,157
1904	143,386	306,943	18,228	118,986
1905	157,724	319,290	18,508	104,113
1906	164,444	363,202	16,606	120,838
1907	173,212	463,862	14,442	118,243
1908	169,905	415,483	16,924	120,364
1909	189,132	372,520	17,922	155,541
1910	232,725	397,261	32,223	176,212
1911	251,572	407,611	37,227	192,386
1912	273,395	429,274	42.085	216,640

These figures show a general increase of late, but not such an increase as is warranted by the conditions. With an abundance of cheap land, wild hay to be had for the cutting, and the extreme ease with which all sorts of fodder and roots for cattle, sheep and hogs can be raised, the live stock industry should be a far bigger thing in Manitoba than it is. There is much money to be made by engaging in this line of agricultural enterprise, and the real necessity of better farming, combined with the demands of a market that grows faster than its supply, by far, is having an excellent effect upon the live stock situation in Manitoba.

Domestic Animals in Demand.

There is a sharp demand for every sort of domestic animal in the West. In spite of the fact that automobiles and farm tractors of all sorts are freely used throughout the West, the call for good horses is always ahead of the supply, and many horses are brought in from Eastern Canada and the United States that ought to be raised in the province where the market for them is. This is not to say that there are no horses raised in Manitoba; on the contrary, the industry is a thriving one, and produces splendid results as far as it is pursued. Chiefly, horse-raising in Manitoba tends to the production of heavy horses, and the Clydesdales, Shires, and Percherons are the breeds that find most favor, although there are a good many smaller horses raised through crossing the lighter native stock with imported stallions. The tendency is, however, to raise pure-bred stock, and of the big breeds, as these horses are not only sure to find good sale among the farmers, but are also much in demand for heavy teams in the cities. The heavy teaming business in Winnipeg is fitted out with this type of horse, and the size and beauty of the horses of Winnipeg is remarked by every observing person who sees these splendid animals.

MUCH MONEY IN FISH

New Brunswick Hooks Four and a Quarter Million Dollars From Its Fishing Grounds

With respect to the fisheries of Canada, it may be surprising to some to be told that since 1870 the first year for which figures are available, Canadian fishermen have taken from the seas, rivers and inland waters of this country, fish valued at nearly a billion dollars, the exact figures being $829,910,756.

The total value of the fisheries of Canada for the last ten years and that of the fisheries of New Brunswick for the same period is as follows:—

	Canada.	New Brunswick.
1903	$23,101,878	$4,186,800
1904	23,516,439	4,671,084
1905	29,479,562	4,847,090
1906	26,279,485	4,905,225
1907	25,499,349	5,300,564
1908	25,451,085	4,754,298
1909	29,629,169	4,676,315
1910	29,965,433	4,134,144
1911	34,667,872	4,886,157
1912	32,973,139	4,264,054

Employs Fifteen Thousand Men.

In New Brunswick, during the year 1912, there were 14,944 fishermen operating on board a fleet of 363 vessels and 8,923 boats. Of the boats no less than 1,087 were fitted with gasoline engines, thus enabling the fishermen to obviate the delays caused by calms and head winds in their voyages to and from the fishing grounds.

The quantities and values of the chief kinds of fish taken in New Brunswick during the year, were as follows:—

	Quantity.	Value.
Smelts, cwts.	80,288	$802,880
Sardines, cwts.	280,282	688,220
Lobsters, cwts.	84,178	672,167
Herring, cwts.	754,682	623,175
Cod, cwts.	243,936	415,897
Salmon, cwts.	13,877	238,117
Haddock, cwts.	22,647	50,762
Hake, cwts.	107,804	104,157
Pollock, cwts.	48,184	53,247
Mackerel, cwts.	6,144	60,775
Shad, cwts.	4,019	34,005
Alewives, cwts.	78,665	117,434
Clams, barrels	59,591	193,425
Oysters, barrels	9,239	55,434

In addition to the foregoing considerable quantities of halibut, sturgeon, trout, pickerel, bass, eels and tom cod were landed.

Licenses add to Revenue.

New Brunswick has, by far, the finest salmon fishery in eastern Canada, intimates Mr. J. J. Cowie, in a recent report. Its many fine salmon rivers annually draw many sportsmen to the province who find fish in abundance. The value of the fishing huts and cottages, used in this connection throughout the province, was, in the year 1912, placed at $61,150.

In addition to the extensive hook and line fishery on the various rivers, there is carried on, during the open season, on all the coasts of the province a considerable net fishery.

For their regulation and conservation, certain inshore fisheries and some river and inland fisheries are conducted under license from the department; although a nominal fee only is charged, the revenue derived therefrom amounts to a considerable sum annually. For instance, during 1912, there were issued to fishermen in New Brunswick:—

	Revenue.
622 herring weir licenses	$3,054.00
174 lobster licenses	1,251.00
481 quahaug licenses	481.00
545 oyster licenses	272.50
3,037 smelt licenses	5,771.14
629 salmon licenses	2,509.44
288 bass licenses	288.00
4 sturgeon licenses	60.00

Only Sardine Fishery in Dominion.

The province of New Brunswick has this distinction: it possesses the only sardine fishery in Canada. The fishing is carried on in the waters of Passamaquody Bay and the waters around the Islands of Grand Manan and Campobello, and the West Isles, in the Bay of Fundy. Of such importance is this fishery, and in such masses do the fish appear that the fishermen who prosecute their calling amongst those islands depend largely upon it for their livelihood.

The canners of Eastport and Lubec are the chief buyers of the fresh product, but six canneries in New Brunswick, including one of very large capacity, at Chamcook, annually handle an increasing quantity of the sardine catch.

SCIENTIFIC TARIFF BUILT STEEL TRADE

In United States, and Same Methods Should be Adopted in Dominion, Says Steel Corporation Director

Monetary Times Office,
Montreal, October 8th, 1913.

Mr. James R. Wilson, a director of the Dominion Steel Corporation, when interviewed concerning the probable effect the lowering of the tariff on iron and steel in the United States would have on the Canadian iron and steel industry, had the following to say:—

"The Canadian steel companies, in my opinion, cannot but be adversely affected by the new American tariff on steel products. The change comes at a time when prices for steel in foreign countries, as well as in the United States and Canada, are beginning to weaken, and already a number of the leading producers in the United States have made several reductions at recent dates in the price of plates, shapes and bars and other steel products. These reductions will require to be met, to some extent, by the steel companies in Canada. The United States Steel Corporation is the largest concern of its kind in the world, doing a business of over $700,000,000 annually, employing 225,000 men, and showing net earnings of over $140,000,000 per annum, and this company, and its allied concerns, can doubtless make steel cheaper than it can be made in any other part of the world, the result being that the Steel Corporation not only fixes the price of steel in the United States, but also makes the price of steel products for the world's market.

Success Due to Scientific Tariff.

"Bituminous coal is put on the free list, but, until I see a copy of the new tariff, I am unable to say whether it is made free unconditionally or whether the tariff is removed only for countries which admit American coal free. If bituminous coal is made free unconditionally, it will be a good thing for the Canadian coal companies. The Dominion Coal Company produces about 5,000,000 tons of coal per annum, and ships up the St. Lawrence during the open season of navigation about 1,500,000 tons. A large quantity of coal mined during the winter months, after navigation closes, requires to be banked, and if the New England market is thrown open, it will doubtless create a winter customer for a good deal of this coal. The Dominion Coal Company, is, of course, in a very favorable position for shipping coal to New England ports. Most of the American coal fields are situated several hundred miles in the interior.

"The success which has marked steel production and manufactures in the United States is undoubtedly due to its high protective, scientific tariff.

"As late as 1879 the United States was importing pig-iron from Great Britain. Now it is by far the largest manufacturer in the world, and the development has been such that it is at the present time the cheapest world's producer.

Should be Adopted in Canada.

"The same policy which has built up the steel industries in the United States should now be adopted in Canada, where many inconsistencies at present exist, such as exemptions of some manufactures from duty on imported finished material. It is, of course, well known and recognized that what is one manufacturer's raw material is another manufacturer's finished material, and there should be no exceptions in any way to the tariff. It seems preposterous to think that a large concern like the Dominion Steel Corporation should have no protection whatever on some of its finished material, such as wire rods, for which it has a manufacturing capacity of 100,000 tons per annum, sufficient to look after the entire requirements of this market. If the steel industries are to prosper in Canada, the government must wake up and give them adequate protection on all their manufactures."

◆

HUDSON BAY REINSURES EASTERN RISKS.

The Hudson Bay Insurance Company, with head office in Vancouver, has made arrangements by which the Northwestern National Insurance Company of Milwaukee, will reinsure all its non-tariff business in eastern Canada. The company will conduct its business west of Port Arthur as hitherto. The Hudson Bay may write tariff business in the east if it so desires. The arrangements for the agreement were made by Mr. Renwick, branch manager at Toronto, of the Northwestern National. Mr. Renwick and Mr. Massie represent the Milwaukee company in eastern Canada.

Mr. C. E. Berg, managing director of the Hudson Bay Insurance Company, has been in Toronto during the progress of the negotiations.

FINANCING MONTREAL TRAMWAYS COMPANY

Growth Demands Many New Cars and Large Expenditures

Monetary Times Office,
Montreal, October 9th.

The activity on the Montreal Stock Exchange in trading in the securities of the Montreal Tramways and Power Company, together with the strength in the securities of both that company and its subsidiary, the Montreal Tramways Company, has been the occasion of much gossip in local financial circles. Little is known of the workings of this company by the street, as a whole, although everyone is interested in what goes on in it. During the period of active trading, many explanations were heard.

At the moment a rumor is heard that the Tramways Company intends making an issue of stock before long at a price which will carry valuable rights to shareholders

It is quite impossible to verify any of the rumors mentioned. There are reasons both in favor of and against the issue of stock mentioned.

Calls and Prospective Financing.

At present shareholders of the company are paying for new stock which was put out at par last April, in the ratio of two new shares in each five old shares only two calls have been made upon it. The terms of payment were "as called," but not in excess of 10 per cent. per month. The calls have not even been made as rapidly as they could have been made. This makes it look as though no further issues would be made in the near future.

The general manager of the company stated new cars would be added to the system, and that by May next, not less than 225 new cars would be in operation. These cars would cost $8,000 each, making a total cost of $2,000,000 for new cars alone. In addition, the general manager stated that it was the intention of the company to make even larger expenditures during the coming year than had been made during the past year. As the expenditures of the past year are said to have reached $3,000,000, the conclusion is that the company is now committed to an expenditure of $5,000,000. This being the case, it is only reasonable to suppose that new financing of some nature will be necessary.

May Obtain Concessions from the City.

Already the company has obtained considerable United States money by way of bond issues through N. W. Harris and Company, and it is likely that all this is not as yet exhausted. The street is much interested and will watch the outcome closely. Inasmuch as the Tram-Power Company holds by far the greater portion of the Tramways stock, it would be the chief gainer from the rights accruing from a new stock issue at a favorable price.

It is generally thought, also, that the company will shortly succeed in obtaining something in the nature of further concessions from the city.

◆

SEPTEMBER COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore during September:—

Cobalt Comet	86,080
Bailey Cobalt	40,000
Penn Canadian	55.860
Peterson Lake	59.280
Crown Reserve	49,800
Dominion Reduction Company	91,300
Coniagas	411.365
Tretheway	95,430
Cobalt Townsite	262,720
O'Brien	148.288
Cobalt Lake	255.370
Hudson Bay	249.240
McKinley Darragh Savage	585,150
La Rose	342,168
Nipissing	257.950
Beaver Consolidated	63,640
Temiskaming	163,540
Total	3,217,181
Elk Lake.	
Miller Lake and O'Brien	51,100
Iroquois Falls.	
Alexo Mines (Mond Nickel Company)	1,055,000

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Havana Electric Company.—Havana Electric Railway, Light & Power earnings (railway department), for the week ending September 28, shows an increase of $2,465; from January 1st, increase, $203,053.

Pear Lake Mine Company.—"The Pear Lake gold mine will not install a mill till next year," stated Mr. Morgan Cartwright. "The mill," said he, "will not be a stamp mill, but a ball pebble mill capable of treating 250 tons a day. The extraction will be by cyaniding and will shortly run to 97 per cent."

Trethewey Mines.—Trethewey shareholders have passed the by-laws submitted for their consideration, the principal one providing that the company may pay dividends and bonuses as the directors may determine, notwithstanding that the value of the net assets of the company may be thereby reduced to less than the par value of the issued capital stock of the company.

Dryden Timber and Power Company.—The Union Trust Company is plaintiff in an action entered at Toronto against the Dryden Timber and Power Company, of Dryden, Ont., to recover $1,000,000 alleged due under a mortgage. The plaintiff sues a trustee of the bondholders.

An order has been made appointing Mr. D. A. Mather receiver of the Dryden Timber Company, and allowing him to borrow $200,000 to carry on the company's operations, the sums borrowed to be subject to the approval of the official referee, G. Kappele, K.C.

Canadian Furniture Manufacturers, Limited.—At the annual meeting of the Canadian Furniture Manufacturers, Limited, a statement was submitted showing that during the past four years the company has made good progress, as the following comparison of earnings will indicate:—

Year ended June 30, 1910	$ 70,145.47
Year ended June 30, 1911	105,919.81
Year ended June 30, 1912	165,983.28
Year ended June 30, 1913	171,064.00

Canadian Northern Express Company.—The report of the Canadian Northern Express Company to the United States interstate commerce commission for the month of July showed the following:—

	1912.	1913.
Receipts	$78,926	$86,256
Express	30,826	33,545
Operating revenue	48,099	52,711
Operating expense	27,292	33,422
Net operating revenue	29,807	19,289
Taxes	403	464
Operating income	20,404	18,824
Mile steam roads	5,736	5,740
Mile other lines	22	22

Dome Mines Company, Limited.—The results obtained by the Dome Mines Company, Limited, for the period April 1st to August 31st, 1913, are as follows:—

	Tons milled.	Value gold produced.
April	9,863	$129,333.28
May	10,852	148,499.19
June	11,300	98,215.83
July	11,150	75,958.29
August	10,720	67,660.11
Totals	53,885	$519,666.70

The operating cost for the first five months of this year, as compared with the figures of the last fiscal year, shows a reduction of $1.09 per ton, whereas for the month of August the costs show a reduction of $1.55. There are at present 40 stamps working, and another 40 stamps are now in process of installation.

Porto Rico Railways Company.—The Porto Rico Railway Company's statement for August shows an increase in net earnings, amounting to nearly $10,000.

The following is the comparative statement:

	Aug., 1912.	Aug., 1913.	Inc.	P.C.
Gross	$ 61,433	$ 66,088	$ 4,654	7.57
Net	15,520	25,309	9,788	63.07
For eight months:—				
	1912.	1913.	Inc.	P.C.
Gross	$551.530	$571.033	$19,503	3.54
Net	194,342	250.280	55.938	28.78

Cedar Rapids Manufacturing and Power Company.—The Cedar Rapids Manufacturing and Power Company has issued a report covering the work done to recent date.

A synopsis of the work done to August 23rd shows the following percentage accomplished:—

	Per cent.
Rock excavation, other than stripping and trench work	19.85
Rock excavation in trenches and ditches and stripping seats of banks	59.00
Earth excavation other than stripping and trench work	43.25
Earth excavation in trenches and ditches and stripping seats of banks	36.20
Transporting and placing excavated rock in entrance works dam	.98
Transporting and placing excavated rock as stone protection	1.54
Transporting and dumping excavated rock other than as per two preceding items	54.40
Transporting and placing excavated rock in entrance works dam	.540
Transporting and placing other earth	71.40
For plain concrete in power house sub-structure	15.70

Canadian Express Company.—The Canadian Express Company reports to the United States interstate commerce commission for June and twelve months compared as follows:—

	1913.	1912.	Changes.
Total receipts from operations	$ 277,577	$ 257,774	+ $ 19,802
Express privileges	122,755	127,096	— 4,341
Total operating revs.	154,822	130,678	+ 24,143
Total operating expenses	146,810	132,529	+ 14,281
Net operating revenues	8,011	*1,850	+ 9,862
Taxes	1,830	9,784	— 7,953
Operating income	6,180	*11,635	+ 17,815
Twelve months:			
Total receipts from operations	$3,340,047	$2,974,600	+ $365,446

FOX RANCHING IN PRINCE EDWARD ISLAND

History of an Important Industry—Ten Million Dollars Invested

By J. E. B. McCready, Charlottetown.

A single pelt of a silver fox from a ranch in Prince Edward Island, Canada, was sold by C. Lampson & Company, of London, in April, 1910, for £540 ($2,700). Other pelts from the same ranch were sold to the same purchasers at the same date for £530 and £500 each, respectively. Twenty-seven skins, including the above, brought £7,601 ($38,005), an average price of £281 14s. ¾d. ($1,400).

Since 1910 practically no pelts have been sold from the Prince Edward Island ranches, excepting of foxes that died from accident or disease, or such as had grown too old to breed. The reason for this is obvious. The profits from fox-breeding had proved to be so exceptionally large that many desired to enter the business, and the demand for breeding foxes absorbed all that were produced. Breeding foxes were sold in 1910 for something more than their pelt value, say, £600 to £800 per pair, and a number of new ranches were established.

The profits were in many cases large, and in some cases exceptionally so. One well-known and reliable citizen of Charlottetown told me that his first venture was to join with three others in the purchase of a pair of foxes, each putting in $1,000 (say, £200). One year later he took out profits of $17,000 (£3,400), including his original investment of $1,000. A lady of my acquaintance invested $500 in fox shares in the autumn of 1911 and one year later drew profits of $11,000. Many cases of equally large profits might be related, due to fortunate circumstances and rapidly advancing prices.

Effect on the Farmers.

The effect of such rapid money-making in a small community, composed mostly of farmers, can be more easily imagined than described. Where the fortunate ones were doing so well others became desirous to share in the profits, and scores of partnerships were formed, each of which bought a pair or two pairs of foxes and built a ranch in which to keep them. The success attending these ventures was unequal, owing to the want of knowledge and experience in the caretakers, but in the main there were handsome profits.

Down to 1912 the business of fox-breeding was conducted as a private enterprise by individuals or partnerships. In that year the first fox companies were incorporated by special acts of the Provincial Legislature. There were ten of these companies, whose authorized capital was from $20,000 to $60,000 each, making $335,000 in all. After the session many more companies secured incorporation under the Joint Stock Companies Act by Letters Patent. At the session in March and April, 1913, there were 33 fox companies incorporated by act of the Legislature, and since that date many more companies have been incorporated under Letters Patent. But many fox ranching concerns, including some of the largest, are still not incorporated.

Down to the present year there were no statistics available of the fox-breeding industry, and many guesses as to the number of ranches and foxes therein were quite wide of the mark. But at the last session of the Legislature provision was made for imposing a tax of 1 per cent. upon the value of the young foxes born from year to year, such tax to be in lieu of the tax on income derived from this source. Under the provisions of this act an enumeration was made in August last of all the fox ranches and the foxes in captivity in the Island, together with a sworn valuation of the young foxes reared this year.

Over Two Hundred Ranches.

As a result of this census it was found that there are 233 fox ranches, of which 101 are owned by incorporated companies and 122 by individuals or partnerships. In these ranches 2,480 foxes of all grades are in captivity, of which 1,325 are classed as silver-black, 443 patch, 32 cross, and 99 unclassed foxes. The sworn valuation of the young foxes this year was slightly over $3,700,000, from which the Provincial Government derives a revenue of $37,000.

The value of the young foxes of this year as found by the official enumeration was considerably under the actual value at present selling prices, but was still sufficient to pay 60 per cent. on the capital invested in the business in January last (estimated at $6,000,000), less the cost of ranching, which would be about 10 per cent. The companies and non-incorporated ranches will pay to their shareholders, mainly in September and October, dividends averaging 50 per cent., but with a wide range from nothing up to 500 per cent. and over. Yet the year was in several respects an unfavorable one, owing to the number of pairs which failed to produce young, ad the number of litters lost at, or shortly after birth. This resulted in large part from the great number of new ranches, for which skilled and experienced caretakers could not be had. A well-known breeder assures me that 90 per cent. of his young pairs have litters at one year old, and that his entire ranch of old and young breeders this year averaged 4½ young per pair. This is, of course, remarkable, as the average production throughout the Island this year was a fraction under two young per pair. Litters of seven, and even of eight, were produced in some cases, and these found ready sale at current prices of $6,000 each, or $12,000 per pair, or better. This year's young of a single vixen were sold for $48,000.

Over Ten Millions Invested.

At present the value of the foxes and the ranches in the Island is over $10,000,000, being about 25 per cent. in excess of the value of all the horses, cattle, sheep, swine and poultry on the well-stocked farms of the Province. Prices have been advancing for years past and have never receded. Most of the young foxes born last spring had been optioned in advance of their birth at $10,000 or more per pair. As the demand considerably exceeded the supply, the price advanced to $12,000 and $14,000 up to $16,000 per pair for choice stock, and many intending purchasers were unable to obtain the foxes desired.

Already options are being purchased (10 per cent. down and balance on delivery in September, 1914), on the young foxes to be born next spring. The selling value of the proved breeding foxes ranges from $20,000 to $30,000 per pair, although there are single foxes of high fur value and large litter record that could not be bought for $30,000.

Three years ago there was not a single resident of the Island whose entire possessions reached $500,000; now several fox-breeders are in that class, while one or more has passed the million mark. Others have incomes of $10,000 to $20,000 each from their fox investments, while thousands of shareholders are receiving 25 per cent. to 200 per cent. yearly on investments of $100 to $1,000 each.

Most of the fox ranches cluster about three principal centres along the line of railway at Alberton, Summerside, and Charlottetown, these towns being about 50 miles distant from each other. The usual location is in a grove affording natural conditions for the animals. The meshed wire enclosure surrounding an area from one to five acres, is supported by posts 12 feet high, with the wire overhanging inwards at the top to prevent the foxes climbing over, and also turned in at the bottom to prevent them burrowing out and so escaping. Within the ranch are the pens, each fox having a separate pen enclose with mesh wire, and within is a kennel, or enclosed sleeping place.

How the Future Looks.

The pairs are mated usually in January, and later are separated for the remainder of the year The period of gestation is 51 days. The larger ranches are in some cases furnished with electric appliances for lighting and giving alarms in cases of attempted burglary. Most of the large ranches retain a veterinary, as well as a day and night watchman to look after the foxes. The animals are fed chiefly on meat, but with other food as well, such as biscuit, milk, etc. The actual cost of food per fox does not exceed $10 to $15 yearly.

As to the future, the principal breeders are confident that the sale of live foxes for breeding purposes will go on for years to come. Eventually, the basis must be the selling value of pelts, which for the best ranch stock would average $1,000 each. Assuming that each pair produces a pair of young yearly, and usually this average is much exceeded, that would give $2,000 yearly, which would still be 20 per cent. interest on a price of $10,000 for the breeding pair. So the future looks roseate to the fox-breeders for an indefinite number of years.

ALBERTA GOVERNMENT MAY ASSIST HOG RAISERS

(Special Correspondence).

Calgary, October 8th.

Cooler and more seasonable weather for the week-end brought a change in the distribution of many kinds of commodities. For the first time this season there was a demand for heavy dry goods, boots and shoes, etc. In the country the work is well advanced, and so well has the equipment of field and transport met the situation that it is only now after practically a month's threshing, that any great accumulation of grain is reported. Already the shipments exceed by five times the quantity moved at the same date last year. The outlook is that everything will work out nicely.

The United Farmers of Alberta in Calgary, will probably be the first to avail itself of the passing of the stockyards by-law. The $350,000 authorized under that enactment provides $300,000 for the purchase of land to be sold at cost to meat-packers and allied concerns. The United Farmers propose to erect a plant to handle 50,000 hogs per annum, and though the details are not available, it is said that some co-operative scheme will be evolved whereby the provincial government may assist the farmers in marketing their offerings of hogs, which are much greater than heretofore.

WHO GOT THE FIVE DOLLARS?

Apple Story, Now a Classic, Gets Further Airing Before Select Committee

An Ontario man sold a barrel of apples for 75 cents which sold in Winnipeg for $5.75. That was the story told in 1912, and then arose the question, "Who got the five dollars?" This incident has been related at home and abroad, and in his recent address on "The Role of the Middleman," Mr. R. H. Coats, of the Department of Labor, says it has now become a classic. Chairman Sexsmith, of the select standing committee on agriculture and colonization, has evidently worried about that five dollars, and at one of the sessions he said: "There is one point upon which I would like information. It has been reported that farmers sell their apples on the tree for 75 cents a barrel, and the consumer in the West pays $5 and $5.50 a barrel for them. Have you any information about that?"

Mr. J. A. Ruddick, dairy and cold storage commissioner, who was giving evidence, replied: "I rather expected that that would come up," and continued, "In the first place, I would say that I do not think many farmers were obliged to sell their apples for 75 cents a barrel on the tree. My chief inspector in the Lake Ontario District, who is a well-informed apple-man, was asked to give an idea as to what would be a fair price for the farmers of that District last season, and he says a dollar a barrel for independent growers and about $1.75 for the co-operative growers." Then the following dialogue ensued:—

Mr. Armstrong (Lambton)—Have you made any inquiry about Western Ontario?

Mr. Ruddick—It varies, but in some places they have been paid $1.75 a barrel.

Mr. Bowman—In my county we got 50 cents per barrel on the trees.

Mr. Ruddick—I think you will find in Norfolk County that the grower got as much as $1.75.

Thousands of Barrels Wasted.

Mr. Walker—Thousands of barrels went to waste last fall in my county, which is in the Lake Ontario District.

Mr. Webster—What did Mr. Armstrong say he bought barrels for in his county last summer?

Mr. Armstrong (East Lambton)—Forty cents.

Mr. Best—In the County of Dufferin apples were sold as high as $1.50 a barrel, while others rotted in the orchards. Where there was an orchard with Northern apples they were sold at from $1 to $1.50, according to the quality. Where a whole orchard was sold out, not more than 75 cents per barrel might be realized.

Mr. Armstrong (East Lambton)—I am satisfied that Mr. Ruddick is not at all in touch with what has been going on if he believes that the farmers have been receiving such an amount of money. We are encouraging the farmers to go on developing the fruit industry and to spend a lot of money in having their orchards pruned and taken care of, and we apparently have got to where we do not seem able to handle our apples and get them to the fruit markets. This is the case every year when we have a large quantity of apples. I would like to ask Mr. Ruddick also what he is doing in the direction of developing the small fruit industry.

Rotted on the Ground.

Mr. Thornton—Just before Mr. Ruddick speaks—in my part of the country there were thousands and thousands of barrels sold on the tree for $1 a barrel; and there were thousands that could not find a market at all which rotted on the ground. The market was flooded with apples early in the season. More apples were offering than the markets could handle.

Mr. Ruddick—I do not think I got quite through with my explanation before I was taken up on that point. I know that apples have been sold for $1.75 on the tree; I know, also, that there were lots of other apples which could not be sold at 50 cents, but I was not intending to elucidate that point further. What I want to explain, Mr. Chairman, is the difference between the selling price and the price to the consumer. If you will allow, for the sake of calculation, that the farmer receives $1 a barrel on the tree and the package costs 45 cents; then add the cost of picking and packing, which some of the fruit-growers—Mr. Elmer Lick, for instance—say can be done for 17 cents; then add the management expenses or the commission to a local buyer, whichever you like, about 19 cents, you have a total of 81 cents of cost in putting these apples on the cars in addition to the price paid the farmer. The freight from Ontario points to Winnipeg will average about 80 cents a barrel in ordinary cars; in refrigerator cars it will cost more.

An Hon. Member—That is in carloads?

What the Broker Gets.

Mr. Ruddick—Yes. The broker's commission I put at five per cent, 12 cents, and they get ten per cent in some places. Then these brokers sell to a retailer, and I suppose it is only fair to say that the retailer should have fifty cents a barrel. This estimate does not take any account of losses or anything of that kind. The cost to the consumer in Winnipeg on that basis would be $3.23.

By Mr. Thornton:

Q. That is the actual cost laid down at Winnipeg

A. Yes. But you tell me these figures are too low, and that it will cost more than I have stated to pack a barrel of apples.

By the Chairman:

Q. How much do you allow for transportation?

A. Eighty cents a barrel.

By Mr. Webster:

Q. Do I understand your figures to include the cost of picking and packing?

A. Yes, that includes the cost of picking and packing.

Mr. Webster—I could not do it for that price.

What It Costs to Pack.

Q. Do you mean to say the cost of packing is only 17 cents a barrel?

A. I am giving you the figures that Mr. Lick gave me. He and his co-workers say that is their actual cost; that is, what it costs them with their own men.

Q. Do you really think a man can pick and pack apples, even on the co-operative plan, for 17 cents a barrel?

A. I am not offering any opinion on the point; I am only quoting the figures given by a man who knows what he is talking about.

Mr. Marshall—How many barrels can a packer pack in a day?

Mr. Webster—I could not do it for that price.
possibly, but he has got to work all the time.

Estimates Are Low.

Mr. Ruddick—I am quite willing to admit that these estimates are low, but even supposing the consumer pays the profit of only one middleman, and the cost to him at Winnipeg would be $3.23 a barrel, the point I would like to make is this: the people in the prairie provinces, bearing in mind the long transportation and other things which add to the cost, cannot buy cheap apples; the fruit is going to cost them a good deal of money. If the Western consumers got the apples for nothing at the place of production the fruit would cost them a good deal by the time it arrived at the point of consumption. Suppose the farmers get, as some of the co-operative societies have obtained, $1.75 for their apples on the tree, and the barrel costs forty or forty-five cents, and they are shipped in iced cars, costing about one dollar a barrel for freight, because there is a minimum charge of $150 to $160 for the car—

By Mr. Bowman:

Q. The $1.75 you speak of would be for the very best grade?

A. Yes, the very best grade. Then the cost to the consumer on the same basis would be $4.28. There are apples being sold in Winnipeg to-day for $4 a barrel.

Still, that five dollar problem seems to remain unsolved.

NOKOMIS AND WATROUS ARE BUSY

Crops in the Nokomis district, Saskatchewan, are excellent. The highest average yield reported to date has been 48½ bushels of Marquis wheat per acre, on Erik Johnston's 80 acres. Other yields of wheat have been from 35 to 40 bushels per acre. Messrs. Lopthien Brothers threshed 1,500 bushels of oats from less than 14 acres. All the wheat cars shipped on which returns have been obtained have graded No. 1 Northern; the highest price obtained being 74½ cents per bushel net Nokomis.

Nokomis is served by the main line of the Grand Trunk Pacific and the Pheasant Hills branch of the Canadian Pacific Railway. There has never been any shortage of cars for shipping grain, farmers seldom having to wait more than two days for a car.

The Canadian Pacific Railway will survey from Theodore on the Yorkton line to Nokomis. The Canadian Northern Railway will also survey from Yorkton through Nokomis to join the Goose Lake line at Zealandia. Nokomis laid nearly three miles of cement walks and built a $7,000 rink in 1912, and intended installing electric lighting system during this year, but this was delayed on account of money stringency.

Watrous, Sask., is a railroad town and is in the midst of a fine farming community, Manitou Lake is also here and many people visited this district during the summer season. A splendid sanitarium is built at this lake.

Watrous has two active industries, they are: Farmer's Machine Company, and the T. N. B. Machine Company. Both of these manufacture the kind of farm implements used in the west. Both company's are reported to be doing a satisfactory business.

The crops in the Watrous District are of a satisfactory character, and are stated to be the best for years. The outlook of Watrous is bright.

PERSONAL NOTES

Mr. J. H. Plummer, president of the Dominion Steel Corporation, is on a visit to England.

Mr. Fraser, of the Dominion Securities Corporation, Toronto, has returned from a trip to England.

Mr. McLeod, of Messrs. Brent, Noxon and Company, bond brokers, Toronto, has left on a business trip to England.

Mr. F. W. Barlow, who sold his seat on the Montreal Stock Exchange, has been elected an honorary member of the exchange.

Mr. C. Dale, of Messrs. W. C. Langley and Company, a prominent New York bond house, who are interested in Canadian municipal bonds, has been on a visit to western Canada.

Mr. E. M. Saunders, treasurer of the Canada Life Assurance Company, has been on a tour through Alberta. Accompanying Mr. Saunders were Messrs. R. Young, manager of the Winnipeg branch, Toole, manager of the Alberta branches, and H. S. Jones of Calgary.

Mr. C. R. Burt, who has joined the staff of Russell Motors, as factory manager, was until recently general superintendent of the Barber-Coleman Company at Rockville, Ill., manufacturers of textile machinery, automobile machinery and parts. He is a member of the American Society of Mechanical Engineers and has held important positions in manufacturing concerns in the United States. He was for nine years with Messrs. Browne and Sharpe, tool manufacturers of Providence, R.I. Mr. Burt has entered upon his duties at West Toronto.

LAKE OF THE WOODS HAD GOOD YEAR.

Details of the annual statement of the Lake of the Woods Milling Company, appeared in *The Monetary Times* last week. The company's official statement is printed elsewhere in this issue.

The company's profits since 1907, before providing for fixed charges, and the final surplus after payment of interest and dividends, have been as follows:—

	Profits.	Surplus for year.
1907-08	$401,869	$116,869
1908-09	723,380	391,880
1909-10	475,226	23,726
1910-11	412,154	34,154
1911-12	457,012	83,870
1912-13	549,677	177,677

The following table compares assets and liabilities for the past two years:—

Liabilities.

	1913.	1912.
Common stock	$2,100,000	$2,100,000
Preferred stock	1,500,000	1,500,000
Bonds	900,000	900,000
Accrued interest	13,500	13,500
Bills payable	225,000	500,000
Accounts payable	288,490	298,115
Bonus	42,000	....
Surplus	853,134	817,457
	$5,922,125	$6,129,073

Assets.

	1913.	1912.
Realty, etc.	$3,069,497	$3,114,833
Stocks	250,000	200,000
Advances	189,461	189,461
Goodwill, etc.	750,000	800,000
Equipment	69,096	62,630
Wheat, etc.	1,050,154	1,163,402
Accounts receivable	529,995	553,874
Bills receivable	795	2,350
Cash	13,124	42,521
	$5,922,125	$6,129,073

◆

FIRE RATES LOWER IN VICTORIA

A reduction in Victoria's insurance rates on dwellings, effective on November 1, with the probability of an early announcement of a reduction on mercantile establishments in Victoria, is the outcome of a series of meetings which the members of the board of the Vancouver Island Fire Underwriters' Association held recently. The reduction in rates on dwellings was decided on, and notification to that effect sent to representatives of the various insurance companies doing business in Victoria. The consideration of mercantile risks is now under way.

ALGOMA STEEL CORPORATION

According to the annual report of the Algoma Steel Corporation, Limited, for the year ended June 30th, 1913, the company had a busy year. The value of this fact was enhanced by the record of net earnings from operations of $1,748,220. Adding dividends and interest on investments, the total net earnings were $1,900,305. The interest charges to be deducted were:—On purchase money mortgage 5 per cent. bonds, $290,000; on first and refunding mortgage 5 per cent. bonds, $679,631.40; on debentures of city of Sault Ste. Marie, $10,148.22; and on bank and other advances, $211,527.65, a total of $1,191,307.27. To those not intimate with the company's affairs, bank interest looks rather heavy. Still a substantial balance of $398,522 was carried to surplus account. The remainder of the sum of $808,522 for distribution, namely, $410,000, being absorbed by the dividend on preferred stock paid to the Lake Superior Corporation. The Algoma Steel Company's assets and liabilities are detailed in its announcement on another page.

The following table compares the company's output during recent years in certain lines:—

	1911-12, tons.	1912-13, tons.
Pig-iron	258,979	326,073
Steel rails	241,729	289,343
Merchant mill material	39,466	26,295

The production of pig-iron and steel rails is the largest yet attained. The company has orders on hand for some time ahead, but with the increased capacity of its plant, it is thought that all business offered during the coming year will be cared for.

The directors are alive to the question of still further strengthening the resources of the corporation, so far as its raw materials are concerned, and during the year acquired a large Pocahontas coal property which is now being operated through the Lake Superior Coal Company, a subsidiary company of the Algoma Steel Corporation. The company's past year was generally a satisfactory one.

◆

LAKE SUPERIOR CORPORATION

The following of a cautious policy, but a development of plant, to keep pace with Canada's growth, was the keynote of the unusually interesting address of Mr. J. Frater Taylor, vice-president of the Lake Superior Corporation at its annual meeting. The address is printed in full elsewhere in this issue, and will repay perusal. Mr. Taylor dealt at length with the tariff question in its relation to the steel industry, and hoped that certain shortcomings in the tariff would be amended in the near future.

Discussing the corporation's progress, he stated that the Algoma Central Railway is within a short time of completion. On January 1st, 1914, it will be in operation as far as Oba, which is the junction point with the Canadian Northern Railway, one of the three great trans-continental railways of Canada, and a few months later it will have pushed its way to its junction with the Grand Trunk Pacific, thus opening up vast possibilities for traffic. At Sudbury the corporation has been busy with railway construction, and the Algoma Eastern Railway will be completed, also for operation, at the beginning of next year. There are great possibilities in connection with both railroads, and the traffic immediately in sight for the Algoma Eastern Railway is expected to bear prompt results. Both railways have been completely equipped so far as their immediate requirements in terminal facilities are concerned, and both have funds in hand for their further equipment in this direction. At Sault Ste. Marie and at Little Current, the respective terminals of the Algoma Central and the Algoma Eastern Railways, the usual railway terminal facilities have been provided, but in addition, up-to-date coal docks and commercial docks with all modern unloading appliances are being built. At Michipicoten Harbor, on the Algoma Central Railway, provision has been made for ore and coal docks. It is expected that coal will be handled in large quantities for at least two of the trans-continental railways, Michipicoten being a handy port for that purpose. Activities have commenced on the land grant of the Algoma Central. The Lake Superior Paper Company have established themselves at the Soo with a most up-to-date 200-ton paper mill, and in addition to an interest in the equity of this business, the corporation have secured to their railway, stumpage or royalties on all woods for pulp-making purposes cut from land grant lands. A good report was presented to the shareholders.

Totals	$708,098,500	$695,288,217	$741,306,341

◆

At the Montreal Stock Yards, west end market, the receipts of live stock for the week ended October 4 were 4,200 cattle, 4.400 sheep and lambs, 2,400 hogs and 1,600 calves The offerings on the market on Tuesday for sale consisted of 3.000 cattle, 2.600 sheep and lambs, 1.050 hogs and 1.000 calves. Then new United States tariff now being adopted. which admits cattle, swine, sheep and lambs free in all United States markets from Canada tended to increase the activity which has prevailed in the trade for the past month at the Montreal Stock Yards.

LONDON LIKES CANADIAN PACIFIC REPORT

Announcement of Segregation Policy Was a Surprise —Comments of the Press

The comments of the London financial critics upon the announcements of Canadian Pacific policy made by Sir Thomas Shaughnessy at the annual meeting last week are generally favourable. The Standard says the announcement of a segregation policy came as a surprise, as it was generally considered that the management was reluctant to adopt a policy of segregation. No doubt the management feeling that the United States' policy may easily move north, prefer to do things their way, rather than have them forced upon them from outside. The history of the company has been one of building in a country devoid of organized capital.

For that reason the creation of hotels, telegraphs, steamers, collieries, and even laundries was forced upon. In consequence, the special income has been very large, and much of it has gone to improve assets. The prosperity has been something beyond that of an ordinary railway company. A policy of segregation would have the satisfactory effect of bringing clearly to the foreground the undoubted earning power of the railway, pure and simple. This is necessary when traders clamour to reduce charges because it is certain that one company is paying a high dividend. By means of segregation the earnings would be put in their proper order and capitalization. At present the intention seems only to deal with land and steamers, but probably later on other businesses may be separated, but it would be folly to consider that this would not effect the earning capacity of the railway itself.

Reason for Price Fluctuation.

The Economist says:—There is no doubt that the lack of knowledge of the real value of the land and miscellaneous assets was responsible for the wide fluctuation in the prices of the stocks. This is desirable from the point of view of speculators, but is repugnant to genuine investors, and does not serve the interests of the company or of Canada. The directors have not an easy task to hold the balance fair between the Canadian public and the shareholders. The best course they can adopt is full publicity. Their operation of the land subsidy has proved of immense value, but at the time it was only an incentive and the present value is due almost entirely to wise management, and the Canadian public has shared in the improved value, through the low capitalization of the Canadian Pacific Railway.

Powerful Prosperity Influence.

The Statist says:—The Canadian Pacific Railway is spending during the current year a large amount on the extensions and improvement of the system, and in a large measure this has a neutralizing effect in reduced expenditure in other directions, and has a large tendency to maintain the prosperity of the country, and consequently the traffic on the railways. The ability of the company to raise additional capital for its objects seems desirable beyond all question, and we attribute that the capital expenditure of the Canadian Pacific Railway Company will be a powerful influence to maintain the prosperity of Canada for the next four years. With the capital expenditure of the Grand Trunk Railway, Grand Trunk Pacific and Canadian Northern Railway reduced, the ability of the Canadian Pacific Railway to raise the capital is due to the great and indeed remarkable financial strength of the company, and is the result of the conservative policy of the country with the remarkable progress of Canada.

The segregation policy is a sound one, but it is unwise to suppose as a result that the country will give its shareholders a great bonus. It is evident that the policy of the company is to strengthen and consolidate the system, and to maintain the prosperity of Canada.

Legitimate Subject of Criticism.

The Daily Telegraph says:—Sir Thomas Shaughnessy's speech should prove reassuring to shareholders. The remarkable growth of the undertaking scarcely needs mentioning. The absence of detailed information about the steamers and other sources of revenue has always been legitimate subject of criticism. The president's remarks are therefore specially welcome.

Referring to the plan of reducing the cost of 18 steamers added during recent years, the Daily Telegraph says that the extension is one of which any steamship company might well be proud.

◆

Tweed Electric Light and Power Company, Limited, has reduced its capital from $40,000 to $24,000.

La Compagnie Usines Generales de Chars et de Machineries has increased its capital to $1,000,000.

BANKERS ARE OBSERVANT AND OPTIMISTIC

Export of Grain From Western Ports—British Columbia Boards of Trade

(Staff Correspondence).

Vancouver, October 6th.

"An increase in wheat shipments to the Orient through western Canadian ports will take place this season," remarked a shipping man to *The Monetary Times*. "I understand that the grain has already been contracted for, and the prospect is that trade will continue to grow. That was why we looked with apprehension a few weeks ago on the rumor that there might be trouble between China and Japan, for any such disturbance would interfere with the grain export."

This remark bears out the report of Mr. Richard Grigg, who has been looking up trade possibilities in the Orient. When the talk of exporting wheat through western ports was first discussed the only market considered was Europe. Even before much grain has gone to that market a fair trade is being done with Japan, and from statements made in the past by prominent Japanese merchants who have visited this coast the buying of Canadian wheat by Japan will assume good proportions.

Vancouver Holds Her Own.

Development in that territory of Vancouver Island tributary to Victoria is shown by the necessity of larger wharves at the various ports along the route of the west coast steamship service of the Canadian Pacific Railway. A new boat is being put on the route, but it has been found that the berthing accommodation is not adequate. The authorities are to be urged to act so that the steamer may continue on the route.

Seattle is always spoken of as the rushing city, but even with a large population it is behind Vancouver in the matter of building permits both for the past month and for the eight months ending September 30th. Vancouver is ahead also of Tacoma and Spokane, and runs close to Portland. It will be seen that Vancouver is able to hold her own, and her future is bright.

Discussion of real estate selling methods has resulted in a resolution by the associated boards of trade of eastern British Columbia to the effect that for the regulation of transient real estate agents, the government should provide heavy licence fees for such salesmen and to require them to give full details of the property they offer for sale. The associated boards held their annual convention at Kaslo last week, when the following officers were elected: President, Mr. F. A. Starhey; vice-president, Mr. H. Giegerich; secretary, Mr. A. B. Mackenzie.

Bankers are Observant and Optimistic.

It is by keeping in close touch with conditions that financial men are able to meet the necessities of the country. At this season many of the bankers of the country are making tours of observations, and their reports are optimistic. Recently Mr. H. V. Meredith, vice-president and general manager of the Bank of Montreal, and Mr. T. S. Holt, manager of the Royal Trust Company, were visitors to the coast, and what they had to say is being quoted to show that conditions generally are good. This week Mr. G. S. Orde, manager of the Union Bank at Calgary and inspector of Alberta branches, has come to the coast. On the other hand, Mr. William Murray, manager of the Canadian Bank of Commerce at Vancouver, has been touring the prairie provinces, and comes back quite pleased with prospects. Mr. D. R. Wilkie, general manager of the Imperial Bank, is making his annual trip of inspection of western territory.

Mr. Martin Chevalier, of Montreal, general manager of the Credit Foncier Franco-Canadien, is in the west. This company is erecting a large block in the business district of Vancouver. It has done a large and successful business in this city, and the amount of money it has placed is being steadily increased. Mr. Chevalier stated that last month his company received $5,000,000 from France for investment. His opinion is that while tight money conditions will continue for some time, the effect will be beneficial, as speculative enterprises will be curbed.

An order for 50,000 barrels of cement has been placed with the Edmonton Portland Cement Company by the Saskatchewan government for use in building the provincial university buildings to be erected at Saskatoon. This company is making daily shipments of its products, and reports sufficient orders already in hand to keep its new plant running to practically full capacity. In view of the fact that the plant has only been completed within the last few weeks, this is an idication of the opportunities afforded by the general development taking place throughout the Edmonton district and this part of Alberta.

VALUE OF LIFE INSURANCE

XXXIII.

Responsibilities of Life

BY C. A. HASTINGS

What are the responsibilities of life?

Most men have only their incomes and brains to meet domestic expenses. In other words the wife and family have nothing else to rely upon—nothing else to place them out of reach of the dreadful possibilities of want and struggle, and no one who finds faul with this statement, is fit to argue with on such a momentous subject.

So many put up the ridiculous argument that life insurance causes a man to live poor in order to die rich, which interpreted means,—he is going to live as comfortably as he can, and his family must look after themselves, if anything happened to him. Some of these men are fortunate in their investments but they are in the minority, and even the majority of these pillars of finance leave their savings or investments in such a hopeless state that something has to be sold in order to provide immediate cash, not only for domestic purposes but also to meet payments on other uncompleted purchases, for these men can never handle a sufficient amount of property, they must invest to the hilt and mortgage again and again in order to get in on the ground floor of another proposition, and so it goes on 'ad infinitum' till the crash comes.

Live and Save Enough.

Of course, there are several individuals who are alive to the value of providing in advance for their dependents, and who carry no insurance. The only way they can be successful is to make sure they can live long enough, coupled with steady and persistent saving which must be large enought to be of some use. The uninsured man takes the same risk of his own death as the man who is insured.

Now, consider the case of the man who does insure, and increases his insurance as his income increases. The premiums are never a burden to him, for he, like all of us, can afford to save ten to fifteen cents on the dollar, and I am not urging anyone to plunge into insurance.

Created An Estate.

With the other 85 cents or 90 cents on the dollar he should be able to live as comfortably as the uninsured man: moreover, this man is fully entitled to live up to the hilt of his income—he has no anxiety as to the future—he knows that his policy has created an immediate estate which he undertakes to pay for, but he does not guarantee that he will live long enough to pay for it, and, if he does not, he knows that no one else will have to pay for it, but that the risk is then turned over to an institution of repute and power who have made their bargain and who never fail to meet their obligations, no matter what they are.

And this man has created this estate merely by a stroke of his pen.

He *has* created an estate, the uninsured *hopes* to, so surely it is obvious that the one who has to live poor to die rich is the uninsured.

SHIPPING FLOUR TO TROPICAL COUNTRIES

Complaints have reached the Department of Trade and Commerce to the effect that large shipments of Canadian flour have gone out of condition when shipped to semi-tropical countries. The Canadian export trade in flour is consequently placed in a somewhat doubtful position so far as competition is concerned with the United States. Some foreign importers have declared that if flours from the Dominion are to compete with those from the United States, they must have the same keeping qualities as those shipped from the latter country.

Some lots of Canadian flour have become mouldy during the voyage, while other consignments have been known to spoil after being in storage only three or four weeks. Canadian millers should, therefore, see that when selling to such markets, the flour is made from strictly sound wheat, freshly ground and with no excessive moisture. No matter how low the grade is, the quality must run uniform in color and in all other respects. It is well known that flour made from tough wheat will not keep in hot weather and should not be exported to tropical markets.

Notwithstanding the preferential duty in some cases in favor of the Canadian products, Canadian millers will lose this trade unless care is taken.

In reply to a question concerning the Canadian port of the new Atlantic steamers of the Canadian Pacific Railway, Sir Thomas says he expects these will dock at Montreal.

TORONTO FIRE CHIEF'S REPORT

Last Year's Loss Was Heavy—Many Causes Are Enumerated

The total loss by fire in Toronto during 1912 amounted to $1,112,484.49; this is $664,495.65 more than that of the previous year. This is accounted for to a great extent by the heavy loss sustained at the Toronto Railway barns, King Street East, and the Allen Manufacturing Company, corner Simcoe and Pearl Streets, the combined loss at these two fires amounting to over a half million dollars, states Fire Chief Thompson, in his comprehensive report.

The high pressure water service proved its efficiency in stopping the spread of a fire on a number of occasions during the year, notably at the Allen Building on Simcoe Street and the Boyd-Brumell Building, Wellington Street.

The insurance on buildings and contents in which fires occurred during the year, amounted to $5,428,566.

Losses and insurance on buildings and contents:—

Losses on buildings	$ 220,637.80
Losses on contents	892,846.69
Total loss on buildings and contents	1,112,484.49
Insurance on buildings	2,382,500.00
Insurance on contents	3,046,066.00
Total insurance on buildings and contents	5,428,566.00
Insurance paid on buildings	204,672.80
Insurance paid on contents	866,178.69
Total insurance paid on buildings and contents	1,070,851.49
Loss over insurance paid on buildings and contents	12,905.00
Loss on buildings with no insurance	11,065.00
Loss on contents with no insurance	19,028.00

Injuries and Deaths.

During the year two children were burned to death, and nineteen citizens were injured more or less through or on account of fire. Thirty-nine members of the department were accidentally injured in the discharge of their duty.

During the year the department received 1,670 alarms, of these 189 were false alarms, thus leaving 1,481 actual alarms for fires, the causes of which were as follows: 16 per cent. of the causes were unknown, 7 per cent. were caused by burning debris, etc., 7 per cent. by sparks from various sources, 6 per cent. by children and matches, 6 per cent. by overheated stoves, furnaces, pipes, etc., 4 per cent. by gasoline.

The actual causes were:—Bonfires, 12; boys and matches, 56; burning chimneys, 59; burning rubbish, waste paper, debris, etc., 115; carelessness with lighted matches, candles, etc., 36; careless workmen, 6; children and matches, 34; clothing, etc., hanging too close to stove, 9; defective automatic sprinkler system, 12; defective chimneys, 30; defective furnaces, 8; defective furnace pipes, 8; defective grates, 38; defective insulation, 13; defective motors, 20; defective stoves and ranges, 11; defective stovepipes, 10; disinfecting room, 2; dry grass, leaves, etc., 27; drying plaster, 25; electric wires, 24; escaping steam or smoke taken for fire, 42; explosion of chemicals, 3; explosion of coal oil lamps, 7; explosion of coal oil stoves, 9; explosion of gasoline in stoves, torches, tanks, etc., 4; fireworks, 9; gas jet, candle, lamp or torch in contact with curtains, etc., 47; hot ashes, 20; ignition of boiling fat, oil, sugar, wax, tar, etc., 39; ignition of benzine or gasoline, 66; ignition of dust in hot air pipes, 6; ignition of leak in gas pipes, 17; ignition of oily rags, waste, etc., 6; ignition of film in moving picture machine, 2; ignition of wood in stove oven, 3; incendiary, supposed, 35; lighting stove with coal oil, 2; mice and matches, 7; molten iron ignited woodwork, 2; overheated baker's oven, 2; overheated boiler, 2; overheated drying kiln, 2; overheated furnaces and furnace pipes, 22; overheated gas stoves, 5; overheated journals, pulleys, etc., 8; overheated steam pipes, 2; overheated ranges, stoves and stove pipes, 53; outside city limits, 22; reflection from electric or other light, 5; rekindling of previous fire, 6; sparks from various sources, 116; spontaneous combustion, 13; stub of lighted cigar or cigarette, 16; struck by lightning, 11; thawing water or steam pipes, 38; unknown, 244; upsetting of coal oil lamp, 14; upsetting of stove, 6; water front in stove burst, 10; wall of building fell, 2; water main burst, 3.

Wants Wires Removed.

"For the past fourteen years," states Fire Chief Thompson, in his recommendations, "I have annually called the attention of the committee on fire and light, and of the city council to the obstruction and delay the department experiences, and also to the serious danger to both life and property occasioned by the overhead wires in the city, especially in the congested districts, and would again earnestly request that some action be taken at once to have this danger removed."

TABLE SHOWING TORONTO'S FIRE LOSSES WITH INSURANCE EACH MONTH DURING 1912, LOSSES OVER INSURANCE PAID AND LOSSES WITH NO INSURANCE.

COMPANIES OBTAIN PROVINCIAL LICENSES

The W. D. Lewis Company has been authorized to do business in the province of Quebec, with head office at Montreal, Que.

The Imperial Water Proof Company, Limited, has been authorized to do business in the province of Quebec, with head office at Montreal, Que.

The Equitable Fire and Marine Insurance Company, of Providence, R.I., U.S.A., has been registered to do business in Manitoba.

British Canadian Securities, Limited, has been licensed to do business in Ontario.

Ronuk, Limited, has been licensed to do business in Ontario.

Maxwell Motor Company of Canada, Limited, has been licensed to do business in Ontario.

Smart-Woods, Limited, has been licensed to do business in Ontario.

SASKATCHEWAN'S HAIL INSURANCE

During 1913, a total of 115 municipalities, covering more than one-half of the cropped area of the province have been insured by the commission. The municipalities range in area from 150,000 to 200,000 acres, and it is estimated that more than 20,000,000 acres of land in the grain growing territory are subject to taxation for government insurance more than 60,000 farmers are affected, and the amount due from all the municipalities in which the act has been adopted, will be in the neighborhood of $800,000. The amount of the claims to be met will not be less than $600,000, and may be considerably more than this sum, thinks Mr. J. E. Paynter, chairman of the Saskatchewan Hail Insurance Commission.

While a complete statement as to the cost of administration is not yet available, this is expected small in proportion to the extent of the business carried on under the auspices of the commissions.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Bradford, Ont.—October 6—Marsh fires destroyed much hay, stables, machinery, etc.

Clifford, Ont.—October 5—Mr. E. Tolton's elevator. Loss, $2,000. Cause unknown.

Welland, Ont.—October 1—Mr. S. Lambert's shed. Loss unknown. Cause, supposed dropped match.

Bredenbury, Sask.—September 29—Bank of Toronto, Greenshield's block, etc. Loss and cause unknown.

Davidson, Que.—October 2—Messrs. J. Davidson Lumber Company's six houses. Loss and cause unknown.

Tignish, P.E.I.—October 2—Mr. P. McCue's residence. Loss, $1,500. No insurance. Cause, supposed spark.

Chesley, Ont.—September 29—Messrs. Lueck Brothers and Elliott's planing mill. Cause, supposed incendiary.

St. Catharines, Ont.—October 6—O Pee Chee chewing gum factory. Loss, $2,000. Cause, supposed incendiary.

Dauphin, Man.—October 2—Mr. G. Caste's farm buildings, five miles north of Dauphin. Loss and cause unknown.

Saskatoon, Sask.—September 21—Rear of Mr. Abele's restaurant, 225 21st Street. Loss, slight. Cause, hot ashes.

Carleton, N.B.—October 2—Mr. G. H. Clarke's residence, Victoria and St. James Street. Loss and cause unknown.

Lindsay, Ont.—October 5—Hotel and store at Sturgeon Point, also Messrs. Flavelle's boathouses. Loss and cause unknown.

Perth, Ont.—October 6—Imperial Hotel stables, Mr. J. Moodies' stable. Loss, $8,000. Partially insured. Cause unknown.

Windsor, N.S.—October 2—Mr. Beckles Willson's residence. Owned by Mr. J. W. Churchill, Hontsport. Loss, $2,000. Insured. Cause unknown.

Lethbridge, Ont.—October 3—Large pile of mine props, etc., at Galt Collieries of Canadian Pacific Railway. Loss, $5,000. Cause, supposed spark.

Ottawa, Ont.—October 2—Mr. A. G. Cowan's residence, Ridgemont. Loss, $10,000. Cause unknown; 494 Somerset Street. Loss, slight. Cause unknown.

New Westminster, B.C.—September 24—Mr. L. Wilts' residence, 906 3rd Avenue. Loss, building $200, contents $400. Insurance, Hartford, building $1,500, contents $75. Cause unknown.

Montreal, Que.—October 1—Mr. J. W. Nille's cottage, Beaconsfield. Loss, $5,000. Cause unknown.

October 3—Mr. A. Tourezzos' general store, Point aux Trembles. Loss, $2,500. Cause unknown.

October 4—Montreal Gas Works' purifying building. Loss and cause unknown; Mr. T. Prudhomme's barn, 3259 St. James Street; R. J. Tooke's and Company automobile. Loss unknown. Cause, engine backfiring.

Pembroke, Ont.—October 3—Business block. Loss, $60,000, including Messrs. W. A. Hunter and Sons, dry goods and groceries. Loss, $25,000 on stock, with $10,000 insurance, $10,000 on building, with $4,000 insurance; Mr. S. N. Hunter, hardware, $10,000 loss; covered by insurance; Mr. W. St. James, barber, $300 loss, covered by insurance; Mr. Robt. Strutt, shoemaker, $600 loss, with $300 insurance; Mr. Geo. Chambers, fruit and confectionery. Loss, $800 on stock and $1,200 on house, with $800 insurance. Cause, supposed tramps.

Toronto, Ont.—October 1—Dr. J. B. Hall's auto. Loss, 5,000. Cause, engine backfired.

October 2—Mr. D. Epstein's stable. Loss, $800. Cause unknown.

October 3—Stable rear J. M. Simpson's store, 365 Yonge Street. Loss $1,800. Cause, supposed tramps; Steel Company of Canada's premises, 69 Bay Street. Loss, $50. Cause unknown; stables at 2164, 2166, 2168 Dundas Street. Losses, $10, $225 and $50 respectively. Cause unknown.

October 4—Gibson Electric Company's premises. Loss, $30,000. Cause unknown.

October 6—Mr. J. T. Maquire's auto. Loss, $600. Cause, engine backfiring.

October 7—Reily Manufacturing Company and Victoria Twine and Paper Company, 443 King Street West. Loss, Reily Company $15,000, Victoria Company $10,000. Building owned by Lieut.-Col. Cowan, $800. Cause unknown.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan.

Berne, No. 3051, Victor Harvey, Ormeaux.
Mayne, No. 1066, $2,000. Frank Bryant, Lidgett.
Pratt, No. 3023, $1,800. W. J. Hughson, Bryceton.
Cairnside, No. 665, $300. Chris. R. Light, Skipton.
Pittville, No. 2855, $1,900. Thos. J. Derman, Cabri.
Curthshill, No. 3048, $2,000. Jas. A. McKay, Oban.
Knob Hill, No. 1289, $1,750. C. C. Ryder, Bladworth.
Valparaiso, No. 1092, $1,500. Jas. Alcorn, Valparaiso.
Highworth, No. 2959, $1,700. E. B. Moore, Highworth.
Pinto Creek, No. 3061, $1,800. W. E. Laird, Austinville.
Ridgley, No. 2893, $1,700. Morris H. Swanson, Amelia.
Whitecraigs, No. 2942, $1,400. T. D. Covey, Gull Lake.
Lake Edwards, No. 2967. $2,000. G. Fellman, Spalding.
Vanceburg, No. 3019, $1,800. Thorne M. Eddy, Bethune.
Lynnhurst, No. 2989, $1,800. Alf. E. Hopkins, Fairmount.

◆

VICTORIA'S WATER SCHEME.

The original by-law for the construction of the Sooke Lake water scheme at Victoria, B.C., was for $1,500,000, though it was expected at the time that the eventual cost would be $2,000,000. In this two millions the amount estimated for land was $200,000. The cost of land to date is as follows:—

Land at Sooke Lake	$264,513
Right of way	27,970
Humpback Reservoir site	57,777
Arbitration and legal expenses	8,766
	$359,026

To this amount has to be added the price of the watershed to be acquired from the Esquimalt and Nanaimo Railway Company, and appertaining to Sooke Lake proper, $304,089.50, and $75,000 for right-of-way not yet settled for making a total for land of $738,116.35, or $538,116.35 more than the original estimate.

The first half-million dollars of the original loan was sold at 96, the remaining million only realized 91, and no better price can be expected for the new loan. This would make an amount of $125,000 chargeable to the increased cost of money. This, added to $538,116.35, will account for $663,116.35, or 66 per cent. of the difference between the original estimated cost and the probable final cost of the completed work.

The annual cost of the first loan is $74,825, and that of the new one $78,270. The difference is caused by the increase of interest from 4 per cent. to 4½ per cent. on $1,000,000 of the first loan and the whole of the new one, also a slight increase in the annual payment to the sinking fund, owing to the term of the new loan being fixed at 48 years, so as to make due date of both the same. These payments cease on February 1, 1962, and the works, which are the property of the ratepayers, will be paid for.

The Ogilvie Flour Mills Company, Limited

TWELFTH ANNUAL REPORT

OF THE

Directors of The Ogilvie Flour Mills Company, Limited, for the Year ended 31st August, 1913

The Annual General Meeting of the shareholders of the Ogilvie Flour Mills Company, Limited, was held at the head office of the Company in Montreal on 9th October, 1913, Mr. C R Hosmer, President, in the chair.

Among those present were:—

Mr. C. R. Hosmer, Sir Montagu Allan, C.V.O., Mr. H. S. Holt, Mr. W. R. Baker, Hon. Lionel Guest, Mr. W. A. Black, Mr. Shirley Ogilvie, Mr. W. H. Evans, Mr. A. J. Brown, Mr. C. R. Black, Mr. Chas. Chaput, Mr. T. H. Christmas, Mr. S. A. McMurtry, Treasurer, and Mr. G. Alfred Morris, Secretary.

The President said in part:—

A recent appraisal of the Company's properties, made by competent valuators, established their real value at over $2,000,000 in excess of the figures at which they were being carried on the books of the Company; and the Directors therefore felt justified in adding $830,304.03 of this excess to property accounts. This, with $169,694.97 transferred from the Profit and Loss Account, enables the Company to write down the item of $1,000,000 for good-will, trade marks and patent rights to the nominal figure of one dollar.

Mr. W. A. Black, Vice-President and Managing Director, in seconding the report, said in part:—

Since our last annual meeting, our new mill at Medicine Hat has been completed, together with a large terminal elevator at the same point, and a number of country elevators at stations best suited for serving our requirements. The mill has been running now for over a month, and is doing excellent work.

The establishment of this industry at this important point will be of much value both directly and indirectly to the farming community. It not only provides the grain grower with a ready cash market for his wheat, but in supplying him with offal feed for his stock, will assist in that section becoming the centre of an important dairying and stock industry, so essential to the permanent success of our Canadian North-west.

DIRECTORS AND OFFICERS

The following gentlemen were elected Directors of the Company for the ensuing year:—

Mr. C. R. Hosmer, Sir Montagu Allan, C.V.O., Mr. H. S. Holt, Mr. Charles Chaput, Mr. George Drummond, Mr. Shirley Ogilvie, Mr. W. A. Black, Mr. H. W. Norton, Mr. A. M. Nanton.

And Messrs. Creak, Cushing & Hodgson were appointed Auditors.

At a subsequent meeting of Directors the following officers were appointed:—

Mr. C. R. Hosmer, President; Mr. W. A. Black, Vice-President and Managing Director; Mr. S. A. McMurtry, Treasurer; Mr. G. Alfred Morris, Secretary; Mr. J. R. W. Papineau, Assistant Secretary; Mr. George M. Heath, General Superintendent; Mr. F. H. Thompson, Superintendent; Mr. R. R. Dobell, Manager, Winnipeg; Mr. George A. Coslett, Manager, Fort William; Mr. Henri Merrill, Sales Manager, Province of Quebec; Mr. J. E. Weeks, Sales Manager, Province of Ontario.

At a Special General Meeting of shareholders, held immediately after the conclusion of the Annual Meeting, sanction was given for the creation of a new issue of First Mortgage Six Per Cent. Gold Bonds, to be known as Series C, to the extent of $600,000, which issue will be secured by the Company's new plant at Medicine Hat, together with a number of interior elevators recently constructed and acquired. These Bonds will be offered for subscription at an early date.

OGILVIE FLOUR MILLS COMPANY, Limited

BALANCE STATEMENT, 31st AUGUST, 1913

			$8,880,737.32

Indirect Liabilities:—
Customers' Paper under Discount. $431,091.00

We have audited the Books of the Company for the year ending 31st August, 1913, and certify the above to be a correct Statement of the affairs of the Company on that date as shown by the Books.

CREAK, CUSHING & HODGSON,
Auditors.

UNITED STATES TARIFF SIGNED

Imports and Revenue Summarized—Germany in Negotiation Regarding Trade Agreement

President Wilson has signed the new tariff of the United States. Here is a brief summary of the law, as prepared for the United States Senate:—

The average percentage of tariff rates as compared to the value of all imported merchandise—old law, 37 per cent.; new law, 27 per cent.

The value of annual imports added to the free list, $147,000,000.

The estimated revenue from all import rates—under old law was $305,000,000; and under new law, $249,000,000.

Estimated revenue from corporation and income taxes—old law, $37,000,000; new law, $122,000,000.

Altogether consumers in the United States probably will receive from abroad free of all tariff more than $1,000,000,000 worth of merchandise during the next year.

During 1912 the amount of "free imports" was more than $880,000,000, and when the tariff is entirely removed from wool, sugar, iron ore and cheap iron and other important items the total is expected to increase notably. Under the old law more than 53 per cent. of all goods brought to the United States from all parts of the world paid no tariff, and that proportion will be increased by the new law.

The free wool provision of the new law takes effect December 1, 1913; the free sugar provision, May 1, 1916.

Features Regarded Most Important.

The new tariff law, passed four years after President Taft signed the existing Payne-Aldrich law, as the result of more than nine months of work in congress. Hearings were started January 6 by the house ways and means committee. Chairman Underwood introduced the tariff bill April 7, immediately after President Wilson had convened the new congress. It passed the House May 8, and the senate September 9.

In the opinion of its makers, the Democratic leaders of congress, the most important features of the new tariff are:

A reduction of nearly one-half in the average tariff on foodstuffs and farm products.

The placing of raw wool on the free list, and a reduction of nearly two-thirds in the tariff on woolen clothing, especially of the cheaper grades.

A reduction of one-third (average) on cotton clothing.

Reduction of sugar tariff and its ultimate abolishment in 1916.

A reduction of one-third (average) in the tariff on earthenware and glassware.

Abolishment of all tariff on meats, fish, dairy products, flour, potatoes, coal, iron ore, lumber and many classes of farm and office machinery.

General tariff reduction on all important articles in general use.

Germany in Negotiations.

Germany will be the first nation to take advantage of that section of the new tariff act which provides for the negotiation of reciprocity arrangements embodying mutual concessions in customs taxes. Already the initial steps have been taken to secure such an arrangement in anticipation of the signing of the bill by the President. The chancellor of the German Embassy, acting in the absence of Ambassador Bernstorf, has been in communication with the state department, and it is expected a rough outline draft of such an arrangement as is referred to in that section soon will be ready for consideration.

As it emerged from conference this section no longer contains the retaliatory provisions inserted in the senate, and is now nothing more than an authorization to the executive to "negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce."

History of the Bill.

The Chronology of the Tariff Bill is as follows:—

April 7—Introduced in house and referred to ways and means committee.

April 7 to 21—Discussed in house Democratic caucus.

April 21—Reintroduced in house.

May 3—Passed by house.

May 16—Referred to finance committee in senate.

June 20—Reported to Democratic caucus by finance committee.

June 21 to July 7—Discussed in senate Democratic caucus.

July 11—Approved by finance committee and reported to senate.

September 6—Reported to senate from committee of the whole.

September 9—Passed senate.

September 10 to 27—Discussed in conference committee of the two houses.

September 29—Reported to house from conference committee.

October 2—Senate adopted report of conference committee, receded from Clarke amendment and rejected Underwood amendment.

October 3—House adopted conference report.

October 3—President Wilson signed the bill at 9 p.m.

◆

GRAND TRUNK PRESIDENT RE-ELECTED

At the meeting of stockholders of the Grand Trunk Railway, held at Detroit, Mr. E. J. Chamberlin, of Montreal, was elected president for the third successive year; Mr. H. G. Kelly was re-elected vice-president, and Mr. G. W. Alexander, secretary and treasurer of the Grand Trunk Western. Additional directors are:—Messrs. A. B. Atwater, U. E. Gillen, Arthur Dixon, L. R. Skinner and M. H. Lane.

The officers and directors were re-elected, with a few changes for the following lines: Detroit, Grand Haven and Milwaukee; the Toledo, Saginaw and Muskegon; the Chicago, Detroit and Grand Trunk Junction; the Michigan Air Line; the St. Clair Tunnel Company; Pontiac, Oxford and Northern, the Detroit and Huron; the Bay City Terminal Company, the Grand Rapids Terminal Railroad Company, and the Detroit and Toledo Shore Line.

◆

ALASKA, RAILROADS AND THE SOVEREIGN BANK

More railroad transportation is Alaska's crying need, according to an article contributed by Mr. E. E. Swergal, of the New York Central road, to the Railway Age Gazette. "A definite and businesslike development programme" is imperative for the Territory, and the first and most important item in this programme is the construction of an adequate system of railways. The lines in present operation are: the White Pass and Yukon, built in 1898-1900, only 25 miles of it in Alaska; the Copper River and North-western (197 miles), and the Alaska Northern (70 miles), leading inland from points on the south-western coast, and one or two short narrow-gauge lines.

The Alaska Northern is the road in which the Sovereign Bank is interested. The projected line is from Seward, on the south coast of Alaska, north to near Fairbanks, on Tanana River, 450 miles. Besides the 70 miles built, about 40 miles additional are partly constructed. The company proposed to build a 38-mile branch from Mile Post 146 to the Manatuska coal fields. Another division, 300 miles long, through the Kuskowim country to the new gold fields at Iditarod, leaving the main line at Susitna, was also proposed. The company was chartered on October 28th, 1909, under the laws of Washington, and purchased the assets of the Alaska Central Railway whose properties were sold under foreclosure October 11th, 1909, and bid in by Mr. F. G. Jemmett, representing the interests that liquidated the Sovereign Bank, which owned a majority of the $4,000,000 bonds. The rolling stock on December 31st, 1911, comprised locomotives, 3; cars, baggage, mail, etc., 3; gasoline passenger motor cars, 2; freight (flat), 23; service, 7; total, cars, 35. The authorized capital stock is $30,000,000, of which $5,000,000 is outstanding. The directors are: Messrs. O. G. Laberee, F. W. Low, J. C. Williams, Seattle, Wash.; R. D. Miller, Spokane, Wash.; E. H. Morrison, Fairfield, Wash.; F. B. Jemmet, Toronto, Ont., and the officers: O. G. Labaree, president and general manager; J. C. Williams, vice-president; J. A. Haight, secretary, Seattle, Wash.; F. G. Jemmett, treasurer, Toronto; A. H. Wheatley, assistant treasurer, Seward, Alaska.

Mr. Swergal writes:—

"Regarding the pointed question as to who can best develop the transportation for the common good of all, it appears to be the consensus of opinion of the men who know the country best that the work should be continued by private enterprise, as has been permitted in the States, and with equitable financial assistance and regulation by the Government. The Interstate Commerce Commission now has jurisdiction in Alaska, and, considering the agitation that has been engendered by this question, there is little probability, if any, of corporation abuses being practised or even attempted in the future. Many of the railroads built in the States were liberally assisted by the Government; therefore, why should not assistance (stripped of political and financial abuses) be extended to private railway enterprises in Alaska?"

◆

The Asquith Manufacturing Company, Saskatchewan, Limited, has changed its name to the Badger Mill and Elevator Company, Limited.

NEW CANADIAN COMPANIES

Large Mortgage Corporation—Capital for Building and Construction

New incorporations number fifty, the head offices of these companies are located in five provinces. The total capitalization amounts to $13,657,900. The largest companies being as follows:—

The Canadian European Mortgage Corporation, Limited, Winnipeg	$4,000,000
Confederation Construction Company, Limited, Montreal	2,000,000
Cheticamp Gypsum and Plaster Company, Limited, Montreal	1,500,000
Fern Consolidated Company, Three Rivers, Que.	1,000,000
Shirley's Limited, Winnipeg	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Quebec	13	$5,432,000
Ontario	12	1,020,000
Alberta	1	100,000
British Columbia	12	1,686,000
Manitoba	12	5,419,900
Total	50	$13,657,900

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Fanny, Bay, B.C.—Weeks Dunell Cedar Company, Limited, $50,000.

New Westminster, B.C.—Westminster Coal Company, Limited, $10,000.

North Vancouver, B.C.—Lonsdale Coal and Supply Company, Limited, $10,000.

Victoria, B.C.—Mackay and Gillespie, Limited, $15,000. White Lunch, Limited, $50,000.

Windsor, Ont.—McCann and Twomey, Limited, $40,000. S. Cuddy, G. M. Drouillard, B. Robinson.

Three Rivers, Que.—Fern Consolidated Company, $1,000,000. P. E. Fugere, L. J. Fugere, H. St. Cyr.

Ottawa, Ont.—The Canadian Carter Company, Limited, $150,000. J. B. Carter, C. A. Denneen, J. S. Fox.

Nashville, Ont.—The Nashville Cemetery Company, Limited, $10,000. A. Houston, C. Shaw, T. H. Robinson.

Sandwich, Ont.—The J H. Bishop Company, Limited, $150,000. J. H. Bishop, Sr., J. H. Bishop, Jr., W. J. Burns.

Spring Coulee, Alta.—The John M. Nelson Company, Limited, $100,000. J. M. Nelson, C. H. Nelson, N. H. Nelson.

High Bluff, Man.—The High Bluff Shooting Club, Limited, $4,900. W. Dugdale, G. W. Hicks, M. G. Tidsberry.

Pointe Claire, Que.—Pointe Claire Sash and Door Company, Limited, $49,000. A. Lesage, Z. Mitchell, J. A. E. Decelles.

Quebec, Que.—La Compagnie dea Abattoirs de Quebec, $299,000. Hon. J. E. Roberge, J. T. R. Laurendeau, D. Raymond.

Fort William, Ont.—Central Contracting Company, Limited, $50,000. E. R. Wayland, C. E. Smith, J. D. Chisholm.

Bishop's Crossing, Que.—Bishop's Crossing Sash and Door Factory, Company, Limited, $49,000. E. B. Evans, J. W. Bishop, T. E. Evans.

Beausejour, Man.—Honey Transforming and Manufacturing Company, Limited, $20,000. Rev. A. Polawaki, R. B. Graham, H. M. Hannesson.

Vancouver, B.C.—The Universal Hat Pin Company, Limited, $50,000. The Yorkshire Building Company, Limited, $400,000. The Hope Hotel, Limited, $6,000. Mainland Packing Company, Limited, $50,000. The Black Diamond Mining Company, Limited, $250,000. Shushanna Mining and Trading Company, Limited, $300,000. Baramba Mining Company, Limited, $500,000. The Provincial Club Company, Limited, $10,000.

Toronto, Ont.—Duncan's Detective Agency, Limited, $20,000. W. Duncan, W. H. Burkholder, W. W. Dunlop. The T. Heal Woodworking Company, Limited, $40,000. W. J. Mitchell, R. J. Christie, W. S. Thomas. Barker Realty, Limited, $400,000. M. MacDonald, G. Adams, E. Smily. James T. Gilchrist Lumber Company, Limited, $40,000. J. T. Gilchrist, A. S. Winchester, J. W. Broudy. Worr Foundry Company, Limited, $40,000. E. V. McMillan, J. Aitchison, D. McArthur. Toronto City Messenger Company, Limited, $40,000. E. O. Dexter, E. A. De La Hooke, D. J. Lunan. National Garments, Limited, $40,000.* C. Wilson, W. R. Galbraith, H. Jacob.

Montreal, Que.—Kelly-Springfield Tire Company, Limited, $5,000. W. R. Hastings, R. Fleet, A. L. S. Mills. Cheticamp Gypsum and Plaster Company, Limited, $1,500,000. C. H. Cahan, J. L. Finlay, E. J. Church. Wentworth Realties Limited, $100,000. J. W. Cook, A. A. Magee, T. B. Gould. Confederation Construction Company, Limited, $2,000,000. G. A. Campbell, T. M. Papineau, C. H. Grundy. Cadillac Motors, Limited, $50,000. F. G. Bush, H. W. Jackson, G. R. Drennan. McGill Building, Limited, $300,000. T. S. Stewart, H. E. Walker, E. G. T. Penny. Wailes, Dove (Canada), Limited, $50,000. A. W. Holmested, C. J. F. Collier, A. B. Mortimer. The Ideal Clothing House Incorporated, $20,000. A. R. Hall, G. C. Papineau-Couture, L. Fitch. The Montreal Automobile Trade Association, Limited, $10,000. W. L. Stoneburn, W. A. Allen, W. P. Kearney.

Winnipeg, Man.—Credit Homebuilders, Limited, $200,000. G. Baskin, C. Williams, R. Jacob. Shirley's, Limited, $1,000,000. C. D. Hughes MacAlpine, J. W. Lunney, R. Tidmus. ALGOMA STEEL CORPORATION, LIMITED

A COMPANY RISING TO ITS PROSPECTUS

EXECUTIVE OFFICE - SAULT STE. MARIE, CANADA

To the Stockholders: JULY, 1913.

Your Directors submit herewith the Accounts of Algoma Steel Corporation, Limited, for the Fiscal Year ended 30th June, 1913. (See Appendices Nos. I. and II. for Income Account and Balance Sheet respectively.)

The following is information of a general nature with reference to the Company's operations:

The output, as compared with the preceding year, is as follows:

	1911-12	1912-13
Pig Iron	258,979 tons	326,073 tons
Steel Rails	241,729 tons	289,343 tons
Merchant Mill Material	39,466 tons	26,295 tons

The production of pig iron and steel rails is the largest yet attained. The Blast Furnaces have produced in excess of expectations. In the early part of the year the Rail and Blooming Mills were closed down for two weeks to permit of the installation of new mills of greater capacity. This work was satisfactorily accomplished within the time indicated, and the result has been a largely increased production of steel rails. It is estimated that with further slight improvements which are in hand the production next year will average 1,200 tons of rails per day. The operation of the Merchant Mills has been confined to railroad material, owing to the large demand for steel rails.

The Company has orders on hand for a considerable time ahead, but with the increased capacity of its plant, it is expected that all business offered during the coming year will be cared for.

Your Directors have been fully alive to the question of still further strengthening the resources of the Corporation, so far as its raw materials are concerned, and during the year have acquired a large Pocahontas Coal Property which is now being operated through the Lake Superior Coal Company, a subsidiary company of the Algoma Steel Corporation.

Mining development is being proceeded with in the Michipicoten District, and in addition to the Helen, the Magpie Mine has been opened up and it is fully expected that this mine will be ready for shipping ore at the opening of lake navigation next year.

By order of the Board, J. FRATER TAYLOR, *Vice-President*.

INCOME ACCOUNT For the Year Ended 30th June, 1913

Net Earnings from Operations		$1,748,220.82
Dividends and Interest on Investments, etc.		152,084.50
Total Net Earnings for Year		$1,900,305.32
DEDUCT: Interest Charges for the Year		
1. On Purchase Money Mortgage 5% Bonds	$290,000.00	
2. On first and Refunding Mortgage 5% Bonds	679,631.40	
3. On Debentures of City of Sault Ste. Marie	10,148.22	
4. On Bank and other Advances	211,527.65	
	$1,191,307.27	

LESS: Proportion thereof charged to Capital in respect of expenditure on new construction	99,523.99	1,091,783.28
Balance		$808,522.04
Disposed of thus:		
Dividend on Preference Stock paid to The Lake Superior Corporation	$410,000.00	
Carried to Surplus Account (for depreciation, etc.) as per Balance Sheet	398,522.04	$808,522.04

ALGOMA STEEL CORPORATION, LIMITED

BALANCE SHEET AS AT 30th JUNE, 1913

ASSETS

Property	$46,631,408.88
Moneys Invested in Subsidiary and other Companies	1,515,710.08

Total Liabilities,			$55.577.337.20

F. MARTIN TURNBULL, Comptroller.

New York, August 22nd, 1913. Examined and found correct, BARROW, WADE, GUTHRIE & CO., *Auditors.*

At the Annual Meeting of Shareholders, held recently, the following Directors were elected for the ensuing year:—

J. FRATER TAYLOR W. K. WHIGHAM W. E. STAVERT HERBERT COPPELL
D. C. NEWTON W. C. FRANZ T. GIBSON

The following were elected officers of the Company:—

President: J. FRATER TAYLOR *Vice-Presidents:* W. K. WHIGHAM, H. COPPELL, W. C. FRANZ
Secretary: THOMAS GIBSON *Assistant Secretary:* ALEX. TAYLOR *Treasurer:* A. H. CHITTY

The showing indicated in the above accounts is excellent considering that the period covered is the first full year of operation of the new completed plant. In a prospectus issued in 1912, immediately prior to the new plant being put into operation, it was stated that the first year's earnings would amount to about $2,000,000. It will be seen that this figure has practically been reached.

DIVIDENDS AND NOTICES

THE STEEL COMPANY OF CANADA, LIMITED.

PREFERRED DIVIDEND, No. 13.

Notice is hereby given that a dividend of 1¾ per cent. on the Preferred Stock of the company for the quarter ended September 30th, 1913, has been declared. The same will be paid on November 1st, 1913, to shareholders of record at close of business, October 15th, 1913.

H. H. CHAMP,
Treasurer.

Hamilton, Ont., October 1st, 1913.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of One per cent. (1%) on the Ordinary Shares of the Capital Stock of the Mexican Light and Power Company, Limited, payable on the 15th day of October, 1913, to shareholders of record at the close of business on the 6th day of October, 1913.

The transfer books of the Company for the Ordinary Shares will be closed from the 6th day of October to the 15th day of October, 1913.

Dividend cheques for shareholders are payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; London, England; Mexico City, Mexico; and its Branches.

By order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 27th September, 1913.

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of Three and One-half per cent. (3½%), (being at the rate of Seven per cent. (7%) per annum) on the Preference Shares of the Capital Stock of the Mexican Light and Power Company, Limited, for the six months ending October 31st, 1913, payable on the 1st day of November, 1913, to shareholders of record at the close of business on the 11th day of October, 1913.

That the transfer books of the Company for the Preference Shares will be closed from the 13th day of October to the 31st day of October, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; London, England; Mexico City, Mexico; and its Branches.

By order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 27th September, 1913.

The Consumers' Gas Company of Toronto

THE ANNUAL GENERAL MEETING of the Stockholders of the Consumers' Gas Company of Toronto, to receive the Report of the Directors, and for the Election of Directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on Monday, the 27th of October, 1913, at 12 o'clock noon

ARTHUR HEWITT,
GENERAL MANAGER.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next, to Shareholders of record at the close of business on the 15th day of October.

By order of the Board,
E. F. HEBDEN,
General Manager.

Montreal, 26th September, 1913.

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A Dividend of two per cent. on the Preferred and one and one-half per cent. on the Ordinary shares of the Company for the quarter ending September 30th, 1913, has been declared payable October 15th, 1913, to shareholders of record of September 30th, 1913.

By order of the Directors.
THOMAS GREEN,
Cashier.

New Glasgow, N.S., September 23rd, 1913.

CROWN-RESERVE MINING COMPANY, LIMITED

DIVIDEND No. 44

Notice is hereby given that a dividend of 2 per cent. has been declared for the month of September, payable **15th October, 1913**, to shareholders of record the 30th September.

Transfer books will not be closed.

Dividend cheques will be mailed on the 14th October by our transfer agents, "The Crown Trust Company," and shareholders are requested to advise them of any change of address.

By order of the Board,
JAMES COOPER,
Secretary-Treasurer.

Montreal, September 8th, 1913.

CANADIAN PACIFIC RAILWAY COMPANY

ISSUE OF $60,000,000 ORDINARY CAPITAL STOCK

SPECIAL INTEREST PAYMENT

In accordance with the President's Circular to the shareholders, dated January 3rd, 1913, an Interest Payment at 7 per cent., or $\$3.67^{164}$ per share, will be paid on October 15th next, on the first four instalments ($140.) from the due date of each instalment, to September 30th, 1913, on the shares of the above New Issue represented by the Certificates of Subscription, to holders of record at the close of business August 18th next, who have paid these instalments on or before their respective due dates. Notice is hereby given that this Interest Payment will be mailed from New York to the registered addresses of holders, or their duly appointed Attorneys, on October 14th, 1913.

For the purpose of this Payment the Certificate of Subscription Books will close August 18th at 3 p.m., and re-open September 18th, 1913.

All the shares of this Issue, when paid in full, will rank with the existing Stock for the full dividend accruing for the quarter ending December 31st, 1913, which dividend will be payable April 1st, 1914.

W. R. BAKER,
Secretary.

Montreal, July 31st, 1913.

"The excellent crop of 1913 means far more to the country than the actual money value; it means a re-establishment of our credit; it shows that we have the wherewithal to produce not only a large crop, but a good crop." —Mr. O. W. Gardiner, of the financial house of Messrs. Kirby, Oldfield and Gardiner, of Winnipeg.

The Horne elevator at Fort William is now completed. This addition to the city's array of terminal elevators is expected to start operation this week. The capacity is one and three-quarters of a million bushels. It is the largest cleaning elevator in Canada, and has a capacity for cleaning 1,000 bushels per hour.

Lake of the Woods Milling Shows Marked Growth

Net Earnings at Rate of 16.46 Per Cent. on Common Stock Amply Justifies Bonus Declaration—Conservative Policy Followed in Use of Surplus—Company in Strong Financial Position.

The annual statement of the Lake of the Woods Milling Company for the year ended August 31st, 1913, is one of the most attractive issued by any Canadian industrial company this year and, on this account, will attract special attention both here and in England. The report indicates a marked improvement in the general flour trade of the Dominion, the earnings showing substantial gains over the past few years. As usual the directors have followed a conservative policy with regards to the surplus, making large appropriations for write-offs on both property account and on good-will and trade marks, etc.

The gross earnings for the year amounted to $549,677, as compared with $457,011 in the previous year, an increase of $92,666 or about 20 per cent.

INTEREST EARNED FIVE AND HALF TIMES.

Earnings available for the preferred stock were at the rate of 30 per cent., as compared with 23.79 in 1912, and for the common 16.46 per cent., against 11.99 in 1912. The company's bond interest was earned approximately 5½ times.

After providing for the bonus recently declared on the common stock, a balance of $135,677 remained out of the year's profits. Of this $50,000 was applied to writing off property valuation and $50,000 to writing off good-will, trade marks, etc., leaving $35,677 to be added to surplus. The writing off for the year was practically the same as that in 1912, but the deductions in 1912 encroached to the extent of $25,000 on the old surplus, in contrast to which, after all deductions this year, surplus on August 31st last stood $35,677 higher than at the same date a year before.

COMPANY'S STEADY GROWTH.

The profits since 1907, before providing for fixed charges, and the final surplus after payment of interest and dividends, have been as follows:—

	Profits.	Surplus for year.
1907-08	$401,869	$116,869
1908-09	723,380	891,880
1909-10	475,226	33,726
1910-11	412,154	34,154
1911-12	457,012	83,879
1912-13	549,677	177,677

The profit and loss account for 1912-13 compares with that of 1911-12 as follows:—

	1913.	1912.
Profit	$549,677	$457,011
Bond interest	99,000	100,141
Balance	$450,677	$356,870
Preferred dividend	105,000	105,000
Balance	$345,677	$251,870
Common dividend	168,000	168,000
Balance	$177,677	$83,870
Bonus	42,000	....
Balance	$135,677	$83,870
Written off property	50,000	....
	$85,677	$83,870
Goodwill, etc	50,000	109,370
Surplus	$ 35,677	*$25,500
Previous surplus	817,457	842,957
Total surplus	$853,134	$817,457

---

*Deficit.

FINANCIAL POSITION STRONGER.

The balance sheet for the year shows a few important changes. Bills payable have been reduced from $500,000 to $225,000, and there is also a slight reduction in accounts payable. In assets, the principal features are the adjustments resulting from generous writing off during the year, and a new item under the head of investments—$50,000 in stock of the Sunset Manufacturing Company. Stocks of wheat, flour, etc., are valued at about one hundred thousand dollars lower than a year ago. Comparisons are afforded by the following table:—

Liabilities

	1913.	1912.
Common stock	$2,100,000	$2,100,000
Preferred stock	1,500,000	1,500,000
Bonds	900,000	900,000
Accrued interest	13,500	13,500
Bills payable	225,000	500,000
Accounts payable	288,490	298,115
Bonus	42,000	......
Surplus	853,134	817,457
	$5,922,125	$6,129,073

Assets.

	1913.	1912.
Realty, etc.	$3,069,497	$3,114,833
Stocks	250,000	200,000
Advances	189,461	189,461
Goodwill, etc.	750,000	800,000
Equipment	69,096	62,630
Wheat, etc.	1,050,154	1,163,402
Accounts receivable	529,995	553,874
Bills receivable	795	2,350
Cash	13,124	42,521
	$5,922,125	$6,129,073

BOARD OF DIRECTORS.

The officers and Board of Directors elected are as follows:—

President and managing director—Frank S. Meighen.

Vice-president—Wm. W. Hutchison.

Directors—Hon. Robert Mackay, George V. Hastings, Abner Kingman, R. M. Ballantyne, Tancrede Bienvenu, J. K. L. Ross, John Carson.

Secretary—F. E. Bray. Assistant Secretary, R. Neilson. Treasurer, T. F. McNally.

At the annual meeting of the Saskatchewan Investment and Trust Company, held at Saskatoon this month, it was decided to re-organize the company under a different name. The directors of the company are: N. G. Boggs, president; Hon. Chas. Littleton, London, England; D. G. Stephenson, London, England; A. J. Adamson, president Western Trust Company, Winnipeg; and J. G. Turriff, M.P., Regina; W. H. Clare, manager.

The London Financial Times, under the heading, "A Canadian Job Lot," comments on the offer of the Canadian Industrial Development Company to sell 100,000 dollar shares of Nakamun Asphalt and Oil Company at three shillings, remarking on the extent of the advertising. It says that evidence of the value of the properties is extremely meagre. Though asphalt had been found, it would appear local investors were chary of the proposition, which did not look attractive to the innocent British investor.

A modern double-track bridge across the South Saskatchewan River at Medicine Hat has been completed by the Canadian Pacific Railway. The work was done under the supervision of Mr. P. B. Motley, chief engineer of bridges, with Mr. C. R. Turner as resident inspector. Mr A. W. Starr was in charge for the contractors, the Canadian Bridge Company, Limited.

Fort William real estate men have formed an association. The objects are to promote the growth, prosperity and industrial welfare of the city of Fort William. Mr. J. H. Perry has been elected president, and Mr. J. P. Kenny secretary. The local board will be affiliated with the National association.

The Owen Sound Furniture Company, Limited, has changed its name to that of the Owen Sound Chair Company, Limited.

THE LAKE SUPERIOR CORPORATION

Mr. J. Frater Taylor, vice-president of the Lake Superior Corporation, made the following remarks at the annual meeting of the corporation, held in Camden, New Jersey:

Gentlemen,—We, as directors, are glad to meet you here to-day, particularly so as we have a favorable report to present. This time I think you will agree that we have been able to lay a report before you which shows that distinct progress has been made. It is interesting to glance over our activities of the past four years, and to see briefly what has been done during that period, and to say a few words as to the outlook. Four years ago we had at Sault Ste. Marie and at Sudbury, railways hopelessly incomplete, running to nowhere, and we had a steel plant, which was only the nucleus of a plant, and which consisted of two small furnaces, able to produce 500 tons of pig iron, and a rail mill able to turn out 700 tons of rails per day. During the period I refer to we have had visits from several of our more important shareholders, and they will appreciate more than my words will be able to convey to you what has been accomplished recently at the "Soo" and elsewhere, by way of development of the properties of the Lake Superior Corporation, and its subsidiaries, but there are two or three outstanding features of development to which I would like to call your special attention. I have told you what existed some four years ago, and I am going to tell you what we have now.

Our report indicates to you how we fared in the matter of our railways. The Algoma Central Railway is within a short time of completion. On the 1st of January next, it will be in operation as far as Oba, which is the junction point with the Canadian Northern Railway, one of the three great trans-continental railways of Canada, and a few months later it will have pushed its way to its junction with the Grand Trunk Pacific, thus opening up vast possibilities for traffic. At Sudbury we have also been busy with railway construction, and the Algoma Eastern Railway will be completed, also for operation, at the beginning of next year. There are great possibilities in connection with both railroads, and the traffic immediately in sight for the Algoma Eastern Railway is expected to bear very prompt results. Both railways have been completely equipped so far as their immediate requirements in terminal facilities are concerned, and both have funds in hand for their further equipment in this direction. At Sault Ste. Marie and at Little Current, the respective terminals of the Algoma Central and the Algoma Eastern Railways, the usual railway terminal facilities have been provided, but in addition, up-to-date coal docks and commercial docks with all modern unloading appliances are being built. At Michipicoten Harbor, on the Algoma Central Railway, provision has been made for ore and coal docks. It is expected that coal will be handled in large quantities for at least two of the trans-continental railways, Michipicoten being a handy port for that purpose. Activities have commenced on the land grant of the Algoma Central. The Lake Superior Paper Co. have established themselves at the Soo with a most up-to-date 200-ton paper mill, and in addition to an interest in the equity of this business, we have secured to our railway, stumpage dues or royalties on all woods for pulp-making purposes cut from land grant lands.

In addition to our railways, we have had responsibilities in the matter of our public utilities. We had a losing proposition in the street railways, but they now have turned the corner, and are doing well.

We now turn to the most prominent of our own subsidiary companies, namely, the Algoma Steel Corporation. I think that we have endeavored to convey briefly in this, and in other reports what has been done, but the magnitude of the work which has been carried on, and brought to a head can only be fully appreciated by those who have visited the works, and I can only repeat at this juncture an invitation to the shareholders to come and see for themselves what has been accomplished. Not only did we start off with a view to enlarging the blast furnace end of the plant, not only have we built coke ovens, obviating the necessity of importing coke, and increased our output of pig iron by 500 tons a day, but we have built more open-hearth furnaces, have put down a most up-to-date power plant, second to none on this continent, and further, since our meeting here last year, we have put in a new blooming mill, and have remodeled our rail mills to the extent that we now have 1.200 tons of rails per day in sight, against 700 referred to before, and have, of course, in addition, the product of our merchant mills, so that in effect the finished capacity of the plant is twice as great as it was four years ago. All this expenditure has absorbed a great deal of money.

In looking over the records of the four-year period under review, I find that altogether, outside of transfers from one subsidiary company to another, on capital account, a sum of more than $26,000,000 in cash has been spent. in connection with the steel plants and railways, and our story is not yet told. I am sure you will agree with me when I say that any business of the magnitude of the Algoma Steel Corporation must continue to progress, and its progress must of necessity involve the spending of more money on capital account. Your directors have, however, endeavored to pursue a cautious policy. We have waited as a matter of fact until we have obtained the expected results from our first expenditure, and when I tell you that we have arrived within a few cents per ton of our expected costs for steel rails, you will, I think, agree that our conclusions have successfully reached the contemplated point.

As I have said, we are endeavoring to pursue a cautious policy, but we are alive to the necessity of developing the plant to keep up with the growth of Canada. It is true that at the moment there is something of a lull, particularly so far as finance is concerned, but our particular business is one which cannot have any element of slackness in it for several years to come. Obviously, with the continued and increasing acreage under cultivation in the West, with the development of the country, and with the opening of it up by the great railroads, our industry is one which can reasonably be regarded as being safe in the matter of demand. Your directors have under consideration an enlargement of the plant, which will enable us to produce, subject to proper tariff protection, an alternative tonnage to steel rails. Canada is absorbing steel in other directions in large quantities. Big buildings are being constructed, large bridges are being erected, and we propose to have a share of this business, and to cater generally in the direction in which Canada's growth and demand lies.

I do not wish to occupy much more time with my comments on the Algoma Steel Corporation's business, but I cannot help reminding you gentlemen that what was an unbalanced proposition some years ago, is now a balanced one, in so far as its operation and its raw material are concerned. The Steel Corporation owns its own coal mines, both Pocohontas and Cannelton, and owns its own limestone quarries, and also possesses considerable quantities of ore in Canada. We have been busily endeavoring to overcome some of the difficulties attendant on the use of Canadian ores. We have had high sulphur to contend with, but fortunately at our Magpie Mine our efforts are likely to prove successful, and by successful, I mean commercially successful, so that for our open-hearth furnaces at the Steel plant, and any development thereof, we shall be exceedingly well covered. so far as ore is concerned, for the making of basic pig iron.

There is one thing further which I wish to say, and it is this: In dealing with such problems as the treatment of the leaner ores, we consider that we are entitled to all assistance possible from the government, and we rather think that the Dominion Government will be inclined to listen to our representations. It is vital to our minds that the government should realize its responsibility in the development of its iron and other mineral resources, as much as in the conservation and uses of its woods and forests, and if Ontario is not possessed of the rich ores that are found in Minnesota and in the United States, there is nevertheless an abundance of ore of a kind, which can be made commercially useful, and which, particularly with government assistance, can be made readily available.

There is another point, so far as the government is concerned, and it is that they must still take a decided interest in the steel trade in Canada. Some time ago, in the matter of bounties. their assistance was withdrawn. I do not suggest that those particular bounties should be renewed. but I do suggest that adequate protection should be afforded to the steel trade in Canada, which is one of the basic industries of the country, and I suggest further that their assistance should take the shape of affording adequate tariff protection, and of encouraging the various branches of steelmaking which do not at present exist, and strengthening those which do exist. I cannot help feeling, as one deeply interested in the steel business in Canada that a great and vital mistake was made. and is being made in not affording an adequate tariff for the purpose of protecting such as the rod-making industry, and I hope that in the near future, this will be remedied.

I think, gentlemen, that I have taken up sufficient of your time with these few remarks. If there are any questions which any shareholder would like to ask, I shall be very glad to answer same to the best of my ability.

At the above meeting, the following were elected Directors:—W. K. Whigham, London; Frederick McOwen, Philadelphia; Herbert Coppell, John T. Terry and Jos. S. Dale, New York; W. E. Stavert, D. C. Newton, Montreal; Thomas Gibson, Toronto; J. Frater Taylor, W. C. Franz, Sault Ste. Marie, Ont.; and A. H. Chitty and James Hawson, Sault Ste. Marie. Ont.

The following Officers were elected:—President. J. Frater Taylor; Chairman of the Board. W. K. Whigham; Vice-Presidents. H. M. Coppell and W. C. Franz; Secretary, Thomas Gibson; Assistant Secretary, Alex. Taylor; Treasurer, A. H. Chitty.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

Pembroke, Ontario.

$17,955.98	Town of Pembroke 4½% Bonds, namely:—
8,500.00	For Extension of Water Works System maturing 20 years from September 6th, 1912, interest payable annually at Bank of Ottawa, here.

COMMERCE AT HEAD OF THE LAKES.

Another tribute to the growing importance of the head of the lakes as a shipbuilding point is the fact that the Canadian Pacific Railway Company has contracted with the Western Dry Dock and Shipbuilding Company, to overhaul two of their lake passenger vessels, the Alberta and the Athabasca. The cost of the repairs to these two vessels will be about $100,000.

Plans and specifications for the plant of the Conley Frog and Switch Company, to be located just north of Fort William's city limits, have been received at the office of Messrs. G. R. Duncan and Company. Tenders will be called for in the course of a few days. It is the intention of the company to have their works in operation by next May. At the commencement between 50 and 100 hands will be employed.

The plans and specifications of Fort William's customs house, have been in the hands of the city clerk for some time. The site has been selected. The building will be of brick and concrete.

The board of grain commissioners of Canada in their weekly report of September 18th, show grain receipts at the head of the lakes as totalling 4,393,540 bushels; shipments outward 1,343,685 bushels; in store 8,508,571 bushels.

Senator N. Curry, the president of the Canadian Car and Foundry Company, accompanied by other members of the company, while in Fort William a few days ago inspecting their big plant, which is rapidly approaching completion, stated they would be ready for business at their Fort William plant in three months time.

Among the exhibits at the West Algoma Agricultural Association's exhibition at Fort William, was that of Mr. J. M. Munro, with a display of 2,000 pounds of native honey. The bee farm of Mr. Munro is located some 20 miles from Fort William. The country surrounding Fort William is suited for bee keeping, the whole of the district being covered with wild clover which grows as a perennial, which provides most suitable bee pasture.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

MANY FEEDERS TO CANADIAN PACIFIC REVENUE

Consideration Given to Formation of Steamship Company —Mines, Water Powers and Hotels

"A small portion of the earnings of the Atlantic and Pacific steamship lines were, during the past few years, included in the net revenue, having been transferred instead to the steamship replacement fund," said Sir Thomas Shaughnessy when dealing with the earnings of the Canadian Pacific Railway steamships. "As this fund now approximates the entire cost of the original Atlantic fleet, it is neither necessary nor desirable to increase it by liberal appropriations hereafter. The Atlantic fleet has, in recent years, been supplemented by the acquisition of eighteen steamships with a gross tonnage of 146,361 tons. The earnings of these steamships have been utilized in reducing their cost to the company, which now stands at about $2,750,000, including temporarily in advances and investments pending a determination of policy.

"The trans-Pacific steamships, while useful as contributors of traffic to the railway system, have never been particularly profitable. And, indeed, the Atlantic ocean traffic varies considerably from year to year in volume and value, but I think that we may, with safety, anticipate an annual net revenue of $2,000,000 from the trans-Atlantic and trans-Pacific steamship lines after making due provision for interest on their cost and for depreciation.

Considering Steamship Company.

"The formation of a steamship company to acquire the vessels, whose cost has not been capitalized, to charter or lease those purchased with the proceeds of securities, and to provide means for the construction or purchase from time to time of additional vessels of a suitable type to maintain the character of the fleet and to strengthen its earning power, is receiving some consideration.

"Most of the company's hotels are yielding a fair return, but some of them, provided as necessary accessories to the tourist traffic, during the summer months, are operated at a loss. However, on the whole, the hotel system is reasonably profitable, and hereafter the net profits, which have been used in the past for additions and improvements, will be treated as special income.

"Legacies that came with acquired lines, the utilization of some of the coal lands, and other circumstances have involved the company in a number of enterprises that do not ordinarily come within the province of a railway company. There are the mining, smelting and water power interests, of considerable value as compared with what they cost, from which the revenue in the current year will be approximately $250,000; coal mines at Bankhead, Hosmer and Lethbridge, from which was received in the year upwards of $300,000, and the lumber mill at Bull River, in British Columbia, where ties and timber are manufactured for the company's use, a doubtful commercial enterprise, excepting in so far as it serves to keep prices within reasonable bounds.

Segregate Railway Earnings Proper.

"Railway companies in the United States are required to segregate their railway earnings proper and their income from other sources, and, while there is as yet no similar legal requirement in Canada, we have recently made such a change in our system of accounting as to practically conform to the practice of other railway companies, but we still include in the earnings of the railway the returns from the commercial telegraph system and the Pacific coast steamships. In the next annual report the revenue from these sources will be treated as special income, and, of course, there will be a corresponding reduction in the gross and net earnings of the railway."

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt station for the week ended October 3rd, 1913:—Cobalt Lake Mines, 100,471; Crown Reserve Mines, 69,426; Hudson Bay Mines, 127,918; Alladi Reduction Company, 141,634; McKinley-Darragh Mines, 201,502; La Rose Mines, 651,039; Coniagas Reduction Company, 415,709; total, 1,707,699. The total shipments since January 1st are now 31,267,391 pounds, or 15,647 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

WINNIPEG'S BUSINESS BUILDINGS

The substantial business buildings that have been constructed in Winnipeg are commented upon by all visitors to the Manitoba capital. In 1910 there were nineteen buildings erected at a cost of over $100,000 each. In 1911 twenty-two buildings were put up each costing over $100,000. In 1912 the big buildings costing over $100,000 each numbered twenty-five, and for the eight months of this year Winnipeg has completed sixteen buildings at a cost of over $100,000 each. This year Winnipeg has had three buildings that have cost over $500,000 each, while last year the government law courts was the only permit that exceeded the half million mark. In 1911 the Grand Trunk Pacific Hotel "Fort Garry," was the most costly building erected, calling for an expenditure of $1,000,000, and in 1910 the two largest buildings in the permits were the Bank of Montreal, $950,000, and the Canadian Bank of Commerce, $800,000.

◆

MONTREAL'S FLOATING DOCK DUES

The dues of the Montreal floating ship dock have been announced. They are as follows:—

Gross Reg. Tons.	First day.	Commencing 24 hrs. after vessel is raised. Following days or fractions thereof each.
Up to 1,000	$ 300 00	$ 80 00
1,000— 1,199	340 00	95 00
1,200— 1,399	365 00	95 00
1,400— 1,599	390 00	95 00
1,600— 1,799	415 00	110 00
1,800— 1,999	450 00	110 00
2,000— 2,249	475 00	110 00
2,250— 2,499	500 00	125 00
2,500— 2,749	525 00	125 00
2,750— 2,999	550 00	125 00
3,000— 3,499	575 00	150 00
3,500— 3,999	600 00	150 00
4,000— 4,499	625 00	150 00
4,500— 4,999	650 00	175 00
5,000— 5,499	700 00	175 00
5,500— 5,999	750 00	200 00
6,000— 6,749	875 00	200 00
6,750— 7,499	950 00	225 00
7,500— 8,249	1,025 00	225 00
8,250— 8,999	1,100 00	250 00
9,000— 9,999	1,200 00	275 00
10,000—10,999	1,300 00	300 00
11,000—11,999	1,400 00	350 00
12,000—12,999	1,500 00	400 00
13,000—13,999	1,600 00	450 00
14,000—14,999	1,700 00	500 00
15,000—15,999	1,800 00	550 00
16,000—16,999	1,950 00	600 00
17,000—17,999	2,050 00	650 00
18,000—18,999	2,150 00	700 00
19,000—19,999	2,250 00	750 00
20,000—20,999	2,350 00	850 00
21,000—21,999	2,450 00	950 00
22,000—22,999	2,550 00	1,050 00
23,000—23,999	2,650 00	1,150 00
24,000—25,000	2.750 00	1,250 00

There are a large number of regulations to be observed in connection with the dock. The dues are exclusive of any towage and men for shifting the vessel, shifting keel blocks, bilge blocks, or shores for painting or repairs, but inclusive of shoring, of bilge blocks and providing stages for cleaning the bottom. No rebate whatever will be allowed from the authorized tariff.

In cases involving abnormal risks when docking or when docking vessels with considerable cargo, the risk shall be borne by the owners, who shall also be liable for any damage thereby ensuing to the ship-dock or ship-dock properties, and the company may exact sufficient bond or other guarantee protecting them from all loss caused by such docking; and the extra cost of preparing the ship-dock for the reception of such a ship plus 20 per cent. is to be paid in addition to the tariff rates.

In emergencies liable to endanger the ship or property of the Canadian Vickers Company and thereby rendering it advisable to undock the ship, or in the event of a fire occurring on a ship or on the ship-dock, the company have the right to float the ship and cause her to be removed at once from the ship-dock. If the fire occurs on board the ship, or is due to action on part of the ship's officers or crew, the cost of any work done to enable the ship to be undocked, and any damage done to the property of the company, will be charged to the owners.

STOCKS AND BONDS TABLE—NOTES

(e) Ex-Rights. (h) Half-yearly. (u) Unlisted.

‡ Quarterly.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

** Trethewey pays no regular dividend. They have paid:—1906, 4%: 1907, 4%: 1908, 15%: 1909, 25%: 1910, 10%; 1911, 20%: 1912, 10%.

Montreal prices (close Thursday) furnished by Burnett & Company, 12 St. Sacrament Street Montreal.

* $20,000 of this was redeemed April 1st, 1913.

Figures in brackets indicate in footnotes date on which books close for dividends, etc.
(1) Oct. 6-15. (2) Oct. 13-31 (3) Nov. 1-17

WINNIPEG UNDERWRITERS HEAR ABOUT COMPENSATION.

At the monthly meeting of the Winnipeg Life Underwriters' Association, Mr. R. M. Dennistoun, K.C., gave an address on the "Workmen's Compensation Act." He stated that it was one of the political topics in many countries. The principle is that the working man, who works under stress or fear of accident, is entitled to receive some compensation when an accident happens—or that his heirs are entitled to it if he is killed. He must be sustained at the expense of the state when he becomes too old to work at his dangerous vocation. Mr. Dennistoun stated that in the future it was likely that the matter would be taken out of the hands of the insurance companies and be under government control.

ONTARIO WANTS ANOTHER PULP MILL.

The Ontario government is inviting tenders until December 31, for the right to cut pulpwood on a certain area situated on the Metagami River in the district of Temiskaming.

Tenderers are to state the amount they are prepared to pay as bonus in addition to the Crown dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, for the right to operate a pulp mill and a paper mill on or near the area referred to. The tenderers are required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

ARMY OF BOND SALESMEN

They Will Offer Interborough Securities — British Canadian Lumber Company's Financing

Over four hundred bond salesmen, representing the syndicate which has purchased $30,000,000 of the new Interborough Rapid Transit first and refunding mortgage 5 per cent. bonds, met at New York last week, and listened to President T. P. Shonts and General Manager Frank T. Hedley, of the Interborough Rapid Transit Company, talk on the features of the operating contracts of the city, the operating efficiency of the Interborough system, and the value back of the bonds. Mr. G. M. Lane and Mr. N. T. Hallowell, of Lee, Higginson and Company, and Mr. Samuel L. Fuller, of Kissell, Kinnicutt and Company, emphasized the strong points in these new bonds. Auditor Gaynor, of the Interborough, explained the figures on which the estimates of earnings for the enlarged rapid transit system are based.

Part of these bonds will be offered in Canada by Messrs. N. W. Harris and Company.

Want More Frequent Reports.

"Some of our English people made mistakes in trying to manage things too much from England, and no doubt some of the Canadians made blunders here, but on the whole the British investors were pleased with Canadian investments," stated Mr. C. Ponsonby, a director of a British Canadian firm, at Montreal. "I think there is one thing in which Canadian business firms might do themselves good, and at the same time confer a great advantage upon the British investors. That is by giving more information from time to time as to the progress of business by the issue of periodical reports showing exactly what the businesses are doing, so far as it can be done without injury or detriment to the undertaking."

Lumber Company's Financing.

The directors of the British Canadian Lumber Corporation, Limited, have found that the $1,500,000 originally provided for the mills and working capital was insufficient, and have therefore authorized a bond issue of $3,500,000, which bonds are to be deposited with a trust company as security for a note issue for the term of three years, amounting to $3,000,000. These notes are to be in denominations of $500 or multiple thereof, and are redeemable at $107 and carry interest at the rate of 8 per cent. per annum, payable half-yearly.

Although the note issue has been made only a few days the shareholders have already subscribed for over $1,000,000, and as the board asked for a minimum of this amount, which is all that is necessary at the present time to make the last payment of $700,000 on their standing timber ($200,000 due 15th November and $500,000 1st of January, 1914), and the balance $300,000, together with the semi-liquid assets of the corporation amounting to $1,400,000 will enable the company to pay off all outstanding current liabilities and give them a working capital of $700,000.

ONLY BUCCANEERS DISCREDIT BONDS.

"Most of the discussion and criticism relating to bond issues in Canada is created by buccaneers, who hope to ruin the credit of the cities, with a view to beating down the price of debentures for their own benefit. The bonds of Canadian cities and towns are good, and it should not be necessary to make a great discount, as has been done in the past," said Mr. D. R. Wilkie, head of the Imperial Bank and president of the Bankers' Association of Canada, in an interview at Edmonton.

"While western Canada has borrowed large sums of money from eastern Canada and Great Britain," Mr. Wilkie continued, "from what I can see, these loans have been fully justified, and with the marketing of the enormous crops now being threshed, there is every reason to believe that money will be considerably easier than what it has been during the last eight to ten months.

◆

An English syndicate recently offered the sum of $1,250,000 for the Sultana gold mine in the Kenora district of Ontario, a property of some 46 acres, which has produced according to government reports over $600,000 worth of gold.

Plans have been completed by the Minneapolis, St. Paul and Sault Ste. Marie Railway Company for the construction of a large ore dock on the lakes, to take care of the increased traffic to Canadian steel mills; especially at the Soo. It will cost more than $1,000,000.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Estevan, Sask.—By-laws approximating $46,000, have been carried by the taxpayers.

Scott, Sask.—Tenders are invited for $40,040 5½ and 6 per cent. 20 and 30-year debentures. J. N. Forest, secretary-treasurer.

Regina, Sask.—The Regina council has approved of a by-law providing for the issue of $119,427 of debentures for concrete sidewalk construction.

Sutherland, Sask.—Offers are invited for $200,000 debentures. S. Appleby, secretary-treasurer. (Official advertisement appears on another page.)

Chauvin, Alta.—Up to October 30th, for $1,800 5 per cent. 10-year debentures. R. A. Cowan, secretary-treasurer. (Official advertisement appears on another page.)

Brantford, Ont.—Brantford city council has decided to submit a by-law to the ratepayers on January 1, to provide for the erection of either a $45,000 or $60,000 school.

West Vancouver, B.C.—Tenders are invited for $13,200 5 per cent. 40-years debentures. G. H. Peake, Hollyburn P. O. (Official advertisement appears on another page.)

Pembroke, Ont.—Up to October 15th, for $17,955 debentures. Offers to be addressed to W. H. Bromley. A. J. Fortier, town clerk. (Official advertisement appears on another page.)

Saskatchewan.—The following villages have been empowered to borrow money:—Laura, $700. Secretary-treasurer, J. H. Shillington, Laura; Waseca, $700. Secretary-treasurer, Henry Rowed, Sr., Waseca; Manor, $2,000. Secretary-treasurer, J. D. Brooksmith, Manor; Edenwold, $1,500. Secretary-treasurer, J. Mohl, Edenwold.

CANADIAN INVESTMENTS IN WEST INDIES

Why should not Canadian capital find outlet for its investments in the development propositions of the British West Indies and British Guiana?

A private report to the Department of Trade and Commerce points out that there are in British Guiana excellent opportunities for investment if done on a liberal scale and in an intelligent manner. United States capitalists have already commenced to realize the potentialities of this colony. A New York company drained and irrigated 5,000 acres of virgin savannah land, put it under rice, and by intelligent working with machinery, last year realized a crop of exceptional quality. The company has an option on another 10,000 acres which it is intended to empolder by sections.

The high price of meat is attracting stock raisers to the grazing possibilities there. One large ranch of 15,000 acres, rented from the government, with rich grass and well watered, has been stocked by a United States investor, and he has also erected a packing plant on the property to dispose of his product.

The land along the rivers is capable of growing almost anything and can be secured very reasonably. The price of cocoanuts, which has doubled in the past decade, has induced their cultivation which is attended by excellent profits.

DEBENTURES AWARDED

Steelton, Ont.—$40,000 5 per cent. 10-years, to Dominion Securities Corporation, Toronto

Wingham, Ont.—$13,500 5 per cent. 25 and 30-years, to Dominion Securities Corporation.

Belleville, Ont.—$50,000 5 per cent. 30-years, to Messrs. Wood, Gundy and Company, Toronto.

Bassano, Alta.—$20,000 6 per cent. 30-years, to Messrs. C. H. Burgess and Company, Toronto.

Windsor, Ont.—$34,441 5 per cent. 20 instalment, to Messrs. Wood, Gundy and Company, Toronto.

Windsor, Ont.—$116,000 5 per cent. 10 instalments, to Messrs. Wood, Gundy and Company, Toronto.

North Grimsby Township, Ont.—$10,000 6 per cent. 20-years, to Messrs. C. H. Burgess and Company, Toronto.

West Tilbury Township, Ont.—$5,165 6 per cent. 10-years, to Messrs. C. H. Burgess and Company, Toronto.

CONTROL OF MUNICIPAL BONDS

The movement in Canada, especially in the western provinces, to organize a central authority for the supervision of municipal loans, is making headway. The suggestion in this country has gone only as far as provincial supervision. There appears a fairly unanimous feeling in favor of, say, a Saskatchewan local government board to pass upon municipal loans in Saskatchewan, an Alberta board for that province, and so on. Mr. John Coles, a well-known London financier and director of the Hudson's Bay Company, has suggested that the proposal should be carried a step farther by the creation of a central authority for the whole of Canada. One federal board, rather than several provincial authorities, would deal with municipal loans, just as does the local government board in Great Britain, the head of which is a member of the Cabinet. The London Economist discusses this suggestion and says: "The provincial authorities in Canada do not command better credit or more respect than better class municipalities. The fact, for example, that the finance of Toronto was controlled by the Ontario government, or that the finance of Winnipeg was controlled by Manitoba, or that of Vancouver by British Columbia, would not necessarily add very much to the security of these municipal loans in the eyes of a judicious investor. Some of the western provinces, such as Alberta, are not on a much better financial footing than the growing towns of the west."

While *The Monetary Times* thinks that this reference to Alberta's credit is quite unfair, there is considerable truth in the general assertion as to the respective popularity of Canadian provincial and municipal loans in London. Sir Frederick Taylor drew attention to this in *The Monetary Times Annual Review* early this year, when he said:—

"It seems curious—indeed, anomalous—to all Canadians that the provinces cannot borrow on better terms than the principal cities of the Dominion, but the fact remains that Canadian Provincial Government and the more important municipal securities are classed by the London market alike as to intrinsic merit—otherwise price. The explanation lies in part in the fact that the term 'Province' in Great Britain is a vague term; i.e., when reference is made to 'The Provinces' in England it means the district or territory outside of London other than Wales. The fact seems to be ignored, or at least unappreciated, that prior to 1867 the various provinces of Canada were self-governing entities, and that their position was strengthened, not weakened, by Confederation."

It is, perhaps, but a matter of time and education before the securities of the provinces of Canada will be on a much better plane in the British market. With the backing of the provincial government, there can be no doubt of the security of the issues. The Canadian provinces have not yet attained the position they deserve in the British markets, and, simple as it may sound, the use of the word province seems to have been one of the chief stumbling-blocks.

The entire discussion respecting some sort of central supervision of municipal loans arises from the desire of Canadian municipalities to borrow cheaply in the London market. There has always to be considered prevailing market conditions, but aside from that factor, the higher the credit of the borrower, the better chances will that borrower have. If a central board has approved the issue of a certain municipal loan, the credit of the municipality would be much enhanced in the eyes of the British investor. He knows what a stern master is the British local government board, and he would expect the Canadian federal board to copy their example.

Naturally, there will be many voices against this proposal. The municipalities generally may be expected to favor supervision as a general principle, but they will probably want that supervision confined to their province. The provinces will probably agree to undertake the task, but they will not desire any interference from the Dominion government. The old jealousies of provincial versus federal jurisdiction might appear again. But it must be borne in mind that the only reason for the various proposals under review is to help the credit of Canadian municipalities. By far the greatest amounts are borrowed by them, in London. The opinion of London must, therefore, be given consideration. *The Monetary Times* favors the supervision of Canadian municipal issues, because it thinks that Canadian municipalities will be greatly helped thereby. For the same reason it favors also the one central board rather than many provincial boards. It would seem quite possible to form a federal commission, with proper representation from each province. This would appeal to the British investor, remove the possibility of too much local color in the supervision, and delete to some extent the bogey of politics. The provincial supervision of municipal loans, we fear, will help matters but little. Why not try the larger, and what many consider the better scheme for assisting Canada's municipal borrowers? They must be heavy borrowers for many years to come.

TWO JOHNS, SAM, AND BUSINESS

While it is admitted that John Bull's privilege is to grumble about everything, it would seem the privilege of John Canuck and Uncle Sam to complain, usually without protest, of John Bull's poor business methods on this continent. Actually, there is little substance, but much habit, in the grumbling of any of the three parties. The old cry has been raised, in Washington this time, that surprise was felt there and in New York at the "slowness of British manufacturers" in recognizing the majority of the lower duties imposed in the Underwood bill now in force. Inquiries made by the London Times do not support that view.

The Imperial Board of Trade has had a number of communications from merchants and manufacturers for exact information with regard to the changes made in the schedules, and no doubt is entertained from that quarter of the alertness of British traders and their wish to take the fullest advantage of the opportunities offered to them. Similarly, it is clear from inquiries made at the London Chamber of Commerce that the liveliest interest is taken in the new tariff by members of that body. Ever since the introduction of the bill merchants and manufacturers have been keen to learn what duties were going to be levied on commodities in which they were particularly interested.

It is known that a number of British firms made tentative arrangements some time ago for opening offices in the United States with a view to possible developments, while others sent representatives there.

The explanation of the impression apparently entertained in certain commercial circles on this side of the Atlantic, says the Times, may lie partly, in fact, that not a few British manufacturers have order books already filled, and say it is mere waste of time taking orders which cannot be executed.

This is a point we in Canada sometimes overlook in analyzing the question, Why do not British firms get more business in the Dominion? Certainly, they are not getting as much as they could, but they no doubt have good reasons, and there are other markets, too. Two matters should however, engage their serious attention. One is the necessity for paving the way now for the trade with Canada which they may need in future years. Otherwise, when this market is needed perhaps to take the place of one of their other markets, British manufacturers may find their United States competitors have almost a monopoly here, and one which will be hard to dent. The other point is that more care should be given by them to small business matters, such as the correct addressing of letters, the use of the proper amount of postage stamps, quotations in our currency, and so on. They may be trivial things, but overlooked, they cause immense annoyance. *The Monetary Times* saw a letter from an English house, the other day (seeking business in Canada), on which 32 cents postage charges had to be paid by the recipient, because the letter was understamped. It was a simple oversight, but the avoidance of such incidents makes the wheels of trade turn smoothly and help to bring the business.

TORONTO STREET RAILWAY SITUATION

For a month or two now, the ratepayers of Toronto will have an opportunity to consider the proposal to purchase the street railway and the Toronto Electric Light Company, and to digest the experts' reports on the matter. At this stage, opinion is sharply divided as to the wisdom of purchase. The citizens later will decide the matter by vote. One question arising is whether or not it is better to buy now or a few years hence, when the street railway franchise expires. If the citizens mean business, the price is fair and the bargain solves certain problems, there seems little to be gained by delay.

Toronto is probably getting one of the best street car services on this continent, provided by a well-managed company. *The Monetary Times* doubts whether the civic authorities can give a better service without the expenditure of very large sums, and without loading the ratepayers with additional tax burdens. But Toronto folks are hemmed in by lack of suburban transportation. The city is confined to a comparatively small area, where land is selling at high, and in some cases unreasonable, prices. Hundreds of acres of good building land in healthy suburbs remain idle, within a 25-mile radius of Toronto. It is not available to the workers of the city because the steam roads fail to give an adequate suburban service, and because the radial lines are their own masters, and besides have no entrance to the heart of the city. Solution of the radial problem, therefore, seems to be a very important part of the transportation situation. The city proper and the surrounding areas are divided by lack of transportation facilities. In short, the people of Toronto are compelled to live in a metropolitan saucer because a tangle of franchises and poor transportation dictate so. Is not that a serious obstacle to the Greater Toronto, about which we have heard so much?

Mayor Hocken has said that if his proposed deal goes through, it will clean up the entire franchise situation. On this point, he stated this week in council:—

"There was a further consideration in my mind in trying to put the transportation system of the city under public ownership, and that was to make it possible to admit the radial railways which might come to the borders of our city from any direction. For twenty years past the advisability of getting radial railways to the centre of the city has been discussed almost continuously. The accomplishment of this highly desirable object has been prevented by the character of the franchise held by the Toronto Railway Company, and only by the acquisition of that franchise by the municipality can we succeed for the next eight years in bringing about this much-desired end."

That may be so, but Mayor Hocken also said, in discussing some of the other franchises: "At some time or other, these ends of railways and franchises must be dealt with, if the city of Toronto is to have an adequate railway system." Why not deal with the entire matter now, instead of leaving part of it until "Some time or other"? Toronto has suffered badly in the past by dealing with only part of its municipal matters, by rushing the easy sections of its problems and leaving the difficult ones for "some time or other." While several cities have been called to book for looking too far into the future and financing that way, Toronto has failed to look ahead sufficiently. Its municipal governors have, generally speaking, shown little capacity for dealing with the city's business outside of current years.

The ratepayers will probably go into the matter carefully, and the mayor will undoubtedly see that all those who care to have them, will be provided with copies of the various expert reports. They cannot expect to be guided by the partisan arguments, both for and against, which have so misrepresented the merits of the proposals. The deal is a matter for individual consideration, and the individual needs to look at all the cards in the pack held by the mayor, the board of control and the city council.

Finally, the compilation of the experts' reports on such an intricate question, with so many important phases, in but a few weeks, may be considered a modern miracle. The opinions which have been formed on that report, in but a few hours, are even greater miracles.

SPANISH RIVER REPORT

A brief glance even at the report and balance sheet of the Spanish River Pulp and Paper Mills, Limited, for the fiscal year ended June 30th, 1913, seems to indicate that the directors have had a pretty strenuous time in steering the financial craft. Undoubtedly, a hostile attitude in the public mind was created by the failure of the company to make a statement or to issue its report in reply to continuous rumors. The report appeared three and a half months after the close of the company's year. Judging the report on its merits and by its statements, *The Monetary Times* is inclined to agree with the company's vice-president and managing director, Mr. T. H. Watson, who says that "the figures may prove disappointing to some of the shareholders."

Shareholders of the company will probably draw a number of conclusions from the figures in the balance sheet. Among the assets, for instance, are deferred charges of $536,650, including commissions, discounts and expenses in connection with issues of securities, an item amounting to $412,345. One could almost forgive the country shareholder were he to ask for an itemized account. It is better, however, to have the amount stated in cold type, instead of having it hidden somewhere in the balance sheet, as has been the case with more than one company.

No provision has been made during the year for depreciation. In the previous year, $39,328 represented renewals and depreciation. The directors think that ample provision to cover depreciation is made through the operation of sinking fund on the bonds. That may be all right as a temporary measure, but it is doubtful as a permanent practice. If the shareholders have enough patience and faith, and those who are backing the company in England have enough of the same assets, there is hope. The company have had an unfortunate time, but they have probably learned something by their experience, and that fact is a valuable asset. Even so, it might be a good idea to knock off a few ciphers from the company's capitalization.

Those who judge without bias will think that too much criticism has been aimed at the promoters and late financiers of the company. They had to navigate, during the past few months, a financial vessel which in other hands might have crashed upon the rocks, instead of which it is in sufficiently good shape to appeal to cautious English interests, who now control the situation. The company has been engaged with organization difficulties and the obstacles experienced in building a new industry. Much of the hard work necessary to meet these has been accomplished. More money was needed, and the British interests who advanced it at the same time obtained control. Finally, the balance sheet has some bright spots. With all the plant working and other favorable conditions, next year's statement should look better. The present statement undoubtedly has been painted as black as possible. In that fact, there is consolation for the shareholders. Besides, when the company pulls out of the slough, the pull will look more spectacular.

SMALL CHANGE

Monday—Give thanks.

* * * *

About the only thing Lord Northcliffe did not tell Canada, was why money is tight.

* * * *

On the decision of a Montreal law case defining "dry rot" hangs $91,802—Damocles' sword up-to-date.

* * *

Montreal paper says: "New era dawns in Celestial Empire." Must have been bargain sales of eras in China lately.

* * * *

Toronto city council refused to establish a civic trouble department. Would never be able to get a big enough staff.

* * * *

Ontario had a silver rush, Prince Edward Island has a fox rush, and now Alberta has an oil rush—and we may all land in the same ditch.

* * * *

Canadian Cereal and Milling Company had a poorer year than expected. The merger mills grind slowly, but they grind exceeding small.

* * * *

Montreal real estate firms are giving fetes, aeroplane flights and prize puzzles as business trimmings. "The prospective buyer" is certainly a person of magnetism.

* * * *

In view of flying machine activity, Admiralty have decided to surround Britain with air stations, giving the Englishman a legitimate chance to talk of his 'air cut.

* * * *

Girl in Rotterdam found proposal note in barrel of Canadian apples and will be married in British Columbia next week. A case of Northern Spies living up to their name.

* * * *

Book on cost of living was given to United States senators and baby comforters to British commoners. There is yet a chance that someone will give Controller Thomas Church, Toronto, a toy rattle.

* * * *

Mr. W. R. Houston, Toronto Stock Exchange publisher, gives his clients a lot for their money. Besides the usual quotations, we now get weather reports, personal gossip, and last week, baseball talk.

* * * *

The Vancouver Manufacturers' Association will wear a lapel button for identification purposes. Is it not time the button idea stopped? Every man has enough fancy buttons now to decorate like a Rajah.

* * * *

If, when touching the button to dynamite the Gamboa dyke, President Wilson really did say, "There, Gamboa is busted," he may expect to hear from professors at McGill, Toronto and Kingston and other Canadian points.

* * * *

The Canadian Mining and Exploration Company is said to have examined and rejected some 700 properties in United States and Canada to date. Some of them, no doubt, will soon appear in attractive dresses for the "small investor."

* * * *

A Saskatchewan municipal treasurer, in reply to inquiries of *The Monetary Times* as to tenders for bonds, says: "I have lost the names of the other bidders. Their bids were so low, they were burned forthwith." Bond brokers will undoubtedly take notice.

* * * *

If composed of $5 bills placed end to end, the line of money represented by the $56,950,229,364 world's railroad capitalization would stretch about 1,327,000 miles, or more than fifty-five times around the earth. The man who figured this must be statistically inclined.

SEVEN ISSUES LOADED UNDERWRITERS WITH $18,000,000

Canada is Again a Prominent Factor in the Overseas Market—Underwriters Are Baulking Again

(Central News financial cables are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement)

UNDERWRITERS WILL NOT TOUCH NEW LOANS.

(Special Central News cable to *The Monetary Times.*)

London, October 17th.—The condition of the general market here during the past week has been sound, with evidences of a conservative attitude toward such factors as might influence the situation. While the investment public as a whole may be said to have been reserved in its relations to the market, it is apparent that there has been a gradual absorption of the unsubscribed portions of new loans. This was accelerated to some extent, no doubt, by the joint decision of underwriters to discontinue all new capital underwritings until easier conditions prevailed.

Slackening of trade has contributed to an increase in free balances. Canadian scrip quotations have shown a hardening tendency. The recovery in Brazilian issues has been an aid in the restoration of confidence, to which the improbability of a fresh outbreak in the Balkans has contributed.

It is considered by many that stock prices have touched their bottom levels. Canadian Pacific has been feverish with recurrent forced sales. The semi-annual report failed to benefit Grand Trunk.

Discounts have been firm on the approaching Treasury bill issue, and the demand for gold from Russia has offset the return of the Bank of England.

DRIVEN INTO THE MARKET.

(Central News cable to *The Monetary Times.*)

London, October 13th.—Dealing with the subject of "Canadian municipal borrowing and the explanation of recent issues," the Times says it is not fair to conclude as a result of the recent return to the money market of Canadian municipalities that the severe admonition directed against the Dominion left her quite unregenerate.

As far as the municipalities are concerned, the suggestions for amendment have been taken seriously to heart and there is little doubt that nothing short of absolute necessity has driven them into the market. The reason for this urgent necessity does not require much seeking. The new Canadian Bank Act has prescribed alterations, including returns every two months, showing the indebtedness of municipalities to the banks.

When there are indications of tight money the banks do not offer and facilities are curtailed. The banks are probably pressing for the repayment of loans and in the circumstances there is nothing for it but to have recourse to London in a dire though temporary necessity.

The Financial News comments that underwriters were compelled to take up 80 per cent. of the Alberta loan and that the public will come in later.

BAD TIME TO MAKE NEW FLOTATIONS.

(Central News letter to *The Monetary Times.*)

London, October 11th.—The present time of uncertainty is not a particularly propitious one for new capital flotations, but these continue to pour out in an increasing stream. Canadian securities in London just now are undoubtedly regarded with much more favor after their few months' eclipse, which arose from indigestion in the investment market. But it would be impossible to deduce this improvement in popularity from the results attending the two last Canadian loan operations.

Of the attractive £3,000,000 issue by the Dominion this week it was announced that 57 per cent. had been left with the underwriters, while the City of Edmonton loan of over £900,000 was only subscribed to the extent of 50 per cent. of the total. These results following the success of the small Ottawa debenture operation indicate that investors are only gradually abandoning their post-Balkan caution, and therefore immediate investment resources are none too abundant. In spite of this the City of Vancouver has just come forward with a loan issue of nearly half a million. An emission of a million by the Province of Alberta has been arranged and presumably the Montreal loan is not far off. Additionally there are many other big borrowing operations pending in other directions. So there would seem to be some likelihood that the supply of new securities will shortly be exceeding the demand again.

Paris investors are quite as conservative as those in London, and the £4,000,000 bond issue recently made in that centre by the Brazil Railway met a very cold reception, but this may not have been unconnected with the credit crisis which Brazil seems to be passing through at the present time, and which is associated with national extravagance and the serious position of the rubber trade.

BRITISH COLUMBIA DOES NOT WANT LOAN.

*London, October 13th.—Mr. McBride has denied the report here that British Columbia will soon be in the market for a loan. "Paris and Berlin found the province well thought of, and predict an increase in investments especially in Germany." Informal discussions are taking place at the Foreign Office regarding the Oriental influx on the Pacific Coast. I am informed that notes and suggestions for restraining the entrance of Hindoos and Japanese are now passing between Ottawa and London.

MUST CURTAIL NEW LOANS.

*London, October 13th.—Regarding the restriction of municipal borrowing facilities, the financial editor of the Standard says:—"The pressing problem of the moment is how to curtail within the narrowest limits the fresh loan operations in the near future.". The Standard suggests that the public are inclined to hold back until after an issue in order to get the discount. Satisfactory responses came in some recent cases where there was no underwriting, and the terms were really tempting, hence the advice to intending borrowers to dispense with underwriting and appeal direct to the public for the smallest possible amount on the best possible terms. Failures have been by no means confined to Canada, 74 per cent. of the Buenos Ayres Lacrosse Tramways issue of £500,000 5 per cent. debentures having been left with the underwriters.

WANT BRITISH COLUMBIA FISHERIES CASE INVESTIGATED.

*London, October 13th.—It is being urged that the Board of Trade, which has judicial powers of investigation, take up the case of the British Columbia Fisheries, Limited, to ensure that the circumstances leading to the appointment of a receiver not be allowed to slip into oblivion.

Sir George Doughty and colleagues are still silent on the circumstances leading to the debacle, the effect of which has been necessarily bad with the British investor.

Another Canadian enterprise adversely discussed is Canadian Mineral Rubber Company, in view of the winding-up application by a Canadian creditor in the Illinois courts when it was reported a competing company had successfully claimed as their own the basic patents.

[It is most unlikely that the Imperial Board of Trade will take up the case of the British Columbia Fisheries.—Editor, *The Monetary Times.*]

†London, October 15th.—Criticisms of the management of the British Columbian Fisheries continue from financial writers. Astonishment is expressed at Sir George Doughty's reticence concerning the true position of the company of which his son was at the head. The general advice to shareholders is to apply for a compulsory winding-up order.

**Montreal Star* cable.

†Canadian Associated Press cable.

SOME HEALTHY MARKET SIGNS.

*London, October 13th.—The Sunday Times, which speaks authoritatively on matters of finance, in discussing the way new issues are being made by the province of Alberta and the city of Edmonton, the Vancouver Power Company, and others, which have been rushed along recently to discount on subscription price, says:—

"For a healthy market this condition is far better than the reverse, inasmuch, as when the public rushes indiscriminately to apply for all that is offered, seeds are sown for dangerous developments. The underwriters may be trusted not to go beyond their depth, and they will be the first to strike, and stop new issues when prudence calls.

"Discount is now being quoted on all recent loans, even on St. Petersburg loan, which has not yet been offered, but this will bring its cure, and meanwhile it is well to remember that all these new stocks are intrinsically good, though they have no free market at present."

INQUIRIES FOR GRAPHITE.

*London, October 14th.—The Quebec Agent-General reports many inquiries regarding graphite, mica and feldspar properties. Several English firms have sent investigators this week with a view to the possible purchase. The office reports enquiries more numerous during the first half of October than during the same period last year.

MORE FRENCH CAPITAL FOR CANADA.

*London, October 14th.—It will be interesting to Canadians to learn, particularly in view of the great need of additional capital in that country, that another French company is about to extend its commitments in the Dominion.

The company in question is Caisse Hypothecaire de Paris, which has decided to increase its capital by ten million francs, with a view to its investment in Western Canada.

The same concern has already invested 50 million francs west of Port Arthur. It is paying dividends at the rate of 6 per cent. this year.

NEW ZEALAND LOAN FAILURE CONSPICUOUS.

*London, October 15th.—The condition of the market was further reflected by the result of the New Zealand Government loan of three and a half millions sterling, fours, at 98½. The public took only 8 per cent., which compares with 45 per cent. taken in the case of the recent Canada loan.

The result is all the more remarkable because the whole New Zealand loan was to replace expiring debentures, English bondholders possessing £200,000 fives.

HOW THE UNDERWRITERS FARED.

*London, October 16th.—The seven last issues left $37,000,000 with the underwriters, of which $18,000,000 are on account of the loans of the Canadian Government, cities of Edmonton and Vancouver, the province of Alberta, and Victoria Power.

New Zealand's failure, following on the Canadian issues, has driven the underwriters of Colonial loans on the Stock Exchange to agree among themselves to refuse to underwrite further until the New Year, when it is hoped the recent issues will be digested by the public.

Similar pious resolutions of the past have always broken down in the presence of the colonial borrower offering tempting terms.

Meanwhile quite a good demand is arising for scrips of new loans at present at discounts. Western Canada Mortgage shortly offering £300,000 fives secured on mortgages and guaranteed by the Western Canada Land Company.

UNDERWRITERS POSSIBLY ARE NOT SADDLED.

†London, October 16th.—The Daily Mail says that in consequence of the New Zealand loan fiasco, of which the public took no more than 8 per cent., the underwriters have decided to refuse any more such issues for some time to come.

The Daily Telegraph, however, says there have been so many similar instances of lack of public response within the last three weeks, that it seems doubtful whether the underwriters are really being saddled with such heavy liabilities as would appear. Those with money to invest nowadays possess a good deal more inside knowledge than formerly, and there is reason to believe that they are frequently themselves the real guarantors of the so-called underwriters.

It is beyond doubt that insurance companies and other big corporations with funds take advantage of the underwriting commission to secure the amounts they want at a cheaper rate. They underwrite purely for investment purposes, and not for the sake of earning the commission on subscriptions at large.

OIL DISCOVERY INTERESTS LONDON.

*London, October 16th.—Much publicity is given to the oil discovery near Calgary and hopes are expressed that owners will not over-capitalize. It is felt that the discovery greatly increases the attractiveness of Calgary enterprises for British investors when the present stringency is relieved.

SIR W. MACKENZIE IN LONDON.

*London, October 16th.—Sir William Mackenzie, who is here accompanied by Lady Mackenzie, on what is described as a usual short holiday trip, pays daily visits to his headquarters in the financial end of the city. Colonel Davidson is also here.

PERSONAL NOTES

Messrs. Chaplin and Young, auditors, have amalgamated the practice of Mr. T. Anderson, C.A., with their own. The new firm will be known as Messrs. Chaplin, Young and Anderson.

Messrs. F. B. McCurdy and Company have opened a London office, under management of Mr. R. H. Metzler, one of the members of the firm. It is located at Pinners' Hall, Austin Friars, London, E.C.

Mr. A. Lindback, fire commissioner of Manitoba, and Mr. McLean, Saskatchewan's fire commissioner, are attending the convention of the State Fire Marshals' Association of North America at Philadelphia. Mr. Lindback is one of the committee on resolutions.

Mr. J. A. Johnson has been appointed by the Great West Life Assurance Company as manager for the British Columbia (mainland). Mr. Johnson is widely known in Canadian life insurance circles, and is western vice-president of the Life Underwriters' Association.

MAY BE SIX PER CENT. BANK RATE

Betting at even money is in progress on the London Stock Exchange, that there will be a 6 per cent. Bank of England rate this year. The rate is now 5 per cent.

IMPORTANT CHANGE IN HOME LIFE ASSOCIATION.

The directors of the Home Life Association of Canada, met at Toronto on Tuesday and elected Mr. R. J. McLaughlin, K.C., a director and president of the company. This step, it is hoped, clears the way for the continued success of the Home Life Association, which was halted recently for a few months by the company's change of control to parties who, for the sake of the company's welfare, should never have had control. Mr. McLaughlin has not been associated with the company previously and represents new interests. He has had considerable experience in life insurance spheres having been for many years on the directorate of the Manufacturers Life and formerly solicitor and counsel for that company.

The Home Life Association was placed in a good position by the management of Mr. J. K. McCutcheon and the incidents which impaired his work, through no fault of his, are too well known to need repetition here. Mr. McCutcheon, continuing as general manager and director, will have to exert once again his ability to place the company in the soundest position, and in this he will undoubtedly be aided by Mr. McLaughlin and presumably the other members of the directorate.

The investments of the company will be carefully examined and where necessary, improved. The company's head office building at the corner of Adelaide and Victoria Streets, Toronto, is taken in as an asset at only $275,000. This is obviously a desirable property, especially in view of the fact that the new post office is to be built nearby. The company have received an offer equal to $425,000 for the property.

The Monetary Times feels that the best interests of the policyholders and shareholders are safe in the hands of Messrs. McLaughlin and McCutcheon, who will, we hope, see the advisability of surrounding themselves with an entirely new directorate.

SUPERVISION OF MUNICIPAL LOANS BECOMES LEADING ISSUE

London Authorities Suggest Federal Rather Than Provincial Control--How to Borrow Cheaply is the Why of the Discussion

An analysis of the proposal that some sort of Government control should be instituted in Canada over the borrowings of Canadian municipalities in the London market is discussed in the London Economist, says a cable to the Montreal Star. The proposal came from Canada itself and received authoritative shape at the recent conference of Albertan municipalities.

Mr. John Coles, a veteran London financier and director of the Hudson's Bay Company, and some of the leading insurance corporations here, when recently in Canada carried the suggestion a step further by proposing that something should be created in Canada for the supervision of municipal borrowings analagous to that of the Local Government Board of the British administration, the head of which is a member of the Cabinet.

Lenders Have a Say.

"Seeing," said Mr. Coles, "we in England are the lenders and you Canadian municipalities are the borrowers, it is reasonable that we should have some say as to the basis upon which we lend money and it will be good business on the part of borrowers to meet these conditions as far as they can!"

The Economist and the important financial interests here whose views the Economist generally expresses, cordially approve of the suggestion in general. But what the Economist goes on to say when it comes to detail will provoke a good deal of dissent in some Canadian circles. Its own preferences are obviously for some sort of federal and not provincial control over municipal finance.

Provincial and Municipal Credit.

It says:—"The provincial authorities in Canada do not command much better credit or more respect that better class municipalities. The fact, for example, that the finance of Toronto was controlled by the Ontario Government, or that the finance of Winnipeg was controlled by Manitoba, or that of Vancouver by British Columbia, would not necessarily add very much to the security of these municipal loans in the eyes of a judicious investor. Some of the western provinces, such as Alberta, are not on a much better financial footing than the growing towns of the west."

Hence the Economist does not think much of the proposal which seems to have the support of Mr. Arthur Meighen, the Dominion Solicitor-General, that the desired supervision should come from a competent Financial Board appointed by various provinces. It contends that the problem of Canadian municipal finance is much more than a local affair and that the matter should be taken up at Ottawa. It continues:

Standing of Canadian Municipalities.

"If the Central Government would begin by tabulating and publishing the exact financial position of all Canadian municipalities, that alone would act as a very valuable check, though it would by no means put the Canadian municipality under the safeguards which apply to our own towns in the United Kingdom. All local loans in England have to be obtained either by Act of Parliament, or a provisional order of the local Government Board. In both cases there is close supervision by the board. If these safeguards are necessary in an old and settled country where ratepayers are strongly opposed to extravagance, they are doubly desirable in a new country full of pushful communities which are eager to develop as quickly as possible without much regard to the expense so long as the money is not raised by taxation."

To Borrow Cheaply.

I have heard the Economist article discussed among financiers here whose opinions Canadians value, and find a good deal of approval, looking of course to the supreme question, How can Canadian municipalities borrow most cheaply in the London market? Coupled, however, with this approval, is the strong doubt whether it is practical politics that in such a vital municipal matter the Provincial Governments should be superseded by the federal authority.

The same subject is discussed by Mr. J. Watson Grice in United Empire, the organ of the Royal Colonial Institute. "It is asserted," he says, "that while the methods of local government in Canada are admirably suited for safeguarding the rights of the ratepayers and securing local control of municipal expenditure, they are not such as may secure the most advantageous terms when recourse must be had to borrowing in aid of local revenues for purposes of permanent improvement. The councils may not, as a rule, incur debts amounting to more than 20 per cent. of the assessment values of the city or town. Even within that limit, present arrangements of procedure are not considered satisfactory. The councils are handicapped unduly in providing for future needs of a more or less speculative nature by the changing personnel of their members, (who are elected for two years only) and by the legal routine which insists on repeated appeals to the general body of ratepayers. Frequent plebiscites and, in certain towns, the necessity of obtaining the approval of the Public Health Commissioners involve much uncertainty and possible delay. As the councils are all elected in January, and the procedure is much the same everywhere, proposals involving appeals for financial support are all ready to be launched in the late spring of each year.

Flood the Money Market.

"This rigidity of procedure tends to flood the money market with flotation schemes at much the same time, and the municipalities which are all keen on making the best bargain for themselves, in the bulk lose by making bids for British support under conditions which are often ill-timed. The larger cities have, as a consequence, to close with less advantageous offers, and the smaller areas are crowded out. Proposals have accordingly been made that the councils should have a freer hand in dealing with their most important projects, so that they might take advantage of temporary fluctuations in the market. A further suggestion has been made that stock should be issued for specific objects (e.g., waterworks, and electric supply) independently, and not in the form of debentures.

"On the other hand it is desirable to introduce a more effective guarantee that the sums required are for profitable enterprises, undertaken with reasonable general security, and not because of particular inducements which occasionally appeal to councillors in their private capacity, or from a reckless desire to out-do a neighboring town. At home the Public Works Loan Commissioners, the Local Government Board, and other government departments effectually check rash borrowing for unsound projects. Similarly, in Canada, the public sense of security has been strengthened by such impartial bodies as the Public Utility Commissioners of Manitoba and Quebec. Further developments in the same direction are now being publicly canvassed on the following lines.

Appointment of Independent Boards.

"Independent boards should be appointed, whose sanction and approval for the whole or part of any proposed loan should be necessary. They should be free from political control, and should base their judgments on the real needs of the towns and their capacity to meet the burden. Increases in assessments, and debts already contracted would form the basis of the board's inquiry. The ratepayers would be glad of a generally accepted guarantee of the soundness of any proposal, and in necessary cases the faith of the hesitating British investor would be strengthened.

Continuity of policy might be further effected by the handing over more generally of projects of any magnitude to the care of experienced and competent officials, who might devote their whole time to the work, as in the towns of Germany and in many American cities.

To relieve the smaller areas of the unfair disadvantages under which they at present suffer, the Government should foster the consolidation of municipal loans. Proposals made by any town for inclusion in a consolidated loan would provide some opportunity of examination and supervision of town accounts, and the smaller towns would reap the benefit of better terms obtained in the market. The combined proposals made under these conditions would almost bear the imprint of a Government guarantee.

Would Bestow Triple Benefit.

It is claimed for these suggestions that their adoption would bestow a triple benefit. Changes of this character would be of distinct advantage to the municipal authorities and relieve them of much financial anxiety; they would prove an effective guarantee to the ratepayers of the municipal areas that not only were the improvements really needed, but that the money would be properly spent, and that the town's resources were not being dissipated or neglected; moreover they would afford security to the British investor, and lead to an even greater support being accorded to industrial enterprises which are everywhere being promoted in Western Canada, and which must for some time to come rely to a very great extent on British capital.

Saskatchewan Municipalities Make a Move.

Saskatchewan municipalities have discussed the question with their provincial government, and are in favor of a Saskatchewan board. Here are the reasons:—

"That the difficulty encountered by western Canadian cities in disposing of their debentures is largely due to the fact that the financiers required some assurance that the money was required for bona fide improvements.

"That the cities of Great Britain had no difficulty in obtaining money for municipal works at a low percentage, owing to the fact that the contemplated expenditure had first to be approved by the local governing board.

"The establishment of such a board is advocated by prominent British and Canadian financiers."

What Saskatchewan Government Says.

Hon. George Langley, Saskatchewan, minister of municipal affairs, receiving a deputation, stated that the provincial government had been thinking of this local government board idea. It had come up in connection with the formation of a commission on farm loans. The government had at that time had its attention drawn to the whole question of municipal borrowings and the problem of placing finance on a more stable foundation.

Saskatchewan's Attorney-General had gone to Britain and had made a complete investigation of the system of the local government board which regulated their municipal expenditures. Hon. John Burns, the head of the department which had charge of municipal affairs, had given Mr. Turgeon every assistance, and he had been able to get the fullest details of the working of the scheme. As a result of this system in the old land the municipalities were able to get the lowest rate of interest of any except the British Government itself.

One aspect of the question as he saw it was that such a board would be required to investigate and authorize loans for the purpose of municipal improvements, the approval of such a board to carry to the outside investor the assurance that the projected work had not been undertaken without careful consideration. The form of the board was still to be decided.

Regina City Says "No."

At a recent meeting of the city council of Regina, the aldermen decided that the credit of their city in the financial markets was so good that a commission of this kind was unnecessary as far as that city was concerned.

STEAMSHIP MERGER CHANGES NAME

The steamship merger has changed its name from Canada Transportation Lines, Limited, to Canada Steamship Lines, Limited.

LIVING COST STILL WEARS A WORRIED LOOK

The index number of the Department of Labor, of Wholesale Prices stood at 136.0 for September as compared with 136.2 in August, and 132.7, September, 1912. The slight fall was due to lower prices for fresh fruits, vegetables and canned salmon, but some important advances occurred in eggs, fish, sugar, cream of tartar, jute, silk, anthracite coal, some building material and starch. In retail prices eggs, butter and coal were higher, but potatoes declined.

TRADE DISPUTES LAST MONTH

According to the record maintained in the Department of Labor there was continued improvement in September. There was a still further decrease in the number of strikes and lockouts in existence, and a favorable record is shown when a comparison is made with the same month of last year. There were altogether eleven trade disputes in existence throughout the country, as compared with eighteen last month and twenty-one during September, 1912. Only two of these occurred during September. Of those that were in existence before that time, the only one of importance as affecting industrial conditions to any great extent was that of coal miners on Vancouver Island, which remained unsettled at the end of the month, although there were not so many men out of work as a result of it as before. Upwards of 78,000 working days were lost through strikes during September, as compared with a loss of 109,530 during the preceding month.

VALUE OF LIFE INSURANCE

XXXIV.

Policies for Bankers

BY C. A. HASTINGS.

Those who follow this interesting profession are in a similar position to government servants, for after a certain period they become entitled to a pension, which increases as their services and emoluments increase. If there is any profession in the world where thrift and safety go hand in hand it is that of banking, and it is common knowledge that members of this profession do carry more protection in proportion to their remuneration than perhaps those who follow any other livelihood. Perhaps it is due to the fact that they breathe in figures and interest—both simple and compound—and are therefore in a position to learn the value of a dollar and what it can earn if saved.

I propose to point out in this article the policy which is most suitable to men in this profession. I will take, as my first example, the young fellow who starts at the bottom of the ladder. His salary is a small one and it is hardly expected that he can save very much at the beginning, but if he can save $10 every six months he should take out a whole of life with profits policy, and for a sum in the neighbourhood of $20 a year he can buy $1,000 of insurance on this plan.

Twenty Payment Life Policy.

My next example will be that of one who has served from five to ten years in his institution; he is now drawing a much higher salary, and if he is of a saving disposition, has probably put by a small sum—say $500. The policy for him is a twenty payment life with profits, which at age 26 would cost him in the neighbourhood of 3 per cent., and with any established and reputable company, he would have guaranteed to him the return of every cent. he has paid in, should he require it, at the end of the premium paying period.

I will now take the example of a banker of, say, 17 years' service and some 34 years of age. Some at this stage of their experience are in extremely good positions—earning good salaries and bonuses, and enjoying the confidence and responsibility that is shown them by their superior officers. To these men, if they are married, a guaranteed income policy is the most suitable, the first amount being payable at death, when their income ceases or their pension is reduced considerably. On the other hand, to those that are not married, I commend the thirty year endowment policy with payments limited to twenty years, for they have the option of either cashing the policy in at the end of 20 years for every dollar they have paid in plus profits, or receiving the face value of the policy in cash at the end of 30 years, plus profits.

Banker Who Has Served Twenty Years.

My last example will be that of one who has served 20 to 25 years, but who has not climbed the ladder as the others have done (we cannot all get to the top). If he is a married man, his sole aim should be protection for his wife and family, and the best contract for him is a contingent annuity policy—it is the one method by which he can purchase the most protection, but should his wife predecease him the policy becomes null and void; he, however, has done his duty. On the other hand, should he still be a bachelor at this age—45 or 50—a fifteen year endowment with profits policy is the best plan, for if he defers his profits for the period of the contract, he would receive, on the basis of 1½ per cent. per annum, in cash $1,263 for every $1,000 he has purchased—a very nice little nest-egg to add to his pension to help him enjoy life when he has resigned his position in the bank.

CROP HANDLERS ARE ALERT.

A comparative statement of the number of cars of grain and total quantities inspected at Winnipeg and other points in the western division for the month ended September 30, 1913, and the same period for 1912 by the department of trade and commerce shows the great rapidity with which this year's crop is being handled in comparison with former years. During the two periods the grain handled was:

	Sept., 1913.	Sept., 1912.
Wheat	25,786,125	5,574,950
Oats	4,447,950	680,200
Barley	2,796,300	2,458,100
Flax	581,700	454,700
Screenings	36,000	....

During September, 1913, there was inspected 26,927,725 bushels of grain more than during the same period last year.

SICKNESS INSURANCE BUSINESS TRANSACTED IN CANADA LAST YEAR

Twenty-nine companies and fraternal societies wrote sickness insurance in Canada last year under the supervision of the Dominion department of insurance. The details are given in the table appended. The premiums for the year totalled $1,012,966. Of that sum, four companies took each over $100,000. Two, the Ancient and the Independent Orders of Foresters, wrote $421,000 between them, but that sum included funeral benefits. The Canadian Railway Accident and the Dominion of Canada Guarantee and Accident Company were the two insurance corporations obtaining the largest share of the premiums.

Losses incurred during the year amounted to $707,603. Those of the two Foresters societies were very heavy, accounting for nearly half the total losses. Claims paid aggregated $628,282, of which the two Foresters orders paid about half.

The stock companies' personal accident and sickness section of the International Casualty Underwriters' Association met during the recent convention at Quebec. President Hedley R. Woodward presided. He said that the standing committee had worked hard to bring about the needed reformation of accident contracts, but success had been denied. The larger companies could come to an understanding in an hour, he said, as they were now agreed as to what is necessary for the proper and prosperous conduct of the business, but that it seems to be almost impossible to bring all companies to their way of thinking.

Mr. Walter C. Faxon spoke in support of the movement for the elimination of frills. He opposed indemnity for sunstroke, saying it was simply disease with a violent name. He said that there was no warrant whatever for any double indemnities, but it was probably inadvisable now to eliminate them. The bites of insects and aeronautic accidents should be specifically excluded. He was in favor of an extra premium for automobile and motorcycle indemnities.

Insurance Commissioner Basford said that the insurance commissioners did not want to prescribe policies as they lack technical training, but what else could be done if the companies did not get together?

Under the head of new business, Mr. John T. Stone, spoke as follows: "Without offering any motion I desire to suggest for your consideration the matter that I have been making careful study of, and that is whether or not the premium payers are not entitled to more than the average of 50 per cent. of premiums as benefits. It is an open question whether prevailing agents' commissions are not too great. I have recently heard rumors of commissions running to 60 per cent. This is a question which we must face sooner or later. We can deal with it more wisely than any one else can for us. Insurance commissioners prefer not to settle it, but they are responsible to the people and the people are holding them responsible. We know what the legislatures can do if they try. I advise careful thought about trying to so regulate expenses that more money will be available for benefits to policyholders."

Officers were elected as follows: Messrs. Wilfred C. Potter, chairman; Bertrand A. Page, Walter C. Faxon, Hedley R. Woodward and Clark Howard, standing committee.

The section adopted the recommendation of the information bureau that applications hereafter include the date and place of birth of the applicant.

	Premiums of the year	Number of policies new and renewed	Amount of policies new and renewed	Number of policies in force in Canada at date	Losses incurred during the year	Claims paid

WHAT A PROPHET MAY EXPECT IN THE WEST

"It is not safe for a Western man to indulge in any opinion as to the future of rival cities," says Sir William Whyte, "for the reason that if anyone went to Edmonton and predicted that Calgary would be a great city he would be immediately thrown into the North Saskatchewan, and if he repeated the offence at the expense of Calgary he would be at once consigned to the waters of the Bow before even getting a chance to say his prayers."

"Talk of holdings of Brazilian stock in Brazil is nonsense," said a banker to *The Monetary Times*. "There is none held there."

MOOSE JAW SEPTEMBER FIRES

The following fires occurring in Moose Jaw during September were reported to *The Monetary Times* by Fire Chief Baines:—

September 5—Mr. D. R. Brown's premises. Loss slight, No insurance. Cause, coal oil stove exploded.

September 18—Mr. Pashdown's outbuilding. Loss $15. Insurance, stock $700; building, $1,000. Cause unknown.

September 19—Stable 16 Fairford Street. Loss $3. Cause, sparks from chimney.

The first shipment of apples from St. Catharines to Cape Town, South Africa, was made last week.

CANADA'S CROPS SHOW SUBSTANTIAL INCREASE

First Reports Based on Threshing Results—Government Bulletin Says Weather Was Ideal for Harvesting

	All Canada—bushels,		Three Prairie Provinces—bushels,	
	1913.	1912.	1913.	1912.
Spring wheat	188,468,000	182,840,000	183,852,000	178,664,000
Fall wheat	19,107,000	16,396,000	5,264,000	4,658,000
Oats	391,418,000	361,733,000	239,595,000	221,857,000
Barley	44,348,000	44,014,000	27,904,000	26,671,000
Rye	2,559,000	2,594,000	686,000	537,000
Flax	14,912,000	21,681,500	14,808,000	21,534,000

According to the provisional estimates of the census office at Ottawa, Canada is to have a substantial crop increase this year, as compared with 1912. The figures are summarized above. The estimates are for the month ended September 30th. The government bulletin says that during that month ideal weather for the ingathering of the grain crops prevailed over all Canada. In the greater part of Ontario and in the western provinces harvesting operations were well completed by the middle of September, and only in parts of Quebec and the Maritime Provinces, where the spring opens later, was harvesting carried on during the latter end of the month.

The estimates given a month ago are slightly greater than those now issued which may be presumed to be based more or less on results of threshing. The final estimates based altogether on threshing results and calculated on corrected areas will be issued as usual on December 15th.

Spring and Fall Wheat.

For spring wheat the estimate for the end of September is 188,468,000 bushels as compared with 182,840,000 bushels last year. For fall wheat the estimate is 19,107,000 bushels as against 16,396,000 bushels last year, and 18,481,000 bushels in the preliminary estimate this year. The total estimated wheat production this year is therefore 207,575,000 bushels as compared with 199,236,000 bushels last year, an increase of 8,339,000 bushels, or 4¼ per cent. The yield per acre for all wheat is 21.15 bushels as compared with 20.42 bushels last year. Oats show a total yield of 391,418,000 bushels and an average yield of 40.57 bushels as compared with 361,733,000 bushels and an average yield of 39.25 bushels.

Barley gives an estimated total yield of 44,348,000 bushels and an average of 31.00 bushels per acre as compared with 44,014,000 bushels and an average of 31.10 bushels in 1912. For this year the total production of rye is 2,559,000 bushels, of peas 3,974,000 bushels, of buckwheat 7,600,000 bushels, of flax 14,912,000 bushels, of mixed grains 17,178,000 bushels, of corn for husking 14,086,000 bushels, of beans 989,500 bushels as compared with a total yield last year for rye of 2,594,000 bushels, for peas of 3,773,500 bushels, for buckwheat of 10,193,000 bushels, for flax of 21,681,500 bushels, for mixed grains of 17,952,000 bushels, for corn for husking of 16,569,800 bushels, for beans of 1,040,800 bushels.

Western Wheat Crop.

For the three Northwest provinces the total yield of spring wheat is estimated at 183,852,000 bushels, of fall wheat at 5,264,000 bushels, of oats at 239,595,000 bushels, of barley at 27,904,000 bushels, of rye at 686,000 bushels, of flax at 14,808,000 bushels.

The average quality of these crops measured upon a per cent. basis of 100 as representing grain well headed, well filled, well saved and unaffected to any appreciable extent by frost, rust, smut, etc., is as follows: Spring wheat 89.17, oats 90.52, barley 88.25, rye 85.41, peas 81.71, beans 78.48, buckwheat 73.40, mixed grains 90.59, flax 82.68, corn for husking 75.16. Of these wheat, oats, barley and rye are above the average quality for either of the last two years.

The potato and root crops continue to show good figures, as representing average condition during growth. The condition of potatoes is 83.59, turnips 82.62, mangolds 83.64, sugar beets 82.63.

SHIPBUILDING QUIET FOR THE GREAT LAKES

Marine affairs on the Great Lakes during the past year were reported poor by Mr. J. C. Wallace, president, at the annual meeting of the American Shipbuilding Company. This corporation has a construction yard, machine-shop, boiler shop and a dry dock at Port Arthur, Ont., in addition to its plants in the United States. "Low rates have prevailed," he said, "and in consequence the company has not had a very favorable year. The company has built and completed 14 vessels, and has now 12 under construction. The prospects for the coming year are not good for new construction, as it has been demonstrated that with the increased depth of water and the rapidity that has been attained in loading and unloading, through the installation of new and modern plants at the ports, the present tonnage on the Lakes is ample. It is believed a large amount of reconstruction work will have to be done during the coming winter on the smaller and older vessels."

◆

UNITED STATES TARIFF AND CANADIAN CATTLE

As a result of the free importation to the United States of cattle from Canada, stockmen of our western provinces find increased difficulty in obtaining stocker cattle from eastern Canada. Within the next few months, in the opinion of Stock Commissioner J. C. Smith of Saskatchewan, free imports to the United States will have marked effect on the stock industry of the prairie provinces. "For the present," he says, "the run of beef in the west may not be greatly affected. That our own stock growers will not be able to buy from Ontario for feeding purposes seems entirely probable. In September, before the tariff was abolished, more than 20,000 Canadian stocker cattle were shipped to Buffalo and points beyond at an average price of $40. In the long run, increased prices for stockers to the growers in Saskatchewan and western provinces will be general. Supply now available is much too small to meet home demand. At present there is a tariff of 25 per cent. on cattle imported to Canada; its abolition would assist westerners to place their own industry on a more substantial basis."

IMMIGRANTS THROUGH THE PANAMA CANAL

According to Mr. C. H. Markham, president of the Illinois Central Railway, the chief economic benefit to the Pacific coast following the opening of the Panama Canal, will be from the immigrants that will ship there directly from Europe. "The construction of the canal," he says, "is justified by the traffic passing through it. New Orleans will be one of the largest beneficiaries. Business conditions in the south are fine. The settlement of the tariff brought confidence, and I look for good business all around for the next two or three months. The Illinois Central roadbed in the five miles from Mounds to Cairo will soon be raised beyond the possibility of floods."

◆

PROVINCES UPHELD IN COMPANIES CASES

An Ottawa dispatch states the supreme court of Canada, on Tuesday, handed down a memo of the judgment in the Companies Act and insurance cases. Generally speaking, the provinces win, the court dividing by four to two. Justices Anglin, Duff, Idington and Brodeur uphold the provinces, while the Chief Justice and Mr. Justice Davies sustain the Dominion contentions.

There is a similar judgment in the reference respecting the insurance case as to what power provincially-incorporated companies have to issue policies all over Canada. Their right to do so is upheld in a similar division.

◆

The following extra-provincial companies have been licensed to do business in British Columbia:—John Millen & Son & Urquhart, Limited; Leadville Mining Company; Kildare Mines, Limited; MacArthur Brothers Company; Union Meat Company; Eastern and Pacific Land Company, Limited; Campbell, Wilson & Horne, Limited; the Anglo-Colonial Estates, Limited; Revillion Wholesale, Limited; E. T. Wright and Company, Incorporated; Charles A. Eaton, Company; Union Gas Engine Company; Richard Haworth & Company, Limited.

SOLVING TORONTO'S TRANSPORTATION PROBLEMS

City Council Receive Experts' Reports—Company's Price is Twenty-two Millions

According to the report just presented to the city council of Toronto by the experts engaged in the valuation of the property of the Toronto Street Railway Company, offered for sale to the city by Sir William Mackenzie at a price of $22,000,000, it has an absolute minimum value of $20,944,478, exclusive of the line of the Mimico Radial, which has been said by arbitrators to be worth $75,000. The potential reduction in the deficit of the civic car lines during the next eight years, or until the Toronto Railway Company would automatically come into the city's possession at an arbitrated price of $670,886. The estimated real estate increment on the railway's lands during the same period is $627,035. If these two items be considered as assets, the whole property has a value of $22,242,405.73.

Mayor Hocken in addressing the council summarized the proposals thus: "We find ourselves with a monopoly of the surface transportation in the hands of a company enfranchised 22 years ago upon such terms as make it impossible for the municipal administration economically or satisfactorily to provide transportation for nearly one-half of the present area of the city This company has a franchise terminating eight years hence, with no inducement to maintain an efficient service, but with every reason from the standpoint of the shareholders to deteriorate both— the service and the equipment. I believe that I am within the mark when I say that hardly a single thoughtful citizen expects from the present company reasonable consideration of their needs during the remaining period of the franchise.

Need of an Adequate System.

"This puts us under the necessity of spending some millions of dollars in establishing a civic system which is necessarily disjointed and costly to operate, if we would attempt, however inadequately, to provide transportation for nearly one-half of the city; and, even in doing that, we must subject those who live beyond the limits of the city, as it was in 1891, to the burden of a double car-fare—a burden which increases in importance when we remember that those affected form a large proportion of the working population of Toronto.

"In addition to these considerations we have other difficulties to contend with in the shape of railway franchises granted by other municipalities which formerly embraced a large area of what is now the city of Toronto. The claim is made by those holding such franchises that their rights are in some cases perpetual and exclusive. Whether their claims could be substantiated before the Privy Council is a question which I do not pretend to decide. But it is apparent that to get possession of these lines involves prolonged litigation and heavy expense.

Radial Lines and Outlays.

"We have, for instance, the Metropolitan branch of the York Radial Railway operating for approximately three miles to the upper part of Yonge Street. As long as that franchise exists it will be impossible to serve that section of the city efficiently or economically, for it must be borne in mind that whatever we may do in the way of constructing railway lines parallel to Yonge Street, that is the main thoroughfare, and, by general consent the proper location for a street railway.

"In the east the Scarboro branch and in the west the Mimico branch of the York Radial Railway can now be taken over by the city. The acquisition of these small portions will involve a considerable outlay, in fact the award for a little over a mile of the Mimico line is somethng over $75,000.

"There is also to be considered the rights and franchises of the Toronto and Suburban Railway Company, which operates a line from the Canadian Pacific Railway tracks to Bathurst Street along Davenport Road into Ward Seven, small portions of the lines running to Weston and Lambton, besides franchise rights which cover the whole of Ward Seven. At some time or other these ends of railways and franchises must be dealt with, if the city of Toronto is to have an adequate street railway system.

"For twenty years past the advisability of getting radial railways to the centre of the city has been discussed almost continuously The accomplishment of this highly desirable object has been prevented by the character of the franchise held by the Toronto Railway Company, and only by the acquisition of that franchise by the municipality can we succeed for the next eight years in bringing about this much desired end.

"It was well understood between Sir William Mackenzie and myself from the first interview that the essential feature of the purchase was to be that the city should secure absolute control of transportation and electrical distribution within the limits of the city. Whether the phraseology of the memorandum of July 21st on a critical analysis bears this interpretation in every point, the fact remains that at no time did we admit anything less than that to be our intention. To assure ourselves that this purpose would be accomplished the memorandum of July 21st was placed in the hands of Mr. Arnold and Mr. Moyes when they received their instructions to report on the physical and intangible assets, in order to secure from them a report as to the sufficiency of that document to carry out our intentions.

"Concurrently with the presentation of their report, and under date of September 20th, they forwarded to me a letter setting out several particulars in which they thought the memorandum of July 21st should be amended. Without delay this document was submitted to Sir William Mackenzie, and he was asked to give us a statement as to whether its terms were satisfactory. In reply to that you have, in the correspondence laid on the table to-day, a letter from him, in which he says that he believes he can meet the views of the experts, and leaves to the city's legal department the drafting of an agreement upon these lines.

Determining Physical Values.

"An examination of the report of Mr. Arnold and Mr. Moyes shows the net present value of the physical assets to be $9,894,482.66, after allowing for depreciation the sum of $3,407,204.01.

"In dealing with these physical values the report will show that the most exhaustive examination of these assets was made, the depreciation running as high as 60 per cent. on some portions of the plant, and the discarding, without value, of 135 cars which are now operating upon the streets of Toronto.

"If the two items of increment in land values, and the deficiency on civic car lines are added to the amount which Mr Arnold and Mr. Moyes say represents the value of the Toronto Railway Company we get the sum of $22,242,405.73.

"As to the purchase of the Toronto Electric Light Company, I am free to say that the city is not in so difficult a position as with regard to the question of transportation.

"The creation of the hydro-electric system affords competition, which compels the company to give a good service at reasonable rates or lose its business. Because of this there are many citizens who believe that it would be better for the city to meet the company on the basis of competition than to secure a monopoly of electrical distribution. That is an attitude with which I have no quarrel. In reaching a decision on the question one may be perfectly justified in taking either position.

"Personally I take the ground that it is worth something to the city to secure a monopoly of electrical distribution, because it would put an end to the duplication in much of the city of to-day, and in all of the city of the future, which must ultimately work out enormous economies, the full benefit of which will accrue to the people, because the whole system would be operated on a cost basis

Twenty-three Thousand Customers.

"Turning to the report of Mr. R. A. Ross, as to the value of the physical assets, we find that he gives the replacement value of this at $6,358,960, and he places the present value at $5,339,617, to which is to be added the value of the company's real estate, which is $793,137, or a total value for the property of $6,132,754, which leaves the sum of $1,867,246 as the amount to be paid for the franchise and the business.

"Assuming that the present revenues of the company would pay interest and sinking fund on $6,132,754, the sum of $150,000 would provide 6½ per cent. to pay interest and sinking fund on $2,300,000; in other words, assuming the property to be worth to the city the sum that Mr. Ross sets out as its physical value, the possible economies would more than take care of the sum paid for the franchise value. And in addition to that there is some considerable allowance to be made, surely, for a going business with 23,000 customers.

"There is a further consideration, that by acquiring this system extensions to the hydro-electric system, which are inevitable—and now under consideration—would be either unnecessary or the cost very largely reduced."

◆

In the north of England with its large number of female operatives engaged in the textile and other trades, there is a considerable demand for confectionery goods, which in part, is supplied by local makers. Some lines, however, such as chewing gums and peppermints, are sent there from the United States and it would be interesting to learn of Canadian firms making any specialities which would be likely to appeal to the market, writes Mr. J. M. Mussen, Canadian Trade Commissioner at Leeds.

AMENDMENTS TO SASKATCHEWAN'S INSURANCE LAW

They Will Regulate Disposition of Funds After Death —Unlicensed Insurance Discussed

Changes in Saskatchewan's insurance law will be made in the near future, as recently forecasted in *The Monetary Times*. One of the proposed changes is to enable an assured party effectively to regulate the disposition after death of the trust fund created. This will be supported by the Life Officers Association and the Life Underwriters' Association of Canada.

Far too little attention is given by many people who hold insurance contracts to the protection of their beneficiaries, said Mr. Arthur E. Fisher, insurance superintendent for the province, in a recent interview:—"In many instances in which a wife to whom a policy has been made payable dies, the question of a change in beneficiary has been unattended to. It would be far better were the assured person during his lifetime carefully to consider this matter, and provide adequate safeguards. If such a course were taken the possibility of delay in payment after his death would frequently be averted. This delay, it must be understood, generally speaking is no fault of the champions. It is not their intention to dispute the claim which is brought before them, but they are obliged to see that all legal requirements are complied with. This they must do in their own business interests."

Problem of Unlicensed Insurance.

Speaking of unlicensed fire insurance companies and the nature of the security which they offer to policyholders, Mr. Fisher said that the problem had become a serious one in almost every province of Canada.

"So far as the people of Saskatchewan are concerned," he continued, "this question has two aspects. In the first place there are insurance companies which operate entirely outside the boundaries of Canada, and in the second place there are companies incorporated and operating legally in certain provinces of Canada, but not in Saskatchewan. There is nothing to prevent anyone who cannot obtain insurance on his property with the duly licensed companies placing his insurance across the international line or in Great Britain. Should he do so, however, he would find that he lacked the protection guaranteed by the supervision exercised by the Federal Department, and the various provincial departments as well, not to mention the benefit that might be secured through the deposit made with the Government for the protection of policyholders.

Keep Away from These Companies.

"The inadvisability of placing one's insurance in companies not licensed in the province is patent when one considers the fact that in the event of legal proceedings being taken judgment against a company which comes under this classification would be of little value in the province of Saskatchewan. The policyholder would have no means of enforcing his claim, or at best, inefficient means, whatever the nature of a court decision might be, unless the company concerned was licensed and duly registered in the province.

"This unlicensed insurance is generally placed by brokers travelling through the province. With 84 companies registered and licensed, all of which have deposits either at Ottawa with the Dominion Insurance Department or in Regina with the Minister, I fail to see, why any propertyholder in this province should need to seek his insurance from an unlicensed company. There are, moreover, nine mutual fire insurance companies duly registered in Saskatchewan."

◆

RELATION OF STATE TO INSURANCE

"No more interesting aspect of the public's attitude toward insurance has developed than the opinion which is beginning to be expressed in many quarters that the business should be a public monopoly," writes a professor of economics as the introductory sentence in the preface of his valuable book on "Insurance and the State," which elucidates in a fair and interesting manner this topic, interest in which is far spread. Professor Gephart shows that insurance as a study has received scant attention except by those interested in the business and points out how the public suffers through this lack of knowledge.

The various chapters of the book deal with: Character of Insurance, State Insurance in Practice, Should the State Monopolize Life, Fire or Social Insurance? Insurance and the State, W. F. Gephart, Ph.D., $1.25, Macmillan Company of Canada, Toronto.

CANADA AND ARGENTINE FREE WHEAT COMPETITORS

Dominion Takes Foreign Trade by Selling Cheaper Than the United States

Canada and Argentine are the only wheat raising countries the United States need fear, according to the Wall Street Journal. Argentina has an import duty, which it is said, will be removed. Under the new tariff wheat flour is on the free list, with a countervailing duty of 45 cents per barrel. The new tariff is expected to act as an evener on speculative conditions and prevent radical advance in times of short crops in the United States when Canada and Argentina have a big surplus.

Little to Invite Buying.

At the moment there is little in the speculative situation to invite large buying, and those who are bearish take the position that prices should go lower, as export buying has fallen to small proportions. Canada is doing all the selling at lower prices than the United States, and has taken the foreign trade away, and the belief exists that prices the United States side of the international line should drop to a competitive basis.

A big decrease in the amount of breadstuffs on ocean passage is already liberal. Conditions in the Argentine Republic will be watched with great interest by the entire wheat world, and it is expected that with additional dry spots in that country a scare of considerable size may be seen.

Depending on Canada.

The shipments from that country have narrowed down to smaller proportions, and the likelihood is that they will fall off still further before another crop is available.

The importing nations of the old world have been depending upon Russia and the Danube, as well as Canada, India and Australia for supplies of late, with fair proportions coming from Argentina. While the clearances from United States coasts have shown goodly proportions, a large part of this grain was grown north of the international line. Nearly all the wheat to clear from the United States in the last several weeks was grain sold some time ago.

◆

HAMBURG MARKET AND CANADIAN HARD WHEAT

The grain trade of Hamburg is awaiting with interest the first shipments of this year's crop of Canadian wheat, says Mr. C. F. Just, Canadian Trade Commissioner at Hamburg. On 'Change, the commissioner has been repeatedly requested by the representatives of the leading flour milling firms to assist them in obtaining advance samples of the first three grades in order that they might be enabled to test the baking qualities of the crop at the earliest possible moment. It is true to say that as an ideal mixer for German wheat Western Canadian hard wheat last year established its reputation in quite a notable manner. The German crop which had proved to be low in flour yield during milling and of a poor quality in baking, urgently needed the addition of a wheat high in gluten in order to make a fair average flour. With the Russian crop a failure, Canadian wheat got its chance, and in the result the imports reached a record figure. While these large imports last year were thus to some extent accidental, the remarkable growth of German imports of Canadian wheat of late suggests on the other hand, that this has been due to something less than an accident.

It was found that the imports of wheat from Canada which were non-existent in 1909, rose successively from 16,973 metric tons in the calendar year 1910 to 88,017 tons in 1911, and to 269,028 tons in 1912. During January to June of the current year upwards of 160,000 metric tons have been imported already. Of these imports the port of Hamburg alone obtained in 1910, 16,973 tons; in 1911, 52,070, and in 1912, 139,715 tons.

A fair explanation of this development is to be found in the recognition by the German milling trade of the quality of the wheat which Canada can be depended upon to supply.

◆

A Toronto financier, just returned from England, estimates that the British investor during recent years has thrown $100,000,000 into poor speculations, and some of them Canadian.

"The Canadian Pacific Railway is Canada's best barometer," said a German banker to *The Monetary Times*. "It benefits from everything by which the Dominion benefits—immigration, tourist travel, land purchases, steamship activity, freight carriage, and so on."

HAS CANADA TOO MANY PULP MILLS?

One Answer to this Query is Positive—What New United States Tariff Means

Monetary Times Office,
Montreal, October 15th.

In view of the attention which has been attracted to the Canadian pulp and paper field, by occurrences which cannot but exercise some influence upon the general situation, an interview which appears below with a well-informed Montreal pulp and paper man will be of interest. The interview relates to the report that the customs officers of the United States have been notified by the treasury department to collect countervailing duties on all printing paper valued above 2½ cents a pound imported into the United States. It would seem that since the passage by congress of the reciprocity act, print paper from Canada, when valued under 4 cents a pound, has been admitted free of duty. The 2½ cents value is now under the new law. This order will result in the assessment of 12 per cent., plus the countervailing duty imposed by the country of origin, on the paper above 2½ cents a pound.

Newsprint is Free.

The comments of this Montreal gentleman upon this industry are as follows:—"The practical effect of the new American tariff is that Canadian newsprint is now admitted free. Customs officials through the United States have been notified by the treasury department to collect duty on all printing paper above 2½ cents per pound imported into the United States. However, newsprint is not now nor is likely to be for many years, selling as high as 2½ cents per pound. Canadian paper selling above 2½ cents is all book paper, and of this none is exported. Canada does not at present manufacture sufficient book paper for domestic requirements and imports considerable quantity from England.

"The Newspaper Association of the United States is a powerful body and it has succeeded in having newsprint put on the free list. At present there is practically no newsprint imported into the United States from any country but Canada. Canada is now shipping about 800 tons per day as compared with 250 tons six months ago.

Should be no New Flotations.

"Local paper manufacturers are of the opinion that the United States will in time import newsprint from Norway and Sweden, but these countries are our only competitors. On the whole the market now open in the United States for Canadian pulp and paper is not very considerable. Newsprint is admitted free, but wrapping paper, which was formerly admitted free, has now a duty of 25 per cent. under the new tariff.

"The production of groundwood by Canadian mills is now greatly in excess of the demand. One company, at a very recent date, had on hand 22,000 tons of this product, which, at the prevailing market, meant a reserve of $300,000 and represented a nine months' output for their mills. A good part of this stock has had to be sold at a sacrifice.

"Canada has now too many pulp and paper mills and it is to be hoped that any further flotations will not take place for some years to come."

◆

During the past two months thousands of tons of steel rails have been received at Fort William. The bulk of the shipments are consigned from the United States Steel corporation's various steel plants in the eastern and central states and are destined for points throughout Western Canada, chiefly to points on the Grand Trunk Pacific Railroad. The United States Steel Corporation have representatives in Fort William superintending the unloading and forwarding of their big consignments. Until the close of navigation the receipts of steel rails, fastenings, bolts, plates, etc., will be heavy, and will exceed all former years' shipments.

One of the noticeable physical features of British Columbia is its position as the watershed of the North Pacific slope. All of the great rivers flowing into the Pacific, with the exception of the Colorado, find their sources within its boundaries. The more important of these are: The Columbia (the principal waterway of the State of Washington), which flows through the province for over 600 miles; the Fraser (750 miles long); the Skeena (300 miles); the Thompson, the Kootenay, the Stikine, the Liard, and the Peace. These streams, with their numerous tributaries and branches, drain an area equal to about one-tenth of the North American Continent. The lake system of British Columbia is extensive and important, furnishing convenient transportation facilities in the interior. The area of the lake aggregates 1,560,000 acres.

UNION LIFE INQUIRY; LEDGER MISSING

The investigation into the affairs of the Union Life Insurance Company, was opened this week with Mr. George Kappele, K.C., the official referee, presiding. Messrs. Harry Symonds, one of the incorporators of the Union Life Company, and W. H. Carrie, secretary of the company, were examined. It was shown relative to the agreements made between the Union Life and the National Agency Company, which controlled most of the stock in the Union Life, that the agreements had been amended from time to time to enable the National Agency to obtain certain amounts, presumably as an agent, and permit it to pay dividends on its capital stock.

It was admitted by witnesses that the National Agency Company used premiums received from the public in connection with the sale of its capital stock and the profit of the sale of certain blocks of stock to the Union Life Company.

W. H. Carrie informed Mr. Masten, (for the government) that a stock ledger referred to was missing.

BANK BRANCHES OPENED AND CLOSED.

During September 20 branches of Canadian chartered banks were opened and 12 closed. The following gives details of the branches opened and closed this year:—

	Opened.	Closed.
January	34	15
February	29	16
March	25	6
April	28	4
May	20	8
June	22	10
July	20	8
August	21	6
September	20	12

Houston's Bank Directory gives the following particulars for September:—

Branches Opened—20.

Alberni, B.C.	Bank of Montreal.
Amqui, Que. (Shown closed last month in error)	La Banque Nationale.
Beauharnois, Que.	Banque d'Hochelaga.
Borden, Sask.	Northern Crown Bank.
Chateauguay Basin, Que.	Merchants Bank of Canada.
Chester, N.S.	Bank of Nova Scotia.
Delhi, Ont.	Molsons Bank.
Hunter's River, P.E.I.	Royal Bank of Canada.
Lancer, Sask.	Northern Crown Bank.
Limerick, Sask.	Merchants Bank of Canada.
Maisonneuve, Que.	Imperial Bank of Canada.
Prelate, Sask.	Northern Crown Bank.
Richdale, Alta.	Bank of Toronto.
St. George's, Grenada	Royal Bank of Canada.
Shaunavon, Sask.	Canadian Bank of Commerce.
Sherbrooke, Que.	Royal Bank of Canada.
Toronto, Ont., 2115 Yonge St.	Home Bank of Canada.
Toronto, Ont., Queen St. and Beach Ave.	Bank of British North America.
Victoria, B.C., James Bay	Bank of British North America.
Winnipeg, Man., McGregor St. and Selkirk Ave.	Bank of British North America.

Branches Closed—12.

Gretna, Man.	Bank of Montreal.
Irricana, Alta.	Northern Crown Bank.
Lemberg, Sask.	Bank of Toronto.
Michel, B.C.	Imperial Bank of Canada.
Naramata, B.C.	Canadian Bank of Commerce.
Odessa, Sask.	Bank of Toronto.
Peachland, B.C.	Northern Crown Bank.
Quebec, Que., St. Roch.	Imperial Bank of Canada.
Saskatoon, Sask., 219 Second Ave.	Royal Bank of Canada.
Sayabec, Que.	La Banque Nationale.
Ways Mills, Que.	Quebec Bank.
Wynyard, Sask.	Imperial Bank of Canada.

Mayor Deacon, Winnipeg, says that no franchise will be given to any company to operate motor buses in the city. There is an application before the city from a party of Montreal capitalists.

UNITED STATES CURRENCY BILL DENTED

Critics are Numerous and Bankers Association File Strong Objections

The currency bill now before the United States Congress has been bombarded with criticism from every part of the country. One authority has said that it is a poor imitation of the Canadian Bank Act. The American Bankers' Association has now issued a lengthy report criticizing the measure. In part it says:—

"The proposed currency legislation is still pending in Congress. The bill in its present form imposes unwise hardships upon the banks, and equally unwise hardships upon the general public. The interests of the bankers and commercial public are coincident; no injury can be inflicted upon the one without the other also suffering. When business is active and prosperous, the banker shares in the benefit; when it is languishing, he feels the ill effects. The chief function of the banker is to loan his capital and other resources to his customers so that they may increase the activity and extent of their business. Any withdrawal of the bank's capital from these legitimate channels of trade not only entails a loss to the banker, but also to the business public.

Banks Have Minority Representation.

"The banks are required to subscribe to the Federal Reserve banks an amount equal to 20 per cent. of their capital, one-half of which must be paid in at once, the other one-half being subject to call. This is to be taken over and placed under the management of a corporation in which the banks have not only a minority representation, but a very limited voice indeed. In return for the capital thus appropriated, the banks receive a certificate, which cannot be sold, assigned or hypothecated, over which none of the usual rights of property can be exercised. The banks are obliged to make this subscription, or be dissolved. Charters have ever been regarded in the nature of a contract, and it is doubtful if, under our constitution, Congress can take away the charter of a bank in this summary manner, not because the terms of the charter have been violated by the banks, but because the bank management might refuse to make a coerced investment such as the pending measure provides.

Says It Is Socialism.

"There is no provision whereby a bank which subscribes money to the capital of the Federal Reserve bank can recover the same, except by liquidation, either voluntary or enforced. A bank is given a maximum return of 5 per cent. upon capital subscribed—if earned. If the Government can appropriate one-tenth of a bank's capital in the manner provided by this bill, they may appropriate one-tenth next year, and so on until the capital is all transferred to the Government bank. If they can fix the compensation at 5 per cent. this year, they may make it 4 per cent. next year, and 3 per cent., 2 per cent., 1 per cent. or nothing—a very simple and easy process whereby the entire capital of the banks may be transferred to the Government. For those who do not believe in Socialism it is very hard to accept and ratify this proposed action on the part of the Government.

"There are other provisions of the bill equally important and far-reaching in their effect.

"We have recounted the condition which confronts us as to that provision of the pending measure, in order to impress upon the banks the fact that we have reached a point where we must act in our own interests and for our own protection. Individually we must reach our conclusions in the premises, and if we are not satisfied with the provisions of the bill we ought to acquaint our respective representatives in Congress of the fact, and clearly point out and impress upon them the changes which we think ought to be made.

Why the Bankers Oppose.

"It has been proclaimed in Congress and in the public prints that many features of the pending measure are exactly like or similar to provisions of the bill reported by the National Monetary Commission, and which the bankers in convention approved. The question is asked, 'Why, if the bankers approved such provisions in the so-called Aldrich bill, do they oppose similar provisions in the so-called Glass-Owen bill?' This is the reason:—

"(a) Investment in the stock of the Central Reserve Association created by the bill of the National Monetary Commission was permissive, not compulsory; banks might invest in the same if they chose, or they might decline the opportunity, in accordance with the dictates of their business judgment.

"(b) Under the terms of the bill of the National Monetary Commission, the bankers controlled the management of the Central Reserve Association. It follows that an investment in the stock of the association was an investment under their own control and management. On the contrary, investment in the stock of the Federal Reserve banks of the Glass-Owen bill is compulsory. The individual banks have a minority representation in the management of these Federal Reserve banks and have no voice whatever in the selection of the Federal Reserve board, which dominates the Federal Reserve banks, and the proposed measure only provides that one of the seven members must have banking experience.

"The fact that the bankers controlled the Central Reserve Association was a guarantee against political control, and it was equally a guarantee against incompetent management—two important respects wherein the pending measure is lacking."

RICHELIEU STOCK HELD POSITION,

Monetary Times Office,
Montreal, October 15th.

Among the stocks which have held firm during the past week is Richelieu and Ontario. Prices have barely fallen below 110, this being but the slightest decline from the recent high point. The stock in the past has been wont to give way under small selling pressure, so that the present firmness with all other stocks showing an inclination to drop on the slightest liquidation, is attracting attention.

There are other indications that the time is approaching for the final consummation of the deal which has been so long pending. Gathered in Montreal this week are several of the larger interests in connection with the deal. It is stated that practically everything is now in readiness awaiting an improvement in the general financial position. It is felt that there is little use offering securities of any kind at the present time. The disposition just now is to sell, and, until sentiment recovers, any securities which are sold on the market, are apt to be sold at a price which would look low once the situation adjusted itself again. Otherwise, it is said, the new issue of preference stock would already have been made.

CANADA CANNOT HELP UNITED STATES

Washington is Grappling With High Meat Prices and Finds Beef Cattle Decreasing Here

The meat supply of the United States is dealt with in a bulletin just issued by the United States department of agriculture. No relief can be seen through shipments from Canada. One proposal to relieve the situation is the establishment of public abattoirs and the sale of meats through public markets. Mr. J. Pickens, of the United States bureau of animal industry, summarizes the position as follows:—

"The high cost of meat is a serious reality, and it is now obvious that the rise in prices in recent years is the natural result of an actual shortage in production. These conditions are reflected in the per capita consumption of meat in the United States, which is estimated to have fallen off ten pounds in four years, or from 162 pounds in 1909 to 152 pounds in the fiscal year 1913. It is evident that the country is facing an era of short production of meat, and that some constructive means must be adopted if the American appetite for this class of food is to be supplied.

Meat Cattle Declining.

"In the last six years the number of beef cattle in the country has apparently fallen off over 30 per cent., while the population has, of course, increased. According to estimates of the bureau of statistics of the department of agriculture, the beef cattle in the country on January 1, 1907, numbered 51,566,000, and at the beginning of the present year the number was only 36,030,000. Meanwhile the number of dairy cows has remained practically stationary.

"The slaughter of beef under Government inspectors, which covers more than half of the total slaughter of the country, shows a steady falling off since 1910, the total decline amounting to over 800,000 carcasses, equivalent to about 450,000,000 pounds of dressed beef. Applying the ratio of federally inspected slaughter to total slaughter, according to the census figures for 1909, this means a falling off of 1,419,000 cattle, or approximately 780,000,000 pounds of beef in the entire slaughter of the country from 1910 to 1913.

"While future imports may afford some measure of relief, too much reliance should not be placed on this source of supply. A study of the statistical situation in other countries does not disclose where we are likely to obtain any large quantity of beef for an extended period. Besides Canada and Mexico, the sources of imports are practically limited to South America, especially Argentina, and Australia.

No Help From Canada.

"Canada and Mexico do not at present give promise of substantial assistance. The number of beef cattle in Canada is only about one-ninth of that in the United States, and shows a steady decrease, amounting to over 11 per cent. in the last five years. Argentina and Australia are already supplying most of the British imports and have been called on to make up the loss in supply formerly furnished by the United States. Argentina is a large producer and exporter of beef, but has apparently reached the limit of its present cattle resources. The number of cattle in that country showed a decrease at the last census, 1911, as compared with the preceding one, 1908.

"The report from Buenos Ayres that 7,262,000 cattle were killed in 1912 out of a total stock of 29,000,000 indicates that Argentina is drawing on its reserve.

"In view of the present meat situation at home and abroad, it is unlikely that our cattle raisers will have much to fear from foreign beef."

Hope in the Small Farmer.

The department in its bulletin says that the chief hope for a solution of the problem lies in the small farmer again turning to the raising of stock as he did before the packing-house with its artificial refrigeration put an end to local butchering. But before the farmer will undertake to raise more stock he must be assured of a local market. The department recommends for the present co-operation among farmers in different communities so that they may raise the same kind of animals and ship them to a central market in carload lots.

◆

All previous grain handling weekly records were beaten during week ended October 4th, at Fort William. Over 8,000 cars of grain amounting to about 11,000,000 bushels were emptied into the bins of the different elevators. Vessel shipments for the week kept pace with the receipts and according to figures, between 10,000,000 and 12,000,000 bushels were shipped east via the lake and rail route. The capacity of the elevators is over 42,000,000 bushels and at the present time there is not quite 15,000,000 bushels of grain in storage.

UNITED STATES TRADE BALANCE

It Would Have a Different Complexion, but for Canada, Says James J. Hill

According to the prediction of Mr. James J. Hill, it is a question of only a few years when Canada will become the best customer of the United States. Mr. Hill, who was born in Canada, addressed the bankers' convention at Boston last week. He discussed the trade balance of the United States, showing what a prominent factor Canada is in that balance, and emphasized the necessity for more agricultural production.

"In the modern era," he said, "manufacturing became the main sources of fortune; and on its raw material, products and plants a greatly expanded credit system was established. Governments have not yet freed themselves from the delusion that this is the cornerstone of wealth production. But those who investigate know better—that agriculture, as the ultimate source of wealth, should be the especial care of those interested in maintaining the credit system.

"Campaign should be waged along this line because national developments follow a curve that moves toward future disaster. No country ever yet put all its eggs in one basket by fostering one industry at expense of others and escaped the penalty.

To Interpret the Lesson.

"Total exports the the last fiscal year were $2,466,000,000, having almost doubled in ten years. Manufacturers' materials increased from $409,000,000 to $731,000,000; manufactured articles from $468,000,000 to $1,187,000,000; but foodstuffs, which were $510,000,000 in 1903, were $502,000,000 in 1913. Translated into pounds the deficit would be much greater.

"It is not difficult to interpret the lesson. The number of mouths to be fed increases progressively. In a few years we may be buying food abroad. The industrial features which we boast are bound to make most of living higher. Exhausting our natural resources means future scarcity and industrial decline.

"We may hereafter buy, not only bread, but steel manufactures abroad. What then, will support a top-heavy industry and pay our debts? Would it not be better to quit hurrahing over the rise in exports while we rearrange our industrial system?

"Sound policy advises to increase the number engaged in farming, to educate them and to increase production. So far as the banker can assist by granting agricultural credits and conditioning loans on right methods, he will safeguard his own interests while helping to build up the country.

Canada and United States Trade Balance.

"We exult in a balance of trade exceeding $650,000,000. But we do not analyze. Our eyes look east or south, and we refuse to understand the advantages already ours, and that we might enjoy if we had looked north instead.

"Our trade with Canada in the last fiscal year was nearly $536,000,000, in ten years an increase of over 200 per cent. For 1913 over 1912 it increased 22.3 per cent.

"Our balance of trade in 1913 amounted to $653,000,000. Canada contributed $294,688,000, or 45 per cent. We spare no expense to drum up trade south of us. We have spent many millions on the Panama Canal. Our balance of trade last year with all North and South America was $183,869,000. If we leave Canada out, it shows a balance against us of $110,000,000, mainly to pay for coffee. It is not difficult to decide what is the most valuable trade to us in the western world."

SWISS TRADE WITH CANADA

The Swiss imports from Canada in 1911, consisting almost entirely of wheat, were valued at £474,500, an increase or £140,200 as compared with 1910. The imports of Canadian wheat rose from £46,000 in 1908 to £194,000 in 1909, to £310,400 in 1910, and to £460,500 in 1911.

The principal Swiss exports to Canada in 1911 were as follows:—

Cotton, silk, woolen and straw textures	£455,400
Embroidered goods	328,200
Watches	79,600
Chocolate	29,500
Food products	22,800
Coloring materials and chemicals	14,600
Machinery	40,600

HELP OF LIFE INSURANCE

Experience of Merchant Prince Demonstrated its Value in Commercial World

Life insurance is a savings bank, if you choose to put it on the simplest, plainest business basis, said Hon. John Wanamaker in an address which was a feature of the recent convention of the Fidelity Mutual Life insurance agents. There was unusual interest manifested to hear Mr. Wanamaker, who at one time ranked as the most heavily insured man in America, and his son, Rodman Wanamaker, is now the most heavily insured man in America. Continuing, he added: It is not only a savings bank, but it is collateral. I would not have been prepared to start my building when I did if I had not saved two and a half millions, little by little. I did not realize what I was doing. I think I would take a journey to San Francisco just to shake hands with the man who started me, if he were living.

I want to say to you that I do not know men who are more worthy than the men who have enlisted to do good work for a life insurance company. It is different from fire insurance. By toil a man can gather another fortune to build that which has been burned; but when it comes to human life you are linking your time with a trustee that takes care of the mother if the son's gone; that watches over with practical helpfulness those that have been left behind by the parent.

Were Able to Lend.

I have said life insurance was a savings bank. I will add that some of my policies were so written that when you could not get any money out of banks or on government bonds in the panic of 1907 the insurance companies loaned money on them. So you see taking out a policy is quite a different thing from just getting ready to die. You have got to magnify this business of yours. You have got to realize that it means as much and more to the man you seek to insure than to you. You can get employment of some kind or other and make your living, but what is the loss to the man who for want of a faithful friend to instruct him goes out of the world without providing for his dear ones or for the charitable causes he delighted to support while he lived. No other class of business men have a calling more sacredly practical. You have got much more responsibility than the man who simply sells shoes or shirts. It is something so very different that this fact of facts should beget high respect for you, for all engaged in such a highly honorable calling necessary to the happiness of so many people. It should awaken in every man his best energies to attain the topmost efficiency.

Character in Manhood.

A man's unquestioned integrity lies at the very foundation of his success. Allow me in closing to call your attention to the fact that the most distinguished business man of this country, who passed away recently. Mr. J. Pierpont Morgan, when he first came from London, came only as the son of Julius Morgan, a very successful banker. Mr. Morgan did not have so very much money, but he had the thing that was worth more than money. His word was absolutely as good as any bond that ever could be made. People found his word stood, and so they poured into his depository more money than many of the banks in New York received on deposit. He had the use of that money at about two per cent. interest. That is the way he got his art galleries and great libraries. Of course, there were years when the underwriting of the railroads and of industrials became a large business, but these things all turned to him because he was fair and just and could be depended upon. His whole business was confidence, confidence, confidence. It seems to me that is your capital. All his art galleries and all his beautiful pictures will be forgotten in the coming years, but they will never forget that he was a man in whom the people had confidence. That is the great thing. Every one of us has aspirations. Let us put first of all the making of a character that shall inspire confidence.

◆

NEW LIFE COMPANY IN WESTERN CANADA

The Winnipeg Life Assurance Company has an authorized capital of one million dollars, and its headquarters are at Winnipeg. The organizers expect to enter the insurance field next year.

Prominently identified with the promotion is Mr. H. R. S. McCabe, formerly of Toronto, but for some years past manager at Winnipeg for the London and Lancashire Life, who will assume the management of the new company.

A board of western men have become provisional directors, this board comprising among others, Messrs. Wallace H. McMillan, C. R. Gilmour, M.D., C.M.; T. J. Murray, barrister; J. F. C. Menlove, F. O. Maber, H. R. S. McCabe, all of Winnipeg; I. A. Robinson, Brandon, and J. W. Breakey, Souris, Man.

KEEN COMPETITION IN CHEESE TRADE

Canada's is an Export Business and Chief Market is Britain—Commissioners' Recommendations

The report of the commission appointed to inquire into the complaints received by the department of agriculture from producers and vendors of butter and cheese in eastern Ontario and the western portion of Quebec, as to alleged unfairness in the methods of weighing butter and cheese in Montreal, and also to inquire into the complaints made by representative farmers as shown by documents on file in the department of agriculture, present methods of payment for butter and cheese in Montreal, has just been issued. Among evidence submitted was a letter from the Montreal Produce Merchants Association, which drew attention to the following factors in the cheese trade:—

"1. That in consideration of the system under which cheese should be weighed it is important that it be borne in mind that the cheese business, so far as Montreal is concerned, is entirely an export business, the chief market being Great Britain, and that, in that market, Canadian cheese meets with the keenest competition from other countries, notably from New Zealand, consequently the success, and in fact the very existence of the trade, depends on Canada being able to compete with such opposition, not only in the matter of quality and price, but also in the matter of good weight, which is necessarily an important factor in determining the desirability of the goods from one country as compared with those from all others.

Claims for Short Weights.

"2. That Canadian exporters, under the system of weighing which has been in effect for years past have suffered continually from claims for short weights, more particularly on those cheese that are weighed under the present Montreal rules, the liability of cheese to shrinkage being so well known as not to require proof on our part; indeed these claims have been more frequent during the past year or two than usual, due to factories shipping cheese so green, thus showing that the situation is becoming more aggravated rather than improving, and the hold being secured by the New Zealand cheese shippers on the British market has already made a marked difference in the buying of Canadian cheese for winter storage."

Among the recommendations noted by the commission was the advisability of amending the act respecting the weighing, measuring and gauging certain articles of general consumption, assented to on the 18th of March, 1865, so as to permit the appointment of special weighers for special trades.

The commissioners recommend that a competent official be appointed under the control and direction of the dairy and cold storage commissioner with headquarters at the city of Montreal, who shall be charged with the duty of investigating the weights of cheese when shortages arise, and as prompt action is necessary in the matter of reweighing cheese; and that the official be instructed to inspect daily the certificates of Mr. McLeod and his assistants and where excessive shortages are shown, that he immediately reweigh the cheese, and the result of his reweighing shall be considered to be the correct weighing between buyer and seller, and be final.

To Detect Faulty Cheese.

Such official should be competent to judge as to quality of cheese, and when instructed by the dairy and cold storage commissioner he should inspect as to quality, not for the purpose of acting as arbitrator, but for the purpose of detecting faulty cheese, and that he co-operate with the Ontario and Quebec Departments of Agriculture in advancing dairy interests, by reporting such defects promptly.

This official should also be provided with a thoroughly tested scale and be in a position when he found excessive shortages to go to the factory and examine into the reason for same, and if necessary test the scales in the factory. He should also be on the alert as to any false marking of weights, and where same is found notify the proper authorities so that parties guilty of false marking can be properly punished.

The Weights and Measures Act should be amended, so that all scales at cheese factories would be inspected at least once a year.

In the interests of the cheese industry of Canada, legislation should be passed preventing the shipment of cheese from place of production under ten days old.

In regard to the present method of payment for cheese it is evident that there is no desire among the dairymen of Canada that there should be any change. This is clearly shown by the resolution passed at the meeting of the Dairymen's Association of Eastern Ontario.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Hathaway, Ont.—October 6—Imperial Hotel. Loss $8,000.

Melita, Man.—October 6—Mr. W. J. Cobb's stable. Loss and cause unknown.

Vernon, B.C.—October 6—Exhibition buildings. Loss $3,000. Cause unknown.

Peterboro, Ont.—October 7—Rear Sakloff's drygoods store. Loss $1,000. Cause unknown.

Portage la Prairie, Man.—October 10—Roy shooting lodge. Loss $5,000. Cause, lightning.

Red Deer, Alta.—October 8—Mr. Meredith's residence, Woodlands. Loss and cause unknown.

Weyburn, Sask.—October 11—Mr. T. A. Underwood's automobile. Loss and cause unknown.

Hamilton, Ont.—October 9—Fishing huts at Winona Beach. Loss $10,000. Cause unknown.

Mallorytown, Ont.—October 12—Ferguson Hotel. Loss $3,000, partially insured. Cause, sparks.

Regina, Sask.—October 7—Regina Trading Company's premises. Loss $4,000. Cause unknown.

Hall's Harbor, N.S.—3 fish houses, 1 smoke house, 1 ice-house and store. Loss and cause unknown.

Fredericton, N.B.—October 7—Exhibition cattle sheds. Loss slight. Cause, children and matches.

Windsor, Ont.—October 9—Messrs. Berry Brothers' varnish plant. Loss slight. Cause unknown.

Shediac, P.E.I.—October 8—Messrs. J. B. King and Company's coal shed, etc. Loss and cause unknown.

North Vancouver, B.C.—October 6—Mr. J. Hanley's residence, Tenth Street. Loss $60. Cause unknown.

Denholm, Sask.—Denholm Hotel, owned by Messrs. Reinhardt and Kramer. Loss and cause unknown.

Gallup Hill, Que.—October 10—Mr. I. Lacroix's residence. Loss and cause unknown. Third fire in three years.

Orillia, Ont.—October 9—C. H. McAlary Company's boat building establishment. Loss $3,500. Cause unknown.

Brandon, Man.—October 6—Mr. E. A. Kaminske's dance hall, Sixth Street North. Loss $100. Cause unknown.

Lachine, Que.—October 11—Mr. A. Clement's hardware store, 14th Avenue. Loss $500. Cause, supposed bonfire.

Tillsonburg, Ont.—October 14—Messrs. Snedicor and Hathaway. Loss $1,000. Cause, supposed defective wiring.

Belmont, Man.—October 8—Mr. T. McLennan's blacksmith shop, etc. Loss $2,500, partially insured. Cause unknown.

Caledonia, Ont.—October 11—Storehouse occupied by Albastine Company and Sherra Milling Company. Loss and cause unknown.

Leamington, Ont.—October 9—Messrs. Barnard and Biggar's barn. Loss, building, $2,000; contents, tobacco crop, $6,000. Cause, lighted brand.

Morin Heights, Que.—October 10—Argenteuil Lumber Company's mills. Loss $30,000. Insurance $10,000. Cause, supposed overheated machinery.

Moncton, N.B.—October 12—Mr. L. Higgins and Company's barn. Loss $500. Cause unknown. Marven Biscuit factory. Loss slight. Cause unknown.

Scott, Sask.—October 3—Mr. F. Taylor's barn, eight miles south-west of Scott. Loss, barn and contents, $3,000; pair horses, $1,000. Cause, gasoline explosion.

Grassy Lake, Alta.—October 10—Mr. E. Sinder's residence, 5 miles north of Grassy Lake. Loss $1,800. Insurance, building, $700; furniture, $300. Cause, supposed stove.

Stoney Point, Ont.—October 9.—Mr. J. B. Lefalve's sheds and those of Mr. G. N. Gagne. Mr. Lefalve's loss, $1,200; Mr. Gagne's loss, $600; Mr. Disher's loss, motorcycles and horse. Cause unknown.

Saskatoon, Sask.—October 2—Mr. G. Shere's stable, 135 Avenue G. North. Loss $5. Cause, children and matches.

October 3—Mission Tent owned by Mr. J. Turner. Loss, tent and chairs, $200; no insurance. Cause unknown.

St. Thomas, Ont.—October 13—Mr. A. E. Agar's residence. Loss unknown. Cause, children and matches. One death.

October 14—Mr. J. H. Sell's barns, Shedden. Loss $4,000, partially insured. Cause unknown.

New Westminster, B.C.—October 2—Mr. J. Morehead's residence, 324 10th Street. Loss $25. No insurance. Cause, spark.

October 5—Residence, 10th Street. No loss. Cause, chimney fire.

Montreal, Que.—October 12—Mr. R. O. Smith's sash and door factory, 37 Hillside Avenue, Westmount. Loss $15,000. Cause unknown.

October 13—Mrs. Jubinville's residence, 1000 Charlevois Street. Loss slight. Cause, exploded lamp. Presbyterian College, McTavish Street. Loss and cause unknown. Dominion Flint Glass Company's premises. Loss and cause unknown.

October 14—Mr. C. E. Descharaus's sash and door factory. Loss $6,000. Insurance $4,000. Cause unknown.

Moose Jaw, Sask.—October 2—Mr. G. Gledhill's residence. Loss, building, $1,000; contents, $400. Insurance, Rimouski, building, $800; contents, $400.

October 5—Messrs. Battell Brothers' auto. Loss $150. Cause, lighted match ignited gasoline.

October 9—Mr. G. Kitchen's residence, Kent and Nairn. Loss slight. Cause, chimney.

Ottawa, Ont.—October 6—103 St. George Street. Loss and cause unknown. This was seventh fire in radius of two blocks.

October 9—77 Leduc Street. Loss $50. Cause, upset lamp. Rear Senecal and Glaude's store, 159 Rideau Street. Loss $100. Cause, supposed dropped match.

October 11—Cattle barn at Government experimental farm. Loss $75,000. No insurance. Cause, supposed spontaneous combustion. Draft flue at incinerator. Loss slight; Messrs. J. R. Booth's lumber mills. Loss small. Cause unknown.

October 13—Greater Ottawa Lumber, Sash and Door factory, Parkdale Avenue, Hintonburg. Loss $60,000. Cause unknown.

Toronto, Ont.—October 1—Swift Canadian Company's shed, Keele Street and St. Clair Avenue. Loss, building, $125; contents, $167. Cause unknown.

October 2—Frazer Storage Company's storage building, 11 Elizabeth Street. Loss, building, $50; contents, $100. Cause unknown.

October 4—Mr. J. Dunfield's Apartment House, 318 Clinton Street. Loss, building, $50. Cause unknown.

October 8—Mr. T. N. Anderson's barn. Loss $800. Mr. J. Pear's hay. Loss $600. Cause unknown.

October 9—Dominion Wool Stock Mills, 203 First Avenue. Loss, building, $50; contents, $500. Cause, supposed dropped match. Hay stack, Waverley Park. Loss $500. Cause, supposed incendiary. Shed rear 110 Broadway Avenue. Loss $20. Cause unknown.

October 11—Mr. H. O'Brien's residence, 511 Dupont Street. Loss, building, $25; contents, $35.

October 12—Mrs. J. Lane's grocery store, 54 Robinson Street. Loss, contents, $75; building, $25. Cause, mice and matches. Stable rear 254 Queen Street East. Loss, buiding, $50; contents, $450. Cause unknown.

October 13—Grand Trunk freight sheds, Parkdale. Loss, building, $4,000; cars, $4,000; contents, $1,000. Cause unknown. Mr. Turner's shed, 16 Beaconsfield Avenue. Loss $100; contents, $25. Cause unknown. Mr. E. H. Boyes' factory, 18 Beaconsfield Avenue. Loss, building, $400; stock, $500. Cause unknown. Mr. W. Whiting's stable, 633 Richmond Street West. Loss $700. Cause unknown. Mr. M. Pietro's shed, 631 Richmond Street West. Loss $50. Cause unknown.

VANCOUVER SEPTEMBER FIRES

During September the Vancouver fire department responded to 34 alarms divided as follows:—Chimney fires, 2; false alarms, 4; fires where damage occurred, 14; bush fires, 2; fires where no damage occurred, 12. The total damage done during the month was $15,542, with insurance paid $14,684, leaving the property loss above insurance, $858. The total value of property involved was $576,385. The most serious fire during the month occurred at Woodward's department store, Abbott and Hastings Street; damage to the extent of $9,650 occurred here.

A complete list of fires where damage occurred follows:—

September 1st.—Verbal alarm at 11.06 a.m. Fire in kitchen at 1446 Tenth Avenue West, caused by a gasoline explosion. Building owned by C. Erickson, and occupied by W. Hodson and used as a dwelling. Damage $110, partly covered by insurance.

September 3rd.—Telephone alarm at 4.07 a.m. Fire in some lumber on the west verandah at the Eagle Hotel, 115 Cordova Street West; cause unknown. Building owned by C. S. Douglas, and occupied by C. W. Night, and used as a temperance hotel. Damage $10, covered by insurance.

September 4th.—Telephone alarm at 1.54 a.m. Fire in automobile and garage in rear of 1457 Comox Street, cause unknown. Building and car owned by T. O. McKay. Damage $630, partly covered by insurance. Telephone alarm at 9.01 p.m. to the Gore Avenue slip. Fire in gasoline freight boat "Quarry Queen," caused by a gasoline explosion, when a match was struck to light the side lights. Boat owned by the Scott Goldie Quarry Company. Damage $425, covered by insurance.

September 5th.—Telephone alarm at 3.40 p.m. Fire at 838-842-844 and 890 Pender Street West, occupied by Mrs. Webster, rooming house; Mrs. Hallman, candy store; A. Ross, motorcycle agent, and Mrs. Gallagher, furnished rooms. The blaze started at 844, occupied by the motorcycle store, and was caused by a short-circuit on motorcycle, causing a gasoline explosion. The fire had a good start when the apparatus arrived and quickly spread to the adjoining premises, considerable damage resulting. 838-42-44 owned by Mrs. McKay, and 890 by C. E. Turner. Both buildings were two-storey frame structures. Damage $3,310, partly covered by insurance.

September 10th.—Telephone alarm at 9.08 p.m. Small fire on kitchen roof at 1181 Homer Street, caused by sparks from chimney. Building owned by H. H. McDougall, and occupied by Mr. McDaniel and used as a dwelling. Damage about $7, covered by insurance.

September 13th.—Telephone alarm at 2.58 a.m. Fire in two-story frame dwelling at 729 Heatley Avenue, owned by A. J. Gay, and occupied by G. Barber. The blaze started in shed in rear of building and spread to the house. The house in the rear at 666 Harris Street, owned by E. Chalmers, was also slightly damaged. Damage $600, partly covered by insurance.

September 18th.—Telephone alarm at 12.38 p.m. Small fire in basement at 1947 Quebec Street, caused by a barrel of lime getting wet. Building owned by J. Sullivan, and occupied by G. Ogilvie, and used as a dwelling. Damage $5.

September 20th.—Telephone alarm at 10.50 a.m. Small fire on roof of dwelling at 1751 Main Street, caused by sparks from chimney. Building owned by G. B. Kerfoot, and occupied by J. Vaun. Damage $14, covered by insurance.

September 21st.—Telephone alarm at 3.35 a.m. Small fire at 1007 Davie Street, owned by D. R. Cowan and occupied by Mrs. Armour, and used as a clothes cleaning and dyeing establishment. The fire was caused by an electric iron being left turned on and was confined to the room where it originated. Damage $20, covered by insurance. Telephone alarm at 5.26 p.m. Fire on roof of dwelling at 736 Seventh Avenue West, owned by C. Pearce, and occupied by F. W. Gilbert. The fire was caused by sparks from chimney, the attic being slightly damaged. Damage $130, covered by insurance.

September 22nd.—Telephone alarm at 6.13 p.m. Fire at the Farr Brass Company's premises at 546 Howe Street. The blaze started in the stock-room from some unknown cause, slight damage resulting to both building and contents. Building owned by the Electrical Construction Company. Damage $235, covered by insurance.

September 28th.—Telephone alarm (Western Union), at 6.45 p.m., to Woodwards department store, north-west corner Hastings and Abbott Streets. The fire started in the hardware department on the fourth floor, and was apparently caused by a lighted cigar being thrown in a waste-paper basket, and was confined to that floor, but some damage was done to the stock on the lower floor by water. Considerable damage was done to the stock. Building owned by Chas. Woodward. Damage $9,650, covered by insurance.

September 27th.—Alarm from Box 1317 at 9.26 p.m. Fire in two-story frame vacant dwelling house at 902 Eighth Avenue West, owned by John Clifford. The blaze started in the kitchen and in stairway leading to attic, and was of incendiary origin. Damage $400, covered by insurance.

The total number of alarms was 34; chimney fires, 2; false alarms, 4; value property involved, $576,385; loss, $15,542; insurance paid, $14,684; loss above insurance paid, $858; hose laid at fires, 11,900 feet; chemicals used, 1,569 gallons.

◆

The amount of collections for the Medicine Hat customs house, as per returns furnished by Collector Ware, for the month of September were $23,116, as compared with $13,816 for the month of September, 1912. For the nine months of 1913 the collections have been $272,128. For the same period of last year they amounted to $118,583, thus showing an increase this year of more than 100 per cent.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Marconi Wireless Company of Canada.—The annual statement of the Marconi Wireless Telegraph Company of Canada, shows an improvement over the results of the previous year's business. Against a net loss on operation amounting to $5,467 the previous year, a profit of $62 is shown in the present report. The improvement is better than indicated by these figures, however, as interest on advances, which had amounted to $34,170 the previous year, is reduced to $19,046. Taking net results from operation and interest charges together, the actual deficit was reduced from $39,638 in 1911-12, to $18,981 in 1912-13. The balance sheet shows total assets of $5,573,959, as against $5,441,681 a year before. The directors were re-elected.

Mexico Tramways Company.—The following is a statement of earnings and expenses from traffic only, as advised by cable, for the month of September, 1913, in Mexican currency:—

	1912.	1913.	Increase.
Total Gross Earnings	$ 587,734	$ 604,744	$ 17,010
Operating Expenses	271,551	282,549	10,998
Net Earnings	$ 316,183	$ 322,195	$ 6,012
Aggregate Gross Earnings from January 1st ...	$5,008,432	$5,116,331	$107,899
Aggregate Operating Expenses from January 1	2,379,316	2,380,103	787
Aggregate Net Earnings from January 1	$2,629,116	$2,736,228	$107,112

The Mexican Light and Power Company, Limited.—The following is a statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the months of September, 1913, in Mexican currency:—

	1912.	1913.	Increase.
Gross Earnings:—			
The Mexican Light and Power Company, Limited	$ 627,344	$ 969,073	$ 68,729
Pachuca Light and Power Company	101,286	137,687	36,401
Total Gross Earnings	$ 728,630	$ 833,760	$105,130
Net Earnings:—			
The Mexican Light and Power Company, Limited	$ 474,843	$ 534,775	$ 59,932
Pachuca Light and Power Company	58,334	68,149	9,815
Total Net Earnings	$ 533,177	$ 602,924	$ 69,747
Aggregate Gross Earnings from Jan. 1st:—			
The Mexican Light and Power Company, Limited	$5,505,374	$5,854,853	$349,479
Pachuca Light and Power Company	1,011,047	1,190,117	179,070
Total Aggregate Gross Earnings	$6,516,421	$7,044,970	$528,549
Aggregate Net Earnings from January 1st:—			
The Mexican Light and Power Company, Limited	$4,088,115	$4,500,421	$412,306
Pachuca Light and Power Company	588,926	654,618	65,692
Total Aggregate Net Earnings	$4,677,041	$5,155,039	$477,998

◆

Saskatoon's fire loss for September amounted to $41,825. The total loss for eight months ending August 31, according to Fire Chief Heath's report, was about $20,000.

SPANISH RIVER REPORT ISSUED

Term Notes Substituted for Proposed Preferred Shares —No Stock Dividends to be Paid During Their Currency

The report of the Spanish River Pulp and Paper Mills, Limited, for the year ended June 30, 1913, was issued this week. Mr. T. H. Watson, vice-president and managing director, says:—

"No financial report was issued for the broken period of six months ending 30th June, 1912. In this period the new paper mill at Espanola was under construction, and the lately-acquired mill at Sturgeon Falls was undergoing extensive repairs and additions, hence the only source of revenue was from the sale of groundwood pulp made at the Espanola plant, for which the market was very dull at that time. In view of these circumstances a portion of the reserve from the previous year had to be applied to cover fixed charges and preferred dividends, as set forth below:—

Reserve and surplus account, as at 31st December, 1911		$ 91,551.11
Manufacturing profits for six months ended 30th June, 1912		54,645.35
		$146,196.46
Bond interest and other charges	$69,916.21	
Preferred dividends	70,000.00	139,916.21
Surplus as at June 30th, 1912		$ 6,280.25

What the Directors Met.

"The result of operations for the fiscal year ended 30th June, 1913, are set forth in the attached statements, and while the figures may prove disappointing to some of the shareholders, your directors, after carefully considering the adverse conditions and unforeseen difficulties which have had to be overcome in the starting up of the plants, are of the opinion that these results are all that could be expected.

"It may be explained that the first two paper machines installed at Espanola Plant were originally expected to be operating by January, 1912, whereas, owing to delays in construction of buildings and delivery of machinery, etc., they were not actually ready for operation until the months of June and July, after which certain defects in construction caused further delays and interference with the output, with the result that the total production of these two machines for the fiscal year was only some 25,300 tons. Owing to similar conditions at the Sturgeon Falls plant the two machines there produced only 9,700 tons, or a total output of 35,000 tons as compared with a normal capacity of 45,000 tons on the four machines.

"Two additional paper machines have since been installed at the Espanola plant having a daily capacity of 60 tons. These machines, as well as those originally installed, are now all in successful operation, and a careful estimate of the probable production of the six machines for the year commencing 1st July last, that is for the current fiscal year, will be approximately 63,000 tons as against 35,000 tons for the preceding year. With this large increase in production your directors feel confident that the results of the current year's operations may prove satisfactory to the shareholders.

No Provision for Depreciation.

"It will be noted that no provision has been made during the year for depreciation, but in the opinion of your directors ample provision to cover this item is made through the operation of the sinking funds on the bonds of both the Spanish and Ontario Pulp Companies, as an annual charge of 3 per cent. is applied for redemption of bonds, which is a very heavy charge and is estimated will retire these bond issues in about 17 years. Furthermore, the successful operation of paper mills requires that the machinery be maintained in the highest state of efficiency, the cost of such maintenance being charged against operations.

"The plant and equipment are in excellent condition and operating very efficiently, and the product has been disposed of at satisfactory prices."

Figures of the Balance Sheet.

The balance sheet submitted is as follows:—

Assets.

Cost of Properties:		
As at July 1, 1912	$8,329,368.17	
Additions during the year	772,744.47	
		$9,102,112.64
Sinking Fund Assets:		
Cash in hands of trustees		2,328.14
Current and Working Assets:		
Wood in streams and at plants, supplies, pulp, paper, etc., as certified by the management	$1,426,988.62	
Bills receivable	112,698.18	
Accounts receivable	338,119.46	
Duty recoverable from United States Government	56,108.57	
Cash in banks and on hand	2,886.07	
Cash deposited against bond interest due 1st July, 1913	29,300.00	
		1,966,100.90
Deferred Charges:		
Commissions, discounts and expenses in connection with issues of securities	$412,345.49	
Unexpired insurance premiums, etc.	24,683.55	
Other deferred charges	99,621.12	
		536,650.16
		$11,607,191.84

Liabilities.

Capital Stock:			
Preferred 7% cumulative—			
Authorized and issued		$3,000,000.00	
Common—			
Authorized	$4,000,000.00		
Issued		3,000,000.00	
			$6,000,000.00
Bonded Debt:			
The Spanish River Pulp and Paper Mills, Limited		$2,500,000.00	
Less: Purchased by trustees in September, 1912		76,500.00	
		$2,423,500.00	
Ontario Pulp and Paper Co., Limited		1,500,000.00	
			3,923,500.00
Current Liabilities:			
Royal Bank of Canada—Loan secured by pledging inventories, notes and accounts receivable, etc.		$ 357,250.00	
Trade bills payable		25,990.65	
Accounts payable, accrued payrolls, etc.:			
Miscellaneous	$352,534.27		
Canada Foundry Co.	93,227.14		
Government dues	63,813.19		
		509,574.60	
Accrued bond interest paid in July, 1913		117,705.00	
Preferred dividend paid in July, 1913		52,500.00	
Sundry reserves		2,677.50	
		$1,065,697.75	
Dominion Bond Co'y loan secured by short term and equipment notes of a par value of $884,380.00	$605,500.00		
Accrued interest	12,333.85		
		617,833.85	
			1,683,531.60
Surplus:			
At July 1, 1912, as per last annual accounts		$ 6,280.25	
Net profits from operations		190,754.99	
		$ 197,035.24	
Less: Dividends to preferred shareholders		196,875.00	
			160.24
			$11,607,191.84

Appetite of the Plants.

In a letter to the shareholders, Mr. T. Gibson, secretary, says, "that the operations of the company's three plants will consume about 200,000 cords of pulpwood annually, this wood being cut from Ontario Government concessions of the Spanish Company, which comprise some 8,900 square miles. The Lake Superior Company procures its requirements of wood from the land grants of the Algoma Central Railway which comprise 1,637,250 acres over which the company has the right to cut pine, spruce and other woods. The organization for the joint operation of these plants and the marketing of their product is now receiving attention, and it is felt that considerable economies can be effected.

Scheme of Refinancing.

"In the circular issued in July last, it was proposed to raise additional working capital by a further issue of preferred shares, but this plan of financing has been changed, and an issue of term notes substituted, this issue providing the necessary capital for the requirements of the company, it being intended that during the currency of these notes, no dividends on the company's capital stock should be declared or paid. The rearrangement of the finances of the joint companies has been effected by large financial interests in London, England, who deem it advisable to reduce the number of the board of directors to seven."

Mr. T. H. Watson, vice-president and general manager of the company, made a statement regarding this financing, of which the following are extracts:—

"The preparation and publication of the report have had to be deferred pending a settlement of the basis of the new financial arrangements for the company. These have now been completed, and will take the form of an issue of £300,000 of term notes, which have been underwritten at 95 by the London financial group, consisting of Messrs. Robert Fleming and Company, the British, Foreign and Colonial Corporation and their friends, the Canadian Agency, Limited, and Messrs. R. Niveson and Company.

"The proceeds of this issue will put the company in funds and enable its operations to be carried on successfully."

MEDICINE HAT EXTENDS UTILITIES

Distinct progress is being made in Medicine Hat in extending public utilities, notwithstanding the monetary stringency. The report of city engineer A. K. Grimmer, for September, shows that in the natural gas department service mains were extended about five and a quarter miles. Besides this 74 new meters, 42 services and 25 new street lamps were installed, and more than a thousand feet of temporary lines were laid. The No. 2 gas well is down about 1,000 feet, and work of drilling No. 3 is under way, and the equipment is on the ground for No. 4 well.

In the water department more than a mile of six and eight inch mains were laid. It is expected to have all the concrete work for the new reservoir completed by the end of this month. Maintenance in this department, as well as in the gas department has been exceedingly light during the month.

About 3,600 feet of new sewer mains were laid during the month. In the electric light department, nearly four miles of main line were constructed during the month. Work on the high tension line from the new power station was commenced and the construction of the reinforced concrete transformer station building in the industrial section will be completed during November.

CANADIANS MINING IN MEXICO

The San Martin Mining Company of Canada, Limited, was formed by Montreal men (including C. A. Barnard, K.C., director Richelieu and Ontario Navigation Company, etc.; Hon. J. A. Ouimet, K.C., president of the City and District Savings Bank of Montreal, vice-president of the Credit Foncier Franco-Canadian; and D. W. Ogilvie, vice-president North Montreal Land Company) for the purpose of developing and operating the San Martin mine. The San Martin mine is situated one mile from the railway station of San Martin de los Cansecos, in the State of Oaxaca, Mexico. The property comprises some 191 acres, containing on the line of the vein over 7,000 feet, of which only about 1,200 feet has so far been prospected, a further acreage has recently been secured on the dip of the reef. The capital of the company is $750,000, in 150,000 shares of $5 each, all of which are issued and fully-paid. There are no debentures and no preference stock. After paying for the mill and cyanide plant the company will have sufficient working capital in hand. The London agents of the company are the Anglo-Canadian Finance Company, Limited, 6, Old Jewry, E.C.

London authorities complain in reference to companies of this character, that the overseas public have little means of forming an opinion as to the merits of the undertakings.

The Edmonton Daily News, Limited, has changed its name to Edmonton News Publishing Company, Limited.

HOP-GROWING IS SUCCESSFUL

This British Columbia's Industry Employed Hundreds During Harvesting—September Log Production

(Staff Correspondence.)

Vancouver, October 13th.

Hop-growing in British Columbia is an industry that little is heard about, yet it is prominent at Agassiz and Chilliwack. Both of these places are in the lower Fraser Valley. Agassiz is 70 miles east of Vancouver on the main line of the Canadian Pacific Railway, and it is the first town the railway strikes after the Fraser River canyon. The district is one of the best on the lower mainland for dairying, and the experimental farm is located on 1,200 acres of land, near the station. Three hundred acres are cultivated for hops by the British Columbia Hop Company, which is the local name of the E. C. Horst Company, of San Francisco. This company has a similar acreage under hops in the Chilliwack district also. The investment at Agassiz represents $250,000, and before the hops are ready for picking a large amount of labor is necessary. The hop is a perennial, but many plants have to be reset each year. This season about 380,000 pounds of hops were harvested, which will bring 30 cents a pound or $115,000 gross. Eight hundred pickers were employed in the harvesting, which occupied about a month. The hops grown in British Columbia are unsurpassed by those grown elsewhere, and always command highest prices. This hop-growing is an excellent instance of good profits being made direct from the land, and shows what is possible on the coast.

Traffic Between Australia and Canada.

A larger trade with Canada is the object of Australia, and in emphasizing this point, Mr. J. W. Kelly, of Melbourne, a representative of the Victoria government, gave an interesting talk before the Progress Club this week. While Mr. Kelly pointed out some trade possibilities, he said that Australia bought more from Canada than Canada did from Australia. Merchants and shippers in the south desired to send more goods to Canada, and a greater amount of traffic would be beneficial to both countries. Mr. Kelly, in his visit to Canada, has another object in view, to suggest to people who would move the desirability of settling in Australia.

The meat trade is one of the big lines between Australia and Canada, and there is now due a special steamer bringing a cargo of frozen beef and mutton to British Columbia. Meats are high in price here, the best cuts of beef are scarcely less than turkey per pound, and with the prospect of a still higher price it is not improbable that larger quantities of both kinds will be shipped in from the Antipodes this winter. Frozen meats has for a number of years formed a chief part of the cargoes of the Canada-Australian line of steamers.

Log Production in Millions.

Building in Vernon, the principal town in the Okanagan district was satisfactory in September, being $20,000 over the total for August. For the first nine months of the present year the building amounted to $156,593, which is large for an interior town the size of Vernon. That further development is expected is shown by the construction of a new $20,000 courthouse, a $25,000 structure by the Royal Bank of Canada and a building to cost a similar amount by the Canadian Bank of Commerce.

Log production during September would indicate that timber owners anticipate a resumption of better times shortly. The output was 66,000,000 feet, which compares very favorably with the production of September, 1912, when 81,000,000 feet was put in the water, but in these figures was included the cut for Vancouver Island, which exceeds ten million feet. Under the system now in effect, the mainland coast district is separate from Vancouver Island, so that in September a year ago the cut in this section would approximate 70,000,000 feet. At present lumbering is not particularly active, though the majority of the mills are cutting. These will do a large and profitable business in firewood this winter, as this is oddments and sells for $3.50 for a load.

◆

The Royal Farm and Machinery Company, of Manitoba, are locating at Prince Albert, Sask., and will invest $100,000 in the proposed plant there.

"I have £3,000 in the Amalgamated Asbestos Corporation, an investment I guess is not worth £500 now," said a North of England investor in *The Monetary Times* office the other day, "and I have £1,000 in one of Pollman Evans' companies,"—another case of the British investor in trouble.

COMPANIES LICENSED

The Alberta-Saskatchewan Life Insurance Company, with head office at Edmonton, has been licensed to do business in Canada.

The Ridgely Protective Association of Hamilton, Ont., has also been licensed to do business in Canada.

The Perfect Stove Company, Limited; Chappell and Company, Limited; Prest-O-Lite Company, Incorporated; and the Thompson Shoe Company, Limited, have been licensed to do business in Ontario.

EDMONTON AS A PACKING CENTRE

The new packing plant of Messrs. P. Burns Company, Limited, at Edmonton, will employ about 200 men, a staff of 50 clerks and make a daily market demand for 2,200 animals. This means much to Edmonton as an industrial centre, and also Alberta's mixed farmers.

The business of the Swift Canadian packing plant will be duplicated by the P. Burns Company, and when in full operation will have a daily capacity of 200 head of cattle, 1,000 hogs and 1,000 sheep, besides handling tons of poultry, butter and eggs.

COBALT ORE SHIPMENTS.

The following are the shipments of ore in pounds from Cobalt station for the week ended October 10th, 1913:—Tretheway Mines, 40,000; O'Brien Mines, 87,400; McKinley Darragh Savage Mines, 71,665; La Rose Mines, 348,600; Miller Lake and O'Brien Mines, 49,800; total, 597,465. The total shipments since January 1st, are now 30,958,976 pounds, or 15,429 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

SOMETHING FOR AFTER OFFICE HOURS.

When the business man reaches home after the day's work and his children bombard him with the usual assortment of apparently unanswerable questions, he will turn with relief to "The Book of Knowledge." The 20 volumes comprising it are being sold in Canada. They answer the kids' questions and give them the desire to learn. Simplicity without silliness, clearness without dullness, accuracy without pedantry, high ethical teaching without preaching—are some of the difficult achievements which have been realized. Men and women, who know the mind and heart of childhood as well as their own special subjects, working together with zeal and enthusiasm, have produced a work unlike anything ever before published. "The Book of Knowledge;" The Children's Encyclopædia, sold by the Grolier Society of London, 307 Manning Chambers, Toronto.

FORT WILLIAM'S SEPTEMBER FIRE LOSS.

Fort William's September fire loss, as reported to *The Monetary Times*, by Fire Chief Cameron, was as follows:—

September 6—Two residences on Island No. 2, owned by Mr. E. Steigh and occupied by Mr. J. Collins and P. Wilcox. Loss, building, total; contents, small. Insurance, building, $1,500; contents, $1,500. Cause, supposed stove.

September 9—Canada Iron Corporation's switch board. Cause unknown.

September 10—Canada Iron Corporation's wheel house. Cause, supposed incendiary.

September 17—Messrs. Ray, Street and Company's garage and auto, Simpson Street. Loss, building, $100; contents, $1,000. Insurance, $1,200. Cause, collision of auto with gasoline tank.

September 20—Mr. A. Ostram's residence, 217 Harold Street. Loss, slight. Cause, chimney.

September 28—Butcher's shop, 645 Simpson Street, owned by Messrs. O'Donnel, Walsh and Murphy. Loss, building, $300; contents, $400. Insurance, building, $1,000; contents, $700. Cause unknown.

September 29—Messrs. Anderson and Company's plumbing store. Loss, building, $20. Fully insured. Cause, dropped lighted candle.

September 30—Mr. J. Frank's fruit store, owned by Messrs. O'Donnell, Walsh and Murphy. Loss, building, $495; contents, $400. Insurance, building, $1,000.

JOTTINGS FROM CANADA'S ISLAND

All is not gold that litters.

* * * *

They cannot all be Daltons.

* * * *

Prince Edward Island comes to the front again.

* * * *

Many of the investors may yet want some "yelp."

* * * *

In future coon songs, Rastus will rob the fox roost.

* * * *

One may know the A.B.C. but the fox has learned his P. E. I.

* * * *

They may have kept autos off the Island for the sake of the fox.

* * * *

One day, the inevitable amalgamation of fox companies will come.

* * * *

It seems to be a case of a sure 3 per cent. or a possible fox per cent.

* * * *

This new farming industry is in short a business of dollars and scents.

* * * *

An island is a strip of land surrounded by water and trampled by foxes.

* * * *

The prospective investor should examine carefully the company's foxpectus.

* * * *

As in all enterprises, honest management is one of the important factors in fox farming.

* * * *

The estimated earnings of fox farm companies seem to be figured largely with the help of Nature.

* * * *

In Cobalt companies the fox was often behind the pen; in Prince Edward Island he is in the pen.

* * * *

The government savings banks have suffered withdrawals, which may yet prove, as the office boy says, too foxy a move.

* * * *

The demand for foxes is for stocking new farms, which in turn may create a savings demand, for new farm stockings.

DOMINION STEEL STOCK DECLINE.

Monetary Times Office,
Montreal, October 15th.

Holders of the preferred stock of the Dominion Steel Corporation, during the last few days, have been watching the price of their stock declining. Last week Dominion Iron preferred sold on the local market at 97 and towards the close of the week a further sale took place at 95. On Wednesday morning the stock was traded in at 89 and by the close of the day selling had carried the price down to 86. This drop of three points took place notwithstanding the fact that the entire sales of the day were less than 200 shares. Meantime, the common stock of the corporation showed little tendency to lower prices, being however down to 42¾ at the close of the day, compared with one point higher at the opening, and with a recent high in the vicinity of 46.

It has been suggested that the weakness in the preferred is mainly due to the proposals concerning new financing which Mr. Plummer is now on his way over to England to execute. The claim is made that the time is altogether inopportune for the sale of bonds at anything like a price which would be remunerative and that such a sale at present rates would reflect adversely upon the price of the bonds already outstanding. Accordingly, it is proposed to accomplish the financing by the issuance of preference stock.

Why an issue of preferred stock should exercise such a depressing influence upon prices as to cause them to decline more than 10 points on sales of a few shares is not clear. Rather would it seem that the price of the preferred has been held up to too high a level, otherwise, it would seem that liquidation of a few hundred shares would be readily absorbed by the purchasing public at but a slight decline.

THREE RIVERS SEPTEMBER FIRES.

Three Rivers September fire losses, reported to *The Monetary Times*, by the Fire Chief, were:—

September 1—Lanctot Realty Company's grove. Loss unknown. Cause, tramp.

September 10—Mr. A. Brunel's residence, owned by Mr. J. Rage. Loss, building, $200; contents, $204. Insurance, building, $3,000; contents, $1,000. Cause, electric wires.

September 11—Mr. C. St. Pierre's shed, owned by J. Chaiwel. Cause, children playing with matches; Mr. E. C. Carufel's residence. Loss, building, $720; contents, $920. Insurance, building, $4,000; contents, $4,500. Cause unknown.

September 16—Mr. H. Godin's shed.

September 22—Mr. A. Brund's residence, owned by Mr. J. Page. Cause, overheated stove.

September 24—Pickard's tobacco factory. Loss, building, $10; contents, $500. Insurance, contents, $1,000. Cause, overheated stove.

September 29—Mr. A. Beland's butcher shop. Loss, contents, $35. Insurance, contents, $3,000; building, $5,000.

September 30—Mr. A. Laroche's residence, owned by Mr. A. Sperard. Loss, building, $415; contents, $310. Insurance, building, $800; contents, $500. Cause, chimney.

◆

LIABILITY BROKERS OPPOSE COMMISSION REDUCTION.

A committee of insurance brokers of New York city have entered a formal protest against the proposed reduction of brokerage commissions on liability insurance business to 12½ per cent., before state superintendent of insurance, William T. Emmett. The brief states:—"The satisfactory conditions, existing for the last two years or more in the liability business, as to commissions and other matters, has been due to the competition among the companies and lack of faith and distrust in one another. Many of the brokers of this city have spent the best part of their lives, some of us upward of 25 years, in acquiring the knowledge, education and training so necessary to our business, which is a technical one. There are thousands of young men, necessarily of a high grade of intelligence, who have been trained in our branch of the business and who depend upon it for a living. It is not possible for a brokerage business to be conducted profitably on a 12½ per cent. commission and we do not believe that you will permit the liability companies to use you as a cloak to conceal their effort to destroy the broker."

◆

RAILWAY EARNINGS.

The following are the railroad earnings for the month of September and first week in October:—

	1913.	1912.	Inc. or dec.
Canadian Pacific Railway.			
Sept. 7th	$2,496,000	$2,649,000	— $153,000
Sept. 14th	2,462,000	2,667,000	— 205,000
Sept. 21st	2,769,000	2,549,000	+ 220,000
Sept. 30th	4,160,000	3,457,000	+ 703,000
	$11,887,000	$11,322,000	+ $565,000
Oct. 7th	$3,145,000	$2,765,000	+ $380,000
Grand Trunk Railway.			
Sept. 7th	$1,099,259	$1,082,457	+ $ 16,802
Sept. 14th	1,144,856	1,110,514	+ 34,342
Sept. 21st	1,134,021	1,101,588	+ 32,433
Sept. 30th	1,492,505	1,464,723	+ 27,782
	$4,870,641	$4,759,282	+ $111,359

GOLD RESERVE WORKING

The central gold reserve established at Montreal by the government under the provisions of the Bank Act, has begun its work, to increase the note circulation. Deposits of about $4,000,000 are reported. For every dollar deposited in gold in this reserve the banks making the deposit may issue an equivalent in note circulation. This is in addition to the ordinary powers and those exercised under the provisions governing emergency circulation.

◆

RUSSELL STOCKHOLDERS AWAIT REPORT.

Dividends at the rate of 7 per cent. were paid on the $1,200,000 preferred stock of the Russell Motor Car Company, up to the end of the last fiscal year, ended June 30, the last quarterly payment being made on August 1. Notice has now been sent to the Toronto Stock Exchange, that the quarterly payment falling due November 1 will not be paid at present. The common stock dividend was passed in the spring.

The annual statement of the company is not yet ready for publication, but it is understood that the figures that will be shown will not be very satisfactory.

◆

WESTERN PROVINCES PREPARE FOR ANOTHER CROP

Monetary Times Office,
Winnipeg, October 14, 1913.

Improved business conditions are noticeable throughout the west. Threshing operations are now nearing completion and conditions in this respect have been the best experienced in years. In many sections of the country the farmers have their threshing done and many have been able to get a great of their fall ploughing done. Bad weather and the lateness in getting the crop threshed last fall interfered with this work. Conditions are now much better, and the farmers will be in better shape for next year's crop, which should result in large additions to the returns.

Financial conditions also are improving, and during the next month or six weeks a great deal of indebtedness should be liquidated.

The Monetary Times has discussed the western situation with a number of prominent men recently, who have covered large areas, and the gist of their reports would indicate that Western Canada is in good trim. Regarding the general wholesale and retail trade one prominent man stated that there were more people paying cash for what they got this fall than for several years past.

Regarding collections an improvement has been noticed during the past week, according to the results obtained by many of the machine companies and insurance companies.

ALBERTA'S INSURANCE LAWS CHANGED

Amendments are Slightly in Favor of Companies—Many Concerns Licensed Since July

Alberta has amended its insurance act. It has been said that the clause requiring companies to maintain a reserve, was repealed. This is not so. The clause reads as follows:—

"Every company incorporated by the Legislative Assembly of Alberta or licensed under the Alberta Insurance Act, or transacting any business of life insurance in this province, shall maintain a reserve for the protection of its policyholders, computed on the basis of the reserve required under the provisions of the insurance act of Canada, for the time being in force."

In Favor of Companies.

On the other hand, section 10 of the act is repealed and is made to read, "Shall deposit with the treasurer such a percentage of the reserve required by section 9 thereof on all its Alberta policies as the superintendent of insurance may direct." This clause formerly read, "The company shall deposit with the treasurer the reserve required by section 9 on all its Alberta policies." This is simply a modification slightly in favor of the insurance company.

Section 28, Clause "B" reads, "Every benevolent, provident, industrial or co-operative society not incorporated by or under the authority of an act of the Parliament of Canada, shall keep on deposit with the treasurer $10,000, etc." This has been amended by adding the words, "or of an Act of the Province thereof" after the word "Canada."

What the Fees Are.

The amendment to section 58 makes the fees as follows:—

Life Insurance	$300.00
Fire	300.00
Hail	200.00
Accident, Sickness and Guarantee	200.00
Mutual Insurance	100.00
For one or more of all other kinds of insurance	100.00

To those companies already stipulated in the insurance act, with certain sums mentioned for deposit with the treasurer, this sub-section is added: "Every foreign mutual fire or fire and inland marine company insuring mercantile and manufacturing risks shall keep on deposit with the treasurer $10,000; but a foreign mutual fire insurance company not insuring mercantile and manufacturing risks shall keep on deposit with the treasurer $5,000."

Section 5, sub-section 2 has been amended by adding the words, "nor to any provincial company" after the word "licensed."

The above notes cover all the amendments to the act that will have any material effect on the insurance companies.

Mr. G. H. Babbit is deputy superintendent of insurance for Alberta.

Companies Licensed in Alberta.

The following insurance companies have been licensed to do business in Alberta since the Insurance Act come into force on July 1st, 1913:—

Atlas, London, Eng.; Aetna, Hartford, Con.; Alliance, London, Eng.; American, Newark, N.J.; Anglo-American, Toronto, Ont.; Acadia, Halifax, N.S.; American Central, Winnipeg, Man.; Alberta Canadian, Edmonton, Alta.

General Animals Insurance Company of Canada, (Live Stock) Montreal, Que.

◆

WHAT NATURE HAS GIVEN BRITISH COLUMBIA

British Columbia's coal-measures are sufficient to supply the world for centuries; it possesses the greatest compact area of merchantable timber in North America; the mines have produced over $400,000,000, and may be said to be only in the early stages of development; the fisheries produce an average annual value of over $10,000.000, and, apart from salmon-fishing, their importance is only beginning to be realized: the immense deposits of magnetic and hematite iron of the finest quality, which remain undeveloped: the agricultural and fruit lands produced approximately $21,000,000 in 1912, and less than one-tenth of the available land is settled upon, much less cultivated: British Columbia has millions of acres of pulp-wood unexploited: petroleum deposits, but recently discovered. Bestowed by nature with all these essentials, British Columbia is destined to occupy a significant position in the world's commerce and industry.

FOUR LARGE CORPORATIONS

Newly Chartered Companies Reflect Activities in Progress Throughout the Dominion

New incorporations number fifty-two, the head offices of these companies are located in four provinces. The total capitalization amounts to $8,103,900. The largest companies being as follows:—

Electric Manufacturing Company of Canada, Limited, Montreal	$2,000,000
Merchants Mutual Lake Line, Limited, Toronto	1,500,000
Model Dairies, Limited, Montreal	1,000,000
Hamilton By-Product Coke Ovens, Limited, Hamilton	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Quebec	13	$3,768,900
British Columbia	8	280,000
Ontario	20	3,730,000
Alberta	11	325,000
	52	$8,103,900

Victoria, B. C.—Fulton Bros., Limited, $100,000.

Castor, Alta.—Nicholl and Dillon, Limited, $50,000.

Mundare, Alta.—The Mundare Hotel Company, Limited, $25,000.

Athabasca, Alta.—Athabasca Realty Company, Limited, $10,000.

Medicine Hat, Alta.—The Keystone Investment Company, Limited, $50,000.

Fort Murray.—Alta.—Arctic Trading and Transit Company, Limited, $25,000.

Vernon, B.C.—The Vernon Carriage and Automobile Company, Limited, $50,000.

Almonte, Ont.—Kir-Benn, Limited, $200,000. A. M. Greig, W. H. Stafford, W. Thoburn.

Walkerville, Ont.—C. A. Chilver Company, Limited, $40,000. C. A. Chilver, J. R. Ridley, C. L. Chilver.

Victoriaville, Que.—Victoria Hide and Skin Company, Limited, $99,900. W. Paradis, P. Leduc, G. Simoneau.

Pembroke, Ont.—The O'Gorman Company, Limited, $50,000. M. E. O'Gorman, M. M. O'Gorman, E. M. McAuliffe.

St. Malo, Que.—Saint Malo Furniture Company, Limited, $49,000. J. E. A. Decelles, J. A. Agagnier, T.S. Lemieux.

Chatham, Ont.—The Wallaceburg Oil Refining Company, Limited, $200,000. D. A. Gordon, R. G. Stitt, J. T. Montgomery.

Cookshire, Que.—The Westbury Electric Light and Power Company, $75,000. H. A. Worby, G. W. Allard, R. C. Cowling.

St. Johns, Que.—The Canadian Clarendon Marble Company, Limited, $100,000. H. J. Trihey, W. P. Kerney, E. Lafontaine.

St. Martin, Que.—St. Martin Lumber Manufacturing Company, Limited, $49,000. J. E. A. Decelles, J. W. Lavoie, L. A. Lavoie.

Owen Sound, Ont.—The News Printing Company, of Owen Sound, Limited, $10,000. J. D. Finlay, J. H. Finlay, D. R. Dobie.

Stoney Creek, Ont.—Parry Sound Basket and Veneer Company, Limited, $60,000. S. D. Biggar, F. F. Treleaven, R. W. Treleaven.

Edmonton, Alta.—Edmonton Recreation Company, Limited, $50,000. Developments, Limited, $20,000. Commercial Printers, Limited, $20,000.

Calgary, Alta.—Standard Liquor Company, Limited, $15,000. William W. Carey and Company, Limited, $10,000. Hughes Meat Company, Limited, $50,000.

Windsor, Ont.—White Star Refining Company, Limited, $10,000. H. B. Earhart, R. Manley Connor, R. A. Bell. Windsor Sand and Gravel Company, Limited, $40,000. H. A. White, M. White, S. E. McDowell.

Vancouver, B.C.—Newcombe's, Limited, $15,000. R. C. Purdy, Limited, $10,000. Carstens Goldstone, Limited, $10,000. Western Builders, Limited, $25,000. Courtenay Condensed Milk Company, Limited, $50,000. The British Columbia Office Equipment Company, Limited, $20,000.

Hamilton, Ont.—Pythian Hall of Hamilton, Limited, $40,000. A. Ramsperger, W. Pebbles, E. W. Muma. Wheldan Park, Limited, $40,000. W. H. Daniels, W. T. Elliott, J. G. Gauld. Hamilton Taxicabs and Garage, Limited, $40,000. D. M. Sorenson, H. J. Davison, J. J. Maclennan. Jefferson Club, Limited, $10,000. F. T. Card, D. J. Card, T. Hendry. Hamilton By-Product Coke Ovents, Limited, $1,000,000. J. W. Nesbitt, J. G. Gauld, C. V. Langs. The Berkel-Freeman Slicing Machine Company, Limited, $40,000. S. T. Mills, W. Bain, J. J. Dashwood.

Toronto, Ont.—Merchants Mutual Lake Line, Limited, $1,500,000. J. S. Lovell, C. D. Magee, S. T. Mills. Toronto English Investors, Limited, $130,000. A. K. Goodman, D. G. M. Galbraith, L. Brayley. The High Park Dairy, Limited, $40,000. H. C. Macdonald, T. J. W. O'Connor, A. O. White. Canadian Automatic Parcel Checking Company, Limited, $200,000. M. H. Ballou, J. J. Williams, M. C. Phillips. Patent Twines, Limited, $40,000. A. L'E. Malone, E. G. Lond, A. Mearns. House and Apartment Company, Limited, $40,000. M. G. Varcoe, J. Varcoe, W. N. Lonsdale.

Montreal, Que.—Gordon Willcocks and Company, Limited, $75,000. J. R. Gordon, M. F. Willcocks, T. B. Gould. Electric Manufacturing Company of Canada, Limited, $2,000,000. H. S. Ross, E. R. Angers, O. F. Shearer. P. & P. Liquor Company, Limited, $50,000. E. Deniger, E. Lebeau, M. Leclerc. British Canadian Film Company, Limited, $200,000. C. H. Grundy, J. Kerry, M. Bradley. Model Dairies, Limited, $1,000,000. L. Macfarlane, C. A. Pope, G. Barclay. John Findlay, Limited, $50,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. The Buffalo Securities Company, $19,000. H. J. Trihey, P. Bercovitch, W. P. Kearney. Concerts, Limited, $2,000. T. O Dionne, C. Beausoleil, J. Shea.

TRACTOR VERSUS HORSE

There is certainly a big difference in the value at the end of five years between $3,000 invested in good heavy brood mares, worked at ordinary farm work for this period, and $3,000 invested in an engine, after it has been used in the ordinary way for the five years. Farmers who are using tractors are beginning to realize this point. Without question a farmer with a mechanical turn of mind gets very much better satisfaction out of his machinery than one who has not, though I believe the average farmer is many times better off with horses or oxen to cultivate his land than he is with tractors. W. H. Fairfield, superintendent, Experimental Station, Lethbridge, Alta.

WORKMEN RECEIVED FIFTEEN MILLION DOLLARS COMPENSATION.

Official figures show that last year Great Britain paid £3,174,101 on workmen's compensation claims in seven large industries, employing nearly seven and a half million workers. Four years ago the amount was £2,274,238. For every person employed the amount paid in compensation last year was 8s. 7d. The charge on each industry was as follows:—

Mines	£1	1	10
Docks	1	1	4
Shipping		15	9
Building		11	7
Quarries		11	3
Railways		8	2
Factories		5	0

Including law costs and claims not brought under the act, the total charge on the industries concerned is estimated at nearly £5,000,000.

Only a small proportion of the claims become the subject of litigation. The total number of cases under the Workmen's Compensation Act which were taken into court in 1912 was 10,972; many of these, however, were applications dealing with allowances that had already been granted, and many were settled out of court or otherwise disposed of, so that the total number of original claims for compensation finally settled within the cognizance of the courts was only 5,858. Of these claims, the decision was in favor of the applicant, that is, the workman, in 4,455, or 76 per cent. The total number of cases under the Employers' Liability Act, 1880, taken into court in the whole of the United Kingdom was 604 in 1907, 406 in 1908, 298 in 1909, 217 in 1910, 223 in 1911 and 197 in 1912. These figures show clearly the tendency of the remedy provided by the older act to fall into disuse since the act of 1906 came into full operation.

DIVIDENDS AND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of Three and One-half per cent. (3½%), (being at the rate of Seven per cent. (7%) per annum) on the Preference Shares of the Capital Stock of the Mexican Light and Power Company, Limited, for the six months ending October 31st, 1913, payable on the 1st day of November, 1913, to shareholders of record at the close of business on the 11th day of October, 1913.

That the transfer books of the Company for the Preference Shares will be closed from the 13th day of October to the 31st day of October, 1913, both days inclusive.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

NEW ROAD-SPRINKLING MATERIAL.

Experiments recently conducted at Queen's University, Kingston, show conclusively that the dark-coloured liquor obtained as a waste product in the manufacture of sulphite wood-pulp makes a better dressing for public highways than the low-grade oils now used. The two treatments were compared under identical conditions, and it was found that the same quantity of concentrated (four to one) waste liquor will last longer than road-oil when subject to the washing of rain, and has the additional advantage of being free from the nauseating odor so objectionable in low-grade oils. The Laurentide Pulp and Paper Company have been using this waste liquor for a considerable time on the streets of Grand Mère, Quebec, where their mills are located, and find it very satisfactory.

The bulletin on pulpwood recently issued by the Dominion Forestry Branch at Ottawa, states that one-third of the pulpwood used in Canada in 1912 was manufactured into pulp by the sulphite method, the other wood constituents being dissolved out by a solution of calcium sulphate and piped into the rivers as waste liquor. Thus one-half of every cord of pulpwood becomes absolute waste, as also the 140 lbs. of sulphur used in its dissolution, for the sulphur becomes so combined organically that it cannot be economically recovered.

It is calculated that material valued at over one and a quarter million dollars is thus wasted in Canada each year.

The utilization of this enormous waste is, therefore, an important problem in Canada, where an increasing amount of sulphite pulp is being manufactured every year. As a temporary expedient, the use of this waste liquor as a road dressing is to be desired, for it would prevent the contamination of the rivers on which sulphite mills are situated.

◆

The following companies have been registered to do business in Alberta:—Ford Motor Company of Canada; the Crown Tailoring Company, Limited.

The International Lumber Company, Limited, has been authorized to do business in Quebec province. Atlantic Fruit Distributors, Incorporated, has been authorized to do business in Quebec province.

BURY, THE CROP MOVER

Mr. George Bury, the energetic western vice-president of the Canadian Pacific Railway, with headquarters at Winnipeg, has his big task just now. Moving the crop out of the West is a heavy responsibility and Mr. Bury thinks it should take his entire time during the fall months. He wants no interruptions just now, for the Canadian Pacific Railway takes the lead in the crop movement, and Mr. Bury is on the job.

◆

MONEY OUTLOOK THIS AUTUMN

"Opinions vary," says the London Economist, "on the severity of the money strain in the later autumn. The great crops in Russia, India and Canada will no doubt require a lot of money; but owing to the failure of the maize crop the United States will require less than usual. The prostrate condition of Brazil, owing to rubber prices and public extravagance, is a new cause for anxiety, while the recrudescence of war in Albania will make it more difficult for the French banks to recover their loans from the French investor."

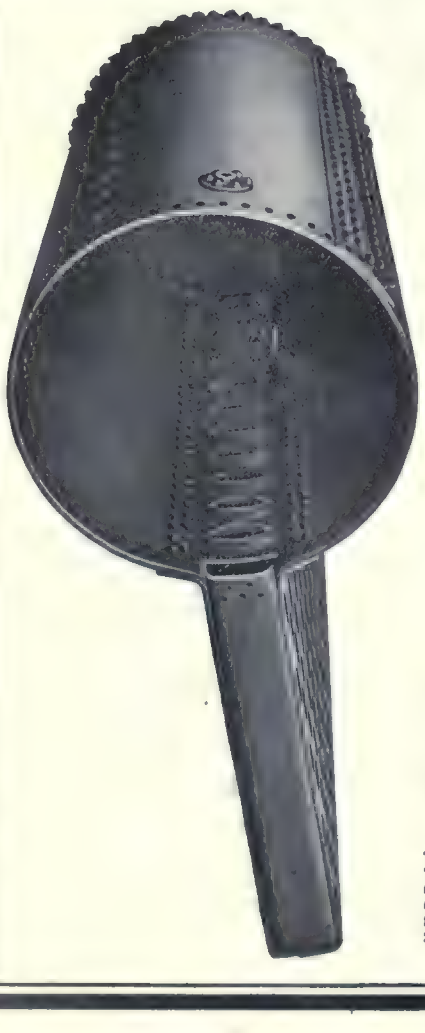
◆

AMERICAN SURETY COMPANY OUT OF CANADA

The American Surety Company of New York has ceased to carry on business in Canada, and has re-insured with the Canadian Surety Company, Toronto, Ontario, its policies in force. On January 15th, 1914, the company will apply to the Minister of Finance for a release of the securities deposited by it at Ottawa. Any Canadian policyholders and others opposing the release are notified to file their opposition, if any, with the Minister of Finance before January 14th, 1914.

◆

Sir William Whyte does not believe that the opening of the Panama Canal will sweep every bushel of wheat to Vancouver for shipment, as the cost of the haul will be too much to do much damage to the Eastern and St. Lawrence routes.



It's this Full Width Header that gives Unrestricted Passage to the Steam Drum. This means Perfect Circulation in the

ROBB WATER TUBE BOILER

Nothing retards the flow—the front header extends the entire width of the front cross drum and the patented throat connection gives ample area for the free passage of the mixture of water and steam. Compare with the contracted area of many other water tube boilers.

MUNICIPAL BOND NOTES

Vancouver civic authorities are pleased over the sale of $2,240,000 of four and a half per cent. bonds in London recently at 95. This figure is regarded as satisfactory, and the proceeds of the sale will improve the financial condition of the city. The overdraft at the bank was reduced to a minimum by the two million and a half of taxes, and most of the money to be received now will be devoted to paying off outstanding treasury notes. The bonds just sold were part of the issue of which $2,500,000 were sold in London in July last. The city has still $385,000 worth of ten-year bonds on the London market, and $800,000 of local improvements in New York. The whole issue of $100,000 of "baby" debentures may be disposed of locally, $50,000 having been sold.

Middlesex County, Ont, received seven bids for its issue of $25,000 5 per cent. 20-years. That of Messrs. W. L. McKinnon and Company, Toronto, being the successful tender.

◆

ABOUT RECENT LONDON ISSUES

The city of Edmonton's offer in London was one of £900,700 5 per cent. sterling bonds at 96 per cent. The bonds are redeemable as to £92,700 in 1923, £487,500 in 1933, and £320,500 in 1953. The total debenture debt of the city is given as £4,585,062, and the population is 70,000. The bonds are issued to provide for repayment of temporary loans, for street paving, and other public works. The London Economist said that the splitting of the issue into three separate maturities was unfortunate, and it was illogical to offer them all at the same price, the 1923 maturity being obviously worth more than the others. The underwriters took 50 per cent. of this issue.

The city of Vancouver's issue was one of £461,200 4½ per cent. consolidated stock at 95. The stock matures for repayment on February 1, 1953, and is secured by a special rate on all the rateable property of the city, such rate being also sufficient to provide for a sinking fund to redeem the stock at maturity. The borrowing powers of the city on the average assessment valuation of 1911-1912 are £6,573,038, and the existing debt, excluding the present issue is £5,432,350. The balance at credit of the sinking fund at December 31st last was £371,242, and the population is given as 122,100. The 4 per cent. loan of Vancouver maturing at approximately the same time as the present issue stands at 80, and the existing 4½ per cent. stock at 95. The new loan carries a full six months' interest, payable February 1, 1914, and yields just over 4¾ per cent., without allowing for redemption. The underwriters took 86 per cent.

The Bell Telephone Company of Canada issue of $4,500,000 5 per cent. bonds at 98½, dated April 1, 1895, mature on April 1, 1925. The issue of bonds is limited to 75 per cent. of the outstanding capital stock of $18,000,000, on which dividends of 8 per cent. per annum have been paid since 1886. The amount of bonds outstanding, including the present issue, is $11,149,000, and are a first charge on all the plant, works and lines of the company, excluding real estate. The plant account stood at $26,847,745 on June 30th last. The earnings since 1907 have shown the interest on outstanding bonds to have been covered from 6.8 to 9.4 times by the annual earnings. The existing bonds were quoted in London at 103½ xd. The list for the new issue was closed on the day on which it opened.

◆

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY.

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Alberta.

Wooler, No. 2976. E. Bell, Caroline.
Watts, No. 2996. J. W. Warren, Warner.
Lutz Grove, No. 2987. W. E. Allen, Junkins.
Todd Creek, No. 2968. J. C. Drewry, Cowley.
Parkerville, No. 2903. Francis Faulkes, Macleod.

◆

NEW SCHOOL DISTRICTS IN ALBERTA.

The following are the names of new school districts in Alberta, together with their senior trustee:—

Lewisville, No. 3041. O. E. Lewis, Hardisty.
Glenevis, No. 3040. Ralph E. Barker, Glenevis.
Dry Berry, No. 3043. J. S. Aneral, Hawksdale.
Bank View, No. 3042. A. M. Garrett, Milk River.
Garth, No. 3039. J. F. Greer, Rocky Mountain House.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

West Vancouver, B.C.—First reading was given by council to by-law to raise $40,000 for a wharf.

Listowel, Ont.—The by-law to loan $6,000 to the Perfect Knit Mills Company, Limited, was carried.

Petrolia, Ont.—On October 29th, ratepayers will vote on by-law to grant bonus of $30,000 to Petrolia Wagon Company, Limited.

Sutherland, Sask.—Offers are invited for $200,000 debentures. S. Appleby, secretary-treasurer. (Official advertisement appears on another page.)

Saltcoats, Sask.—The burgesses of Saltcoats will, on October the 24th, vote on a debenture by-law to raise $5,000 for additional cost of town hall, etc.

Scott, Sask.—Tenders are invited for $40,040 5½ and 6 per cent. 20 and 30-year debentures. J. N. Forest, secretary-treasurer. (Official advertisement appears on another page.)

◆

DEBENTURES AWARDED

Grenfell, Sask.—$15,000 6 per cent. 20-years, to Mr. G. F. Williams.

Kingston, Ont.—$94,870, to Messrs. Brent, Noxon and Company, Toronto.

Hanover, Ont.—$43,500, to Messrs. Brent, Noxon and Company, Toronto.

Brighton, Ont.—$21,000, to Messrs. Brent, Noxon and Company, Toronto.

Elmira, Ont.—$30,000, to Messrs. Brent, Noxon and Company, Toronto.

St. Boniface, Man.—$345,890, to Messrs. Brent, Noxon and Company, Toronto.

Brandon S.D., Man.—$15,000, to Messrs. Brent, Noxon and Company, Toronto.

St. Hyacinthe, Que.—$100,000, to Messrs. Brent, Noxon and Company, Toronto.

Viceroy S.D.—$5,000 8 per cent. 10-years, to Messrs. Nay and James, Regina.

Lumsden R.M.—$12,000 6 per cent. 20-years, to Messrs. Nay and James, Regina.

Assiniboia R.M., Man.—$502,837, to Messrs. Brent, Noxon and Company, Toronto.

Nepean Township, Ont.—$12,000, to Messrs. Brent, Noxon and Company, Toronto.

Fort Garry R.M., Man.—$154,605, to Messrs. Brent, Noxon and Company, Toronto.

Knox, S.D., Sask.—$500 8 per cent., 1923, to Saskatchewan Life Insurance Company.

Vester S.D., Sask.—$6,000 8 per cent. 20-years, to Messrs. Nay and James, Regina.

Mayfield R.M., Sask.—$10,000 6 per cent. 20-years, to Messrs. Nay and James, Regina.

Carrot River R.M., Sask.—$8,000 7 per cent. 15-years to Messrs. Nay and James, Regina.

Grayson R.M., Sask.—$4,000 6 per cent. 10-years, to Messrs. Nay and James, Regina.

Bushville R.M., Sask.—$9,000 6½ per cent. 20-years, to Messrs. Nay and James, Regina.

Alberta and Sask. R.M.'s and S.D.'s.—$20,000 to Messrs. Brent, Noxon and Company, Toronto.

Haileybury, Ont.—$10,388 6 per cent. 10 instalments, to Messrs. Stimson and Company, Toronto.

Eastview, Ont.—$12,886 5 per cent. 20-years, to Messrs. W. A. Mackenzie and Company, Toronto.

Maryfield, Sask.—$1,700 7 per cent. 15-years, to Messrs. W. L. McKinnon and Company, Toronto.

Invergordon, Sask.—$5,000 7 per cent. 20 instalments, to Messrs. C. H. Burgess and Company, Toronto.

Manitou Lake R.M.—$5,000 5½ per cent. 20-years, to Messrs. W. L. McKinnon and Company, Toronto.

Baildon R.M., Sask.—$5,000 7 per cent. 20 instalments, to Messrs. W. L. McKinnon and Company, Toronto.

Middlesex County, Ont.—$25,000 5 per cent. 20-years, to Messrs. W. L. McKinnon and Company, Toronto.

PROVINCIAL AND DOMINION COMPANIES

The Supreme Court of Canada have decided, by four to two, that a provincially incorporated company is not limited in the scope of its operations to the territorial boundaries of the incorporating province, but has the right to go to other provinces to carry on its business.

The power of the province to license and regulate such incorporations from outside as located within its territory, is upheld so long as such regulation or licensing is not preventive in its character.

An appeal will likely be made to the Privy Council.

The insurance companies especially have taken an interest in this matter, which has been before the courts for a long time. Writing in *The Monetary Times Annual Review* this year, Mr. T. L. Morrisey, Montreal, said:—

"Away back in the sixties when the Fathers of Confederation sat down to write the rules of the game to govern the new Dominion—commonly known as the British North America Act—it occurred to none of them to set down insurance as either a subject to be assigned exclusively to the provincial legislatures, or worthy of mention amongst those subjects expressed for greater certainty as falling to the Dominion Parliament. The consequence is that insurance has been held up ever since, something like Mahomet's coffin, between the heaven of Dominion supervision and the earth of Provincial interference, or vice versâ, to suit the taste or views of the particular individual considering the question, or how it affects his particular interest at that particular moment."

There is little doubt that while the Dominion and nine provincial governments are discussing their respective "rights" in the matter of company laws, serious obstacles are being created to the conduct of business. The ten governments have different ideas as to company laws and requirements. The result often is that the Dominion has to be treated as ten units by companies doing business, or desiring to, in Canada. A uniform company law for the Dominion is a necessity. That fact will surely be recognized one day by the various governments concerned.

HOW THE NATIONAL AGENCY STOOD BEHIND

At the investigation of Union Life affairs at Toronto, Mr. C. A. Masten, K.C., on behalf of the government, asked:—

"What did the National Agency receive from the Union Life?"

"Twenty per cent. on the gross commission," was the reply of Mr. Harry Symonds, K.C., a director of both companies.

"What was the National Agency doing for that 20 per cent.?" asked Mr. Masten.

"Standing behind the Union Life, making contracts, and in a general way supporting the company," came the answer.

When the Union Life tempted hundreds of British investors to purchase 10,000 shares of its stock at a premium of 20 per cent., the National Agency Company guaranteed a dividend of 6 per cent. for three years. This was presumably one of the ways in which the National Agency promised to stand behind the Union Life. It failed to pay the dividend, and that was one of the ways in which it actually stood behind the Union Life.

Last week the National Agency was placed in the liquidator's hands, after having performed gracefully its acrobatic "support" of the Union Life's dip into the British investors' pockets.

CANADA IN LONDON

Canadians in London are discussing which is the better site for the Canadian Government House there—Aldwich or Westminster. *The Monetary Times* votes in favor of Aldwich. There is a certain heavy atmosphere in the Westminster district, which is very appropriate perhaps for Westminster, but not for the London office of a young country like Canada, with its vigorous climate and appealing prospects. Aldwich is young London and that seems to be the suitable centre for Canada's representation.

AN INTERESTING EXPERIMENT

Calgary is the first city in Canada to undertake as a municipal department the construction and operation of an industrial service building. For the $250,000 appropriated by the large favorable vote of the ratepayers, a six-story concrete structure will be erected and leased to incoming manufacturers. It is anticipated that by getting a start in this way, small industries will be encouraged, soon outgrow their temporary quarters, and go out to build more extensive accommodation for themselves. The advantage primarily to the newcomer is that he retains his capital in the form in which he can most profitably use it. To the people at large this plan offers an inducement to small manufacturers which, instead of being a tax, as is the bonus idea, is a revenue producer from the beginning. The Industrial Bureau of Calgary is responsible for having pressed the question before the attention of the city council and ratepayers. The experiment will be watched with interest, if not with trepidation.

CAPITAL AND THE LONDON MARKET

Seven recent issues in London left $37,000,000 with the underwriters, of which $18,000,000 were on account of five Canadian loans. That fact is a clear index to conditions in the London money market. The underwriters took more than 50 per cent. of the Dominion, Edmonton City, Vancouver City, Alberta Province, and Vancouver Power Company's issues. They also took 92 per cent. of the New Zealand Government loan of £3,500,000 4 per cents. which was issued at 98½. The underwriters of colonial loans on the London Stock Exchange then agreed among themselves to refuse to underwrite further until the New Year, when it is hoped the recent issues will be digested by the public. Montreal city is waiting to float a loan of $11,900,000, and this will probably be withheld for the time being.

The conditions in the market naturally are to an extent, temporary. Some months ago, a similar glut of securities existed, and the underwriters refused to sponsor any more issues. Recently it was thought that the market was ready again for a supply of new securities. The events of the past few weeks have proved that the market was not ready. There is only one thing for Canadian borrowers to do—there are a large number waiting to enter the market—and that is to be patient until conditions improve and expert advices are received that loans may be made, probably with some success. That is a difficult task, especially for those rapidly developing municipalities which must have funds to finance the improvements necessary to accommodate constantly increasing population.

But after all, the check in securities issues is but a passing phase. Other facts must be recognized and they are apparently permanent factors in the situation. The demand for capital has increased greatly in the past few years. The same explanation is given by many authorities. Mr. Albert S. Bolles, sometime professor of banking at Pennsylvania University, for instance, in a recent article states that the enlarged call for capital comes from two well-defined sources: the need of the merchant for more capital in consequence of the higher prices he must pay for his merchandise, besides the additional capital needed for business extensions. The other enlarged demand comes from the railroads and other great enterprises for the extension of their business.

In short, as Lord Milner stated at Birmingham the other day, it will be a long while before we again see anything like "a glut of capital" of which it was once the fashion to speak. As he aptly put it, "capital is no longer prepared to serve on the terms which it was formerly willing to accept. It has, so to speak, struck for higher wages. A vast demand has been made upon capital by the rapid development of so many new countries and the simultaneous awakening into great industrial activity of certain old countries. There has never been a time when so many new countries are rapidly growing all at once and pulling all at once on the surplus capital of the old countries. In time, no doubt, they will be better able to help themselves, and the pull will diminish."

It will likely be a great many years before that point is reached. Canadians know well what immense development work lies ahead in Canada, entailing heavy borrowing for a lengthy period. Other countries also are strong bidders for surplus capital, such as, for instance, Argentina, the South American Republics, the West Indies, India, Japan, and self-governing dominions other than Canada. The scramble for capital will continue. Few countries there are which have any considerable amount of surplus capital. These include chiefly Great Britain, the United States and France.

Canada, therefore, will have to take its chance in the scramble. In the past, it has come out with pretty fair handfuls of cash. Canadian securities will have no better an opportunity than that of other countries, except it be that the terms of the offerings exactly suit market conditions and the offerings themselves are without blemish. How important it is for Canadian credit to be maintained at a high standard by placing only first-class loans in London, is obvious. The British investor has a wide choice of good securities in many lands. Which should be a sufficient hint to the Canadian borrower.

SASKATCHEWAN TAX PROCEEDINGS

Several complaints have reached *The Monetary Times* to the effect that the Saskatchewan government is not as lenient as it might fairly be to property owners whose taxes have not been paid. Here, for instance, is a notification from the secretary-treasurer of one of the municipalities which seems to read rather harshly:—

> "Take notice that the hail insurance tax has to be paid to the secretary of the municipality on or before the first day of October; in the event of the fund then in the hands of the commission not being sufficient to pay all losses in full the same shall be paid pro-ratio. If all the taxes, due to this municipality, are not paid within 30 days from the date of the enclosed tax notice, steps will be taken at once to forfeit the land or to collect the same by distraint without any other notice."

There is little need surely for such drastic proceedings in a rich agricultural and progressive province like Saskatchewan. Probably the costs connected with forfeiture proceedings would sometimes exceed the original tax bill.

FINANCIAL RELATIONS WITH UNITED STATES

As has been pointed out by Mr. H. M. P. Eckardt, an increase of commercial interchanges between Canada and the United States means a further development also of financial relations. The accounts carried in New York, Chicago, Boston by the Canadian banks are likely to grow steadily larger and more valuable. Probably an increasing number of banks throughout the United States will find it advisable to carry accounts at one or other of the Canadian centres for the purpose of clearing Canadian items negotiated by them and for purposes of selling drafts on Canada. Six Canadian banks have fourteen branches in the United States. Six of these are at New York, two at Chicago, two at San Francisco and one each at Boston; Portland, Oregon; Seattle, and Spokane.

Stronger trade relations may also encourage a greater interchange of securities. At the same time, London will remain our chief banker. When the British market has been overloaded with new issues, the United States will help to relieve the situation as they have done during the past few months.

SMALL CHANGE

Tammany Sulzer should make a good, hot New York drink.

Theatre and lunatic asylum should do good business now Toronto citizens are trying to follow intricacies of street railway deal—one for the ceasers, the other for the plodders.

* * * *

"Mr. Coady's cabled word would be enough with some old banking firms in London to put funds amounting to several million dollars at the disposal of Toronto," says Toronto Mail—always supposing, in tight money times, their age did not affect their hearing.

* * * *

Manager of the People's Securities Company, Toronto, who issues a stock and bond brokerage course and then gives his pupils investments to sell, says "stock and bond brokers are the highest paid men in the world." Statement is as yet unconfirmed by the brokers.

* * * *

In an official memoir from Ottawa on oil and gas prospects, Mr. Wyatt Malcolm says: "In the west, deposition during carboniferous, triassic and jurassic times has, to a great extent, bridged over the unconformity seen in the east." Looks like a geological translation of Kipling.

* * * *

A youth living at West Liverpool, N.J., sold the family cow in order to get money enough to pay his way into the world's championship baseball games. We will wait patiently to hear this boy later tell his children how he glued to schoolbooks, never threw a slate at teacher, and became a railroad magnate.

* * *

"If the working people would save, for the next five years, the money that they spend on beer, tobacco and baseball, they could control a large share of capital employed in industries," says United States writer. Why not add theatres, automobiles, candies, hobble skirts, dancing, etc., etc., etc., etc., etc.

* * * *

London cable says Canada may be trying to secure the Brazilian dreadnought which is under construction in English shipyards. This vessel is not of suitable type for British navy, and naval experts state that she would be a nuisance to combined squadron work. Might be useful to cruise after Brazilian stock mysteries.

* * * *

Mark Twain described a mine as a hole in the ground owned by a liar. Our Calgary correspondent says that definite information as to the commercial value of the oil discovery there is not to hand, as further boring and a shooting will be necessary to determine whether the hole "is a gusher, a pocket, or a duster." Twain did not get as far as oil holes.

* * * *

Lord Haldane had to borrow the German word "sittlichkeit," owing to the alleged poverty of his native tongue, for the subject of his address to the American Bar Association at Montreal. It purports to express the idea of ethical conventions as between political communities, corresponding to the social conventions which prescribe or proscribe certain conduct as good or bad "form" as between individual members of society. We know a few office boys who could have filled the gap with his Lordship's native tongue.

UNDERWRITERS WILL NOT TAKE MORE ISSUES YET

(Central News financial cables are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

INVESTORS' HESITATION UNDERSTOOD BY EXPERT FINANÇIERS

Canadian Loans Left With Underwriters are Being Digested—Stock Exchange Settlement

(Central News letter to *The Monetary Times*).

London, October 15th.—Trade throughout the United Kingdom remains the reverse of brisk, but capital, which is being set free from commercial purposes, is for the moment merely finding its way into deposit accounts and not flowing into the investment markets. This is a circumstance, which naturally causes impatience on the Stock Exchange, where members are conscious that there are plenty of bargains about and are at a loss to understand the attitude of the investing public. Perhaps, however, the public is really actuated by dicates of the soundest commonsense. Investors, not without good reasons, are not sure that prices have reached their lowest levels yet. Moreover they can secure 3½ to 3¾ per cent. for their spare balances by putting them on deposit with the banks and discount houses. So they are conscious that there is no hurry to rush in to purchase securities on markets of doubtful stability for the sake of earning an extra ½ per cent. or so per annum over a short period. If in addition to these considerations the possibility of a further rise in the Bank rate—which is being discussed and which, if it occur, will not only react adversely on the Stock Exchange, but will probably increase the allowance, made by bankers on deposits—be also taken into account, the present hesitation of the public to come forward as buyers, can be both understood and approved by the best judges in the financial district.

When Tide Turns.

The same considerations, which explain the position investors have taken in relation to the security markets, of course hold good in regard to their attitude towards new capital offerings. Since the beginning of the month loan offerings by Canada alone, in this centre, have aggregated £5,361,900, and of this amount 64 per cent. or about £3,437,000, has been left with the underwriters. Some of the biggest brokers, who were not particularly confident of the chances of these large emissions on the present money market and who, consequently, failed to urge participation in the first instance, are now more inclined to draw attention to the cheapness of the new Dominion scrip, standing at ¾ discount and the Alberta scrip, standing at 3¾ discount, but even now they are not particularly emphatic, and the mere existence of present discounts on quotations demonstrates that their caution has been justified. Nevertheless, balances are undoubtedly accumulating both in London and Paris, and in the latter centre, indeed, funds on deposit with the big credit institutions are estimated to total £200,000,000. When the tide turns, therefore, the buying will probably come with a rush, but whether it will be before the end of the year, or at any rate before the big French national loan and some of the Balkan loan operations have been completed, it is difficult to say.

How New Zealand Fared.

The settlement this week on the Stock Exchange has been got through without failure, but not without some difficulty. It was matter for congratulation that the speculative account for a rise was so small in markets generally, for the few "bulls" that did exist had some big differences to pay, particularly in the American railway department and among various Brazilian securities, where heavy declines were recorded during the past fortnightly account. One or two smaller members are known to have received assistance, but no important embarrassments came to light, and it now seems improbable that any defaults will occur. Brazilian securities at the time of writing have taken a moderate turn for the better and are 1 to 3 points over the lowest. This has helped sentiment elsewhere, while the discounts on the various Canadian loans have also begun to dwindle, indicating that the big blocks left with the underwriters are gradually being digested. The partial failure of several Canadian loan operations has been followed by an even worse fiasco in the case of a £3,000,000 4 per cent. New Zealand loan, of which as much as 92 per cent. has been left with the underwriters. Although this means further sales by underwriters of existing gilt-edged stocks, the Consol market has received the news quite cheerfully, believing that the result will have the effect of checking new capital operations more effectively than ever. The labor situation in South Africa is reported to be anything but settled, but the Transvaal gold output for September was on the whole favorable. The total of gold recovered was 706,186 ozs., valued at £2,999,686. This was a decrease of 21,910 ozs., or £93,068, compared with August, but the daily average production was higher, being 23,540 ozs. for September, against 23,487 ozs. for August. There are satisfactory proofs also that the native labor situation is becoming more normal again, and the seasonable decrease of natives last month showed signs of being checked.

Canadian Financing Methods.

The appointment of a receiver is announced for the British Columbian Fisheries Company, which had a total cash capital of about £121,000. The undertaking is a comparatively new one, but it is not controlled by Canadian interests, the chairman being Sir George Doughty, M.P. The receivership has been at the instance of the debentureholders, for whom Sir George Doughty is one of the trustees, and a very disagreeable impression has been created by the fact that in January, when this debenture issue of £40,000 was arranged and a shareholders' meeting held, no mention was made that the company was in serious straits. There is an agitation afoot for a Board of Trade inquiry, and in this connection it may be recorded that the article in a recent number of *The Monetary Times*, calling for fresh methods in financing Canadian ventures has been largely reproduced here and is heartily endorsed.

CANADIAN MARKET STRONGER YESTERDAY.

(Central News cable to *The Monetary Times*).

London, October 24th.—The general tone of the markets during the past week has been much healthier, and new capital is making a welcome appearance. There are indications that the long attack of financial indigestion is passing off notwithstanding the fact that 48 per cent. of the £2,300,000 St. Petersburg loan remained unsubscribed this week. There are no further big issues immediately pending although China is sounding the quintuple financial group respecting a new loan amounting to £20,000,000.

The tone of the money market is distinctly more confident. Treasury bills amounting to £3,500,000 will be paid for tomorrow, and it is expected that the proceeds will be quickly redisbursed.

The stronger complexion of this week's bank return affords additional evidence of the general improvement which is being manifested.

The stock market is somewhat reactionary after the rebound, but the undertone is good in spite of the critical state of affairs in Mexico, and the fears that the government's land campaign outlined by Chancellor of the Exchequer last night will participate a rush of estate sales and drive much capital abroad.

Canadian industrials are stronger, dealers in Canadian Pacifics being particularly optimistic.

Consols became easier to-day pending the publication of the Bank of England weekly statement.

Home rails sagged and Americans weakened on a drive by the bears encouraged by the decline in the New York market.

Pressure against Mexican railway company issues was resumed this morning and foreigners worked lower. Other sections with the exception of rubbers moved sluggishly with a downward tendency. Rio Tintos shaded ⅜ to 77⅜.

STEAMSHIP DEBENTURE ISSUE

*London, October 21.—Arrangements for the debenture issue of Canada Steamship Lines, Limited, are progressing favorably.

GRAND TRUNK RATES

Chairman Calls for Increase—Takes a Slap at Public Criticism

†London, England, October 23.—Presiding at the Grand Trunk meeting Chairman Smithers said from one point of view it was unsatisfactory that, with larger gross receipts, they had been unable to secure a larger profit. The cause was the large increase in wages and the cost of fuel and material. Yet, on the other hand, they had been able to maintain their position and meet charges on capital account.

It is a perpetual fight to maintain the position already won, declared the chairman, and as railway commissions, municipalities, employees and the general public are forever placing extra burdens on railways, or asking more concessions, the fight is a hard one.

Knowing the difficulties, I think our staff deserves credit for what it has accomplished. (Hear, hear).

Mr. Smithers, proceeding, expressed the emphatic opinion that, with all the demands now made on railways, they ought to have increased charges.

All over the world the railways are asked for more service and more accommodation for the same, or less, money.

To hear public men and the general public talk, one would think railway companies consisted of unscrupulous capitalists, whereas they are composed of investors, who throughout the world do not get an average return of 4 per cent.

I fully realize that railways must conform to the law, but I must respectfully submit that more consideration should be given to what they can really afford.

The necessity for higher rates is so urgent and demand so unjust, I cannot believe that the people of Canada and America will long resist it.

There has been a great deal of criticism of Canada, some of it quite just and moderate, some of an unnecessary croaking order.

The fact is that the Dominion has been going through a very trying period for eighteen months, brought about by ten years of extraordinary trade activity, during which new countries had absorbed an unprecedented amount of liquid capital. There had also been a haunting fear that war might involve the bigger powers, which led to hoarding of gold, and the curtailment of credit.

The report submitted was unanimously adopted.

The meeting was entirely harmonious.

UNDERWRITERS NEED A REST.

†London October 20.—The Daily Chronicle, which has from time to time deprecated prodigal borrowing on the part of colonies other than governments, says that the underwriters here have evidently had enough of it, for they have decided to undertake no fresh issues until the public has disburdened them of a goodly portion of the issues they are now shouldering.

So long as they are given to petty municipalities, and other borrowers, to be prodigal, adds this paper, there can be little hope of any resolute recovery in the gilt edged market.

MR. PLUMMER IS INVESTIGATING

*London, October 23.—Mr. J. H. Plummer informs me that he is here in order to follow the latest developments of the iron and steel industry, with help from the company's expert adviser, and proposes to visit English and German steel works.

Asked regarding Dominion Steel finance Mr. Plummer recalled that he came to London last spring hoping to raise the needed additional capital, and found, however, that the market was unpropitious.

It was possible that the matter would be now taken up again, though the prospect was not immediately very hopeful.

CANADIAN LOANS WERE ATTRACTIVE.

(Central News letter to *The Monetary Times*).

London, October 15th.—Among domestic securities, gilt-edged stocks have felt the chief effects of the rush of new emissions, not only from competitive reasons, but because the partial failure of so many loan operations has loaded underwriters, who in order to shoulder their burdens have followed the usual course of selling their most easily marketed securities. It seems as if the outcome of several recent flotations must tend to check the new issue movement before long, unless the investment market wishes to experience a fresh period of indigestion. The indifferent results of various Canadian operations, do not mean that Canadian securities are entering a new phase of unpopularity locally. It means merely that investors continue torpid. Unless London bankers had considered that Canadian loans would prove as attractive as any—perhaps more attractive than any—to the local appetite, they would hardly have been put to the fore front of the present new borrowing movement.

The indisposition of investors to bestir themselves is the more difficult to explain in view of the fresh evidences, which are accumulating that trade all over the country is slowing down.

CANADIAN SECURITIES QUOTED IN LONDON

*London, October 21.—Canadian funds in London are quoted as follows:—

British Columbia 3 per cent. registered stocks, 1941, 76-78.
Manitoba stocks, 1950, 91-93.
Newfoundland ins. con., 3½ per cent., 1945, 89-91.
Edmonton, 5 per cent. debentures, 1915-48, 94-97.
Edmonton 4½ per cent. debentures, 1917-49, 92-94.
Montreal permanent 3 per cent. debentures, 66-68.

ARRANGEMENTS RE CANADA IRON

*London, Oct. 23rd.—The Globe says: "Arrangements are in progress for the reorganization of the Canada Iron Corporation.

"It is reported that a scheme exists by which first mortgage bondholders have accepted debenture stock which is to be preceded by a first mortgage bond issue to provide fresh working capital.

"The plan is a drastic one, but apparently the directors had no alternative."

CROPS WILL PAY FARMER'S DEBTS.

*London, October 20.—Mr. Obed Smith, the Canadian emigration commissioner, in addressing the Passenger Agents' Association last night, set himself to reassure British investors. He said the prairie grain crop alone is computed to pay every dollar that every farmer in Manitoba, Alberta and Saskatchewan owes. What a poor time the emigration officials would have if every business in the Motherland was as well off.

"Winnipeg is actually receiving and handling more wheat per day than Chicago, Milwaukee and Duluth combined, so some people had better turn their sympathy towards these United States centres for they need it more."

Mr. Smith genially chided British editors for publishing "blue ruin letters" from disgruntled emigrants without attempting to verify the facts just because they seemed to be spicy stories against the Dominion. If the truth was desired the editors had better start on the friends in Canada, who had this year invited 42,000 British people to join them there. The Government meant to retain full force, throughout the winter, the guarantee of work for all landworkers and domestic servants. The farmers still needed help. Canada asked nothing from any man except that he succeed there

SASKATCHEWAN SEEKS FARMERS' LOANING MECCA

Royal Commission on Agricultural Credit Recommend Establishment of Co-operative Mortgage Association to Raise Funds on Government Guaranteed Bonds

The Royal Commission appointed by the Saskatchewan government to investigate the question of agricultural credit has presented an unanimous report, being signed by the three commissioners, Messrs. J. H. Haslam, C. A. Dunning and Dr. E. H. Oliver. The Commission recommends the formation of a co-operative mortgage association which will raise funds on mortgage bonds to be guaranteed by the Provincial government. Loans will be made at a rate sufficient to cover expenses and allow for a reserve.

The chief recommendations of the Commission are as follow:—

1. That, inasmuch as in the experience of older communities cheaper agricultural credit is invariably associated intimately with other phases of agricultural co-operation, such additional legislation to be enacted by the legislature and information and guidance provided by the government as will facilitate on the part of the farmers of the province the establishment upon a sound basis of a system of local and central rural co-operative societies for purchasing and selling farm products and supplies

Formation of Mortgage Association.

2. That legislation be enacted to provide for the establishment of a Co-operative Mortgage Association for the raising of funds on mortgage bonds and the granting of loans to farmers on mortgage security for approved agricultural productive or improvement purposes only, such legislation to embody the features hereinafter mentioned.

3. That the association be known as the Saskatchewan Co-operative Farm Mortgage Association, and consist of a central commission, an advisory board, local associations, individual members, and an annual general meeting.

4. That the central commission consist of at least three members clothed with the necessary authority as the Executive body of the Association:—

(a) At the outset the government to appoint all members;
(b) One of the members to devote his whole time to the work of the association as managing commissioner and to be the only salaried member of the commission;
(c) As the association acquires financial standing and is able to dispense with the provincal guarantee in the marketing of its securities, the selection of commissioners to be gradually transferred to the association acting through its annual general meeting.

5. That an Advisory Board of fifteen members be created to act in an advisory capacity in relation to the commission; the members to be appointed part by the association acting through its annual general meeting, and the remainder by such organizations and institutions in the province as exist to promote agricultural betterment.

Conditions of Membership.

6. That the individual members be borrowers admitted by vote of the local association into its membership, approved mutually and by the central commission, and who have paid the initial entrance fee of $10.

7. That each local association consist of at least ten members with a combined mortgage loan of at least $5,000, united on the basis of joint and several liability, formed by mutual consent and with each member approved by the central commission.

8. That the annual general meeting consist of representatives, one from each local association.

9. That the first general meeting be not summoned and loans to individuals be not made until at least 25 local associations have been formed as provided in section 7 by the central commission.

10. That the liability of the individual member, whether as member of the Saskatchewan Co-operative Farm Mortgage Association, in respect of any obligation incurred or losses suffered or in any other respect whatever be limited to an amount not more than fifty per cent. greater than the amount of his loan.

11. That the liability of the several local associations to the Saskatchewan Co-operative Farm Mortgage Association be in the ratio of the aggregates of the mortgage loans of the members composing such associations.

Loan on Amortization Plan.

12. That all mortgage loans be issued on an amortization basis to cover a period of not less than 15, and not more than 35 years, with the option reserved to the borrower, upon three months' notice being given or a bonus of three months' interest being paid, of paying the whole or any part of the balance due in excess of the stipulated payment on any regular day of payment before the final; always provided that payments in excess of the regular payment shall not release the borrower of his obligation to meet promptly his subsequent consecutive annual payments until the amount of his indebtedness has been discharged.

13. That the funds required by the association for loans to its members be raised on mortgage bonds issued by the association and fully guaranteed by the provincial government, the amount of such government guaranteed bonds to be determined annually by agreement between the provincial government and the association.

Rate of Interest.

14. That the association advance its funds to the borrower at a rate of interest which will include only the cost to the association of the money itself, the expenses of administration, and provision for the creation of a reserve fund to provide such security and guarantee for the future issue of mortgage bonds as will in the course of time render government guarantees unnecessary and place the association upon a purely self-supporting basis.

15. That loans be limited to 40 per cent. of the central commission's valuation of the property to be mortgaged.

16. That the provincial government make a grant of not less than $10,000 towards the expense of organizing the Saskatchewan Co-operative Farm Mortgage Association, and also pay the salary of the managing commissioner for at least three years.

17. That the Saskatchewan Co-operative Farm Mortgage Association establish as soon after its foundation as is feasible a bank, with headquarters within the province, to conduct a regular banking business, both through branches of its own, and wherever possible, with and through the locals and officers of the association:

(a) Such assistance to be rendered by the provincial government at the time of the establishment of such bank as will enable the Saskatchewan Co-operative Farm Mortgage Association to control it in the interests of the agricultural industry.

Long and Short-Term Mortgages.

The commissioners' lengthy report states that the unavoidable uncertainties of farming and marketing frequently render prompt payment difficult if not impossible, but it is also stated that when delays do occur, many farmers fail to notify the company. Interest payments are usually met the year they fall due, payments on principal are seldom pressed for, and renewal of the mortgage is made easy.

"In fact," says the report, "the present system of payments seems designed to render renewal necessary and debt perpetual. With the final payment so large the borrower can seldom meet it out of the current year's income. The mortgage is not only renewed; the amount of the loan is very frequently increased.

"These features of our mortgage system are reprehensible. The mortgage is not calculated to develop business habits nor promptness. It is a document that places the farmer, from the beginning, in an impossible situation.

Some Mortgage Statistics.

"During the period of fifteen months ended August 15th, 1913, there were no less than 1,723 sale and mortgage proceedings under mortgage in this province. It should be pointed out that the returns given above are not quite complete. Probably not less than 2 per cent. of the farmers of Saskatchewan were subjected to these proceedings under the conditions that obtained in this period. Of the mortgages in connection with these proceedings 150, or 8.7 per cent., bore an interest rate less than 8 per cent. But 435, or over 25 per cent., a rate of 10 per cent., or higher; 35 a rate of 12 per cent., or higher; and 3 a rate of 15 per cent. And these mortgages were placed at these rates before the present upward trend in interest rates occurred.

"The purposes for which loans on mortgages are granted may be enumerated:—

1. To consolidate past debts..

2. For machinery. In this matter there has been considerable overstocking, due, as one farmer stated, to the "science of salesmanship."

3. For stock.

4. For building and general equipment.

5. To provide working capital.

6. To buy more land.

7. To "finance trips east" or similar purposes.

What is Said of the Banks.

"In appreciating the banking situation in this province it is fair to consider not only the complaints against the banks, but, as well, the services which they have rendered:—

1. Services rendered by the banks.
   (a) Until recently they have in general afforded an abundance of credit;
   (b) They have pushed out into the smaller places and granted credit facilities when the amount of business to be secured immediately did not yield a profit;
   (c) They have exerted an educative influence upon the business habits of the community and inculcated the virtue of promptness.
2. Complaints against the banks:—
   (a) They have frequently sought to dominate the policy of those businesses to which they have advanced credit;
   (b) They have sought rather to pay dividends and to support expensive edifices than to afford credit to customers at reasonable rates;
   (c) They are not controlled within the province and in a time of stress when credit facilities are most required, the banks withdraw them from the western provinces;
   (d) Their charges for transferring funds are unreasonably high;
   (e) The rate of interest on loans is unnecessarily large;
   (f) The interest allowed on deposits is too low;
   (g) Their sympathies lie rather with the commercial than with the agricultural class.

Debts of the Farmer.

"There is no doubt that the largest factor in the indebtedness of Saskatchewan farmers is the amount which is due to mortgage companies. A conservative estimate would place this in the neighborhood of $65,000,000. For the next largest amount implement companies are responsible. We are certain from evidence submitted confidentially to the commission by only a limited number of branch offices that the total indebtedness of farmers to merely six branch offices is $15,106,726.68. It is not improbable that at present between $35,000,000 and $40,000,000 is outstanding for machinery. The amount owing on agreements of sale for land is very considerable. To one company the farmers of this province owe $5,770,000 and to another $3,622,920.45. The amount due for preemptions, for horses, for store credit, lumber, bank credit and for miscellaneous debts, together with that due for the purchase of land is not less than $50,000,000.

"The farmers of Saskatchewan are paying interest on at least $150,000,000. If this is the case then their agricultural credit is costing them $12,000,000 annually. The saving of only 1 per cent. in interest would mean the saving to the farming industry of over $1,500,000 per year. If farmers could secure money at a rate as much as 2 per cent. cheaper than at present they could, by making their payments on the amortization plan, discharge their total indebtedness in about 24 years' time by simply continuing to pay what they are now paying for interest. And this would be abundantly worth while.

Debt Per Acre.

"From the above estimate it can be clearly perceived that the average indebtedness of our farmers is, perhaps, $1,500. The average farm of the province consists of about 295 acres. Thus the indebtedness of the farmers is slightly in excess of five dollars per acre of land under occupation at the present time. The average farm has gathered about it assets in the shape of buildings, stock, implements and grain."

Of Systems Abroad.

Of the systems abroad the report says:—

1. There is in all European countries a frank and universal recognition of the supreme importance of agriculture as an industry, as shown by:

(a) Government co-operation in: 1. Education; 2. Facilitating credit; 3. Promoting co-operative institutions for production and distribution of products; 4. Supervision of processes; 5. Application of scientific knowledge.

(b) Sympathetic attitude of urban communities toward agriculture.

(c) Active participation in agricultural affairs on the part of public spirited citizens and national leaders.

2. Co-operation in everything that affects agriculture has advanced beyond the theoretical into the practical stage.

Benefits of Co-operation.

3. Co-operation has conferred enormous benefits upon the rural communities of Europe by: (a) Stimulating production; (b) Increasing the area under production; (c) Improving the price of products; (d) Opening up markets; (e) Cheapening the cost of farm necessities; (f) Reducing the expenses of transportation; (g) Finishing the products of the soil on the farm; (h) Use of live stock in the utilization of roughages of the farm and the return to the soil of natural manures; (i) Putting farming on a business basis, (1) By providing credit, (2) By systematizing business organization; (j) Stimulating scientific agriculture; (k) Preventing frauds and deceptions in the purchase of raw materials; (l) Improving breeds of animals and plants, 1. By community breeding and cow testing associations, 2. Seed selection and distribution.

4. By organization farmers have been able to provide a security which has attracted loans at favorable rates.

5. Agricultural security has been based upon (a) Mortgage upon the amortization scheme covering a considerable period of time and at reasonable rates; (b) Personal credit associated with (1) Collateral, (2) Endorsements.

Attraction of Local Deposits.

6. By attracting local deposits to co-operative credit associations the resources of local communities have been made available in the first instance for local purposes.

7. The securities based upon land credit have been in the main less susceptible to the fluctuations of the money market than other securities.

8. Though in various places the nominal rate of interest is as low as 3 per cent., 3½ per cent., and 4 per cent., yet the market value of bonds is such that the present borrower is forced to pay an actual rate considerably in excess of this.

9. A system of registration of land titles similar to the Torrens system is of basic importance in securing agricultural credit.

10. Every effort is made to dispose of the bonds locally.

11. The face value of the bonds outstanding in no case exceeds the net value of the mortgages held and frequently withdrawal rights are inserted in the bonds.

For Better Agricultural Credit.

The commission analyses the possible methods by which better agricultural credit may be secured in Saskatchewan. These ways are three in number, viz., through institutions strictly co-operative and partly governmental.

Whichever method were employed the commission lays down three principles that should govern, and then proceeds to a discussion of the pros and cons of the three plans. The principles are:

1. That loans be provided to farmers only upon unquestioned security and for approved agricultural productive or improvement purposes only

2. That provision be made for repayment upon the amortization plan.

3. That the aim should be to render a service to the borrower and not to secure a profit to the institution.

Before passing to an outline of the solution of the question in the light of existing conditions the report enumerates and discusses the economic problems of Saskatchewan. They are stated to be as follows:

Some Economic Problems.

1. The dependence of our economic life upon outsiders.

2. Our location in relation to the export market for our principal farm products.

3. The lack of cohesiveness in our rural life.

4. The primitiveness of market arrangements for products other than grain and dairy products.

5. The absence of concerted action in the sale of products other than these.

6. The lack of even collective action in the purchase of farm supplies.

7. Too exclusive devotion to grain growing.

8. The tendency towards extravagance, especially in the purchase of implements, land and expensive sources of power.

9. Relatively high rates of interest and short terms for mortgage and personal loans.

10. The large amount of credit associated with the purchase of agricultural implements and farm supplies.

11. The attractions in the past of real estate speculation in urban communities.

12. The lack of social atmosphere in rural districts.

13. The enforced idleness during winter months in localities where only grain is grown.

As the Years Pass By.

"For much of this we have no remedy. We cannot alter the facts of geography nor amend those handicaps which arise from physical conditions. It is not possible to bring this province nearer to the Great Lakes, though much may be gained from the route to Hudson Bay, and something from the Panama Canal. The tariff as such is a matter for the whole Dominion. We cannot so long as we remain comparatively undeveloped build up those great reserves of funds which come from thrift, and which make cheap credit possible. But there is something that can be achieved. By concerted action and intelligent marketing we can eliminate at least some transportation charges, and we can outline a rural policy that will broaden and deepen as the years pass by."

Advantages of Co-operation.

The chief advantages of co-operation as applied to agriculture may be briefly summarized:

1. Economies due to handling goods on a large scale, both in buying and selling.

2. The elimination of multitudes of non-productive middlemen.

3. Protection against adulteration and inferior articles and implements.

4. A more intelligent study of market conditions and arrangements.

5. Co-operation develops responsibility in private and public life, makes for education in good citizenship and trains men to act with prudence.

6. Co-operation produces a more cohesive rural social life.

Fostering Local Financial Institutions.

The commission states that the following features are characteristic of financial institutions which at present exist within the province:

1. With two or three unimportant exceptions, they are not controlled within the province.

2. Being associations or lenders whose primary object is to secure profits, their interests in the final analysis are different from those of the borrowers.

3. The extremely low rate of interest allowed on deposits does not afford an inducement for people to save or to invest.

4. The great bulk of the funds used within the province is derived from sources outside the province.

5. The same institutions do not furnish mortgage and personal credit.

Features to be Sought.

The following features should be characteristic of those financial institutions, says the report, the primary object of which is public service :

1. They should seek to serve both borrowers and lenders alike. Associations of borrowers grouped together to furnish the most ample security, and who stand collectively liable, would have as their first duty to keep the lenders safe, and as their primary object to secure credit cheaply.

3. Profits should be reduced to a minimum, only sufficient to cover expenses of administration and to build up the necessary reserve fund.

4. They should allow sufficient interest on deposits to encourage thrift and to induce people to invest safely.

5. Though for a considerable time in the future the great bulk of the funds used within the province must be derived from sources outside the province, they should constantly aim to place the financial resources of our districts and our province, however meagre to begin with, primarily at the services of these districts and this province.

6. Though different institutions furnish mortgage and personal credit they should operate harmoniously and sympathetically.

MISCELLANEOUS INSURANCE IN CANADA

Insurance business other than fire or life was carried on in Canada during 1912 by fifty-eight companies: 20 Canadian, 13 British and 25 United States. Nineteen of these companies likewise transacted fire insurance. In addition to these fifty-eight companies, there were five fraternal orders or societies which carried on sickness insurance, and also life insurance.

Of the twenty Canadian companies which carried on business other than fire or life, seventeen transacted miscellaneous classes of business only. Of these, eleven transacted sickness insurance; ten, accident insurance; five, plate glass insurance; seven, guarantee insurance; two, automobile insurance; three, steam boiler insurance; three, burglary insurance; one, weather insurance; one, live stock insurance, and one, title insurance.

At the end of the year the assets of these combined companies amounted to $6,406,521.42.

Their total liabilities amounted to $1,617,246.59, made up as follows.—

Unsettled losses, $374,458.03; reserve of unearned premiums, $1,088,910.98; sundry, $153,877.58; total, $1,617,246.59.

CANADA PAYING PROMPTLY

"When I addressed you last year I laid stress upon the satisfactory nature of the company's loans, and I am able to say that, notwithstanding the money stringency that has prevailed in Canada during the past year the payments of interest and instalments of principal have been generally met with punctuality," said Mr. J. G. Colmer, C.M.G., chairman to the sixth annual general meeting of the Western Canada Investment Company, of London, held in London, England, recently.

◆

Under the provisions of South Vancouver's new fire prevention and inspection by-law the fire chief and the police chief are authorized to take such measures as are necessary to prevent the spread of fires when a serious conflagration menaces the municipality and to exercise care and caution in the prevention of fires. The fire chief is authorized to operate an inspection bureau for investigating premises where an outbreak of fire is likely, and to advise the owners or lessees of those premises of the precautionary measures needed.

SASKATCHEWAN LAND BANK'S BONDS

Analysis of the Market for Such Securities—Some Important Considerations for the Promoters

BY H. M. P. ECKARDT.

The parties who are promoting the Saskatchewan Land Mortgage Credit Association expect, apparently, that the bonds issued by the association will have a better market in London than the bonds issued by any other Canadian corporation. In an article published by the London Financial Times on September 18th, 1913, reference is made to their claims to the effect that "if they had the machinery which the Canadian Pacific Railway has for borrowing money, or as good a system of a different character, they could borrow at a lower rate than the Canadian Pacific Railway." There will be a marked disposition in expert financial circles to doubt this statement. The Canadian Pacific borrows cheaply, for one reason, because of its record and reputation—it is not altogether a matter of possessing good machinery for floating debentures and stocks.

What the Promoters Ask.

What the promoters ask from the provincial government is put under four heads. They ask for legislation arranging for the formation of the credit associations; for a small sum of money for organization purposes; for government supervision of the issuing of the bonds; and, last but not least, for the government's endorsement and guarantee of the bonds. In order to arrive at a satisfactory idea as to the market which these bonds will command, it is necessary to discuss their character and to take account also of the volume or amount that may be issued.

In brief the plan is to form associations of farmers in the various districts of the province. Every farmer who joins a local association of this kind is to be responsible for the borrowings of his fellow members. Of course, it is presumed that the officers of the local association will be careful to grant loans only to farmers who will carry out the obligation to pay. But the officers may not, and in case of a newly-settled region like Saskatchewan, it is reasonably certain that they will not, be able to confine the loans to good borrowers only. So there is foreshadowed an annual loss which must be covered by a special annual charge on the members.

Pledge for Total Debt.

If the membership of an association is not large and its officers make serious mistakes in lending, the consequences might be very disagreeable for all who join it. Thus each borrower is required to pledge his possessions, not only for his own debt, but for the total debt of the local association with which he is affiliated. In all probability, the successful farmer, able to stand on his own feet and make progress, would rather continue to deal with the loan companies and the banks, even at a little higher cost, than go into a scheme like that. So it is necessary to take account of the possibility that in each local association the members would consist largely of the weaker or poorer farmers, and if that turned out to be the case the chances are that the movement would not be very successful.

Pay Off Existing Mortgages.

In any event the bonds issued by a small local association of this kind would not perhaps command a very good market in London or elsewhere, even if guaranteed by the province. In order to have the bonds issued by associations of this kind come on the market under the best auspices, it would be necessary to have the local associations united by means of a central association which would undertake the work of issuing the bonds and through which the liability for the bonds would be spread in every case over all the local associations.

So, let us assume that the bonds would thus be covered generally by the property of all the members of all the local associations and also that they bear the guarantee of the provincial government. We then arrive face to face with the question what would be the probable volume of the bonds issued or put in circulation? As the farmer, in order to be able to borrow from the local association, must pledge his land, it follows that he would have to pay off his existing mortgages. So the first effect of the scheme, if it goes into operation, would naturally be to replace the existing 7 per cent., 8 per cent. and 9 per cent. mortgages with new mortgages to the association at a lower rate. This promises to be a large operation. It is impossible to discover the aggregate amount of the farm mortgages current in Saskatchewan, but it must be enormous.

On page 503 of its issue of September 20th, 1913, *The Monetary Times* gave a list of trust and loan companies which, during 1912, invested over $61,000,000 in that province. Of course, a large part of this would not be farm mortgages, but no doubt a good many are included; and as the figures represent only one year's investment and take no account of the mortgage loans made by life insurance companies and private individuals, the total, if it could be ascertained, would be a great deal larger.

Estimates of Loans.

Saskatchewan comprises 155,000,000 acres of land, of which about one-twelfth is under cultivation; and new land is being taken up at the rate of about 1,000,000 acres per annum. If the proposed land bank is to serve all comers, it would have to provide, not only for the large existing indebtedness, but also for a large list of new applications each year. As the homesteading, etc., has been going on for some years, it is probably right to say that 1,000,000 additional acres each year would be available as security for mortgage loans. If past experience is any guide, there would be applications from the owners of at least half this land at say $10 an acre. This would mean an additional $5,000,000 per year and the figure is probably too low.

These figures indicate that the volume of bonds to be issued by the association would be very large indeed—that is if the farmers of the province generally joined the movement for cheap loans. In London, where the principal market must necessarily be, they would be taken as practically direct obligations of the provincial government. They would be considered in conjunction with the large issues of railway bonds now current with the government's guarantee or endorsement, and with the direct loans negotiated by the province for other purposes. Also, the attitude of the London financiers would be governed to some extent by the information they had as to the class of farmers joining the association.

Value of Provincial Guarantee.

If the best farmers joined, the bond issues would have better credit, but if the associations were comprised principally of weak and heavily encumbered members, even the provincial guarantee would not induce London to take the bonds in substantial amounts. Under any circumstances, it is not likely that the market would be ready to put up many millions of dollars for this purpose, until the scheme had been proved successful in operation. Under conditions such as have prevailed during the greater part of 1913, it is likely that there would be much difficulty in inducing London to provide any considerable amount of cash.

A large increase in Saskatchewan's borrowings must necessarily operate to raise the rate of interest which the province must pay; and there is the question whether the rate on the bonds would not have to go to 5 or 5½ per cent., after the amount issued had reached certain proportions. If the rate on the bonds got too high, when the expenses of the associations, and the losses from bad loans were added thereto, the cost of borrowing in that manner would be so high as to threaten the success of the whole scheme.

PACKING APPLES AND PEARS

The price received for an article depends much on the manner in which it is presented for sale. This has become especially true in regard to food products, whether offered in the natural or manufactured state. Fruit-growers have recognized this change in public taste, and have, during recent years, greatly improved their methods of putting up fresh products. Reputable apple-growers no longer think of marketing their products in second-hand barrels or boxes, or those that are soiled or clumsily made. It is regarded important not only that the packages suggest contents of fine quality, but that when opened the fruit shall present an undamaged and otherwise attractive appearance.

The packing of fruit in barrels and boxes involves a few general principles, easily mastered in the case of barrel-packing but more difficult when box-packing is concerned. In the opinion of Mr. Alex. McNeil, Chief of the Fruit Division at Ottawa, it is not too much to expect that a season's practice will make a fair box-packer, working on right principles. To teach just how the packing of apples and pears in barrels and boxes should be done, Mr. McNeil has prepared an illustrated pamphlet on the subject, which is designated Bulletin No. 34 of the Dairy and Cold Storage Commissioner's Series. In his letter of transmission, Mr. J. A. Ruddick, the Dairy and Cold Storage Commissioner, points out that this work contains a large amount of new material, setting forth the more recent developments in fruit packing. The book constitutes an exhaustive treatise of sixty-seven pages, showing many helpful illustrations. It is published for free distribution to all who apply for it to the Publications Branch of the Department of Agriculture at Ottawa.

The Traders' Building Association has increased its capital stock from $600,000 to $1,205,000.

SEND SHINGLES TO STATES

Pacific Coast Lumbermen's Views of Tariff—Railway From British Columbia to Alaska

(Staff Correspondence.)

Vancouver, September 20th.

Lumbermen and timber owners on the Pacific coast do not think the removal of the import duty on lumber going into the United States will benefit British Columbia manufacturers, particularly as far as fir lumber is concerned. For some years, the United States millman has not only been able to supply his own market, but has shipped the surplus into Canada. Shingles, though, have been shipped from British Columbia to the United States, even when there was a big duty, and it is reasonable to suppose that this business will increase. The reason is that a better quality is manufactured here. Cedar finishing material may also be in demand, because cedar is becoming a scarce article on the other side of the line. Some dealers also report that users of Georgia pine are turning their attention to British Columbia fir. There is also a tendency on the part of American manufacturers to wait until after the next presidential election before taking any decided step toward establishing plants on this side of the line, which would ship to the United States on the basis of the new tariff. They point out that the Democrats got in not by a majority of votes, but by a split in the opposing party, and the change may not last. If it did last, the probability is that Americans would invest more largely than ever in timber here and build mills. Present conditions are such that noticeable improvement is not expected in less than six months, while some state that it will be quite a considerable time before the market again becomes normal.

Railway to North of Province.

Development of Northern British Columbia has been discussed much more of late. Sir Richard McBride aims to have a railway through from the southern part of British Columbia to Alaska, and the probability is it may come. The White Pass and Yukon proposes an aggressive expansion policy, which will include the establishment of a line of steamers to run between Alaska and Puget Sound and Canadian ports, and also to have rail connection with the Chicago, Milwaukee and Puget Sound line, via the Pacific Great Eastern. Mr. O. L. Dickeson, president of the White Pass and Yukon, was on the coast this week, and said the company should have had these connections when the lower Yukon River started to develop. He does not regard it as too late yet, because an era of substantial permanent development is started in the north.

The establishment of an all-rail connection with the north will be of much benefit to British Columbia, and when it is completed, will give this province an excellent system of transportation. The Pacific Great Eastern is making a good beginning at North Vancouver, and construction on the north shore will add greatly to the activity there.

Activities of Boards of Trade.

The Vancouver board of trade has taken up the proposition of having the time advanced one hour for the summer months, so as to take advantage of the daylight in recreation weather. It has passed a resolution that the standard time be advanced one hour from the first Sunday in April to the third Sunday in October, and other boards will be asked to co-operate.

The Canadian Credit's Men Association is seeking the co-operation of boards of trade in British Columbia in securing uniform legislation throughout the Dominion in regard to assignments, bankruptcy and kindred matters.

Incorporation is being sought for a Chinese Import and Export Merchants Board of Trade for Vancouver. Considerable business is done between Vancouver Chinese and China, and it is pointed out that correspondence between the source of supply of the goods and the merchants in Canada, is in the Chinese language and consequently is not understood by the members of the existing board of trade.

◆

The shareholders of the British Guiana Bank, at a meeting held at Georgetown, Demerara, decided to accept the offer made by the Royal Bank of Canada to purchase the assets and business of that bank. The British Guiana Bank, which has been established since 1836, has branches at Georgetown, Demerara and New Amsterdam, Berbice. The capital of the bank is $926,520; reserve and undivided profits, $282,475.37; total assets, $3,680,000. Mr. John B. Laing, managing director of the British Guiana Bank, will be manager of the British Guiana business of the Royal Bank, and the staff of the British Guiana Bank will be retained by the Royal Bank.

BEEF, MILK AND HOGS

They Are Produced in Large Quantity Around Edmonton, Benefiting Farmers and Community Generally

(Special Correspondence.)

Edmonton, Alta, October 20th.

Business conditions continue to be fairly satisfactory and available information appears to qualify the prediction made earlier in the year, that notwithstanding the much talked-of financial stringency, there was no cause for uneasiness in regard to trade throughout the territory commercially tributary to Edmonton.

Wholesalers and other shipping houses uniformly report increased volume of business, and reasonably satisfactory conditions as to credits. This would appear to be borne out by such statistics as are available. Notwithstanding the practical elimination of real estate speculation, Edmonton's bank clearings for the nine months show a slight increase over last year, the figures being, 1912, $153,491,432; 1913, $157,019,297. Custom house collections show $1,514,657, as against $1,098,834 for the corresponding period of 1912, or an increase of 38 per cent.

The healthy condition of business indicated by these figures in the face of a money stringency and general tendency towards retrenchment regarding expenditures and extensions, is no doubt accounted for by the generally prosperous conditions throughout the territory from which Edmonton draws trade.

Farmers are Wise.

Farmers almost without exception are engaged in mixed farming and are not dependent to any very great extent on wheat growing. Besides grain, they are producing beef, milk and hogs, and their shipments of these products have shown marked increases over previous seasons and prices have been good. In consequence country merchants have found farmers in a position to spend rather more money than has been usual during the summer and fall.

Building activities in the city have fallen off to some extent as compared with last season. This is directly attributable to the lightness of the money market, many projects having been abandoned or deferred owing to the difficulty of arranging loans on satisfactory terms. It has also largely eliminated speculative building. Nevertheless the season has been an active one, and a very large amount of building has been done or is now under construction.

Inspector Issues Many Permits.

For the nine months the city building inspector has issued 2,765 permits for buildings estimated to cost $8,261,175, almost a million a month. Included in this are 1,337 residences aggregating $2,796,350. No "shacks" are included in this return, these appearing under the heading "small buildings and alterations," for which 906 permits aggregating $477,995 were issued.

The returns also include 18 educational buildings, $899,500; seven churches, $230,000; five hospital buildings and additions, $405,000; 29 warehouses, $548,550; 131 store buildings, $691,975; 10 office buildings, $874,500; and 18 apartment buildings and rooming houses, $238,000.

At the present time building operations are active, there being a rush of construction towards the close of the season.

The indications are that when returns begin to come in from the magnificent crop now safely harvested and rapidly being threshed, additional impetus will be given to business. —F.T.F.

FOUR NEW VILLAGES

Saskatchewan's villages are many, the following being the latest added to the roll:—

The village of Abbey is another addition to the rapidly lengthening list of villages along the line of the Canadian Pacific Railway extending north-west from Swift Current.

The village of Lafleche is a new community which has recently sprung up in the hitherto rather sparsely settled country lying south-west of Moose Jaw, near Gravelbourg.

Prussia is a new village situated on the Canadian Pacific Railway line running from Swift Current to Bassano.

The village of Wiseton is situated on the new branch line of the Canadian Northern Railway, which runs between the South Saskatchewan River and the Goose Lake line in a westerly direction. The coming of the railway to this fine district must prove itself a genuine relief to the settlers over a large area.

The Grand Trunk Pacific Railway will augment the coastal service between Prince Rupert and the Pacific coast cities as soon as conditions are favorable.

DOES MUNICIPAL OWNERSHIP BENEFIT TAXPAYERS?

Some Bookkeeping Tricks Indicated—Actual Results Obtained Are Difficult to Secure

Americans hear a great deal of the alleged "triumphs" of public ownership in England and Scotland; they hear next to nothing of its failures. Nor are they aware how often an apparent "profit" earned by a municipal venture and ostentatiously ear-marked for "the relief of the rates" is really only arrived at by charging a totally insufficient sum to the depreciation, reserve and renewal accounts and by omitting many expenses that would find a place in every private corporation's balance sheet.

When the London County Council, for instance, went into the street-car transportation business, it found itself obliged to widen and improve the existing thoroughfares. On this work, necessitated entirely by its plunge into what has turned out to be a very hazardous form of municipal trading, it spent over $20,000,000; but considerably less than one-tenth of this sum was debited to the street-car service, on whose behalf it had been disbursed. That is a fine sample of the bookkeeping devices to which public bodies are impelled to resort by their eagerness to show that their undertakings "pay." Thus writes Mr. Sydney Brooks, the well-known English publicist in the October issue of "Concerning Municipal Ownership." Office, clerical and legal expenses again are rarely, if ever, apportioned to the enterprises that incur them; the plants and property owned by municipalities have been proved in case after case to be more leniently assessed than if they were in private hands; and instances are not known in which the authorities in control of municipal gas works or electric lighting plants have turned a loss into a "profit" by excessive charges for lighting the streets and municipal offices.

Difficult Matter to Get Facts.

But there is another and a much greater deduction to be made from the statistical "profits" earned by public ownership. It is this. When a municipality purchases a public utility from a private company and runs itself, it automatically surrenders the rental which the private company had agreed to pay into the local exchequer. But this item never by any chance appears in the municipal accounts. What the municipality gains by owning and managing the utility is made the most of and is often, as I have said, illegitimately inflated; what it loses and forgoes is not mentioned or allowed for at all. It is just as though a landlord, who suddenly decided to live in a house he had previously leased to some one else, were to omit from his calculations of income and expenses all reference to the rent he used to receive.

Thus, it is a matter of extraordinary difficulty to get at the real facts about the financial results of municipal trading. Unquestionably the paper "profits" are partly and probably considerably fictitious. But just how far they ought to be scaled down to determine the exact state of affairs, nobody in Great Britain can say.

Profits Reach a Maximum of Four Per Cent.

Even, however, if the figures are accepted at their face value, inquiry has demonstrated (1) that the policy of municipal ownership of "reproductive" undertakings earns not more than 4 per cent. on the capital outlay; (2) that out of this, interest charges have to be met and a sinking fund provided for; (3) that the balance left over for the relief of local taxation is less than one-tenth of the gross profits; and (4) that even when the initial debt is extinguished, the municipalities will no more be able to annex all the profits than a private corporation is able to pay out the whole of its surplus earnings in dividends.

And these conclusions, remember, are reached by taking the figures simply as they appear in the municipal balance sheets, by not subjecting them to any of the deductions I have touched on, and by leaving out of account the extra taxation which experiments in municipal trading have always been found to entail. If these factors were brought into the reckoning, as, of course, they ought to be, the net result would in all probability be to show that public ownership in Great Britain, considered as a whole, is about as near to being a commercial failure as a commercial success, and certainly that its many disadvantages in other respects cannot be condoned on the score that it is financially profitable.

Taxpayers do not get Benefits.

Americans, who are used to having paraded before them and quoted at them the "profits" that Birmingham or Glasgow or Manchester are making out of this utility and that, and who may have deluded themselves into the idea that municipal ownership is an infallible money-making device which any one can handle, will probably receive a certain scepticism the conclusion I have thus roughly summarized. It represents none the less the exact truth of the case as far as it can be ascertained. In special cases and under certain and rather exceptional conditions—conditions, at any rate, that do not obtain in the United States—the municipal ownership and operation of a particular utility have been made in Great Britain to yield a profit, which, though decidedly smaller than the artifices of municipal bookkeeping make it appear, is probably a genuine profit. But there are a number of British municipal undertakings, that lose money instead of making it—a recent parliamentary paper instances thirteen important towns in which out of 77 municipal enterprises only 28 even pretend to make a profit—and, when surveyed as a whole, the policy of taking public utilities out of private hands and vesting their possession in the community and their management in elected political bodies, has produced, even in the favorable circumstances of Great Britain, no such financial benefits to the taxpayers as its advocates maintain.

JOHNSON GOES TO GREAT WEST LIFE

When the Winnipeg delegation were travelling to the Life Underwriters' Convention at Ottawa they were mystified as to who was a traveller from Calgary—short, stout, calm, with an attractive personality—who dared to criticize Canadian Pacific Railway beefsteak, and who made some crisp remarks when the train was unduly delayed. Later, it transpired that the Calgary man was going to the convention, too. He was Mr. J. A. Johnson, for twenty-six years with the Mutual Life, of New York. At Ottawa, in August, the underwriters elected him as vice-president of their association. Mr. Johnson has now been appointed manager for the Great West Life for the mainland of British Columbia.

J. A. JOHNSON

Appointed British Columbia Manager of the Great West Life

Although born in the maritime provinces, he is an enthusiastic westerner. His appeal, at the underwriters' convention, that Calgary should have the next gathering was eloquent and witty, and indelibly marked him as an orator of no mean ability.

Mr. Johnson was born January 1st, 1861, in Pictou County, Nova Scotia. He joined the Mutual, of New York, in 1887 as joint general manager with Mr. J. W. Fitzpatrick for the State of Maine. After two years the company sent him to establish its first general agency in Florida, where he stayed two more years, being later appointed manager for the State of Colorado. He was then transferred to take charge of the Halifax office, covering the maritime provinces and Newfoundland. He remained there until January 1st, 1911, a period of eighteen years, during which time he served as a member of the Halifax city council, was deputy mayor for three years, and president of the Halifax board of trade for two years. Since January 1st, 1911, he has been at Calgary.

He has many friends who will wish him well in his new position.

"Certainly Montreal is leading the world in developing a harbor." These words are from a letter of Mr. George E. Marcy, president of the Armour Grain Company, of Chicago, to the Montreal Harbor Commissioners.

GOVERNMENT WATCHES 175 INSURANCE COMPANIES

Eighty of These Write Fire and Fifty-Nine Life Business —Protection of Policyholders

There are 175 companies under the supervision of the Department of Insurance at Ottawa. The nature of the business transacted by them is as follows:—

Companies transacting insurance.	No.
Life	59
Life, assessment plan	4
Fire	80
Accident	29
Guarantee	17
Steam boiler	8
Plate glass	19
Burglary	9
Registered mail, etc.	10
Sickness	31
Title	1
Tornado	12
Live stock	2
Weather and hail	3
Automobile	14
Sprinkler leakage	4
Fly wheel, lightning, explosion, etc.	2

Securities Held by Receiver-General.

The deposits for the protection of policyholders, held by the Receiver-General in trust for these companies, at May 31, 1913, amounted to $69,779,232.23, in securities as follows:

Securities.	Amount.
Canadian government	$ 2,004,113.67
Canadian provincial	6,955,942.88
British government	1,306,096.53
British colonial	1,458,675.21
United States bonds	390,000.00
New York State bonds	454,000.00
Massachusetts bonds	1,985,000.00
Rhode Island bonds	100,000.00
California State bonds	45,000.00
Japanese government bonds	35,971.33
Belgian government bonds	164,320.20
Montreal harbor bonds	560,000.00
Municipal securities	43,122,278.49
Bank stock	20,000.00
Loan companies' debentures	705,933.33
Railway securities, guaranteed	10,151,563.92
District of Columbia bonds	155,000.00
French rentes	165,336.67
Total	$69,779,232.23

Protection of Policyholders.

There was also deposited with Canadian trustees, in conformity with the Insurance Act, $25,663,788.64, making a total of $95,443,020.87 for the protection of policyholders, being an increase since last report of $10,152,647.21.

The distribution of the total sum of $95,443,020.87 held, as above-mentioned for the protection of policyholders among the different classes, is as follows:—

Life	$70,039,103.59
Fire	14,280,538.35
Fire and miscellaneous	6,480,053.54
Accident, guarantee, plate-glass etc.	4,643,265.39
Totals	$95,443,020.87

Amount of Premiums Received.

The total amount of premiums received in Canada for all forms of insurance in 1912 was $60,955,326, of which $30,739,598 was received by Canadian companies, and $30,215,728 by British, American and other companies. The following summary shows the distribution of the premiums to the various classes:—

Companies.	Premiums, 1912.
Fire	$23,194,518
Automobile	464,580
Life	35,709,516
Life (assessment)	2,420,571
Personal accident	2,022,608
Guarantee	564,096
Plate glass	193,525
Steam boiler	135,377
Burglary	66,042
*Sickness	1,027,374
Inland transit	88,151
Employers' liability	2,817,286
Sprinkler leakage	32,118
Title insurance	561
Live stock	127,533
Hail, weather and tornado	302,227
Total	$69,166,083

---

*So far as separate return made.

How the Nations Fared.

Dividing these companies according to nationalities, the following is the result:—

	Premiums—1912.		
Companies.	Canadian Cos.	British Cos.	U. S. Cos.
Fire	$ 5,063,409	$12,092,125	$ 6,038,984
Life	23,540,081	1,768,046	10,401,389
Life assessment	2,420,571	....	....
Accident	1,046,689	557,915	418,004
Guarantee	129,661	147,511	286,924
Plate glass	52,468	34,441	106,610
Steam boiler	103,630	....	31,747
Burglary	39,865	923	25,254
Sickness	821,622	105,420	100,332
Inland transit	4,442	54,275	29,434
Employers' liability	514,742	1,672,875	629,669
Title insurance	561	....	....
Live stock	76,310	51,223	....
Automobile	111,450	42,600	310,530
Sprinkler leakage	....	413	31,705
Hail, weather & tornado	280,220	116	21,891
Totals	$34,205,721	$16,527,883	$18,432,479

COMPANIES LICENSED IN ONTARIO

The following extra-provincial companies have been licensed to do business in Ontario:—

United States Steel Products Company, of State of New Jersey, U.S.A. Ontario capital, $40,000.

Atlantic Fruit Distributors, Inc., of State of Delaware, U.S.A. Ontario capital, $10,000.

Algoma Land Company, Limited, of Great Britain and Ireland. Ontario capital, $100,000.

Detroit-Ojibway Land Company, of the State of Michigan, U.S.A. Ontario capital, $25,000.

Mills Bros., Limited, Dominion charter. Ontario capital, $1,000,000.

COMPANIES OBTAINED FURTHER POWERS IN ONTARIO

Various powers were granted in supplementary licenses issued by the Ontario government last year, as follows:—

Oneida Community, Limited, increasing the amount of capital which it may use in Ontario from $50,000 to $150,000.

Pintsch Compressing Company, increasing the amount of capital which it may use in Ontario from $40,000 to $100,000.

American Thread Company, increasing the amount of capital which it may use in Ontario from $10,000 to $40,000.

Wm. Wrigley, Jr., Company, increasing the amount of capital which it may use in Ontario from $40,000 to $600,000.

Canadian Colored Cotton Mills Company, Limited, in Ontario, the name to be Canadian Cottons, Limited.

Columbia Phonograph Company (General), increasing the amount of capital which it may use in Ontario from $10,000 to $50,000.

National Spring and Wire Company, increasing the amount of capital which it may use in Ontario from $10,000 to $100,000.

Quaker Oats Company, increasing the amount of capital which it may use in Ontario from $1,250,000 to $2,000,000.

Johnson & Carey Company, increasing the amount of capital which it may use in Ontario from $12,000 to $100,000.

Canadian Gold and Silver Mining Company, to use two million dollars of its capital in Ontario.

International Acheson Graphite Company, increasing the amount of capital which it may use in Ontario from $40,000 to $80,000.

Crown Cork and Steel Company, of Baltimore City, trading in Ontario under the name of Aluminum and Crown Stopper Company, increasing the amount of capital which it may use in Ontario from $300,000 to $500,000.

National Cash Register Company, increasing the amount of capital which it may use in Ontario from $90,000 to $150,000.

Stewart Hartshorn Company, increasing the amount of capital which it may use in Ontario from $25,000 to $100,000.

Oriental Carpet Manufacturers, Limited, increasing the capital which it may use in Ontario from £8,000 to $250,000.

EXPECT SIX PER CENT. RATE

Bank of England May Make Further Advance—New Capital Issues

London still expects a 6 per cent. Bank of England rate within the next few weeks. The advance in the rate a few weeks ago, according to the London Statist, is not a serious matter. It is intended to be precautionary, and as a notification to certain countries of the limited supply of gold in London. The notification is doubtless intended primarily for Germany, Russia, and New York, all of which are able to refrain from taking gold without suffering any serious consequences.

Rates of State Banks.

The following table shows this week's official minimum discount rate of all the European state banks, with the respective dates at which the present rates were established and the rates at the corresponding dates in previous years:—

Bank of—	Date of last change.	1913.	1912.	1911.	1910.
England	Oct. 2, '13	5	5	4	4
France	Oct. 31, '12	4	3½	3½	3
Germany	Nov. 14, '12	6	4½	5	5
Holland	June 25, '13	5	4	4	4
Belgium	Oct. 16, '12	5	5	5½	5
Austria	Nov. 15, '12	6	5	5	4
Italy	June 23, '13	6	5½	5½	5
Switzerland	Aug. 14, '13	4½	4½	4	4
Russia	Oct. 28, '12	5½	5	5	5
Spain	Sept. 24, '03	4½	4½	4½	4½
Portugal	Jan. 9, '08	6	6	6	6
Sweden	Nov. 14, '12	5½	5	5	5
Norway	Mar. 23, '12	5½	5½	5	4½
Denmark	July 2, '13	6	5	5	5

New Capital Issues.

"The number of new capital issues in September," a London financial organ notes, "was substantially greater than in August, but was still small, amounting to rather less than £11,000,000, in comparison with £12,000,000 last year. In 1910 the amount was only £1,300,000, but in that year, of course, the scare that arose subsequent to the Agadir incident almost entirely checked the issue of new capital.

"For the past quarter the new issues have reached £40,000,000, against £44,000,000 last year, £12,000,000 only in 1911, and £27,000,000 in 1910. The issues for the nine months have reached the great sum of nearly £191,000,000, against £165,000,000 last year and £134,000,000 two years ago. In the last quarter of the year, the new issues may be quite as large as usual, and for the whole of 1913 the amount of capital placed in this market will probably exceed all previous totals."

◆

LAKE SUPERIOR PAPER COMPANY, LIMITED.

The annual statement of the Lake Superior Paper Company, Limited, which has linked its interests with the Spanish River Pulp and Paper Mills, Limited, for the year ended June 30th, 1913, shows net earnings from operations of $184,878.

The profit and loss statement is as follows:—

Net earnings from operations, $184,172. Deduct: Interest charges for the period on first mortgage bonds—proportion chargeable to revenue, $149,986; interest on bank advances, $30,124; surplus, $4,767. The balance sheet is as follows:—

Assets.—Property account, $12,417,140. Current assets—Pulpwood, $718,691; sawmill, lumber, logs, equipment and stores, $162,115; pulpmill products, $32,985; stores and supplies, $219,388; accounts receivable, $243,382; paper and lumber sold, but not delivered, $478,712; cash, $83,502—$2,325,155; insurance, $19,163; deferred charges, $47,949; totalling $14,809,411.

Liabilities.—Capital stocks—Common, $5,000,000; preferred, $3,000,000; first mortgage bonds, $5,000,000. Current liabilities—Bank loan (secured by lien on forest products), $842,661; accounts payable, $650,643; bills payable, $127,905; accrued interest on bonds, $100,000; unpaid interest coupons, $1,148; accrued taxes, $2,050—$1,724,409; reserves (accident insurance and delivery expenses), $80,234; profit and loss, $8,767. The total liabilities being $14,809,411.

From the directors' statement it appears that the third and fourth machines were only completed and installed in January and March, 1913, respectively. The production for the year was 34,213 tons, and the directors state that practically all the output for the current year has been sold at fair prices.

(Continued from page 669.)

MORE ISSUES IN LONDON.

*London, October 20.—The Nova Scotia Steel Company's issue of £199,500 6 per cents. at 98, now pending, forms part of a recent issue of £400,000.

The Canada Agency advertises an offering of Western Canada Mortgage £300,000 5 per cents. at 94.

Mr. Thomas Langlois, of Vancouver, is here in connection with a sale of debentures for the National Finance Company, Vancouver.

MACKENZIE ON THE LONDON MARKET.

*London, October 20.—Sir William Mackenzie, who recently arrived here from Canada, does not seem greatly perturbed over rumors to the effect that Canada and Canadian industries are being depreciated as is claimed, because of the fact that Canadian offerings are not taken up more readily in London.

"It is not because they are Canadian that Canadian offerings are not being taken up readily in London lately, as nothing seems acceptable just now as the people are not investing," answered Sir William to a question put to him as to what the probable reason for the failure of certain Canadian offerings was.

Sir William added that since coming here he had seen no indication of Canada being depreciated.

"However," continued Sir William, "there should be practically no effect in Canada as a result of conditions in the London market, in view of the fact that Americans have been buying Canadian bonds pretty freely and possibly there have been more Canadian offerings in London than the public cared for."

SAYS ENGLISH MANUFACTURERS CANNOT EXPECT TO COMPETE

* London, Oct. 23rd.—It is understood that one of the objects of Sir William Mackenzie's visit to London is to raise $10,000,000 for steel works at Port Arthur.

The plans of the American steel trust to erect a large iron and steel plant in Southern Ontario has attracted attention among English manufacturers.

The Manchester Guardian, commenting on these plans, notes the determination with which Canada is developing its heavy iron and steel industries.

It alludes also to the abundant opportunities for those who look ahead.

English manufacturers cannot expect to compete largely for enormous structural and other steel requirements in the West unless they establish Canadian branches.

"Anyway, the Canadian market, except in isolated instances, cannot be handled like the Indian in a slow and fatherly manner from a distance through an intervening agency."

REGARDING WEEDS IN FINANCIAL FIELDS.

*London, October 21.—Financial authorities here agree that the present situation will not be greatly eased until the huge Balkan loans are arranged. Continental banks are loaded with commitments from the Balkan States which they desire to pass on to the public, but the French Government insists that the banks must first carry out the big French issue, and some time must elapse before these operations are completed.

Meanwhile the public have been quietly and slowly tempted by the excellent Canadian bargains.

A big financier tells me he was induced to underwrite £10,000 of a recent Western municipal issue, which he was prepared to carry until January, but it had already been absorbed by small investors. He had to sign 30 transfers.

The same authority says it would be easy to exaggerate the effect upon the average British investor of a few defaulting Canadian concerns, a list of which were set out in today's London papers, with a great parade as "The Truth About Canada." This financier's comment is:—"The truth about Canada is, she now seems to be perfectly sound, and reflex action upon London of an early an abundant crop shows how materially the finances of the west are being relieved. We all deplore the failure of a few Canadian concerns, but the chief fault lies with the rash Englishmen themselves. If they will not use common prudence in Canadian investments, but listen to every Canadian charmer, they must expect to suffer.

"Of course there are weeds in the best of wheat fields, but no London financier, whose opinion counts, doubts that Canada's has had fewer weeds than most, and all that is needed is patience, caution and faith, above all, faith."

CEDAR RAPIDS WILL SUPPLY CONSIDERABLE POWER

Company's Construction Proceeding Satisfactorily and Will be Completed Next Year

Monetary Times Office,
Montreal, October 22nd.

The Cedar Rapids Manufacturing and Power Company has issued a report which will gratify the various shareholders. It points out that the St. Lawrence River drains a territory of about 300 square miles, the flow from which is unusually even. About 50 miles west of Montreal the river widens into Lake St. Francis. Above this is a long series of rapids including the famous Long Sault. Below the lake and nearer Montreal is Lake St. Louis and between lakes St. Francis and St. Louis, the St. Lawrence falls 80 feet through Coteau, the Cedars and the Cascade Rapids; 32 feet of this fall is in the Cedars Rapids, 30 miles west of Montreal, and it is for the development of these rapids that the Cedars Rapids Manufacturing and Power Company was formed. No diversion of water from the river is permitted without authority and this the company in due time obtained.

Hundred and Twenty Thousand Horsepower.

Later the control became vested in the joint interest of the Shawinigan Water and Power Company and the Montreal Light, Heat and Power Company. Contracts were shortly thereafter made with the Aluminum Company of America, of Messina, New York, and with the Montreal Light, Heat and Power Company, covering a total of 120,000 horsepower, half going to each company. The aluminum company is to take its entire share immediately upon the completion of the present development, while the power company will guarantee to take at least 20,000 horsepower. It is considered that these contracts will give an ample return on the present issue of capital of $8,850,000 common stock and also provide for the $10,000,000 of 5 per cent. bonds outstanding.

Work has been in progress on the development for a considerable time, and it is considered that by the end of 1914, the development will have been completed. The rapids extend a distance of over two miles and the development plans to concentrate the difference of levels at one point. Accordingly a canal has been constructed along the north bank of the river. The width of the canal on the water will be about 1,000 feet and its total length from the ice fender to the power-house will be about 12,000 feet. The power-house will form a concrete dam across the lower end. The company has the right to take a total of 56,000 cubic feet per second into its canal, and this, it is considered, will develop 160,000 electrical horsepower.

By End of 1914.

The plans for the final development call for the installation of 18 units of a normal capacity of 10,000 horsepower each, two of these units being regarded as spares. In addition to the main unit, six water driven exciter units will be installed.

Special precautions are being taken against what is known as frazil ice, a large amount of which will pass through the wheels, as the opening through these wheels will be about seven feet high and three feet wide.

At the end of August over half the rock excavation had been completed and nearly half the earth excavation and the work was making satisfactory progress. No serious interruptions have been experienced and it is fully expected that the entire work will be completed by the end of 1914.

◆

The annual herring run in Vancouver Island waters has started and promises to be good. Outfits are fishing at Nanoose Bay and Active Pass. Three new salteries are being operated at Cowichan Gap this year. The herring will not start to run to Nanimo for some weeks yet, but dog salmon are being fished for there with great success.

Should Canadian poultry farmers have a surplus of turkeys this season, attention may be drawn to the market in the Leeds district, England, for these birds. It is to be feared, however, that owing to the greater demand and consequently more favorable prices now ruling in the cities of Canada, the export trade in turkeys to England has become a negligible quantity. Leeds merchants came to the conclusion last season after having corresponded with exporters in Canada who were unable to offer them shipments at competitive prices and in some measure this would appear to be borne out by the exports from Canada to England, which, in 1911 and 1912, had fallen in value to $968 and $1,264, respectively. In former years, Canadian turkeys were well in evidence on the English market and still continue to be favorably spoken of by Leeds salesmen.

MONEY MARKETS

Toronto.—Call money on bonds, 6 to 6½ per cent., and on stocks, 6½ per cent.

Time loans are quoted at 6½ to 7 per cent., and commercial discounts at 6½ to 7 per cent.

London.—Bank of England rate is 5 per cent.; three months' discount rate, 4 15-16 per cent.

Bar silver in London, 27 13-16d. per ounce; in New York, 60½c. per ounce.

New York.—Time money in New York, 4¾ to 5 per cent. for sixty days; 5 to 5¼ per cent. for ninety days; 5 per cent. for four months, and 4¾ to 5 per cent. for five and six months.

Commercial paper in New York is discounted at 5½ to 6½ per cent.

◆

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of October 24th, 1912; October 16th, 1913; and October 23rd, 1913.

VALUE OF LIFE INSURANCE

XXXV.

Policies for Brokers

BY C. A. HASTINGS

In the article entitled "Single premium policies," which was published in *The Monetary Times* on May 3rd, attention was drawn to the fact that few of these policies were sold, and how suitable they were to those whose incomes fluctuate. Now, there is one profession in particular, in which there are two classes of men, one whose yearly income is assured, and the other whose income fluctuates—I refer to stock-broking.

There are several stock-brokers who deal for wealthy clients and who are assured of their patronage, but there are many more who are not in that happy position and whose businesses are liable to fluctuation—and perhaps in that fascinating profession more than in any other.

Should Invest Savings Securely.

Stock-brokers and stock-jobbers are usually very shrewd men, and it seems rather unnecessary for me to point out to them the obligations which lie upon them, and that is to make provision, out of the proceeds of a good transaction, in order to avoid any hardships in the future.

Many men are apt to spend too freely when they have closed a gainful deal, instead of investing their profit in such a manner that it will not depreciate, and be available for future use if required. Those who are engaged in an uncertain business should invest their savings securely, and if invested in a first-class life office, they are certainly safe and are bound to increase as time marches on.

Value of System.

A life policy teaches systematic saving and this is invaluable, for while the policy provides for the future, it can always be used as capital when the necessity arises. Furthermore, even should a policyholder find it embarrassing to meet his premium, it has not got to be long in force before the policy carries itself automatically for at least a year, without any reduction to the protection, and at a low rate of interest.

To analyze this profession, the members of it must depend upon their exertions for a living and the good-will which attaches to their own personality; a substantial life policy prevents a man from becoming dispirited and embittered by the realization that he is stranded on the banks of the on-rushing stream of life and can never reach the golden harbour of his dreams.

◆

BRITISH CANADIAN TRUST REPORT

The third annual report of the British Canadian Trust, Limited, for the twelve months ended August, 1913, was presented recently. It shows that a balance of £1,448 to be carried forward, subject to directors' and auditors' fees. The report says: "The investments of the company show a net increase during the year of £81,547, and now amount to a total of £500,301. Of this amount £371,606 is in mortgage loans in the Western provinces of Canada and the United States, and £128,695 in bonds, stocks and shares mainly of American and Canadian railroad and industrial companies. These investments in bonds and stocks have shared in the general fall in values of securities that has taken place during the past twelve months, and at date of balance show a net depreciation of 4½ per cent. after deducting the amount put to contingent fund. The directors expect that this depreciation will be gradually restored by a recovery in values, and meantime it is more than met by the sums added to reserve and carried forward this year.

"Owing to the general tightness of money, the supply of British funds to Canada for municipal and industrial extensions has been considerably curtailed this year, and general business has in consequence been somewhat restricted; but the harvest just reaped is reported to be of finer quality and more value than that of last year, and good crops are the real foundation of the prosperity of the country. The company is prepared to receive at any time during the current year loans on deposit or debenture on account of its borrowing powers. The present rate of interest for debentures for three to five years is 4 per cent.

◆

During the past year, the directors of the Alberta Pacific Grain Company, Calgary, sent a representative to China and Japan to investigate and report upon the possibility of extending the business of the company in those countries. As a result, the directors think that the trans-Pacific business of the company may be profitably and steadily extended, and steps have been taken to accomplish this result

MOVEMENT OF BRITISH INVESTMENTS

Old Country Capital is Going Abroad Because Higher Rates Can Be Obtained There

(Central News letter to *The Monetary Times*).

London, October 15th.—In a blue book just published by the commissioners of the inland revenue there is a great deal of interesting information, but none of the statistics in the volume are more arresting and none have received more widespread comment, than those dealing with the movement of the country's investments. The statistics go back over twenty-five years, or to be exact, to 1886-7. During the period covered, the growth of capital all over the world has been enormous, owing to the opening and development of new countries and industries. Last year, for example, we are reminded that capital applications aggregated no less than £211,000,000, and the large increase, which has taken place in the nation's income from investments, tells the same tale. In this connection there have been some significant developments, especially during the last six years, which are causing a good deal of comment in the financial district. These developments have reference to the income derived by the country from abroad.

Big Increase Abroad.

The return on foreign investments in the year 1886-7 is recorded in the blue book at £44,508,000. This total gradually advanced, until in 1905-6 it reached £73,899,265. Since 1905-6, however, a great stride has been made in the yield upon the country's holdings of foreign securities, and for the year 1911-12, the figures representing the return were no less than £103,894,667. That is to say that during the six years ending 1911-12 the growth in the return upon foreign investments was greater than during the preceding nineteen years. This movement is so startling that special reasons are, of course, sought for. Assuming that the thirty million increase in our income from abroad is mainly paid in 5 per cent. returns, this means that the bulk of our foreign investments for the six years ended 1911-12 grew by £600,000,000.

As to the Reasons Advanced.

This may be partially explained by the fact that capital has tended abroad because it can secure a higher rate of return than it is possible to secure in this country, but a more potent influence is believed in Stock Exchange circles to be the anti-capitalistic activities of Mr. Lloyd George and the class agitation which he has fostered in order to further the political measures of his party. It may be perfectly true, it probably is, that the political unrest which has developed in this country during the latter half of the last decade as a result of the Lloyd Georgian policy of setting class against class, has not been nearly so pronounced as that, which has shown itself from time to time in countries, into which we have been pouring our capital. But this proves nothing, save that the trouble near at hand within domestic borders naturally impresses the imagination of investors more profoundly than that which occurs a few thousand miles away.

◆

NOT ENOUGH CATTLE-RAISING

Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, in a Chicago interview said: "This line is not building track outside of Canada. Canada has this year an estimated wheat crop of 200,000,000 bushels of highest grade that United States millers require for mixing purposes. The Canadian mills are busy and the farmers are getting good prices. I cannot see that Canada would gain anything by removal of duty.

"There has been some movement of Canadian cattle and sheep to the United States since the removal of the duty, but I think Canada cannot spare much stock. We have no great surplus of cattle, but stockmen here have drawn somewhat on thoroughbred herds for breeding purposes. Business is looking up in all lines, and the stringency felt in United States, as well as in Canada and the countries abroad, has practically passed. With excellent crops to put money in circulation, people have nothing to fear and buoyancy will return."

"With reference to our company bidding for existing property in operation between Chicago and Detroit, I can only say such stories are born of rumors and nothing else. Canada will have the greatest crop in its history this year. Reports from North-West shows we will need every car we possess to move the great crop which will be garnered. Of course, this means greatest prosperity. Both Canada and United States have paid too little attention to raising cattle, and both will suffer for it soon unless something is done."

MINERS RAISED MANY MILLIONS

Large Proportion of Production Was Exported—United States is Chief Customer

A large proportion of the mineral production of Canada, the total value of which was $135,048,296 in 1912, is exported for consumption or refining outside of Canada. On the other hand considerable quantities of mine products, chiefly those which have been refined or subjected to partial treatment, or in the form of manufactured goods ready for consumption, are imported.

The total value of the exports of products of the mine, including direct mine products and manufactures thereof, in 1912 was $68,591,225, as compared with $52,546,593 in 1911. This value includes for 1912 mine products to the value of $54,349,640, and manufactures valued at $14,241,585. Practically the whole of the Canadian production of copper, nickel and silver is exported, also a very large proportion of the production of gold, asbestos and mica. There are also considerable exports of coal. These items alone contribute about 95 per cent. of the value of the mine products exported, says Mr. J. McLeish, B.A., in a summary of mineral production issued by the department of mines. Manufactures of mine products exported consist chiefly of iron and steel goods, aluminium, calcium carbide, lime, acetate of lime and coke.

The United States is the chief destination of Canada's mine exports, about 80 per cent. having been exported to that country during the fiscal year 1911-1912, and about 13.4 per cent. to Great Britain.

Imports Increasing More Rapidly.

A great variety of mineral products, chiefly in a manufactured or semi-manufactured condition, are annually imported into Canada, and these imports are increasing with much greater rapidity than is Canada's domestic mineral production. The total value of such imports during the calendar year 1912 was $233,924,270, as compared with imports valued at $181,773,708 in 1911, and $147,305,012 in 1910. Of the total imports in 1912 nearly $50,000,000 in value was made up of the cruder forms of mineral products such as coal, ores of metals, diamonds unset and bort, asphaltum, etc., as against $48,000,000 for similar items in 1911.

The imports of iron and steel and manufactures thereof in 1912 were valued at $124,376,986, as against $93,171,817 in 1911, and $75,758,594 in 1910. Imports of the metals, aluminium, antimony, copper, gold, silver, lead, platinum, tin and zinc, and manufactures thereof, and metallic alloys, reached a total value of over $27,000,000, as compared with $19,500,000 in 1911, petroleum and products of $11,858,533, as against $6,009,730 in 1911; clays and clay products, $6,592,537, as against $5,216,544 in 1911.

It will thus be seen that over 50 per cent. of the imports represents iron and steel, and that the increased imports were chiefly in iron and steel and other metals, and in petroleum.

Opportunities for Industrial Corporations.

As already pointed out in previous reports, adds Mr. McLeish, the great excess of imports over exports would seem to indicate the existence of large opportunities for the development, not only of Canada's mineral production, but also of many manufacturing industries which utilize mine products as raw materials.

No matter what Canada's development in industrial activity may be in the future, it seems certain that there must always be a large and mutually advantageous interchange of trade between this country and our neighbour to the south. Thus, notwithstanding Canada's possession of large supplies of coal, both in the east and in the west, the great central provinces of the country, at present the most highly populated, are situated nearer the coal fields of Pennsylvania and Ohio, and derive their chief supplies from that source, while similarly, British Columbia and Alberta coal is finding a considerable market in the adjacent states of the United States.

Refineries Will Increase.

Our southern neighbors have developed the largest iron and steel industry of any of the world powers, and possess highly developed industries in the treatment and refining of metals of all kinds, and it is perhaps but natural that we send to them the greater part of our metal ores and smelter products, and take from them the refined and manufactured products.

In the case of lead Canada now refines practically the whole of the domestic ore production, and the exports in 1912 were insignificant. Similar development in the future will no doubt result in the refining in Canada of copper, nickel, zinc and other metals. In like manner, the continued large export of crude unrefined ores and the corresponding imports of refined and manufactured products still point to opportunities for the development of industries for the treatment, refinement and manufacture of non-metallic products.

RUSSELL MOTOR REPORT POOR

Loss on Year's Operations—Directors Issue Financial Statement With Explanations

The Russell Motor Car Company, Limited, unfortunately had to report a net loss of $152,826 for the year ended July 31st, 1913. In addition, the balance sheet is not a cheerful document, showing as it does bankers' advances of $902,998 and accounts and bills payable of $569,719

Dividends on Preferred Stock are Deferred.

Patents, trade-marks, good-will, etc., are figured in the assets at $264,150. It would be better were our industrial companies to omit from their balance-sheet goodwill as an asset, as was done by a company the other week which placed goodwill at the nominal sum of $1. Accounts and bills receivable total $677,181 and cash on hand and in banks, $41,303. The stock on hand is valued at $2,390,984.

The directors admit that the showing has been "a deep disappointment" to them. It will be well to give in their words their numerous explanations for the year's results:—

As to the Motor Business.

"This important branch of the company's business has given your board great anxiety during the past year," says the report. "As reported to you a year ago, it became necessary for us, under the patent arrangements, to manufacture the Knight motor in Canada. At the same time there were other important changes in motor car design which demanded detail changes in other parts of the chassis. We had to make provision for electric lighting and electric starting, for means of inflating the tires by the use of the engine, and for the change from right to left hand drive with centre gear shift. These changes were so marked that it practically resulted in our having to completely re-design every detail of our cars. Despite our best endeavors, we were unable to have these changes completed in tested out form for the early part of the season, and there were a number of detail points upon which changes had to be made. In this development work we were confronted with a very great deal of expense in experimenting and testing. On this account, we had either to hold back orders or ship cars before we were sufficiently satisfied as to their performance. We believed it was in the interests of the business that the cars should be held back until they were right, and, as a result, we lost a great number of orders through failure to deliver on date specified. Later in the season, when we were in position to deliver cars, business was quiet. The general financial condition of the country, particularly in the west, was such that motor sales were seriously curtailed, and we were unable to realize the volume of business which had seemed easily possible at the beginning of the year. The bicycle business again showed an increase throughout Canada, and the company's business in this branch seems to become more firmly established year by year.

"As advised a year ago, the crowded condition of our machine shops led us to provide for a new automobile machine shop and assembling departments. This building was completed during the year, and while it has resulted in the securing of first-rate premises for the business for the future, during last year it really proved a handicap. It led to so much change and rearrangement in the plant that it very considerably hampered our manufacturing operations during the winter months.

Outlook for the Present Year.

"Our real estate holdings are all in our books at original cost, which is considerably below their present value. This is borne out by the fact that we have since the closing of our books sold our garage in Ottawa at a profit of $30,000 over the figure at which it is included in this statement.

"Our plant is in practically complete form at the present time and no changes or additions of any importance are considered necessary for this year's business. The bicycle business promises a year of steady growth. Our travellers, who are now on the road for next season, report first class opening orders for next year. In the motor business we are now delivering our 1914 models, and indications are at present that the business in this department for the year will be normal again.

"The directors consider it wise to defer payment of any dividends on the preferred stock until the results from the current year's operations are available."

London may be asked to participate in the development of the Tough-Oakes gold claim at Kirkland Lake, Ont. An effort to finance the property through the medium of an issue of 50,000 shares at $4 each was made in Toronto, but was not successful.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hudson Bay Company.—The sale of farm lands by the Hudson Bay Company for the quarter-year ended September 30, 1913, amounted approximately to 7,100 acres for £30,000, as compared with 19,400 acres for £85,500, and sales of town lots to £7,700 as compared with £209,100 for the corresponding period of 1912. The receipts are £70,300, as against £130,000 in 1912.

The sales for the six months to September 30, 1913, are 17,800 acres for £79,800, and town lots were sold for £19,500, as compared with sales of farm lands 37,800 acres for £162,500 and town lots for £1,158,200 for the corresponding period of 1912.

The total receipts for the six months ended September 30, 1913, amount to £214,800, as compared with £485,000 for the corresponding six months of last year.

Canadian Cereal and Milling Company.—The Canadian Cereal and Milling Company, Limited, bondholders have been notified of a meeting on October 28th.

The notice states that the meeting has been called for the purpose "of considering the present position of the security of the bondholders, and to give such instructions to, and to authorize such proceedings and arrangements by the trustees as may be thought to be best in the interest of the bondholders, and for the purpose of appointing, if thought advisable a bondholders' committee, and of conferring upon such committee such power as may be considered expedient, including all or any of the powers which by the trust deed the bondholders are authorized to exercise by extraordinary resolution."

◆

PERSONAL NOTES

Mr. G. T. Somers has been elected treasurer of the Toronto Housing Company.

Mr. R. L. Crombie, secretary of the Dominion Bond Company, has resigned and intends going away for a short holiday.

Mr. Charles R. Hosmer has been elected president of the West Kootenay Power and Light Company, succeeding the late Mr. W. M. Doull.

Mr. Alex Maclean, manager and secretary of the London and Lancashire Guarantee and Accident Company, has been spending a few days in Toronto.

Mr. A. Macdermott, accident secretary at the head office of the London and Lancashire Fire Insurance Company, Liverpool, England, was a visitor at the offices of *The Monetary Times* on his return from western Canada.

◆

WHAT VERNON NEEDS.

Some of Vernon's, British Columbia, industrial requirements are as follows and further information can be obtained from the secretary of the board of trade:—

A box factory is needed in Vernon. This district has ordered $150,000 worth of boxes and vegetable crates this year. The price of logs at the mill is $9 and $9.50, and they run 10 per cent. clear. Rough lumber sells at $16, dressed at $16, $18 and $20, shiplaps at $20.

An ice and cold storage warehouse is a need at Vernon. The government will give outright a subsidy amounting to 30 per cent. on the actual cost of the building—not on the capitalized stock. The warehouse must be a public one, and of approved construction, to receive the subsidy.

There is a good opening in Vernon for manufacturers of pickles, vinegar, relishes of all kinds and cider. Peaches, apples, pears, plums and apricots are grown. 1,179 carloads of fruit, berries and vegetables were shipped out up to October 13. Average value $750 per car. Total, $884,250.

Three million more cans were used this year in the district, yet there is no can manufactory located there.

Clay and other material for the manufacture of brick, tile, pottery, stoneware and Parian is close to the city on trackage. Limestone analyzing 97.3 carbonate of lime is within one mile and a half of the city.

◆

The International Fox and Fur Company of Boston and Milltown, New Brunswick, has been incorporated at Boston with a capital of $200,000.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Petrolia, Ont.—Up to November 10, for $7,000 5 per cent. 20-years debentures. J. M. Hattie, town clerk.

West Lowther Township, Ont.—Up to November 8th, for $2,212 5 per cent. 15-year debentures. G. Guard, treasurer.

London, Ont.—The citizens carried three by-laws to authorize the issuing of debentures by large majorities, altogether $1,125,000 for electrification, etc.

Port Stanley, Ont.—Up to November 3, for $10,000 6 per cent. 30-year debentures. J. Gough, treasurer. (Official advertisement appears on another page.)

Souris, Man.—Up to November 10th, for $40,000 6½ per cent. 30-year debentures. J. W. Breakey, secretary-treasurer. (Official advertisement appears on another page.)

St. Lambert, Que.—The St. Lambert school commissioners offer for sale $15,000 6 per cent. bonds, repayable by 20 annual instalments. J. K. Beatty, secretary-treasurer.

Kingston, Ont.—A by-law to ratify and confirm an agreement with Frank Vandersept Samwell, and to authorize the issue of debentures to the amount of $10,000, will be voted on November 3rd.

Prince Albert, Sask.—Up to November 13th, for $26,000 6 per cent. 30-years Protestant public school debentures. G. A. Brown, secretary-treasurer. (Official advertisement appears on another page.)

◆

AUTHORITIES WOULD RESENT INTERFERENCE

There is one condition, however, which exists, and of which we may be assured, and that is, cheap money is a thing of the past. Unlike former periods when capital sought investment at moderate rates, the case now is that, owing to the development taking place throughout the civilized world, creating an abnormal demand for money, the reverse has become pre-eminent. It is therefore most important from a municipal standpoint that we should look the situation squarely in the face and appreciate that the position is one of reality, is the opinion of Mr. E. M. Wood, deputy municipal commissioner of Alberta. To my knowledge, due no doubt to the ease with which money was obtainable in times past, not a few of our municipalities have been placed in awkward positions in not being able to readily dispose of debenture issues and at satisfactory prices. It is said by many financial brokers that municipal issues, particularly small ones, are too numerous and hence, difficult to place. There is merit in this contention, and it would be much more beneficial and advantageous to municipalities as a whole, were issues of this character grouped together and placed on the market at the same time. It has also been suggested that with this end in view a sort of clearing house should be created, to which all municipal debenture issues should go for the purpose of examination and disposition. In this way better prices for the securities would result. I would not go as far as to agree to what has been suggested in some quarters that any system established for the above purpose should supersede the discretionary powers of municipal councils to borrow money for local purposes. This would be a clear violation of representative government and could not fail to create most annoying and undesirable situations.

As long as the right of municipal self-government is vested in the people, no tribunal or body, other than elected councils, should be given the power or right to dictate what is in the best interests of communities. They best know the local necessities and requirements, and naturally and rightly would resent outside autocratic interference.

◆

There were sold during 1912 for agricultural and town site areas by the Ontario government 349,319 acres for $272,233. The collection on account of these and former sales was $218,710. There were sold for mining purposes 18,071 acres for $45,522, and collected on account of these and former sales $51,634. There were leased for mining purposes 16,711 acres for $17,316 and on account of these leases and those of former years $33,008. There were leased of Crown lands an area of 15,703¼ acres for $2,157.50. There was collected on account of these and the leases of former years a sum of $18,031.82. The total area of Crown lands disposed of by sale and lease during the year was 412,700½ acres for a value of $344,319.21. The total collection on account of the sales, leases, etc., was $335,645.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Windsor, N.S.—October 13.—King's University. Loss and cause unknown.

St. Hilaire, Que.—October 17.—St. Antoine R.C. church. Loss and cause unknown.

Wakaw, Sask.—October 7.—Wakaw Horse Exchange Loss and cause unknown.

Gleichen, Alta.—Mr. F. Arrison's residence. Loss and cause unknown. One death.

Redcliffe, Alta.—October 13.—Mr. J. Q. Landis' barns, etc. Loss, $5,000. Cause, sparks.

Bonsanquet, Ont.—October 16.—Mr. F. Dew's barn, 14th concession. Loss and cause unknown.

Brampton, Ont.—October 17.—Mr. W. Graham's farm, north of Brampton. Loss and cause unknown.

Meaford, Ont.—October 16.—Mr. G. E. Lowe's residence, Bridge Street. Loss and cause unknown.

Smith's Falls, Ont.—October 21.—Mr. F. Walker's residence, McCann Street. Loss and cause unknown.

Prince Albert, Sask.—Rev. E. N. Hadley's residence, 18th Street. Loss unknown. Cause, supposed sparks.

Sarnia, Ont.—October 20.—Public School, Brock and Devine Streets. Loss, $6,000. Cause, supposed incendiary.

Durham, Ont.—October 13.—Mr. H. Boyce's residence, Bentinck baseline. Loss unknown. Cause, defective chimney.

Victoria, B.C.—October 14.—Weller Bros.' premises, Broughton and Government Streets. Loss slight. Cause, spark from fuse of elevator.

Edmonton, Alta.—October 15.—Mr. J. Shugar's store, 448 Jaspar Avenue East. Loss unknown. Cause, overheated chimney.

Paint Court Village, Ont.—October 16.—Mr. D. D. Gagner's hotel and Messrs. Gagners' stores. Loss and cause unknown.

New Liskeard, Ont.—October 21.—Mr. W. Maglading's hardware store. Loss, $10,000; fully insured. Ross & Wright, Toronto, adjusters for the assured.

Kingston, Ont.—October 18.—Mr. H. Wood's jewellery store. Loss, building, $500; contents, $100. Messrs. Scott & Ryan, electricians. Loss, contents, $717. Cause, wiring Dominion Penitentiary. Portsmouth laundry. Loss, $15,000. Cause unknown.

Vancouver, B.C.—October 14.—Messrs. Wray & McKee's clothing store, Hastings Street. Loss, $300. Cause unknown.

October 15.—813 Seymour Street. Loss, $200. Cause, overheated stove.

Montreal, Que.—October 15.—1154-1178 Cadieux Street damaged. Loss unknown. Cause, chidren playing with matches. 11 St. Alexander Street. Loss unknown. Cause, man smoking in bed.

October 16.—Convent of Sisters of St. Anne. Loss, $80,0000. Cause unknown.

New Westminster, B.C.—October 11.—Jing Tia's lodging-house, McInnis and Carnarvon Avenue. Cause, chimney fire.

October 7.—Mr. E. J. Trader's tug boat, 403 Berst Lane. Loss, $250. Cause, caught from boiler.

October 10.—Mr. W. J. Kerr's premises. Loss, $15; fully insured. Cause, hot ashes.

Saskatoon, Sask.—October 13.—King's confectionery store, Twentieth Street East. Loss unknown. Cause unknown. Flanagan Hotel. Loss, $25. Cause, gasoline.

October 14.—Mr. J. Charlebois' residence, 1703 23rd Street. Loss, $3,000. Cause, supposed defective flues. Mr. Hill's garage, 1122 Spadina Crescent. Loss and cause unknown.

Saint John, N.B.—October 14.—Schofield Paper Company's warehouse. Loss unknown. Building insured for $5,000, distributed with the Springfield, Rochester German, Atlantic Mutual, Liverpool, Manitoba and Commercial Union. Messrs. Schofield had also $1,500 on their stock and $1,000 on their horses. The stock of the McClary Company was insured for $14,000 with several companies, including the Liverpool and Manchester, and the British American.

October 16.—Mr. A. Logan's residence, Chesley Street. Loss unknown. Cause, defective chimney.

Brantford, Ont.—October 19.—Messrs. Thornton's, Limited, leather factory. Loss, $80.000. Cause suspected incendiarism. Insurance on stock, $68,000, as follows: Northern, $13,000; London and Lancashire, $12.500; Yorkshire, $6,000; Scottish Union and National, $4,000; British America, $5,000; Home, $5,000; Hartford. $5,000; Aetna, $5,000; Palatine, $5,000; Royal, $5,000; Nova Scotia, $2,500. On buildings, $8,000, as follows: North British and Mercantile, $2,000; Western, $4,000; Fidelity Phœnix, $2,000. On machinery: Queen City, $2,000. On furniture and fixtures: Palatine, $1,000. Ross and Wright, adjusters for the assured.

Toronto, Ont.—October 15.—Scholey Bros.' planing mill. Loss, $7,000. Cause unknown. Mr. D. Farquarson's residence, Earlscourt Avenue. Loss, $880. Cause, overturned lamp.

October 16.—Mrs. M. Mason's residence, 295 Russell Hill Road. Loss, $50. Cause, defective grate. 514 Adelaide Street West. Loss, $40. Cause unknown. Mr. J. J. Ganong's residence, Glen Road. Loss, $100. Cause unknown.

October 17.—49 and 51 River Street. Loss to former, $175, and latter, $430. Cause unknown.

October 18.—Gregory Apartments, 216 Close Avenue. Loss, $50. Cause unknown. Mr. W. H. Black's stables, rear 260 Queen Street West. Loss, $50. Cause unknown.

October 19.—Mr. R. L. McAlphie's residence, 338 Sunnyside Avenue. Loss, $200. Cause unknown. Mr. Rathbun's garage, 466 Bathurst Street. Loss, $200. Cause unknown.

◆

UNITED STATES SEPTEMBER FIRE LOSS

The fire loss of the United States and Canada for September, 1913, as compiled by the New York Journal of Commerce, shows a total of $17,919,300. These figures show an increase of more than $4,000,000 over the record for September of last year and $6,500,000 over the same month of 1911.

The following table gives a comparison of the losses by fire during the first nine months of this year, together with the same time in 1912:—

	1912.	1913.
January	$35,653,150	$20,193,250
February	28,901,650	22,084,600
March	16,650,850	17,511,000
April	16,349,400	16,738,250
May	21,013,950	17,225,850
June	16,103,450	24,942,700
July	15,219,100	20,060,900
August	14,158,800	21,180,700
September	13,779,300	17,919,300
	$177,429,650	$178,456,550

Canada's September fire loss amounted to $1,468,324, and the total for the year, according to *The Monetary Times'* fire record, was $21,408,260.

◆

THE MOLSONS BANK REPORT

Despite the financial stringency, The Molsons Bank shows that the profits for the fiscal year ended September 30th were $9,577 more than those of the preceding year, being equal to 17.36 per cent. on the paid-up capital, against 17.10 per cent. in 1912.

The profit and loss account compares with that of the previous year as follows:—

	1912.	1913.
Net profits	$684,779	$694,356
Last balance	119,306	161,828
	$804,085	$856,185
Dividends	440,000	440,000
Branch premises	66,515	47,269
Taxes	23,241	24,983
Pension fund	10,000	10,000
McGill fund	2,500	....
Reserves	100,000	100,000
Res. current loans	....	52,000
Res. depreciation	....	100,000
Balance	161,828	81,932

"Owing to the satisfactory condition of trade throughout Canada," said Mr. William Molson MacPherson, the president, in his address to the shareholders, "and the excellent harvest which has been bountifully given to us, I may say that the bank's year has resulted in a gratifying way, and with judicious management for the future we are likely to see a continuance of prosperity. As the same time I would still urge caution in all business transactions."

Mr. MacPherson's remarks also dealt with the new bank act, which, he believed, would prove a satisfactory measure, and the new United States tariff, which, he believed, would prove of advantage to Canada through offering an additional market for Canadian farm produce, as well as some of our manufactures. A change in the date of the annual meeting of the bank from the third Monday in October to the first Monday in November, and the election of auditors in accordance with the requirements of the new bank act were the chief features of the new business of the meeting.

The change in the date of the annual meeting is made to give the auditors sufficient time to complete their work. The auditors elected, the first to be elected by any bank under the new act, are Messrs. George Creak, Lemuel Cushing and C. A. Hodgson.

CANADA'S RICH PACIFIC PROVINCE

Trade of British Columbia is Varied and Valuable—Railway Developments

The trade of British Columbia is the largest in the world per head of population. In 1904 the imports amounted to $12,079,088, and the exports totalled $16,536,328. For the fiscal year ended March 31st, 1912, the imports were $49,346,161 and the exports $20,272,840, an increase in the total trade of the province in eight years of $41,002,584. The leading articles of export are fish, coal, gold, silver, copper, lead, timber, masts and spars, furs and skins, fish-oil, hops and fruit. A large portion of the salmon, canned and pickled, goes to Great Britain, Germany, Eastern Canada, the United States, Hawaiian Islands, Australia and Japan; the United States consumes a large share of the exported coal, and immense quantities of lumber are shipped to Great Britain, South Africa, Japan, China, India, Australia, Mexico and South America.

The valuable furs—seal, sea-otter and other peltries—are sent to Great Britain and the United States. China also buys a considerable amount of fish and furs. Valuable shipments of fish-oil, principally obtained from dog-fish, are consigned to the United States and Hawaii. A large interprovincial trade with Alberta, Saskatchewan, Manitoba and the eastern provinces is rapidly developing, the fruit grown in British Columbia being largely shipped to the prairie provinces, where it finds a good market. Whaling, a new industry, makes an important item in the export trade.

Trade is Rapidly Increasing

With the shipping facilities offered by the Canadian Pacific Railway and its magnificent fleet of steamships running to Japan, China, New Zealand, Australia and Hawaii, and several British and foreign lines making regular trips to her ports, backed by her natural advantages of climate and geographical position, British Columbia's already large trade is rapidly increasing.

The number and tonnage of vessels entered and cleared at British Columbia ports in 1912 was as follows:—

	Number of Vessels inward.	Tonnage.
From the sea	4,933	4,584,740
Coasting trade	27,265	10,037,904
Total	32,198	14,611,644
	Number of Vessels outward.	**Tonnage.**
For the sea	[illegible]	4,560,332
Coasting trade	27,626	10,380,719
Total	32,563	14,941,051

Canadian Pacific Connections.

The Canadian Pacific is the principal railway in the province. It has two main lines, the Canadian Pacific Railway and the Crowsnest Pass Railway, and several branches; also steamboat connections on the inland lakes, besides its large fleet of ocean-going and coasting steamers. The railway mileage of the province is 2,250 miles, with nearly 3,000 miles under construction.

The Canadian Pacific Railway coast service employs a large fleet of steamers, many of them model ships of their class, which ply between coast points, from Victoria, Vancouver, Seattle, Nanaimo and Ladysmith, to northern British Columbia and Alaskan ports. The Empress liners, world-famed for their speed, comfort and safety, make regular trips from British Columbia ports to Japan and China, while the Canadian-Australian liners give splendid service to Hawaii, Fiji, New Zealand and Australia.

The Canadian Pacific Railway Company operates the Esquimalt-Nanaimo Railway, running from Victoria to Alberni, on Vancouver Island, a distance of 134 miles. Extensions of the Esquimalt and Nanaimo Railway are now being built to Cowichan Lake and Comox.

Served by Several Railways.

The Great Northern Railway maintains connections with its main line in the United States over branches running to Vancouver, Grand Forks, Rossland, Nelson and Elko, and by ferry to Victoria.

The Grand Trunk Pacific, which will traverse Canada from Prince Rupert, B.C., to Moncton, N.B., has completed the first section of the western division, from Prince Rupert eastward for 181 miles, and is operating regular trains for that distance. Work is also progressing from Tete Jaune Cache westward towards Fort George. It is expected that the road will be completed in 1914. The British Columbia division of the Grand Trunk Pacific will open to settlement a vast area rich in timber, minerals (including coal), agricultural and grazing lands.

The Grand Trunk Pacific Railway Company has two steamships, the "Prince Rupert" and "Prince George," in the coast service between Vancouver, Victoria, Seattle and Prince Rupert. These steamboats are among the fastest, most commodious and luxurious vessels on the Pacific. The company also operates several smaller steamers in the coasting trade.

The Kettle River Valley Railway Company is under contract to build from Midway to Nicola, via Penticton, 150 miles, which will furnish direct communication between the boundary district and the coast cities, the line to be completed by 1914.

The Canadian Northern Railway Company has a contract with the government of British Columbia to construct a railway, to be known as the Canadian Northern Pacific, from the boundary of the province at Yellowhead Pass, following the Thompson and Fraser River valleys to Vancouver and connecting by ferry with Victoria, across Vancouver Island to Alberni; thence to a point on Seymour Narrows on the east coast and to Nootka Sound on the west coast. This will give the province another transcontinental connection. The company is now building both on the mainland and island.

The Pacific Great Eastern Railway has begun building a line from Newport, at the head of Howe Sound, to Fort George, where it will connect with the Grand Trunk Pacific.

Mr. F. I. Clarke, secretary of the bureau of provincial information, has valuable information on file for prospective investors and settlers in British Columbia.

◆

CANADIAN PACIFIC RAILWAY, WORLD BAROMETER

A New York despatch says: "A downward swing of 10 points is not much of a performance for Canadian Pacific at any time, but this month's decline has attracted attention because it has coincided with the growth of a belief in some circles in Wall Street that the foreign situation was much worse even than it has been painted. If the latest rumors of the character of the selling which brought about this fall in Canadian Pacific are true, the reputation that the stock enjoys in some quarters of being a correct barometer of financial conditions abroad will suffer. Houses with foreign connections have been advised that the drop in the stock has been the result of a bear campaign on the part of a group of operators known in London and on the Continent as the 'Liverpool syndicate.' The 'Liverpool syndicate' is said to be composed of a powerful clique of very rich and daring speculators, who have been very successful at times, but who have made their mistakes, like all stock gamblers. On this particular occasion this group is said to have begun selling Canadian Pacific around 234, and to have put out something like 40,000 shares. A supplementary rumor has it that one of the big Canadian banks has been calling loans recently in order to close out some big Montreal speculators, and this incident is supposed to have some connection with the present decline in Canadian Pacific."

◆

NEW INDUSTRIES AT THE HAT

Several carloads of steel have arrived at Medicine Hat for the building of the Saskatchewan Bridge and Iron Company, Limited. Anything less than a ton in weight will be freighted to the factory site, so that the erectors can be at work getting the steel frame up before cold weather arrives. In the meantime, the grading of the railway spur to the site has been completed, the steel is all on hand, and ties are arriving, so that no time will be lost in completing the line. The new gas well at this West industrial site has been completed, and the company expects to build about 40 homes there for its employees.

The Ogilvie Flour Mills Company, Limited, which started grinding in its new mill on July 25th, found it necessary to put on another shift of men, and the mill is now running at the full initial capacity of 2,000 barrels every twenty-four hours. In addition to the local and district demand, which Manager Armstrong states has been satisfactory, this mill has large orders on hand for England and the Orient. For the latter a shipment of 7,500 sacks, sent out a short time ago, is being followed by another of 15,000 sacks, the first car of the latter order having been shipped this week to Hong Kong, China.

One feature is the facility with which the offal, such as bran, shorts, etc., has been disposed of. Very often this is a problem with flour mills, but in this case the mill has not been able to keep pace with the orders. This indicates, in some degree, how the farmers are turning more and more to diversified farming and stock-raising.

Surveys have been made and the spur track located for the new brewery, the early building of which will soon commence. Mr. C. V. Drazan, the manager, expects to have it under cover before severe weather arrives, so as to get the machinery and equipment housed and be ready for business in the spring.

SMALLER CITIES GET INDUSTRIAL COMPANIES

Western Provinces Contribute Fifty Per Cent. of These Corporations

New incorporations number sixty-four, the head offices of these companies are located in seven provinces. The total capitalization amounts to $12,620,500. The largest companies being as follows:—

Quebec Development Company, Limited, Montreal, Quebec	$2,500,000
The Valleyfield Water Power Company, Limited, Salaberry de Valleyfield, Quebec	1,000,000
The First Canadian Estates, Limited, Winnipeg, Man.	1,000,000
Dominion Investment and Securities Company, Limited, Winnipeg, Man.	1,000,000
Canadian Rand Goldfields, Limited, Toronto, Ont.	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province	No. of Companies.	Capitalization.
Prince Edward Island	3	$ 293,000
Alberta	1	500,000
Ontario	22	3,503,500
Manitoba	12	3,250,000
British Columbia	11	485,000
Saskatchewan	8	650,000
Quebec	7	3,939,000
	64	$12,620,500

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Fernie, B.C.—Roarin' Game, Limited, $10,000.

Victoria, B.C.—Sturgess and Company, Limited, $100,000.

Bounty, Sask.—The Gordon Kelly Company, Limited, $20,000.

Mortlach, Sask.—The Wheatlands Mercantile Company, Limited, $40,000.

Aneroid, Sask.—Aneroid Co-Operative Supply Company, Limited, $20,000.

Nelson, B.C.—Independent Printing and Publishing Company, Limited, $30,000.

Fort Qu'Appelle, Sask.—The Fort Qu'Appelle Boatbuilders and Manufacturers, Limited, $25,000.

Galt, Ont.—The Galt Co-Operative Society, Limited, $10,000. A. C. Lamb, W. J. Pratt, F. Wilde.

Woodville, Ont.—Woodville Hotel Company, Limited, $4,500. M. J. Stoddart, D. McLachlan, A. Good.

Brockville, Ont.—The Brockville Arena Company, Limited, $25,000. F. Craig, A. M. Patterson, G. Ross.

Windsor, Ont.—Peninsular Chemical Company, Limited, $40,000. W. Lucking, H .W. Hanlon, H. Van Auken.

Brandon, Man.—The Patmore Nursery Company, Limited, $200,000. H. L. Patmore, F. Nelson, A. F. Barker.

Gananoque, Ont.—The W. J. Gibson Harness Company, Limited, $99,000. W. J. Gibson, C. A. Gibson, L. P. Wood.

Hamilton, Ont.—Hamilton-Buffalo Real Estate Company, Limited, $200,000. L. Mitchell, R. L. Smith, J. G. Morrow.

London, Ont.—The Cox Manufacturing Company, Limited, $50,000. W. P. Stephenson, F. L. Willgoose, C. Lambert.

Canadian Vitaphone Company, Limited, $250,000. H. N. McMenimen, W. Thorpe, W. R. Wadsworth. Port Weller Land Company, Limited, $40,000. W. R. Wadsworth, D. R. Leask, I. Rouse. Clovelly Park, Limited, $150,000. L. F. Black, G. D. Waters, H. A. Hall. Crescent Realty Company, Limited, $40,000. J. J. Gray, G. H. Gray, W. R. Willard. Glen Grant, Limited, $200,000. L. F. Black, G. D. Waters, H. A. Hall. Insurers' Alliace, Limited, $100,000. J. MacIntosh Duff, E. Harris, Sr., J. Parker. The Atlantic Coast Steamship Company, Limited, $500,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock.

DEFECTS IN CONSTRUCTION ADD TO FIRE LOSS

"We have had lessons from recent fires by which Saskatoon city council has failed to profit," commented Mr. Herbert J. Payton, architect, of Saskatoon, in an interview. In a number of buildings the space between the ceiling and the roof spreads over the entire building and is not partitioned off at all.

"This was the case in the Cairns building fire. When the flames ate through the ceiling they spread in all directions under the roof, and the firemen did not know what to do as they were faced with fire bursting out everywhere. The same thing occurred in the recent cafe fire. There was a space between the ceiling and the top of the roof and the flames spread in all directions.

"Steps should be taken to force people, putting up buildings, to divide off these spaces. This would prevent the fire from spreading under the entire roof. It could be done cheaply enough by putting in a four-inch brick wall between the roof and the ceiling wherever there was a steel beam or other support.

"The cost would be trifling, and, while people do not realize it, it would soon be more than made up by the reduction in the cost of their insurance.

"While the matter is before the public some pressure should be made upon the council to secure a provision in the building by-laws."

NATIONAL AGENCY IN LIQUIDATION

Alleging that the National Agency Company, Limited, was insolvent, Mr. John Kuhl, a shareholder, has obtained an order for the winding up of the company. Mr. G. T. Clarkson was appointed interim liquidator, with a reference to George Kappele, K.C., official referee.

These proceedings are the sequel to the liquidation ot the Union Life Assurance Company's affairs. Mr. Kuhl, who is the holder of 1,500 shares in the company, stated in his petition that he had good reason to believe the company had a deficit of $1;392,642.09; that it had not paid, and could not, the interest due on debentures in July last; that the principal assets of the company consisted of stock of the Union Life Company, which, according to the report ot Liquidator Clarkson, were valueless. He further alleged that all the so-called assets of the company were worthless, and requested that an investigation of the affairs of the company be instigated.

The National Agency Company was incorporated in 1901 to act as managing agent for any insurance company registered in Ontario. Its nominal capital was $750,000, of which 4,732 shares were to have been subscribed for and allotted. The amount said to have been paid up was $456,550.66. The directors, according to the last return made in 1912 to the Provincial Secretary's department were: H. Symonds, K.C., president; F. D. Hughes, L.D.S., vice-president; H. Pollman Evans, W. J. Gilpin, G. E. Allen, James J. McGowan, George E. Millichamp and E. G. Smith.

Mr. Kuhl also stated that he had been unable to ascertain where the business office of the company was now located, and he believed no proper care was being taken ot the assets of the company.

◆

CO-INSURANCE CLAUSE EXPLAINED

A clause which it is important that an insured person should understand is the Co-insurance clause which usually reads:—

"It is a part of the consideration of this policy and the basis on which the rate of premium is fixed that the assured shall maintain insurance concurrent in form with this policy on the property hereby insured, to the extent of at least per cent. (per cent.) of the actual cash value thereof, and that, failing so to do, the insured shall be a co-insurer to the extent of an amount sufficient to make the aggregate insurance equal to per cent. of the actual cash value of the property hereby insured, and, in that capacity, shall bear their proportion of any loss that may occur."

Messrs. Irish and Maulson, Limited, insurance brokers of Toronto and Montreal, elucidate this clause by the following illustrations:—

The clause operates only in event of a partial loss amounting to less than the percentage mentioned in the clause.

Example.

Sound value of property	$1,000
Insurance	700
Loss	400
Insurance should have been	800
Company pays 700/800ths of loss	350
Assured contributes 100/800ths	50

and therefore loses $50.

N.B.—For purpose of illustration the percentage of 80 is taken, but, of course, the percentage stated in the clause governs.

This clause is not operative when:—

1. The property is wholly destroyed.

Example.

Sound value of property	$1,000
Insurance	700
Loss	1,000
Company pays	700

2. Where the damage exceeds the amount of percentage mentioned in the clause.

Example.

Sound value	$1,000
Insurance	700
Loss	801
Company pays	700

◆

It might be well if both parties in Canada ceased to make a virtue of their ability to borrow and paid more attention to the subject of economizing. This warning has been sounded for a year or more by Canadian banks, and is re-echoed just now by financial authorities in England who wish us well, and for that reason are afraid that we have been travelling a little too fast and should slow up, if only for a breathing spell.—Montreal Gazette.

LOOKING FOR AN INVESTMENT

A reader writes *The Monetary Times*, stating his desire to become associated with a first-class financial house handling either stocks or bonds, as a branch manager or assistant manager at the head office. He would be willing to invest money in the business.

◆

WILL DO BUSINESS IN BRITISH COLUMBIA

The following extra-provincial companies have been licensed to do business in British Columbia:—

Eastern and Pacific Land Company, Limited, $500,000. Head office, Victoria, B.C. Kildare Mines, Limited, $1,000,000. Head office, Vancouver, B.C. Union Meat Company, $1,250,000. Head office, Vancouver, B.C. Revillion Wholesale, Limited, $1,000,000. Head office, Vancouver, B.C. Anglo-Colonial Estates, Limited, £10,000. Victoria, B.C. Richard Haworth & Company, Limited, £550,000. Vancouver, B.C. North-Western Novelty Company, Limited, $20,000. Vancouver, B.C. John Millen & Son and Urquhart, Limited, $100,000. Vancouver, B.C. E. T. Wright & Company, Inc., $250,000. Victoria, B.C. West Disinfecting Company, $250,000. Vancouver, B.C. Union Gas Engine Company, $600,000. Vancouver, B.C.

MANY ONTARIO COMPANIES INCREASED CAPITAL

The following Ontario companies increased their capital last year. The word limited and the dollar mark are omitted in each case:—

Adams Wagon Company, from $250,000 to $1,000,000; Algoma Produce Company, 50,000, 250,000; Algoma Steel Corporation, 1,000,000, 30,000,000; Battle Creek Toasted Corn Flake Company, 100,000, 250,000; Bartram Brothers, 20,000, 50,000; Brigdens, 100,000, 250,000; Brown Boggs Company, 150,000, 500,000; Bowmanville Foundry Company, 40,000, 100,000.

Canadian Talc and Silica Company, 100,000, 150,000; Cosgrave Brewery Company of Toronto, 200,000, 300,000; Canada Malleable and Steel Range Manufacturing Company, 50,000, 250,000; Canadian National Horse Show Association, 2,000, 3,000; Chipman-Holton Knitting Company, 150,000, 500,000; Dominion Stamping Company, 100,000, 250,000; Dieckerhoff, Raffloer & Company of Canada, 80,000, 160,000; Diamond Flint Glass Company, 3,500,000, 4,000,000.

Etobicoke Land Company, 100,000, 250,000; Fitzsimmons Fruit Company, 40,000, 100,000; Fort William Coal Dock Company, 200,000, 500,000; Goold Shapley and Muir Company of Brantford, 275,000, 1,000,000; Georgian Bay Shook Mills, 80,000, 250,000.

Hough Lithographing Company, 42,000, 150,000; Hees, Geo. H., Son, & Company, 600,000, 800,000; Holtby Bros., 40,000, 100,000; Hamilton Lock and Hardware Manufacturing Company, 100,000, 200,000; Ham and Nott Company, 200,000, 800,000; Halliday, F. G., 40,000, 100,000.

Imperial Cocoa and Spice Company, 30,000, 40,000; Journal Printing Company of Ottawa, 50,000, 100,000; Kindey Bed Company, 40,000, 100,000; R. Laidlaw Lumber Company, 300,000, 1,000,000; J. M. Lowes Company of Toronto, 20,000, 100,000; Lanark and Carleton Counties Telephone Company, 5,000, 20,000; Lowe Brothers, 100,000, 150,000.

Malcolm & Souter Furniture Company, 75,000, 150,000; McLean, J. B., Publishing Company of Toronto, 3,000, 1,000,000; Monarch Realty and Securities Corporation, 100,000, 1,000,000; Metals-Chemical Company, 200,000, 1,000,000; Mooney Biscuit and Candy Company, 250,000, 1,000,000.

Ontario Financial Company, 40,000, 80,000; Oliver, Reid & Company, 40,000, 100,000; O'Keefe Brewery Company of Toronto, 600,000, 2,000,000; Preston Car and Coach Company, 200,000, 500,000; Robinson Bros. Cork Company, 200,000, 500,000; Robson Leather Company, 200,000, 750,000; Russell Motor Car Company, 1,600,000, 2,000,000; Rideau Canal Supply Company, 100,000, 200.000.

Smith's Falls Electric Power Company, 60,000, 100,000; Sudbury Brick Company, 20,000, 50,000; Sudbury Construction and Machinery Company, 40,000, 100.000; Shevlin-Clarke Company, 200,000, 1.200,000; St. Lawrence Paper Mills Company, 1,000,000, 2.000,000; Robert Simpson Company, 2,500,000, 15,000,000; Sault Ste. Marie Skating Rink and Athletic Company, 20,000, 50.000; Smallman & Ingram, 500,000, 1,000,000; Spanish River Pulp and Paper Mills, 4,000,000, 7,000,000; Sault Ste. Marie Coal and Wood Company, 40.000, 100,000; Sault Ste. Marie Dry Dock and Ship Building Company, 1,000,000, 1,200,000.

Urban and Rural Telephone Company, 4.000, 8,000; Union Realty Company, 50,000, 110,000; United Fuel Supply Company, 500,000, 1,350,000; Volcanic Oil and Gas Company, 500.000, 1,500,000; Western Canada Securities Company, 100,000, 700,000; Wealthy Mines, 1,000,000, 3,000,000; Weston Brick Company, 100,000, 300.000.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

VILLAGE OF PORT STANLEY, ONT.

Tenders addressed to the undersigned will be received up to **November 3rd, 1913,** for the purchase of $10,000 thirty-year Debentures, bearing 6 per cent. interest, payable in annual instalments of principal and interest. Full particulars on application. The highest or any tender not necessarily accepted.

JAMES GOUGH,
Clerk and Treasurer,
Port Stanley, Ont.

Port Stanley, Oct. 15th, 1913.

TOWN OF SOURIS

ELECTRIC LIGHT DEBENTURES FOR SALE

Sealed Tenders addressed to the undersigned will be received up to **6 o'clock p.m., November 10th, 1913,** for the purchase of $40,000 30-year Debentures, with coupons attached, dated December 1st, 1913, A.D., bearing 6½ per cent. interest, payable in annual instalments of principal and interest.

The highest or any tender not necessarily accepted.

J. W. BREAKEY,
Secretary-Treasurer,
Souris, Man.

DEBENTURES FOR SALE

Sealed Tenders addressed to the undersigned will be received until noon on **Thursday, November 13th, 1913,** for the purchase of $26,000 City of Prince Albert Protestant Public School debentures, and bearing interest at 6 per cent. per annum. Principal and interest payable in thirty equal consecutive annual instalments. First instalment, December 1st, 1914.

G. A. BROWN,
Secretary-Treasurer.

Prince Albert, Sask.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

FOR SALE—Old-established and well-known Canadian engineering company doing large business from coast to coast—an excellent opportunity for investors or for anyone wishing to extend operations in Canada by taking over a going concern, with complete plant, staff and extensive connections. All communications strictly confidential. Address Box 261, *The Monetary Times*, Toronto.

FIRE INSURANCE INSPECTOR WANTED.—Old-established Company is open to appoint an active young man as Inspector for Ontario. One with knowledge of risks and rates preferred. Apply, stating age, experience and salary expected to Box 265, *The Monetary Times*, Toronto.

WANTED.—To purchase insurance agency in Montreal. We are open to purchase the business and goodwill of an established Fire and Casualty Insurance Agency in Montreal. Will consider continuing the present owner as manager if so desired. Address, Box 263, *The Monetary Times*, Montreal.

MONTREAL TRAMWAYS COMPANY IS STIRRING

Monetary Times Office,
Montreal, Oct. 22nd.

In certain Montreal quarters the attack upon the intentions of the Tramways Company and its methods of operation persists, and the public is being warned of further inroads contemplated by the company. It is declared that the company proposes to obtain at Quebec, this season, a franchise covering the whole Island of Montreal for a long term of years. It is stated that the Tramways Company will not take the matter up with the city at all, but that Premier Gouin will be called upon in this connection.

No definite statements are being made, however, and the Tramways Company goes ahead and says nothing. Meantime, the company is giving a better service than before it obtained the new streets and routes, although there still is overcrowding at the busy hours. The company appears to be doing its best to make up for lost time, if one may judge by the feverish tearing up of streets and laying of new tracks which are in progress. The company also promises the expenditure of a large amount of money during the coming season on the construction of new cars and the improvements of facilities generally.

It is assumed that the company will require some return from the city for all this expenditure, and that the city will meet it in this respect. The whole subject is being studied by the engineering department of the city, but it is intimated at the city hall that it will be some time yet before any definite proposals will be made.

TORONTO INSURANCE INSTITUTE

The Insurance Institute, of Toronto, has commenced its fifteenth year of activities. At the opening meeting Mr. G. P. Payne, president, delivered his inaugural address, and the large number of members present heard also an excellent address by Dr. J. L. Hughes on Modern Tendencies in Education.

NEW BRUNSWICK GOVERNMENT BONDS

As provincial secretary, Hon. H. F. McLeod handles the finances of New Brunswick, and in a Montreal interview, he quoted Sir Frederick Taylor, manager of the Bank of Montreal in London, as saying that the eastern provinces of the Dominion have nothing to fear from their securities on the British money market, their conservative methods being much appreciated. The province of New Brunswick has a debt of about $4,000,000, and, although the same operation could not be repeated to-day, owing to the general financial conditions of the world, the provincial secretary said that their four per cents. sold at 102.

He had been offered 98, but had declined, as they were not in pressing need of money at the present time. Later on they would have to secure another loan, but as the financial condition of the province is in excellent shape, and the resources unquestioned, there was no apprehension whatever as to the future of the province.

DEMAND FOR QUALIFIED FIRE INSURANCE MEN

Having in mind the strides in development of the agricultural, industrial and financial interests in our Dominion, it would hardly seem to be necessary to urge upon our young men the advisability of thoroughly equipping themselves for the responsibilities and opportunities which are opening up before them. In all branches of business there is a demand for men who are qualified, and the man who has specialized in his own particular line of work is bound to obtain recognition. Owing to the large number of companies coming into Canada and the tremendous increase of population in our Great North-West, there has been a great demand for qualified fire insurance men. This demand is not by any means satisfied. From the office of the Canadian Fire Underwriters' Association alone, we have had a number of men go to important positions with largely increased salaries. Those who, by making the most of their opportunities, by studying the principles of the business in which they are engaged and developing their abilities, both mental and physical, will be those who will achieve the greatest success. The opportunities for gaining knowledge are greater to-day than ever before, and, while it may be said that success is harder to attain than in the past, there never was a time, in this country at least, where the chances for success in all lines of effort were as great as they are now.—Mr. G. P. Payne at Toronto Insurance Institute.

INDUSTRY IN NORTHERN ONTARIO

The townships of Kendry and Haggart, situated on the Transcontinental Railway, thirty miles west of Cochrane, Northern Ontario, containing about 98,000 acres, were sold in 1912 by the Ontario government at the price of $1 per acre cash to a company, subject to certain terms as to development and settlement. Of this sale, Hon. W. H. Hearst, minister of lands, forests and mines, says:—

"The department, being of opinion that centres of industry affording markets for natural products and creating employment for labor, are important aids in the opening up and settlement of the new country, recommended to the government that these two townships should be sold to a company composed of energetic and wealthy men, but subject to conditions which, while conserving the interests of the public, would become an industrial centre. The development already made is large and important, and fully justifies the expectations formed as to the good results which would be obtained by selling these townships. Over $60,000 has been expended in the erection of buildings, opening of roads, etc. Hotels have been erected, and a large sawmill is in operation—the latter affording a supply of merchantable lumber purchasable by settlers at reasonable prices—the absence of which convenience was one of the greatest drawbacks to the settlement of that country; for, without lumber to erect buildings, progress is very slow, and people are not able to provide homes for their families. Not only is there now a supply of lumber, but the company is purchasing pulp wood and other kinds of timber from the settlers, which enables them to stay on their lands during the winter season instead of being obliged to seek employment away from home."

BANK OF COMMERCE BONUS

With the regular quarterly dividend of 2½ per cent. the directors of the Canadian Bank of Commerce have declared a bonus of 1 per cent., the second extra distribution for the twelve months which will end November 30th, 1913.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 17th, 1913:—

McKinley-Darragh Savage Mines, 65,900; Cobalt Townsite Mines, 76,700; Cobalt Lake Mining Company, 64,090; Nipissing Mines, 131,610; total, 338,200. The total shipments since January 1st are now 31,297,176 pounds, or 15,649 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

CIGARETTES AND FIRES

An Ottawa lumberman, whose firm has suffered rather heavily from fire in the past season, calls attention to a new danger which threatens not only the timber owner, but also the owner of property in towns and cities. This danger is the great increase of the cigarette habit. Our railways are now practically wholly constructed by foreign laborers, who are inveterate cigarette users. The cigarette requires much more constant lighting than the old-fashioned pipe, and the burning matches are thrown carelessly down wherever the man happens to be, with the result that fires get into the slash and from that into the green timber along the line of the railway. An even greater danger arises from the fact that when the man is through with the cigarette he throws the glowing stub down with equal carelessness, and fires start as a result. In towns and cities cigarette smokers throw burning stubs down gratings, over fences or into boxes or barrels. Inflammable material is likely to lie in such places, and thus our fire losses in towns as well as in the forest rise to a proportion that is nothing short of criminal.

NO SENTIMENT IN BUSINESS; MONTREAL BENEFITS

A dispatch from Montreal to Commercial West of Minneapolis, shows that Mr. Marcy, president of the Armour Grain Company, Chicago, thinks a great deal of Montreal as a grain port. "The cost of handling our grain, elevating and all other charges inclusive, from its entrance into the port until it has been safely stowed on board an ocean liner in the harbor, ready for export, works out at six-tenths of 1 cent per bushel, as compared with 2¼ cents, that would be the cost to us in the port of New York," was his statement. He is the president of a company that controls elevators having a combined capacity of 25,000,000 bushels, as well as over 300 stations scattered throughout the grain producing states of the middle west for the purchase and temporary storage of grain for the company.

Mr. Marcy, accompanied by Mr. R. N. Burnap, general freight agent of the Grand Trunk at Chicago, was the guest of the harbor commissioners the other day, who showed him over their elevators and supplied him with information on other matters which he was anxious to obtain.

Mr. Marcy stated that the primary reason for his visit was to endeavor to comprehend how the port authorities could handle grain here at rates so low, and added that only a few years ago Montreal was not on the map, as far as grain men in Chicago were concerned, but now it was regarded as being quite the cheapest port on the North American continent from which to ship grain.

As an illustration of this, Mr. Marcy stated that a differential rate of 2 cents had been made to induce Chicago grain shippers to export their grain by way of New Orleans, and other gulf ports, but the calculations made by the shippers revealed that the differential rate would not be sufficient inducement to outweigh the attractions of Montreal, for the cost of shipping through the gulf ports would be greater, in spite of it.

"Of course," Mr. Marcy observed, "there is no sentiment in the grain business, and, if there was, American grain men would naturally be inclined to import their grain through United States, rather than through Canadian, ports; but the question is simply one of dollars and cents, and, because that is so, we favor Montreal."

MANUFACTURERS AS BORROWERS

How New Bank Act's Clauses Deal With Subject—Borrower's Own Pledge

In view of the protracted discussion of the unregistered pledges or liens, on the security of which manufacturers and wholesale dealers are accustomed to borrow extensively, it will be worth while to take note of the clauses of the new Bank Act dealing particularly with them. The matter is covered by sections 88, 89 and 90, and subsections thereof. For the purposes of this article the discussion will be confined largely to the clauses relating to manufacturers, suggests Mr. H. M. P. Eckardt, in Industrial Canada.

The new act interprets "manufacturer" as follows:—"'Manufacturer' includes manufacturers of logs, timber or lumber, maltsters, distillers, brewers, refiners and producers, of petroleum, tanners, curers, packers, canners of meat, pork, fish, fruit or vegetables, and any person who produces by hand, art, process or mechanical means any goods, wares or merchandise."

This interpretation is identical with the interpretation in the old act, which expired on July 1st, 1913.

Section 88 empowers the bank to lend money to any wholesale purchaser or shipper of or dealer in products of agriculture, the forest, quarry and mine, or the sea, lakes and rivers, or to any wholesale purchaser or shipper of or dealer in live stock or dead stock or the products thereof—on the security of the unregistered lien.

Subsection 4 of the new act corresponds with subsection 2 of the old. The wording of this clause has been altered.

Authority to Lend on Grain.

And subsection 2 contains the newly-granted authority for the bank to lend money to a farmer upon the security of his threshed grain grown upon the farm. Subsection 3 deals particularly with the manufacturer. It reads: "The bank may lend money to any person engaged in business as a wholesale manufacturer of any goods, wares and merchandise, upon the security of the goods, wares and merchandise manufactured by him, or procured for such manufacture." The wording is identical with that of subsection 3 of the old act.

Then subsection 5 of the new act provides that the security hereinbefore referred to may be given by the owner of the goods; and subsection 6 prescribes the form in which the security is to be given. These subsections correspond respectively to subsections 4 and 5 of the old act. In the old act subsection 6 merely stated that the bank, by virtue of such security, should acquire the same rights and powers in respect to the pledged goods as if it had acquired the same by virtue of a warehouse receipt.

Subsection 7 of the present act, which covers this subject, is similarly phrased; but it contains a rider which provides that the wages or salaries of persons employed by the pledger, for a period not exceeding three months, shall be a charge upon the pledged property in priority to the claim of the bank; and the bank is required to pay such wages, salaries, or other remuneration if it takes possession or disposes of the property.

Section 89 and subsections 2 and 3 are practically the same as in the old act. The section itself provides that when the bank has taken security in the aforesaid manner, or by way of a warehouse receipt, on goods which are subsequently manufactured into a different form, it has the same right and title to the manufactured goods, or the goods in process, as it had on the raw material.

Subsection 2 establishes the claim of the bank to the pledged property in preference to the claim of an unpaid vendor, except in case the unpaid vendor had a lien upon the goods at the time the bank acquired its warehouse receipt, bill of lading or pledge. However, even in that case, the clause states that if the bank is without knowledge of such an existing lien its claim would be superior to that of the unpaid vendor possessing the lien.

Subsection 3 prescribes the steps that are to be taken by the bank to safeguard the interest of its debtor if it proceeds to sell the pledged property in order to satisfy its claim. Provision is made for sale by public auction after due notice.

All these clauses, as remarked above, are practically the same as the clauses of the former act.

Also section 90 and subsection 2 are practically unchanged. Section 90 provides that the bank shall not take security in this manner to bolster up or support an old or pre-existing debt. The borrower's own pledge, the warehouse receipt, or the bill of lading, is declared to be invalid in the bank's hands unless the bank loan or advance secured thereby is negotiated or contracted at the time of the acquisition of the security by the bank; or upon the written promise or agreement that the security would be given. And the subsection provides for the conversion of the pledge or the warehouse receipt into a bill of lading if the goods are shipped; for the conversion of a pledge or a bill of lading into a warehouse receipt, and for the exchange of one bill of lading for another.

In the course of the bank act discussion before the banking and commerce committee, Mr. H. C. McLeod stated that he considered the unregistered lien to be more in the interest of the borrower than of the bank. He said if registration was required many applicants for credit would be refused and many business men who now borrow in that way would never apply for the credits.

Mr. Gordon Waldron, in his evidence, was more disposed to dwell upon the possible injury to outside creditors when the bank has a secret lien on the manufacturer's assets. The minister of finance, in seeking Mr. Waldron's views, stated that as he understood it the business done under section 88 was as follows: "A manufacturer obtains his raw material and desires to pay cash for it. He obtains a loan from the bank to make that payment. He gives a lien to the bank on that raw material, and that lien is a continuing lien upon that raw material, transformed into the finished product, and until sold; and then the bank debt is liquidated."

Mr. Waldron insisted that the process was somewhat different. "What takes place," said he, "is that the debtor buys merchandise for the purpose of manufacturing it into goods. He receives from the bank money to pay for it and gives the lien upon it. He manufactures the goods, or partly manufactures them, and renews the lien. The goods disappear and other goods come in; and, in practice, track is lost entirely of the original goods, but the lien is made to cover other goods and all goods that he may have in his possession then or thereafter."

His claim was that the exercise of this banking function tended to unduly stimulate manufacturers and to fix banking assets which ought to be liquid. This witness also enlarged upon the matter of the injury done to outside creditors of the manufacturer in some cases when the bank had a secret lien covering practically everything.

Facilities for Manufacturers.

Mr. Joseph Henderson, vice-president of the Bank of Toronto, explained to the committee the circumstances under which the unregistered liens were added to the banking law. They were introduced at the time the national policy was adopted. "The Government desired to give greater facilities to manufacturers, and the impelling motive that led to these clauses being put into the act was to enable the manufacturers who had to put a great deal of capital into buildings, and who required an additional amount of working capital, to carry on their business; it enabled them to go to the bank and upon the security of their raw material they could obtain an advance to cover the period of the working up of these goods in process of manufacture and distribution." He says the original intention was to keep this confined to large transactions by fairly large manufacturers who had capital; and he thought the practice should not be carried too far.

Sir Edmund Walker also gave an explanation of the working of the lien in connection with manufacturers' accounts. He began by saying that the manufacturers of Canada are well enough off not to need this kind of help now to any great degree. He then took the case of the maker of an article in which wood and steel enter largely, and which is made up and sold to the farmer at a certain season. Quoting from his evidence: "The expense of buying the raw material and paying for the wages goes on from the beginning of the manufacturing season until the moment when the goods are delivered, and even then the bank has to wait, of course, the final payment by the buyer of the article. In the early days when a manufacturer began with a capital of $50,000—and that was quite a large capital then—he might turn out products in one year to the extent of $200,000. And the banks in those days might lend $125,000 or $150,000 to a manufacturer whose capital was only $50,000, on his pledge, when they saw that the money they lent was used in payment of the lumber, the steel, and the wages."

While he thought the clauses are not now so much needed perhaps as in former days, Sir Edmund considered that it would be a great harshness to the small manufacturer who is trying to start in competition with the larger concerns, if through the abolition of these clauses of the Bank Act he was prevented from getting the same kind of help that his competitors once had.

◆

The Furness liner Queen Wilhelmina recently arrived at Montreal from Hamburg with a full cargo of beet-sugar, consigned to the Canada Sugar Refining Company. She is the fifteenth sugar-boat to arrive there this season, though most of the former vessels with sugar as their cargo have come from the West Indies. The next arrival will be that of the direct liner Serrana, which sailed from Barbados for Montreal on October 18th.

DIVIDENDS AND NOTICES

THE MEXICAN LIGHT AND POWER COMPANY, LIMITED

NOTICE IS HEREBY GIVEN that a dividend has been declared of Three and One-half per cent. (3½%), (being at the rate of Seven per cent. (7%) per annum) on the Preference Shares of the Capital Stock of the Mexican Light and Power Company, Limited, for the six months ending October 31st, 1913, payable on the 1st day of November, 1913, to shareholders of record at the close of business on the 11th day of October, 1913.

That the transfer books of the Company for the Preference Shares will be closed from the 13th day of October to the 31st day of October, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; London, England; Mexico City, Mexico; and its Branches.

By order of the Board,
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 27th September, 1913.

The Consumers' Gas Company of Toronto

THE ANNUAL GENERAL MEETING of the Stockholders of the Consumers' Gas Company of Toronto, to receive the Report of the Directors, and for the Election of Directors for the ensuing year, will be held in the Company's Board Room, No. 17 Toronto Street, on Monday, the 27th of October, 1913, at 12 o'clock noon.

ARTHUR HEWITT,
GENERAL MANAGER.

MURRAY-KAY, LIMITED

Notice is hereby given that the regular quarterly dividend of one and three-quarters per cent. (being at the rate of seven per cent. per annum) has this day been declared on the preferred shares of the Company for the quarter ending October 31st, 1913; said dividend to be paid on the **first day of November next** to the shareholders of record at the close of business on the 20th day of October, and that the transfer books of the Company will be closed from the 21st to the 31st day of October, both days inclusive.

By order of the Board.
J. E. FEATHERSTONHAUGH,
Secretary.

Toronto, October 16th, 1913.

CARRIAGE FACTORIES, LIMITED

PREFERRED STOCKHOLDERS' DIVIDEND No. 13

Notice is hereby given that a dividend of 1⅓ per cent. for the quarter ended 15th October, 1913, being at the rate of 7 per cent. per annum, on the paid-up Preferred Stock of this Company, has been declared, and that the same will be paid on the 31st day of October to the Preferred Shareholders of record on the said 15th day of October, 1913.

By order of the Directors.
W. F. HENEY,
Secretary.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next, to Shareholders of record at the close of business on the 15th day of October.

By order of the Board,
E. F. HEBDEN,
General Manager.

Montreal, 26th September, 1913.

MEXICO TRAMWAYS COMPANY.

Notice is hereby given that a dividend of one and three-quarters per cent. (1¾ per cent.) has been declared on the Capital Stock of the Mexico Tramways Company, payable on the 1st day of November, 1913, to shareholders of record at the close of business on the 22nd day of October, 1913:—

That the stock transfer books of the company will be closed from the 23rd day of October to the 31st day of October, 1913, both days inclusive.

Dividend cheques for shareholders will be payable at par at the Canadian Bank of Commerce, Toronto, Canada; New York City, New York; Mexico City, Mexico; London, England, and its branches.

The holders of Bearer Share Warrants on detaching from their Share Warrants coupon No. 18, and lodging such coupon or coupons at the Canadian Bank of Commerce in Toronto, Montreal, New York City, or London, England, on or after the 1st day of November, 1913, will receive in exchange for each coupon the sum of $1.75, representing the amount of the dividend.

By Order of the Board
W. E. DAVIDSON,
Secretary.

Toronto, Canada, 11th October, 1913.

PENMANS, LIMITED

DIVIDEND NOTICE

A quarterly dividend of 1½ per cent. on the Preferred Shares of the capital stock of this Company has been declared payable **November 1st, 1913,** to shareholders of record of October 21st, 1913; also a quarterly dividend of 1 per cent. on the Common Shares of the capital stock of this Company has been declared payable **November 15th, 1913,** to shareholders of record of November 5th, 1913.

By order of the Board.
C. B. ROBINSON,
Secretary-Treasurer.

THE ROYAL BANK OF CANADA

DIVIDEND No. 105

Notice is hereby given that a dividend of three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after **Monday, the 1st day of December next,** to shareholders of record of 15th November.

By order of the Board.
E. L. PEASE,
General Manager.

Montreal, P.Q., October 17th, 1913.

The following companies in Ontario decreased their capital last year: Erie Ice Company, Limited, from $40,000 to $11,505; Fairbanks-Morse Canadian Manufacturing Company, Limited, from $500.000 to $10,000; Thames Valley Garden Land Company, Limited, from $900,000 to $400,700; Light, Heat and Power Company, of Lindsay, Limited, from $300,000 to $150,000; Robins, Limited, from $500,000 to $50,000; Northern Ventures, Limited, from $5.000,000 to $500,000, and Broadview Hotel Company, Limited, from $100,000 to $50,000.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

SHOULD FIX RESPONSIBILITY FOR FIRES

Improvement in Toronto Conditions—Need of Common-sense Methods in Preventive Measures

There is a movement on foot which has been developing for some years in the United States, and is beginning to be felt in Canada, which will probably have very wide-reaching influence on the business of fire insurance. That is the movement for fire prevention, said Mr. G. P. Payne, president of Toronto Insurance Institute, in his inaugural address. At the last meeting of the National Fire Protection Association, held in New York, there were represented some 26 state associations, which are engaged in the work of fire prevention. In Ontario an association for this purpose has been formed, with Mr. John B. Laidlaw, manager of the Norwich Union Fire Insurance Society, as president. The importance of this work, and the need for the active co-operation by all associations of business men, will be apparent when it can be shown that the per capita loss by fire in this country rises to an amount of over $2.50 per annum, while in a number of large foreign countries the per capita loss varies from only 30 cents to 50 cents per annum.

Improvement Shown in Toronto Buildings.

It is rather a curious fact that the public generally do not recognize the real import of our fire waste, but the comparison is so marked, and the figures so enormous, that we must not let pass a single opportunity to bring ourselves and the public generally to a realization of this tremendous waste. Insurance men well know that the losses are not in reality borne by the insurance companies, but are a burden upon the country at large. Destruction by fire is a complete loss, although the public are too often content to know that risks are covered by insurance, and there is necessity of bringing the people to a realizing sense of responsibility in this matter. The public is always complaining that rates are too high, although the remedy for this lies largely in its own hands, and it is quite possible to change high rates to low ones.

The conflagration of April 19th, 1904, in Toronto, has resulted in the erection of a superior type of building and the result has been a lower rate of premium, so much so that almost all new warehouses and factories, of any importance, are now built of fireproof or slow burning construction. Many are equipped with sprinkler installations, which tend to further reduce the rates. In doing this they are also reducing the general fire hazard, as sprinklered risks and fireproof buildings are splendid fire stops.

The loss of life from fires in this country is also large and although we have not had any very great loss of life such as that of the Triangle Waist Factory in New York, where 147 workers, mostly girls, lost their lives, the possibility of such an occurrence is painfully apparent in a number of our factories.

Modern Needs are Shown.

They who see this menace must work together to prevent these great losses. If conflagrations are to be prevented, there must be fire resistive or slow burning construction, so that our fire departments may confine the fire to the building in which it starts. Inflammable roofs and superstructures breeds conflagrations from flying sparks and embers. Unprotected window openings allow the spread of fires from building to building. Frame sheds and additions in the rear of otherwise fairly good fire-resistive buildings carry the fire from one building to another. Good internal protection such as is afforded by automatic sprinklers is perhaps the best method of confining a fire to the building in which it originates, but where this cannot be attained, protected vertical openings, fire extinguishers, inside standpipe and hose (of a size to be easily handled by an ordinary individual), and fire pails, which are readily accessible, will frequently control a fire in its incipiency, which otherwise might prove serious and even result in a conflagration.

There is just one way by which the appalling loss of life and property by fire can be put a stop to, and that is by educating public opinion so that we can look upon this unnecessary loss as we do on manslaughter and stealing, as a crime rather than a misfortune. Until this is done it would appear that no real progress can be made. The man who has a fire, instead of being looked upon as an unfortunate, will be regarded as a public offender.

Many Fires Caused by Incendiaries.

Under the laws of France a man is responsible to his neighbors for a fire originating in his buildings, which damages the neighbors' property. The landlord is responsible to his tenant if it can be shown that the accident was occasioned by some defect in the building, or neglect of its proper upkeep. On the other hand, the tenant is responsible to the landlord, not only for the damage done, but also for the loss of rent, not only his own rent, but that of other tenants. It is not probable that such a law could be enacted in this country, but it would appear that some method that would fix the responsibility for fire is required.

An educative and publicity campaign is now being actively pressed throughout the most of the states and no doubt our own fire prevention association is preparing to take steps along the same lines. Boards of trade and business mens' associations generally are being addressed by able speakers, and a most comprehensive work of public education on the fire waste is being made. In addition to such a campaign in the province an important consideration is the matter of incendiarism. There is no doubt that hundreds of fires result from this, but how few of them are traced to this origin, and what small percentage of the criminals have been arrested. This is a matter for the provincial government to take in hand and I understand that something is now being done towards having a fire commissioner for Ontario. In Manitoba there has been a fire marshal for some years with a gratifying decrease in fire losses generally throughout the province.

BRAZILIAN SECURITIES SUFFER

The security selling and depression which have come as a result at bottom of the Balkan wars have centred around a group of Brazilian securities, says a cable to the New York Annalist. The trouble is that a bull account in them had been built up during a period of several years of exceptional prosperity, assiduously advertised. Big schemes of construction had been undertaken, notably that of enterprising concerns led by the Brazil Railway Company. The slump in rubber came too quickly to let the bulls escape, and the market is perpetually being hammered by fresh forced liquidation. Everything Brazilian suffers; Government stocks, because it is feared that the fall in the revenue may lead to a suspension of sinking funds; railway and utility stocks, because of the paralysis of trade. This is the real weak spot in our markets. The slump in the scrip of the Rothschild loan, in Brazil Railway common stock, and the flatness of Leopoldinas, Brazil Traction, Rio Trams, and older Government stocks—these have made a hole which has to be filled up by heavy sacrifices elsewhere.

ALBERTA WILL ISSUE BONDS

They Will Be Floated to Provide for Elevators, Telephones and Public Works

The Alberta legislature at the present session will be asked to vote one million dollars for the erection of farmers' elevators in the province, one million dollars for telephone extensions, and one million six hundred thousand dollars for public works.

Estimates of receipts and expenditure for the province of Alberta for the year 1914 were tabled in the Alberta legislature by Premier Sifton, showed an estimated surplus of receipts over expenditure of $1,217,220, as compared with an estimated surplus during the current year of $1,055,305.53.

The total estimated receipts for the year 1914 are $9,731,350, as compared with $10,610,884.53, the estimated revenue for the current year. The total estimated expenditure is $8,514,130 for the year 1914, as compared with $9,555,579, the estimated expenditure for the current year.

Details of Estimates

ESTIMATED EXPENDITURE.

	1914.	1913.
Public debt, amount to be voted	$ 675,000	$ 565,000
Civil government	441,640	385,964
Legislation	121,000	88,580

Municipal affairs department	110,000	226,500.00
Legislative assembly	5,000	6,000.00
Government printer	8,000	5,000.00
Totals	$9,731,350	$10,610,884.53

Fifty More Elevators.

Referring to the items in the estimates Premier Sifton said $300,000 would be spent this year in connection with Alberta Co-Operative Elevators. Fifty elevators are in operation and fifty more would be built next year. The erection of these elevators would go on until the farmers of the province had the proper accommodation for the housing and marketing of their grain, without being robbed of the profits that rightfully belonged to them as the reward for their labors.

The government had expended in connection with the telephones of the province $8,000,000 and provision made for an additional expenditure of $1,000,000 next year. Notwithstanding the fact that the telephones were mainly built through new and sparsely settled country the operation of the telephones in the province would this year show a surplus of $100,000, after paying interest on capital and operation and maintenance charges.

Two Thousand Miles of Railroad.

It was intended to carry on the same policy of extending this great public utility in future years. Some increase in the rates might be necessary but the government would keep them down to the lowest basis consistent with the economic operation of the system.

With regard to railway development the premier said the construction during the year had not been as extensive as had been hoped, but by the end of 1913 his prophecy that 500 miles would be completed would be an accomplished fact. By that time also there would be actually completed 2,000 miles of railway built under the guarantee of the province. He believed that it was essential that this assistance should be extended and extended liberally.

TRUSTEES AND MUNICIPAL BONDS

Burnaby's Hypothecation Troubles—Hamilton and Montreal Finances

The British Columbia provincial government is to be urged to alter the legislation regarding the investment of trust funds. Under the existing act, trustees cannot invest funds in municipal debentures unless the interest and payment has been guaranteed by the government. It is claimed that this is the only province in Canada carrying such a restriction and that its obliteration would tend to the easier marketing of municipal debentures.

Burnaby's Debenture By-laws.

Councillor Macpherson, discussing the Burnaby debenture further hypothecation by-law, 1913, protested against removal of restrictions as to the price at which Burnaby's bonds may be sold by the Royal Bank of Canada and the abolition of a time limit. In a previous by-law for the hypothecation of $1,391,000 worth of municipal bonds as security for a loan by the Royal Bank of Canada, the minimum price at which 4½ per cent. bonds could be sold, was fixed at 70 and for 5 per cent. bonds 80 was fixed. Since that by-law was submitted, further loans have been made by the bank, and it is proposed to remove the restrictions as to price and time when the bonds may be sold. Reeve McGregor and Councillor Fau Vel, chairman of the finance committee, stated that the previous hypothecation by-law was to cover a loan of $570,000 from the bank. Later the bank advanced a further $150,000 on condition that it be repaid out of the taxes. The bank agreed, however, to allow the taxes to go towards retiring treasury notes and also advanced an additional $33,000 and it was to give the bank security for the additional money owing to the bank that the further hypothecation bylaw was necessary. Councillor Fau Vel stated that the municipality needed $200,000 to pay workmen and to meet other liabilities.

Hamilton and Montreal Finances.

According to figures prepared by Mayor Allan, Hamilton taxpayers will be asked to sanction the following expenditures during 1914, totalling $2,360,000:—Local improvements, $700,000; storm sewer, $650,000; Hydro extensions, $335,000; new hospital, $200,000; waterworks improvements, $150,000; old hospital, $100,000; schools, $100,000; sanatorium, $75,000; library, $50,000.

According to the Montreal controller auditor's annual report, the total receipts of the city for the year 1912 were $26,754,224.22 and the total expenditure $26,256,276.83, leaving a balance of $497,947.39. The continued rise in value of real estate, says the report, has increased the revenue derived from that source and from personal taxes beyond expectations, there being an excess of $1,533,823.25 over the receipts of 1911. This has enabled the corporation to provide amply for the needs of the public service, although the cost of administration has increased from $7,700,000 in 1911 to $9,300,960 in 1912.

Edmonton school board has received the proceeds of its 40-year debentures, issued last spring. The original issue was for $1,250,000, but the sale of small parcels of the bonds amounting to $200,000, has been effected from time to time.

Messrs. G. A. Stimson & Company, debenture brokers, of Toronto, have just completed the purchase of $1,800,000.00 city of Vancouver, B.C., 4½ per cent. local improvement debentures, maturing in 10, 15 and 20 years. The bulk of these were sold in the United States.

◆

DEBENTURES AWARDED

Welland, Ont.—$60,000 5 per cent. 30 years to Dominion Securities Corporation, Toronto.

Medicine Hat, Alta.—$150,000 school debentures to Messrs. W. A. McKenzie & Company, Toronto.

◆

CANADA POWER AND PULP BONDS

Bonds amounting to $254,400 of the insolvent East Canada Power and Pulp, at present deposited in the vaults of La Banque Nationale, will remain tied up as a result of a seizure taken out by Messrs. Badel Freres, bankers and brokers, of Paris. The bonds became the property of certain French investors at the time of the flotation of the company. They subsequently were transferred to Canadian buyers and were transmitted to Montreal through the National Bank. Stanislas D. J. B. Badel, H. M. F. Ducout, A. B. Badel and A. J. Ducout, who are doing business in Paris under the firm name of Badel Freres, now lay claim to the bonds as security in certain proceedings pending over the flotation of the company.

UNION LIFE AFFAIRS

The investigation of the affairs of the Union Life Assurance Company is revealing an extraordinary story of finance. It should result in the tightening of legal strings and in more power to the Dominion department of finance, in order that such a monetary carousal may be made more difficult in the future. As usual, in such investigations, the responsibility for the entire trouble and fraud is, according to the evidence, being heaped upon the shoulders of one man, in this case, Mr. Pollman Evans. Mr. Evans is to blame for many things, but surely he was not a despot in Union Life affairs. Were all the other officers and directors mere dummies, ignorant of what was going on?

Mr. H. Symons, K.C., director of the Union Life, and associated for many years with that company and with the National Agency, is reported to have stated that he intends to run in the English bye-election in the Walthamstow constituency, where he has been nominated by the Unionist party. If Mr. Symons, as director of the Union Life, knew anything whatever of the inside trickery of that company's affairs, as he should have done, and continued to hold his position and draw his fees as director, *The Monetary Times* thinks that Mr. Symons is a very unsuitable candidate for the British house of commons. If Mr. Symons knew nothing of the inside trickery of the company's affairs and continued to hold his position and draw his fees as director, he was a directorial dummy, a director who did not direct, and consequently an unsuitable person to help to direct the affairs of the British house of commons. To these views, *The Monetary Times* adds the wish, therefore, if Mr. Symons is serious in his candidature and proceeds with his intention, that he may be defeated in the Walthamstow election by a thumping majority.

CONTROL OF MUNICIPAL LOANS

On another page are printed comments of Mr. R. O Wynne-Roberts, of Regina, respecting the supervision of municipal loans. Mr. Roberts has specialized in municipal engineering and administration and his views and suggestions, therefore, are impressed with experience and authority. He discusses the opinion of *The Monetary Times* favoring a federal local government board in Canada comprising provincial representatives for the control of municipal finance, as opposed to several provincial boards. Mr. Roberts admits there is some force in the contention of *The Monetary Times*, but on the other hand raises the question of the constitution of the various governments. That is a naturally serious obstacle, and one which was not overlooked. The British North America Act of 1867 appears frequently to be opposed to the best interests of Canada as a whole, such as, for instance, in the matters of company laws and the inclusion of provincial securities in the British Trustee List. We still think that a federal board would carry considerably more weight in the London market than would provincial boards. The detail work would have to be done in the various provinces. It would probably mean that the greater part of the work would have to be done there, but the endorsement of a Dominion of Canada board would be a recommendation to be envied in the money markets.

The country may have to be content with provincial boards, as a beginning at least. Indeed, Saskatchewan already intends to take the lead and will shortly have such an organization. The result will be watched with interest. While hesitating to prophesy, it may, in the natural course of events, unconsciously endorse the suggestion of a federal authority.

HONESTY

A bank clerk in St. John was transferred to Chicago. Before going he obtained certain keys, had them duplicated and stole $10,000. The crime was simple and deftly performed. Apparently, the thief would never be discovered. Inquiries were made. The bank clerk's expenditures in Chicago were watched. He was asked by his head office to come to Toronto to undertake relief work. When he reached there, his arrest was effected.

These incidents are related merely as a reminder that despite modern extravagance and up-to-date contempt for the undeviating path, honesty is the best policy. This applies from the capitalist who pockets a few hundred thousands in the course of his promotions, to the bank clerk who dishonestly slides a dollar into his pocket. If a man has no conscience even, while his crime may go undetected for many years, experience has proved that the long arm of either the law or of Providence finally will get the criminal.

INCENDIARIES AND THE LAW

Seven of nine Canadian provinces are still without fire marshals, the two exceptions being Manitoba and Saskatchewan. The value of the fire commissioner has been demonstrated in many channels, especially in tracking incendiaries and bringing them to justice. Arson is a crime far too prevalent in Canada, and the seven lagging provinces should consider the appointment of a fire commissioner. Ontario particularly needs the services of such an officer.

As Mr. Henry Lye, fire adjuster at Vancouver, reminds *The Monetary Times*, even in the olden days, a very watchful eye was kept upon the incendiary. In the charter granted by King Edward the Confessor to the city of Chester it was provided that "If fire burned in the city, he from whose house it started should compound for it with three oras of pennies, and give to his next neighbor two shillings."

In that of King Edward III. to the Spurriers of London, it was stated "Many of the said trade are wandering about all day, without working at all at their trade, and then, when they have become drunk and frantic, they take to their work, to the annoyance of the sick, and all their neighborhood as well, by reason of the broils that arise between them and the strange folks who are dwelling among them. And then they blow up their fires so vigorously that their forges begin all at once to blaze, to the great peril of themselves and of all the neighborhood around. And then, too, all the neighbors are much in dread of the sparks which so vigorously issue forth in all directions from the mouths of the chimneys in their forges. By reason thereof it seems that working by night should be put an end to and such time for working be forbidden, and if any person shall be found in the said trade to do contrary thereof, let him be amerced, the first time in 40 pence, the second time in half a mark, and the third time in 10 shillings, and the fourth time, let him forswear the trade forever."

In the Salic Law, about 500 A.D., Title XV., concerning arson, it says:—

"If any one shall set fire to a house in which men were sleeping, as many freemen as were in it can make complaint before the 'King'; and if any one shall have been burned in it, the incendiary shall be sentenced to 2,500 denars, which make 63 shillings."

And from Athelstanes' ordinances: "Let incendiaries, and those who avenge a thief, be worthy of the like law. And he who will avenge a thief and wound no man, let him give to the King CXX. shillings, as wite for the assaults."

THE MARITIME PROVINCES.

A graceful tribute to the maritime provinces it was to appoint Hon. G. H. Murray, premier of Nova Scotia, as chairman of the interprovincial conference at Ottawa. Amid all the drumbeating of Western Canada and the self-satisfied smiles of Ontario and Quebec, there is a quiet persistence in Prince Edward Island, Nova Scotia and New Brunswick which excites admiration. The attitude of the maritime provinces carries weight in the world's money markets. A Canadian banker in London said recently that the eastern provinces of the Dominion have nothing to fear regarding their securities on the British market. Their conservative methods are appreciated.

The maritime provinces do not always get their due, and we sympathize with their request for more adequate representation in the federal house. If any criticism were offered here, it would be only that the maritime provinces are too modest. We should like to hear their voice more frequently, and above a whisper.

AGAINST WORLD'S FAIRS

The proposal of a Montreal World's Fair, which was brought up for consideration by the council of the local board of trade, was considered by that body as being a scheme beyond the bounds of feasibility, and by unanimous vote the council decided not to extend their support to the idea. This is a wise decision, and it is to be hoped that other citizens of Montreal will follow the board of trade's example. World's fairs are poor excuses to attract a new generation to inadequate hotel accommodation at any given point, at reduced railroad rates. Few of them pay expenses, and none of them are lasting advertisements for the cities which foolishly undertake them. Montreal will do well to steer clear of the dangerous magic of the words "world's fair." Toronto, Winnipeg and other Canadian cities should not mar the success of their annual exhibitions by entering the "world's fair" arena.

PROVINCIAL SECURITIES AND BRITISH TRUSTEE LIST

A curious misapprehension has received currency regarding one of the recommendations of the interprovincial conference at Ottawa this week. It was stated by newspaper correspondents there that the premiers had agreed unanimously to seek the co-operation of the Dominion government in an effort to induce the Imperial government to include in the British trustee list "the stocks and debentures of provincial corporations." This is obviously incorrect. What they have asked refers to the securities of the provincial governments only. How this error is spreading is indicated in the following Ottawa dispatch to a Toronto paper: "It is believed that there is a joker contained in the resolution which urges the posting of the stocks and debentures of provincial corporations among the stocks of England where trust funds may be invested. It is thought that the intent of the resolution is to strengthen the position of the province, now being attacked in the courts, to incorporate companies which may do business throughout Canada."

At present, Canada's provincial government securities are not allowable in Great Britain as trustee investments. *The Monetary Times*, with provincial and financial authorities, has advocated a change in this direction for many years. The unanimous request of Canada's provincial premiers to the Dominion government this week will, it is hoped, induce the federal authorities to give a true helping hand, previously stuffed in the pants pocket, whenever this matter has come up.

SASKATCHEWAN'S DRASTIC PROPOSALS

The report of the Royal Commission appointed by the Saskatchewan government to investigate agricultural credit, raises far more serious matters than the granting of loans to farmers. The commission recommends the formation of a co-operative mortgage association which will raise funds on mortgage bonds to be guaranteed by the provincial government. The word co-operation to many has become one of magic and is frequently used in a wrong sense. For ten farmers to combine to obtain a mortgage loan of $5,000 for which all of them are liable, the money to be raised on the credit of the province, is by no means co-operation in its strict sense. It means that the farmer wants to lift himself by the strength of Saskatchewan's credit. In British North America the proud boast is that every man is resourceful and stands upon his own feet. The Saskatchewan proposal makes local associations of ten members united on the basis of joint and several liability for the mortgage loan. In brief, the businesslike, progressive farmer in the circle of ten, will have to share the undesirable results arising from the lack of responsibility in a ne'erdowell. The liability of individual members will be limited to an amount not more than 50 per cent. greater than the amount of his loan. In other words, if his share of the mortgage is $1,000, and something goes wrong with one of the other members, his liability is limited to $1,500. One would imagine that this provision alone will be sufficient to show the Saskatchewan farmer that there is more gilt than gingerbread in the Royal Commission's proposals.

When the Saskatchewan government guaranteed credit to the co-operative elevator system, they commenced, we believe, with a comparatively small sum. This has now grown to many millions. There is no reason why it should not expand very much further. Indeed, the logical conclusion is that one day the Saskatchewan government will finance practically the entire crop of the province. The municipalities are now asking the government to guarantee their loans. Finally, perhaps not finally, the farmer is being told that he can obtain money at a low rate of interest (we believe it is not suggested that the rate can be reduced from 8 per cent. to less than 6 per cent.) by a new scheme, a scheme which undoubtedly will strain the credit of the province.

The Commission's report says that the farmers of Saskatchewan are paying interest on at least $150,000,000. Under the proposed system, that sum would probably be increased greatly, and in years to come the peopling of Saskatchewan would mean a far greater sum involved than $150,000,000. If the Saskatchewan government guarantees bonds for the purpose of advancing funds, say, first to two hundred farmers, it is natural to expect that the system will grow, just as the grain elevator system is doing, and consequently the Saskatchewan government will be called upon to guarantee many millions of bonds. Those who are handling the provincial finances know well enough what effect this would have on the credit of the province. The farmer, by the proposed plan, is to a great extent to raise money on the government's credit, instead of on his own credit.

The farmers who complain are not usually those who run their farms in a businesslike way and have their properties mortgaged to a legitimate extent. The class which complain most are those whose farms are already over-mortgaged and want still more credit. It is often forgotten that a borrower must have a proper basis of credit, no matter whether he is a farmer or a manufacturer. If a farmer comes to a bank with a statement showing his property mortgaged to the hilt, with long-standing debts to tradesmen and implement companies, and current crop in poor shape, he will not claim, surely, to have any legitimate basis of credit. He need only compare conditions with those of the farmer whose property is mortgaged, say, 40 per cent., whose debts are few, whose reputation in the community is good, whose farming methods are thorough, and whose crop is ready for shipment.

If proper co-operation among the farmers could be obtained by long-term mortgages at low rates of interest, *The Monetary Times* would be the first to give its hearty support to the scheme. If the commissioners gave proper attention to matters in Europe, they found that this desirable condition existed where there was not only a borrowing class but also a lending class in the same community. This is not so in Saskatchewan but, according to the commissioners' proposals, the breach is to be bridged by clinging to the credit of their province. Obviously that is a very serious matter for the province.

The Saskatchewan government should look further afield than the provincial arena of politics and votes. Their money comes chiefly from the British money market. *The Monetary Times* doubts very much whether the British money market will view this latest proposal with approval. Any number of Utopian ideas cannot change the basic principles of money lending and money borrowing. If the Saskatchewan government tries the land-bank experiment, it will probably learn that fact in the school of experience.

SMALL CHANGE

Market report: money continues firm. Agreed, unanimously.

* * * *

Taxation in Great Britain and the United States is driving capital into Canada. Moral?

* * * *

A contemporary says "let us give business a rest." It would seem that business is giving us a rest.

* * * *

Union Life financing was the nearest possible approach to a bicycle successfully crossing a picture wire.

* * * *

Hamilton complains that latest issue of stamps won't stick—chance for the Liberal party to give something a good licking.

* * * *

Second strawberry crop reported at Sarnia, Ontario, and first blizzard crop in the United States. How times have changed!

* * * *

Chicago will use the operating knife to eliminate criminal tendencies. Canada might use it similarly on overcapitalizing financiers.

* * * *

To ask nine provincial premiers assembled at Ottawa not to talk politics would be as successful as a request to the office boy to study Algebra at a baseball game.

* * * *

The Toronto World says Home Smith has mesmerized The Telegram and The Star says The Telegram has magnetized Controller Thomas Church—a pretty good example of the freedom of the press.

* * * *

Oakville, Ontario, has also experienced difficulty in selling debentures. Says a local paper in calling for a new mayor, "What Oakville needs, is a man that leads, and shows the way to all others; but the little boy blue, if the story is true, fails to finance our debentures." Who would care to underwrite the poet?

* * * *

The proverbial biscuit this week goes to Alderman Morley Wickett, Toronto, who in recommending Professor Wright for city architect, said: "He is first of all an organizer. When things were not going well at the University a few years ago, Professor Wright organized that great rugby team which was the best Canada has ever seen."

NATIONS DOING TOO MUCH AT ONCE STRAINS CAPITAL

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

EUROPEAN MARKETS STILL DISTURBED

Money Continues Tight, While Berlin, Bombay and Balkan Affairs Do Not Help Matters

(Central News cable to *The Monetary Times.*)

London, November 2nd.—A favorable weekly statement by the Bank of England and the fact that the governors of the institution did not deem it necessary to mark up the minimum rate of discount of 5 per cent., which was established on October 2nd, have had a good effect on sentiment in the city. The money market, however, is tight and the Bank of England reports heavy month-end loaning and discounting. Rates for bills are very firm, owing to the uncertainty of the outlook for gold exports and the fact that £3,000,000 additional treasury bills will be paid for next week.

The weekly return of the Bank, issued yesterday, disclosed a decline in the proportion of reserve to liabilities from 56.30 per cent. last week to 54.50 per cent. The total reserve is now £27,114,000, an increase of £513,000 for the week. There was an expansion in loans during the week of £3,690,000 to £28,619,000.

Mexican Railways Hurt Speculators.

As to the securities markets, a more hopeful feeling prevails, following forced liquidation from Glasgow, where a slump in Mexican railway shares hurt speculators. Dealings, nevertheless, continued narrow, because of the settlement which has just ended, of Saturday's religious holiday (All Saints' Day), and of the Mexican situation. Generally the undertone of Canadian railway and industrial issues has improved. Grand Trunk securities have been affected unfavorably by the dividend outlook. The continental interest in Canadian Pacific is widening and the feeling in them is confident.

Advices from Bombay indicate that the financial situation there has failed to improve as has been expected by representatives of Indian Banks here. Several large dealers in pearls have failed, involving some banks that had been advancing money on stones. The forthcoming settlement in the share market at Bombay is awaited with considerable anxiety. The rise in American cotton has been a disturbing factor. There is little or no credit available in Bombay.

German Bank Rate Reduction.

Monday's reduction in the discount rate of the Imperial Bank of Germany from 6 per cent. to 5½ per cent. was gratifying to bankers here. There was a sharp decline in prices on the Berlin Bourse on Wednesday, and three unimportant brokers suspended. Two fairly large bankers experienced difficulty in arranging their accounts, and it was feared at one time that they would be obliged to suspend, but they succeeded in obtaining the necessary funds. To-day the Bourse was calmer. Advices from Paris indicate that there is an abundance of funds in the French capital. Little buying of securities is going on because bankers wish to be ready for the Balkan and other loans. The approaching settlement is expected to be concluded without incident.

EXPORTERS WILL PRESS SHIP COMBINE

†London, October 27.—The Canadian Associated Press learns that the largest exporters in Manchester have privately combined to bring pressure upon the steamship companies regarding freights to Canada.

BOND INTEREST DEFERRED

*London, October 27.—The North Saskatchewan Land Company, of which F. Walker, H. M. Baird Hammersley, M.P., and Lorne Edgar are directors, publish a notice to holders that its £475,000 sixes, on which interest is due November first, will not be paid, owing to the financial depression and the entailment of bank credits. They hope to resume interest at an early date.

NORTH BATTLEFORD BOND ISSUE

†London, October 27.—The North Battleford 5½ per cent. issue at 95 is apparently having a poor reception, seeing that the promoters have adopted the unusual course of extending the advertised time of application. The underwriters took less than half of the St. Petersburg two million 4½ per cent. issue. No fresh applications for capital by Canada are expected just yet.

*London, October 27.—It is officially stated that two-thirds of the North Battleford issue of £103,100 five and halves, in addition to the amount taken firm by the underwriters, has been subscribed by the public. The only information on the Nova Scotia Steel and Coal issue of £199,500 sixes is that it was very well taken up by the public. Applications came in very satisfactorily.

HOW CANADA MIGHT GET TWO MILLIONS

*London, October 27.—The Dukes are taking up Lloyd George's challenge in fine style. The Duke of Marlborough's favorite pose in the picture papers just now is as a supervisor ploughing opinions at Blenheim Park, where he is putting under crops one thousand acres granted by a grateful nation to his famous fighting ancestor two hundred years ago.

The young Duke of Sutherland, writing to the Daily Mail, offers Mr. Lloyd George his 200,000 acres of Highland deer forest at £2 per acre, to enable the Government to do what Mr. Lloyd George condemns the Duke for neglecting to do, namely, to grow corn and repopulate the glens.

"This," says the Duke, "is cheaper than land can be bought in any country named by Mr. Lloyd George, and hardly above the price of prairie land in Canada."

Of course, should Mr. Lloyd George accept, as he will not, the Duke will put the resulting £400,000 into six or seven per cent. Canadian investments.

IS VISIT TO FINANCE STEEL PLANT?

*London, October 27.—It is understood that one object of the visit to London of Sir William Mackenzie and J. J. Carrick, M.P., is to raise $10,000,000 for steel works at Port Arthur. The plans of the United States Steel Corporation to erect a large iron and steel plant in southern Ontario attracted considerable attention among English manufacturers.

The Manchester Guardian, commenting on these plans and the recent Ottawa bulletin on magnetic iron lands at Natashkwan, Que., notes "the determination with which Canada is developing heavy iron steel industries, and the abundant opportunities for those who look ahead. English manufacturers cannot expect to compete very largely for enormous structural or other steel requirements of the West unless they establish Canadian branches. Anyway, the Canadian market, except in isolated instances, cannot be handled like an Indian in slow, fatherly manner from a distance through an intervening agency."

LONDON WILL CHECK PROSPECTUSLESS COMPANIES

*London, October 27.—Alluring illustrated whole page advertisements of the Nakamun Asphalt Oil Company, Edmonton, again appear in to-day's papers, headed "£20 originally invested in oil now worth £80,000."

The advertisement offers 50,000 treasury shares at four shillings and fourpence each, through the Canadian Industrial Development Company.

It is understood that the sub-committee of the London Stock Exchange, as result of investigations made by them, contemplate drastic reforms regarding the introduction of the market of shares of prospectusless companies.

The financial editor of the Daily Press explains the method as follows: "A slip is handed round the market, giving vague information about a certain company. Generally speaking, the shares are introduced at a ridiculously inflated price—the public bid them in and the insiders slide quietly out, the public in turn being bitten.

"These introductions become a scandal, and they have the effect of checking the business of the Stock Exchange by the natural process of disgusting investors."

---

†Canadian Associated Press cable.

**Montreal Star* cable.

SASKATCHEWAN OFFERS SHORT TERMS—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

APPROVAL OF MUNICIPAL FINANCE CONTROL

*London, October 28.—Canadian Government £3,000,000 fours were listed here to-day. Settling day was announced November 3rd for Canadian Northern Railway £1,025,405 fours, and city of Lethbridge £13,800 four and a halves.

The Financial News warmly approves the Saskatchewan proposal of provincial control of municipal borrowings, and hopes that the proposal will be quickly translated into an action to prevent over-indulgence of debt.

BRITISH GOODS IN CANADA

†London, October 28.—"I have just returned from Canada," declared Mr. Faithful Begg, a prominent financier, before the London Chamber of Commerce to-day. "My firm conviction is that the situation there is essentially sound. The difficulties under which Canada finds herself arise from her prosperity alone. If discretion is used, there is no place where the investor may place capital more safely."

The occasion was the lecture by Hon. J. T. Turner, agent general of British Columbia, who denied that the preference on British goods was counteracted by freight rates. He thought there was very little in the alleged sentimental preference in Canada for British goods. Amongst the reasons why British goods had not a bigger sale were the design and make frequently being unsuitable for Canada. They were often made and packed unnecessarily heavily, and were not sufficiently advertised. Mr. Turner submitted details of the British manufacturers' exhibition train proposed to tour Canada next year.

STEEL COMPANY WOULD BE GLAD TO FINANCE

*London, October 29.—Mr. J. H. Plummer, president of the Dominion Steel Corporation, informs me that the Steel Corporation is not worrying about the financial stringency, which has prevented the selling of a moderate amount of securities to provide for a new plant, etc., though naturally he would be glad to have this small balance placed.

Any slackening in the Canadian iron and steel trade has been in imports rather than in manufacturing, and the Canadian home demand is so large that there is little chance of exports to the United States, now that the tariff is removed, yet it is a good thing to have such a market at our doors in case of a dull time at home.

MONTREAL, WINNIPEG, AND SASKATCHEWAN LOANS

*London, October 29.—Arrangements have been completed to repay out of revenue the city of Montreal bills maturing November 1st, but the amount is only small. The city of Winnipeg is also repaying the small amount of bills maturing a little later.

These repayments are regarded as gratifying evidence of the comparative ease with which civic taxes are paid, despite the general financial stringency.

The province of Saskatchewan is offering £300,000 in one year bills, yielding purchasers 5¼ per cent.

MEXICAN SITUATION AND CANADA

*London, October 29.—The Canadian position in the market here at the moment is more closely connected with the Mexican upheaval than most of the authorites care to admit. Indeed, Mexico has taken the place of the Balkans as a political storm centre, with this difference, that Canadian interests are heavily involved in Mexico, which is not so of the Balkans.

The strain was realized from the heavy losses of Mexican issues during the accounts which closed yesterday. Mexican Railway ordinary, which was also affected by the disappointing report, dropped 9½. Prior lien bonds of the National Railways of Mexico and the Mexican Central debentures have fallen 5. Mexican Tramway common is down 9, Mexican Light and Power common 7.

It is understood that the position of the two leading Anglo-Mexican-Canadian houses has, during recent weeks, required considerable support from influential Canadian allies to carry them through the combined effects of the general stringency and the Mexican crisis.

CAPITAL TRYING TO DO TOO MUCH

*London, October 29.—Lord Wesley, former permanent secretary-treasurer, now a leading banker and a director of the Grand Trunk, presiding at the meeting of the Standard Bank, issued a note of warning, and said that public loans to Canada, Australia and South Africa rose from an average of 29 to 51 millions sterling since 1911, and added:—

"The same story applies to the world generally. The question arises, Is not the world attempting too much at one time? Is it not incurring engagements beyond present means—engagements that may lead to financial trouble? The supply of capital is not, as appears to be often thought, unlimited. It cannot be too often repeated that savings alone provided the capital needed for the development of the world. It is more than doubtful whether those savings are keeping pace with the demands made upon them."

Leading underwriting firms have certainly been driven to accept this view. The Financial Times reminds big banking houses that they control not only the borrowers, but many of the lenders as well, seeing that it seems to them that the underwriters must apply for accommodation he needs before underwriting can be granted.

ANOTHER CANADIAN NORTHERN ISSUE COMING

*London, October 30.—The market anticipates a further Canadian Northern issue of £1,500,000 in ten-year 5 per cents, issued about 95.

Part of the new Grand Trunk ten-year $2,500,000 equipment notes bearing interest at 4½ per cent. are being offered here to yield the purchaser 5¼ per cent.

Application has been made to list Bell Telephone $6,250,000 5 per cents., and Casey Sutton Cobalt £75,307 shares.

WESTERN CANADA'S PACE

†London, October 30.—Professor Humphrey Michell has an article in the Economic Review regarding the development of north-west Canada.

"He would be a bold man who would dare to be a pessimist," writes the Professor, "and yet there are certain aspects of the case which certainly make one pause and question whether after all there may not be a limit to all this riot of progress and prosperity."

He speaks of the "utterly unscientific and wasteful" methods of agriculture too long pursued in the West. The whole of the colossal increases in production come from an extension in the number of acres under the plough and not in the improvement of agriculture. Professor Michell also sees danger in the abnormal growth of Winnipeg while the percentage of rural inhabitants steadily declines. "Winnipeg is eating the very life out of the little towns and villages," he says.

The real estate business is another source of apprehension, and he has the gravest doubts whether the idea of Winnipeg having direct communication with Hudson Bay will ever materialize. He sees, in fact, the Hudson Bay Railway and the Panama Canal diverting vast quantities of grain in other directions.

Setting aside the "childish talk" which has arisen in the boosting of the West. Professor Michell says it can be affirmed in sober earnest. Western Canada has wonderful resources. Speaking of the mineral resources, he anticipates such places as Lethbridge and Medicine Hat eventually rivalling Pittsburg. His final word, however, is that solution of the problems of Western Canada lies in improved agricultural methods and in the abandonment of exclusive grain-raising for mixed farming.

FIRE UNDERWRITING IS EXPERTS' BUSINESS

Men Must Be Qualified by Temperament and Experience to be Successful

From certain points of view, the business of fire insurance seems, in a particular sense, to be one which can be better conducted by private individuals than by even the most perfect governmental machinery. It seems to possess certain features which make it a particularly dangerous field for the people in their organized capacity to attempt to enter. A good many kinds of business lend themselves quite easily to the designs of those who would like to see a socialistic state established. The idea of governmental operation presents no insurmountable difficulties in a number of cases. In the case of fire insurance, our present-day reformers and radical thinkers, bent on deriving private capital out of the field and leaving this in the exclusive control of government, are confronted upon the threshold by unusual obstacles which are inherent to the business itself, and few suggestions have yet been made, of a practical nature, respecting the manner in which these obstacles can be avoided. It is no overstatement to say that, at the present time, a formidable and aggressive movement is on foot, having for its ultimate purpose the virtual transaction of the business of fire insurance by government.

Experts Only Can Understand Such Business.

What is the peculiar feature of the fire insurance business which makes the problem of state participation in this business a more difficult one than the corresponding problem in the case of railroads, for instance, or of water companies, or of telegraph and telephone companies? Broadly speaking, what is referred to is of course the fact that fire insurance has always been, and must always be, to an extent not approached by any other legitimate business, a game of chance pure and simple—a game of chance in which men who are qualified by temperament and experience to play it, and who are willing to risk their money in it, can survive, but in which none but experts can with any safety engage.

I entirely understand, and to a considerable extent sympathize with, the reluctant attitude of the older fire insurance men toward anything which savors of governmental aggression in their chosen field. They are engaged in a very peculiar and essentially hazardous business—one in which expert knowledge is absolutely necessary in order to succeed, said Mr. W. T. Emmet, superintendent of Insurance of New York State, at Cincinnati, and I do not in the least blame the men who have grown grey in this business for viewing with alarm the increased activities of the government in respect to their affairs. It is the last business in the world that the people ought to be eager in their organized capacity, to engage in.

Place on Sounder Foundation.

It differs altogether from life insurance in this respect—although I do not want to be understood as favoring state insurance in the life field either, for I certainly do not favor it. But the time has come, I think, when broad-minded fire insurance men must recognize the inevitable drift of things. They must view their problem in the light of actual conditions, not in the light of conditions as they would like them to exist. They must recognize the universality of the demand for good cheap insurance, and the utter dependence of the people upon it. They must appreciate the truth of the proposition that, after competition has died out in any branch of business, and monopoly reigns in its stead, the only direction in which men can look for protection against the possible abuses attendant upon monopolistic conditions, is the state. Monopoly having to a greater or less degree taken the place of the old competition in the fire insurance field, the leaders in the fire insurance business should realize that henceforth they must adopt a different attitude toward governmental activities in connection with fire insurance. The strong men who have performed such wonders in this useful field of work will readjust themselves quickly to the new conditions. In so doing, they will be establishing additional grounds, besides those which now exist, for the praise which no right-thinking man will withhold from them for all the splendid results they have achieved. And they will be taking the final step necessary to place their great business—without which the affairs of the world could not be carried on at all—upon a sounder foundation than it has ever yet occupied.

◆

BANK OF MONTREAL BONUS

With the regular dividend of 2½ per cent. for the fourth quarter of its year, payable December 1st to stockholders of record November 15th, the Bank of Montreal has declared a bonus of 1 per cent., the second extra distribution for the year, and bringing the total return to shareholders for the twelve months up to $12 a share.

BRITISH FIRE COMPANIES IN CANADA

How They Fared Last Year—Larger Volume of Business and Expenses, Lower Premium Rate and Losses

The total cash receipts from premiums of the 23 British companies doing business in Canada last year, were $12,092,125, being an increase of $886,433, as compared with the previous year; the payments for losses were $6,319,064, being $137,175 greater than for 1911, while the general expenses amounted to $3,764,912, being $403,616 greater than in 1911, thus showing balance of $2,008,149 favorable to the companies. In the previous year there was a favorable balance of $1,662,507:—

Paid for losses	$ 6,319,064
Paid for general expenses	3,764,912
Total	$10,083,976
Received for premiums	12,092,125
Balance in favor of the companies	$ 2,008,149

Details of the Companies.

The following details give the balance for the different companies:—

Balance in favor.—Alliance, $35,002; Atlas, $44,454; Caledonian, $84,545; Commercial Union, $130,058; Employers' Liability, $57,325; General Accident Fire, $47,903; Guardian, $60,905; Law Union and Rock, $31,168; Liverpool and London and Globe, $177,061; London and Lancashire Fire, $162,227; London Assurance, $55,907; North British and Mercantile, $200,986; Northern, $137,839; Norwich Union, $118,530; Palatine, $38,081; Phœnix of London, $146,926; Provincial, $20,067; Royal, $91,163; Royal Exchange, $75,118; Scottish Union and National, $112,320; Sun Fire, $56,579; Union Assurance, $70,696; Yorkshire, $53,289. Total balance in favor, $2,008,149.

For every $100 of premiums received there was spent on the average $52.26 in payment of losses, and $31.13 for general expenses.

In 1911 the loss rate was $55.17, and the general expense $30, for every $100 of premiums received.

For the fire business the rate of premium was $12.584 per $1,000 of risks taken, as against $13.305 in 1911.

Hence these companies have done a larger volume of business than in 1911 at a lower rate of premium, a higher rate of expense, and at a lower rate of fire losses.

Experience of 38 Years.

Collecting the result for the 38 years from 1875 to 1912 as regards the receipts for premiums and the expenditure of the British companies we find:—

Paid for losses (1875-1912)	$128,171,707
Paid for general expenses	57,450,353
Total payments	$185,622,060
Received for premiums	204,478,607
Excess of receipts over expenditure	$ 18,856,547

An adverse balance was in existence from the year 1877 till the end of the year 1886, due to the exceptional circumstances of the conflagration at St. John in the first-mentioned year—when the losses paid by British companies amounted to almost $5,000,000. The adverse balance was reversed at the end of the year 1887, when a favorable balance of $341,938 was shown, and this favorable balance increased thereafter from year to year (with the exception of 1893) up to the close of 1899, when it amounted to $5,029,980. In 1900 the loss by the British companies on account of the Ottawa and Hull conflagration amounted to over $2,500,000. To this is due the large deficit of that year, $1,365,476, wiping out the savings of the preceding four years, and reducing the favorable balance at the end of 1900 to $3,664,504, which sum had been still further reduced to $3,512,636 at the end of 1901. The favorable experience for the years 1902 and 1903 increased this balance to $7,123,044 at the end of 1903, but it was again reduced by the unfavorable experience of 1904 to $3,969,472. During the past eight years the favorable balance has been largely increased and now amounts to $18,856,547.

WANTS PARTNERSHIP IN FINANCIAL HOUSE

In another column an advertiser seeks a junior partnership in a good financial house. The advertiser has presented his credentials to *The Monetary Times*, and we will be pleased to discuss these with any who have taken up the question of partnership with the advertiser.

HANDLING OF BANK AUDITS

Need of External Inspection is Admitted—Has Dominion Adopted Best Methods?

Considerable interest is being shown by the general public, as well as professional accountants, relative to the recent appointment of auditors for the Canadian banks, and the whole question of bank examinations and with regard to those who are best fitted to handle these audits. In the hope that the views of the bank depositor and ordinary shareholder may be elicited, Mr. F. C. Blomfield, C.A., who is a Canadian and an ex-banker, resident at Detroit, has written *The Monetary Times* the following letter:—

"With the possible exception of some of the higher officials of the different banks, the desirability of an audit by some other than a bank officer, is generally admitted. There does, however, appear to be some difference of opinion as to who is best fitted to undertake this work; and also as to the wisdom of the method of procedure, in the election of auditors, as prescribed by the Bank Act.

Appointment by Shareholders.

"The general managers of the Canadian banks have already too much power in their own hands, and the manner of election of auditors would appear to rather strengthen this authority than otherwise.

"There can be no question that, if all officers of banks had been prohibited from taking any part in the election, and the appointments, subject to the approval of the minister of finance, were made by the shareholders, a greater feeling of security would be felt. Under the present provisions, an accountant who does not happen to be a partner in one of the few large firms of chartered accountants in the Dominion will practically become, to all intents and purposes, an employee of the bank employing him. This of course will have the tendency of destroying such an appointee's independence, and in the large majority of cases the protection will be little greater than afforded before. To the casual observer though, there will be the greatest protection possible given to depositors and shareholders, in the way of an independent audit.

Is Present System the Best?

"The question is—Is the recently adopted system of external bank audits the best that could have been devised? It would seem to the writer, after a long experience as a banker in both Canada and the United States, that a system somewhat similar to that in the United States would be infinitely better in every way. The total cost to the banks under the present system, if paid into the government, would allow the appointment of an extremely efficient man as superintendent of banks and bank audits, as well as sufficient capable assistants, to handle the work satisfactorily.

"In regard to the examination of National banks in the United States, Mr. H. C. McLeod in his pamphlet 'Bank Inspection,' shows that it has been a success there, as can be seen from the following figures:—

National banks	failed in	43	years	5½	%
Other United States banks	" "	43	"	17½	%
Canadian banks	" "	26	"	25	%
National banks	" "	26	"	5	%

To-day these figures would be even more favorable to the United States, as examinations of national and state banks are being made more thorough and by more competent men, and this is particularly true in regard to the latter."

COMPANY LAW IN CHAOTIC STATE

"If the legislatures, the profession, and the public learn the chaotic state of company law in Canada and take some steps for remedy, some good may have been accomplished," is a striking sentence in the introduction of a comprehensive volume on Canadian company law, by a gentleman, whose qualifications to deal with the subject, are recognized throughout the Dominion, Mr. Thomas Mulvey, under-secretary of state. He has dealt with the matter in his usual thorough manner.

The section dealing with the Dominion Company's Act occupies no less than one hundred and eighty-four pages, and corresponding space is given to each of the provincial laws. Notes have been added to the sections of the Dominion and Ontario acts, and references have been made in the statutes of other provinces to the corresponding sections of these statutes. The book contains all amendments up to the date of its issue, and is well indexed. Canadian Company Law, by T. Mulvey, K.C. Published by John Lovell and Company, Limited, Montreal. Price $10.

WEST INDIES MARKET FOR CANADA

All Negotiations Have Been Completed—Now Traders Must Interest Themselves

The signing of the contract with the Royal Mail Steam Packet Company marks the conclusion of a series of communications and negotiations to promote better trade communications between Canada and the West Indies. In 1891, Honorable Mr. Foster made a tour of the islands and had conferences with their governments and boards of trade. Though there was sympathy at that time expressed with the idea of preferential arrangements, the general fear that the islands would suffer in the United States market from making such arrangements, whilst the Canadian consumption was not sufficient to absorb the major part of their chief products, prevented any actual progress from being made.

Later in 1908, Messrs. Parmelee and Jones had a conference at Barbados with delegates from the principal islands and British Guinea, and there again, although there was an expression of sympathy manifested in a very decided way with the idea on the part of some of the larger islands, yet nothing in the form of an arrangement resulted. Undoubtedly, however, progress was made toward that end.

Then came the royal commission of 1909-10, of which Hon. Messrs. Fielding and Paterson were members, and under whose direction a thorough examination was conducted in Canada and the West Indies, with the result that a general agreement and unanimity of opinion was manifested and the basis laid for future conference.

With Ten of the Colonies.

In 1911, immediately after assuming office, Hon. Mr. Foster took the matter up with the authorities, and invited through them the delegates from the different West Indian Islands to meet at Ottawa. The result of this meeting was successful in bringing about a mutually advantageous agreement with ten of the colonies and opportunity left for the accession of others to the treaty. One of these, Grenada, has since adhered to the agreement.

A preferential agreement having been provided for, upon definite lines, the second step, and one of great importance, was to effect a reduction in ratio of cable communication. This has been carried through, with the co-operation of Canada and Great Britain, and will result in a reduction of 50 per cent. in rates to and from West India points, and now the signing of the above-mentioned contract ensures that from November 1, large, well-equipped and suitable vessels under the management of an experienced and powerful company will take up the service and push it by modern methods.

Canadian Producers Must Co-operate.

It remains now for the producers in Canada to take a live and thorough interest in the extension of markets for Canadian products to the West Indies. Unless they do, personally and generally, take this interest, the best results cannot be expected to follow. Although we do a considerable trade with these islands at present, it is still a fact that a large proportion of the consumption therein of the articles which Canada produces is provided from other sources, largely from the United States of America. The basis for an extension of trade is laid, and with an up-to-date service regularly performed and well carried out, it is now up to Canadian producers to co-operate effectually in ensuring the success of the negotiations resulting in the present favorable condition.

BORROWED COMPANY TO CONTINUE BUSINESS

Investigation of Union Life Affairs Reveals Astonishing Finance

The critical period in the Union Life Assurance Company's existence was in the year 1909. At that date the department of finance at Ottawa had refused to accept the securities held by the Union Life of its parent corporation, the National Agency Company, and it was necessary to secure other securities to satisfy the government inspectors. As both companies were closely connected, the death of one meant the downfall of the other. This was shown by the continuation of the government investigation into the corporation's affairs.

To meet the demands of the government, and show a sound financial groundwork, the National Agency borrowed the Stratford Building and Savings Society, secured the debentures of the loan company in exchange for its own, and then turned the Stratford Savings securities over to the Union Life. The assurance company placed the securities in its capital, and the finance department accepted them, and permitted the Union Life to continue business.

How Control Was Secured.

The control of the Stratford company was secured through the Imperial Trusts Company. According to the evidence given by Mr. Harry Symons, a former president, and original director of the Union Life, the National Agency acquired the Stratford Savings controlling stock for $178,000. At the time the Imperial Trusts held a large block of stock, and acting under orders of the National Agency, obtained an addition sufficiently large to permit the National Agency to control the board of directors.

The campaign of the Union Life's brokers in the United Kingdom in 1910 resulted in disposing of stock to the value of $785,000. Of this amount A. C. Masten, K.C., representing the Dominion Government, succeeded in tracing over $626,000, of which fully three-quarters will be a total loss to the investors.

The following is how the $626,000 of British capital was disposed of by the Union Life:—

Loaned to the Canada Provident Company..	$340,000
Cash debenture of Imperial Loan Company.	37,000
Loaned to National Fruit Company	65,000
Deposited with Imperial Loan Company....	44,000
Expenses of British campaign	140,000
	$626,000

About Some Loans.

The loan made to the Canada Provident Company, of Winnipeg, was secured by bonds of the Imperial Loan Company, supposed to have been valued at $484,000.

The cash debenture of the Imperial Loan Company for $37,000 and the $44,000 on deposit can be realized upon in the future, but the amount will not be as large as the $81,000 invested by many thousands of dollars.

The $65,000 loaned to the National Fruit and Packing Company was secured by a first mortgage on the property of the company, situated in the vicinity of Mimico, which was valued by the officials at $120,000, including the plant. This company is now in liquidation, and about $20,000 can be realized upon the property.

Mr. Masten said: "There is no doubt but that they were made at variance with the intentions which the company expressed to the English investors when the debenture issue of three-quarters of a million was sold. It was stated that the money was secured to solidify and expand the business, but these investments apparently did not have any bearing upon either statements."

What Mr. Symons Says.

These loan transactions were discussed at the investigations, and Mr. Symons, K.C., a director of the Union Life, referring to one of them, said:—

"The loan would have never been made if I had been there, and I doubt if any of the directors but Mr. Evans knew of the real nature of the security. I did not know until a month later when I returned. It was at variance with my plans for using the money, as I desired that it should have been invested in mortgages and municipals. When I found out what had happened I decided that in future the rest of the money would be invested in Western assurance, and I visited Winnipeg and Vancouver with a view of securing good business relations, and investments. I had to go away again, however, and upon my return I found that Mr. Evans had canceled all my arrangements. I then washed my hands of the investments, as it was plain that my advice was of no use to the company."

GRAND TRUNK'S RETURNS

Gross Receipts Showed Increase and So Did Working Expenses

The report of the directors of the Grand Trunk Railway Company as submitted at the half-yearly general meeting held on Thursday, October 23rd, showed in the following comparison of the half-year's revenue account with that of the corresponding half-year to June 30th, 1912:—

	June 30th, 1913.	June 30th, 1912.
Gross receipts	£4,365,636	£3,834,328
Deduct—		
Working expenses, being at the rate of 73.46 per cent., as compared with 72.85 per cent. in 1912	3,207,111	2,793,286
Net traffic receipts	£1,158,525	£1,041,042
Balance of income from rentals, outside operations, and car mileage	Dr. 77,014	Dr. 33,505
Total net revenue	£1,081,510	£1,007,537
Add—		
Amount received from the International Bridge Company	16,013	16.013
Interest on bonds of Central Vermont Railway	6,507	6,507
Interest on securities of Controlled Lines and on St. Clair Tunnel bonds acquired by the issue of Grand Trunk Four per Cent. debenture stock ...	113,254	70,776
Balance of general interest account ...	50,737	51,232
Net revenue receipts	£1,268,022	£1,152,065

Surplus and Dividends.

The following are the net revenue charges for the half-year compared with the corresponding period, viz.:—

	June 30th, 1913.	June 30th, 1912.
Rents (leased lines)	£ 77,603	£ 77,603
Interest on debenture stocks and bonds of the company	630,973	571,642
Interest on debenture stock and bonds of lines consolidated with the Grand Trunk Company	9,703	9,230
Canada Atlantic Railway deficiency ..	73,992	52,805
Detroit, Grand Haven and Milwaukee Railway deficiency	76,624	50,680
	£868,897	£761,960
Leaving a surplus of	399,125	390,105
	£1,268,022	£1,152,065

Adding the balance of £12,785 at the credit of net revenue account on December 31st, 1912, to the above surplus for the past half-year of £399,125, the total amount available for dividend is £411,910, from which the directors recommend the payment of the following dividends, viz.:—Dividend for the half year on the four per cent. guaranteed stock, £247,254; dividend for the half-year on the first preference stock, £85,420; dividend for the half-year on the second preference stock, £63,210; leaving a balance of £16,025 to be carried forward.

Gross Receipts Are Augmented.

The following table exhibits a comparison of the receipts for the half-years to June 30th, 1913 and 1912:—

Description of receipts.	1913.	1912.	Increase.
Passengers	£1,165,828	£1,035,756	£130,072
Mails and express	168,429	162,249	6,180
Freight and live stock	2,868,344	2,496,200	372,144
Other receipts	163,036	140,123	22,913
	£4,365,637	£3,834,328	£531,309

The Saskatchewan provincial executive of the trades and labor congress will ask the provincial government to take into consideration the formation of a commission upon a similar plan to that of the Saskatchewan Hail Insurance Commission, to insure all employees in Saskatchewan against injury or death through accident while at their work. It will practically take the place of the casualty insurance which every employer of labor has to place on his men under the present Workmen's Compensation Act of Saskatchewan.

GUARANTEE INSURANCE TRANSACTED IN CANADA LAST YEAR

Guarantee business was transacted in Canada last year, under the supervision of the Dominion insurance department, by 16 companies, of which seven were Canadian, four British and five United States. The total premiums received were $564,096, guaranteeing an amount of $153,105,282, and the net amount paid for claims was $99,747, with unsettled claims amounting to $125,015 outstanding at the end of the year.

The Guarantee Company of North America transacted business outside of the Dominion, which is not included in the above.

A surety claim man recently said:—"If the employers of men whom we bond would be more particular in making claims, it would facilitate the settlements of defalcations. I refer to the fact that it is frequently the case that employers in making claim for loss, confuse the issue by attributing to the defaulting employee losses of which there is no proof. When the surety company comes to make an investigation, it finds that while there is proof that the bonded employee has taken a portion of the amount charged against him, there is no proof to connect him with other defaults, which are claimed by his employer.

"This necessitates a rigid investigation on the part of the surety company and the looking over of books and records simply because the employer failed to eliminate items in his claim on which there was no proof of the guilt of the bonded employee. The employee, on the other hand, is generally placed in an unfortunate position, because, knowing very well that he is guilty on a number of the accounts, it is hard for him to prove his innocence on others, of which perhaps he has no knowledge. Surety claim men say rightly that the employers in many cases where a default has occurred under a bond are of little assistance in proving the claim."

Surety claim inspectors have been taught by experience to regard it as a suspicious circumstance that any employee in a fiduciary capacity should be one of the kind to "boast" that he never took a vacation. As a matter of fact, long experience of the ways of defaulters has proved that, in many cases, a defaulter will not take a vacation in order that he may continue to cover up his peculations. For this reason a number of firms not only give their employees a vacation willingly, but even insist that everybody in their employ shall knock off work for not less than two weeks. It is frequently the case that the accounts of the firm are gone over to see that everything is all right, while the employees in question are away, and in this way defalcations have been frequently discovered.

Interesting articles on guarantee insurance will be printed in *The Monetary Times* Annual Review.

TRADE OUTLOOK IN WESTERN CANADA.

Monetary Times Office,
Montreal, October 29th.

Mr. Clarence F. Smith, who has returned from a trip of inspection of the branches of the Ames-Holden-McCready Company, of which he is general manager, is impressed with the view that next season will witness a trade revival throughout the west. At the present time there is depression, more especially in British Columbia.

Speaking more particularly of the business of the Ames-Holden-McCready Company, he said that the sales and profits of the present year would probably equal those of the past.

The company had a large stock of goods on hand at the beginning of this year, and this stock has been gradually diminishing. Meantime, the price of boots and shoes has increased and Mr. Smith is of the opinion that it will continue to increase. Leather is dearer than ever before and Mr. Smith quoted figures tending to show that prices are more likely to advance than decline in the near future. Owing to the policy pursued by the company, stocks at the end of the fiscal year will show considerable diminution as compared with the beginning.

The Ames-Holden-McCready Company has been developing a trade in the finer grades of shoes of late, and the output of the factory has met with a good reception in Montreal and the different cities. The sale of finer boots and shoes will probably show an increase.

As to the future, the outlook for next year's trade was promising. Orders for the spring are coming in satisfactorily and will equal in volume those of a year ago. Values are gradually stiffening, but the company had set its prices in August and these are not being departed from.

When spoken to concerning the likelihood of a general setback in business, such as is being predicted in the United States and abroad, Mr. Smith replied that after passing through the west and noting the progress there and the opportunities open to immigrants, he could not reach any other conclusion than that this country is bound to go ahead no matter what happened other countries. Each immigrant meant a producer of the natural products of the country and a consumer of the manufactured products. The class of people being attracted was, on the whole, most satisfactory, and it might even be argued that depression in other countries would tend to cause the population to emigrate from these to Canada and thus result in a final benefit to us.

◆

Further light was shed at Osgoode Hall, Toronto, upon the methods adopted by the promoters of the defunct Farmers Bank to secure the flotation of that ill-fated institution. Application was made before Master-in-Ordinary Alcorn for an order for the removal of the names of two Halton farmers from the list of shareholders, on the ground that the men had been induced, by misrepresentation and fraud, to subscribe for stock. Also, that they were entitled to relief because they had appealed to the courts, before the bank secured its charter, to have their names removed from the list of contributories. Further, that they had been prevented from prosecuting the proceedings started owing to the sharp practices of some of the promoters, who had gone so far as to wilfully mislead the courts. The master found the applicants' charges substantially correct, and allowed them the relief sought. This decision means a loss of $27,000 to the liquidator.

WATCHING DOMINION STEEL STOCK

Holding Corporation's Securities and Their Relation to Coal and Steel Company's

Monetary Times Office,
Montreal, October 29th.

The decline in the common stock of the Dominion Steel Corporation at Montreal to 39 once more attracts attention to the issue, this being the lowest price at which the stock of the holding company ever sold. It managed to rally this week. The Dominion Steel Corporation is heavily indebted to the bank, the amount of such indebtedness being understood to be in the vicinity of $4,000,000. It is further stated by those who have considerable knowledge of the inner workings of the company that the present visit of Mr. Plummer to England is in connection with obtaining further money for the carrying on of the operations of the steel plant. The impression prevails in Montreal that the financing will take place through the issuing of additional preferred stock of the Steel Corporation, inasmuch as the sale of bonds would probably have to be made at such a low figure that it would reflect upon the price of the present issue.

In explanation of the weakness in the common stock, it is said that the bank is desirous of having the indebtedness of the corporation towards it reduced.

Reasons for Weakness Shown.

Owing to various factors, the industrial situation is uncertain at the present time, and the action of the United States in reducing its tariff is thought will bring down the selling price of iron and steel products in the United States and of increasing the competition of the Canadian market. In addition to this, the iron and steel interests in Canada have not obtained definite promise of assistance from the government. Under these circumstances it is felt that the dividend on the common stock may have to be passed, as its continuation would not contribute to the reduction of the bank loan.

As to the weakness in the preferred stock of the Dominion Iron Company, it would seem that the preferred stock of the holding company, the Dominion Steel Corporation, takes precedence over the preferred stock of the constituent companies, owing to an arrangement made last year by which both the constituent companies authorized an issue of $3,500,000, each, of 6 per cent. income bonds, making a total of $7,000,000, to be exchanged for $7,000,000 preference stock of the Dominion Steel Corporation. This $7,000,000 of 6 per cent. preference stock has been issued, and the funds were used for improvements and extensions to the two constituent companies. Whether any new issue of preferred stock would receive precedence in like manner is difficult to say. If there is any doubt concerning the earnings of either of the companies, the fact that each company has to supply $180,000 towards the dividend of the preferred stock of the corporation before the preferred shareholders of the individual companies receive anything, would have effect upon the price of these preference issues. Owing to the large earnings of the coal company, this sum would probably be easily available without in any way affecting the company's ability to meet its preferred charges.

Issue and Conditions Relative Thereto.

A new issue of preferred stock of Steel Corporation can only be put out under certain conditions. The total amount to be issued is not to be more than half the amount of common stock outstanding. Assuming that the common stock remained as it is at present, this would give the company the privilege of issuing up to a total of $18,448,100 preferred, of which $7,000,000 has been issued. The corporation has undertaken not to increase the preferred issue until the average yearly net earnings have for three years exceeded four times the amount of the yearly dividend on the preferred stock outstanding, plus the further shares proposed to be issued. The 6 per cent. preferred stock of the corporation is cumulative, which, together with the precedence given it, makes it a valuable issue.

Assurances have been given out from time to time as to the satisfactory business being done by the corporation this year. Sales and gross earnings are reported to be in excess of those of a year ago, but what a comparison of the net earnings would result in is difficult to say. At the last meeting of the directors it was promised that regular quarterly reports of the business of the company would be issued, and the Street is experiencing some disappointment over the nature of the information obtainable.

◆

Mr. F. Bowser, of the Burrard Peninsula joint sewage committee, recently appointed, says the board will issue $2,500,000 bonds in the early spring. These will be placed on the London market.

BENEFIT FARMERS BY CO-OPERATION

Legislation in Saskatchewan is to That End—Delisle is Newest Town

(Special correspondence).

Regina, Sask., October 28th.

The Saskatchewan legislature will commence its sessions on November 6th. The government at Regina has announced that Delisle will be the next town created in Saskatchewan.

Several years ago the Provincial and the Saskatchewan Grain Growers' Association were instrumental in the organizing of the Saskatchewan Co-operative Elevator Company, which company has been of benefit to the farmers, and a revenue producer. Later the government solved the hail insurance difficulty, and has also entered into numerous other schemes for the benefit of the farmers.

Every Branch of Farmers' Activities.

A department has now been organized in connection with the department of agriculture, for the direction of co-operative organizations. It is the intention of the government to have established in Saskatchewan a string of co-operative societies—local in their operations, but federated under one provincial head. These organizations, it is expected, will be concerned with every branch of the farmers activity, including the marketing of live stock and live-stock products, the importation of stock for the purpose of improving present herds, the handling of seed grain, and even the purchase of the necessaries of life.

Mr. Thomson, of the department of agriculture, in explaining the matter, stated that one suggested improvement, would be the organizations to market eggs systematically. All eggs will be collected once a day, and marketed at least once a week. Each egg will bear a stamp which can be traced back to the owner.

Crops Were Good.

Evidence of the fine crops raised in the Regina district, is given by the fact that Mr. Martin Wagner's 100-acre farm produced 4,150 bushels of wheat, all of which graded No. 1 Northern, and was sold to Messrs. Cook and Vanstone, millers, of Regina.

Another indication of a generally good crop is given by the fact that Hon. W. C. Sutherland, speaker in the Saskatchewan House, has 15,000 bushels of wheat from a 500-acre farm. The average is, therefore, 30 bushels to the acre

◆

SASKATCHEWAN BURNS ONE-FIFTIETH OF HARVEST'S RETURN

Damage to the extent of more than $1,100,000 has been caused by fire in Saskatchewan during the last six months, according to Mr. R. J. McLean, provincial fire commissioner. Such a loss was sustained between April 1 and September 30, and since that time there have been many other serious outbreaks. The value of the property which is going up in smoke annually in the neighborhood of $2,000,000, equal nearly to 2 per cent. of the total grain harvest of the province.

"During the past three months the losses have been heavy and in the investigation into the causes of the outbreaks much work has been done. The period has been an exceptionally busy one."

From 15 to 25 per cent. of the fires which have occurred within the last few weeks, Mr. McLean declared, were caused by gasoline explosions or originated from burning gasoline in one way or another. No fewer than four reports of such fires were received by the commissioner in one day.

"There have been a number of fires of suspicious origin, especially during the last couple of months. The circumstances have been such in many instances as to justify the conclusion that they were the work of incendiaries. Ten per cent. at least were of this character. If to these were added the number of fires the cause of which is reported to be unknown, but which there is good reason to believe were deliberately lighted by persons with criminal intent, the proportion would be very much larger. Several fires were caused by defective stove pipes, and there are many evidences to show that carelessness is one of the most fruitful of causes. Imbued with a happy-go-lucky spirit, the people of the west are frequently all too indifferent in matters of this nature. On the farms, when the cold weather season begins, the settlers are tempted to pile wood on their fires without thought as to the danger to which they may become exposed. Proper care is not exercised and frequently the destruction of the settler's home is the outcome.

VALUE OF LIFE INSURANCE

XXXVI.

Wholesale Houses and Business Policies

BY C. A. HASTINGS.

What a large number of old-established wholesale houses there are in the Dominion, but how many of them have taken adequate precaution to protect their business for the generations that are to come? To say, Let the future generation take care of itself is selfishness to a degree, yet it is often said.

These large business houses have usually been founded by one man, or a very few men, who have put not only all their capital into it, but also brains and work; these businesses can only be built up by sheer hard work and by continual hard work—but then, all this work has been a pleasure, for it always is a pleasure to see the fruits of one's labour ripening. What an injury—what a calamity it is to the members of a large business house, as well as to the community at large, to see that fruit turning sour after so many years.

Realize Worth of Services.

Yet one does see it occur—it is one of the risks we all run which caused that collapse—namely, death. There is no way to prevent it, but it can be eliminated to such an extent that the business would not be hampered, and the remaining owners can continue to serve their customers in the future as they have been served in the past.

No business house would dream of doing without fire insurance and other forms of protection, but they seem to dread life insurance—whereas, in reality, this is the most important form of insurance any house can carry. The best policy is a joint life, or a partnership policy. For example, two or three men or more are in business together, they realize the value of each other's services or capital, and the greater value of their combined services and capital, and build up, through a period of years, a business which is worth, say, $100,000 to each one.

Suddenly, without any warning, one partner is taken away by death, whose estate is in such a condition that his widow requires an immediate settlement. The surviving partners have all their spare cash locked up in their business: what are they to do They must stop doing business and realize in order to fulfil their obligations.

Use of Adequate Business Policies.

Furthermore, it is not only a question of the deceased partner's interest. They lose his services as well. He might have held the key, through his personality, to the entire business of the concern—a detail which is seldom found out until it is brought home to the survivors.

The premiums on a joint life policy are relatively small, and cannot be termed as an expense. As a matter of actual fact, the premiums build up the following advantages:—

(1). It is the only sure plan of providing a sinking fund.

(2). The loan feature is sufficient reason to justify the outlay.

(3). It is a powerful asset with which to gain the goodwill of creditors.

(4). It is equivalent to the purchase of government bonds on the instalment basis.

Can any business house afford to do without an adequate business policy? It is the only form of protection that can be carried on the books as an increasing asset and never a liability.

INTERIM FINANCIAL STATEMENTS FOR TOWNS

At the close of October the secretary-treasurers and auditors in each rural municipality, village, town and city of Saskatchewan, will issue an interim statement showing the condition of the finances for the first ten months of the year. One object of issuing this financial report is that the ratepayers may examine the same, and thus investigate to a certain extent at least the records of the municipal fathers, in good time before the first Monday in December, when nominations will take place throughout every municipal body in the province. These financial statements are available for every ratepayer, and should be studied by each elector who takes an intelligent interest in the public affairs of his own community.

At the beginning of next year the annual financial statement must be compiled by a competent auditor. The information thus secured and sent to the ratepayers will be supplied to every elector in each municipality.

HOW TWO LIFE COMPANIES LOST A PROSPECT

Aggressiveness Did Not Avail—Tact and Method Were Needed to Get This Man

(Related by The Prospect).

Not desiring a visit of aggressive life insurance solicitors, or to listen to their cajoleries, a certain young man desiring to investigate the benefits of insurance with a view to taking a policy on his life wrote to two companies. One was a Canadian corporation, the other a United States company doing a large volume of business in the Dominion. Replies were to be sent to the general delivery in one of Canada's largest cities.

The United States company's representative in his haste sent the following reply:—

"Yours of no date to hand, and contents noted. I was very pleased to note that you were interested in our endowment policy. We will be pleased to explain the same to you if you will pay us a visit. We do not care to send particulars by mail unless we know something about who we are sending them to. Your letter does not impress me that you have any desire to take out life insurance with our company and hence my reason for not supplying you with the information."

What the Canadian Manager Sent.

The Canadian company's city manager was more tactful in his correspondence and wrote:—"I have your favor of recent date asking for particulars of our endowment policies. Not knowing your age, I am unable to give you definite information. I should like if you would favor me by filling in and returning the enclosed card, advising me as to your age next birth-day and as to your address. It is always much more satisfactory to have a personal interview with us when considering the placing of life insurance, because not knowing your circumstances, we are not in a position to give you proper advice or really intelligent service. It is our aim to give to each client individual consideration and the very best service it is in our power to give. I should like very much if you could arrange to call and see us, or let us know when we could see you at your home."

But his tact there ended, for he handed the enquiry, not to a skilled canvasser, but to a "green" field man who hunted the city directory for names similar to that of the prospect and then proceeded to interview them. He missed the actual prospect but got an interview with his brother.

Were the Methods Wrong?

The prospect himself then reasoned thus. In neither letter is there any information. Why, are these companies hesitant to tell what they have to sell? Do they not think some purchasers of policies can make their own investigations and draw their own deductions regarding policies without the aid of a solicitor? and then he went elsewhere and bought his insurance.

The enclosure of a well-worded pamphlet in the letter, detailing actual experiences, would likely have whetted the prospect's desire for an interview with the city manager and resulted in securing the business.

ONE MILLION DOLLARS FOR POLES

In 1912, there were 608,556 poles purchased by Canadian railways, and telegraph, telephone and light and power companies, according to a recent bulletin of the Forestry Branch, Ottawa. This represents an outlay of $1,113,524, making the average cost per pole $1.83. The total number of poles purchased and the average price per pole increased somewhat from corresponding figures for 1911.

Cedar made up 86 per cent. of the total number of poles cut, the western cedar being increasingly used for this purpose. Balsam fir, tamarack and spruce made up the balance of the cut, the greater part of the poles being between 20 and 25 feet in length.

In 1912, there were purchased 21,308,571 ties representing a value of $9,373,869. This represents the large increase of 48.1 per cent. over the number of ties purchased in 1911, due probably to the extensive railway construction now going on.

Jack pine ties made up 36.5 per cent. of the total with an average value of $0.44. Cedar was second on the list with an average cost at point of purchase of forty-five cents, followed by Douglas fir, averaging 30 cents per tie. In all twenty-one different species of wood were used.

Ties treated with preservatives made up 8.5 per cent. of the number purchased. These were chiefly hardwoods, it being found more economical to treat the heavier, stronger woods, than those which are liable to fail from mechanical wear before they have time to decay. Some of the eastern railways are now using hardwood ties exclusively.

PROPOSED UNITED STATES BANKING SYSTEM

Principal Divisions With Their Powers—National Banks May Open Foreign Branches

The organization of the United States federal reserve banking system as proposed in the Owen-Glass bill, has passed the house of representatives, but which may be amended in the Senate, has been outlined in a skeleton form by the Guaranty Trust Company of New York, showing the three principal divisions of the system—the federal reserve board, representing the government control of the general currency and banking system; the federal reserve banks, those "public utility" banks which, through the individual and privately-owned banks in districts will give a central organization for banking in their respective districts and hold reserves; and finally the grouped member banks, which will deal direct with the people in all kinds of banking business.

The federal reserve board consists of seven members. They are secretary of treasury (ex-officio chairman), secretary of agriculture, controller of currency, and four to be chosen by president with consent of senate to serve for eight years, not more than one from each district, not more than two from same political party, one experienced in banking, one to be manager and one vice-manager. No member shall be an officer, director or stockholder of any bank.

The powers of this board follow:—1. To examine federal reserve banks. 2. To permit or require federal reserve banks to rediscount paper of other federal reserve banks. 3. To suspend for stated periods reserve requirements, except with reference to notes. 4. To regulate the issue of notes. 5. To add to and reclassify reserve and central reserve cities. 6. To suspend and with approval of president to remove officials of federal reserve banks. 7. To require writing off doubtful assets of federal reserve banks. 8. To suspend and appoint a receiver for federal reserve banks violating this act. 9. To perform all duties, etc., specified or implied in this act. 10. Federal reserve board may exercise functions of clearing house and may require federal reserve banks to do the same for member banks. 11. To levy upon federal reserve banks semi-annual assessments sufficient to meet estimated expenses of the board. The federal advisory council is to be composed of as many members as there are federal reserve banks, one chosen by each bank. It may act in advisory capacity only, to federal reserve board.

Federal Reserve Banks and their Powers.

There are not less than 12 federal reserve banks to be formed in cities designated from among reserve and central reserve cities, incorporated for 20 years.

Each controlled by nine directors:—Three chosen by member banks representing banks, three chosen by member banks representing public interests of district, and three by federal reserve board.

The capital of which is to be not less than $5,000,000. Shares $100 par value; not transferable, subscribed for by member banks in district. Earnings:—5 per cent. cumulative dividends; after this half to surplus up to 20 per cent. of paid-in capital and half divided, 60 per cent. to United States and 40 per cent. to member banks in ratio to average balances. Said 60 per cent. to constitute a sinking fund for outstanding United States bonds.

The federal reserve bank must keep in its vaults 33 1-3 per cent. of demand liabilities in gold or lawful money.

The powers conferred on the federal reserve banks will be:—

All powers of national banks except as limited by this act.

Accepts deposits from government and member banks and other federal reserve banks, paying interest on government deposits only.

Upon indorsement of member banks, may discount notes and bills of exchange, except those drawn or issued to carry stocks or securities. These notes not to run for more than 90 days, but under certain reserve conditions they may run for 120 days. (Federal reserve board have right to define character of bills eligible.)

Upon indorsement of any member bank, may discount acceptances of such bank, bearing signature of one other member bank, based on exportation or importation of goods and maturing in not more than six months.

Under regulation of federal reserve board may buy and sell prime bankers' bills and bills of exchange of kind named above.

May deal in gold and bullion.

May invest in United States, state, county and municipal bonds.

May buy and sell two-name bills of exchange bearing signature of member bank payable in foreign countries (90 days to run).

May establish branches in district, one for each $500,000 capital.

To establish each week a discount rate.

May open banking accounts and establish agencies in foreign countries to deal in two-name 90-day bills of exchange with consent of federal reserve board.

Collections by federal reserve banks to be flat.

Note Issue To Be United States Obligations.

The note issue is to be:—

Obligations of United States issued at discretion of federal reserve board—redeemable in gold or lawful money.

Issued to federal reserve banks—secured by an equal amount of paper accepted for rediscount, and to be a first lien on all assets of issuing bank.

Federal reserve banks allowed to substitute collateral.

Notes to be redeemed in gold or lawful money on demand at the United States treasury, or at any federal reserve bank; also must be redeemed when reaching treasury and must be forwarded for redemption when received at other federal reserve banks.

Federal reserve banks shall carry 33 1-3 per cent. gold or lawful money against outstanding notes—to be used to redeem these notes.

No federal reserve bank shall pay out notes of another bank under penalty of 10 per cent. face of notes.

Federal reserve board may require federal reserve banks to maintain on deposit in the United States treasury gold equal to 5 per cent. of notes issued—to be counted as part of above 33 1-3 per cent.

Federal reserve board has right to reject application of any federal reserve bank for notes.

Every federal reserve bank to pay interest not less than one-half of one per cent. per annum on notes issued to it.

National banks forbidden to issue or use clearing house certificates or other circulating obligations, except as above provided.

What National Banks Can Do.

Every national bank must within one year, and state institutions may at any time, join the federal reserve bank in their district, by subscribing to stock, a sum equal to 20 per cent. of their unimpaired capital, 10 per cent. to be paid in and 10 per cent. to be held subject to call.

National banks may open foreign branches if they have capital of $1,000,000.

National banks may accept drafts or bills of exchange drawn upon them for exportation or importation of goods having not more than six months to run.

National banks, if not in reserve or central reserve city, may make farm loans up to 25 per cent. of capital and surplus, on not to exceed 50 per cent. of value of property, maturing in not to exceed 12 months.

Any national bank, which, after one year from passage of act, fails to join the federal reserve bank in its district, shall be dissolved.

Requirement that national banks shall deposit United States bonds with treasurer repealed.

The reserves of the various banks to be:—

Country banks 12 per cent. (not including savings deposits)	5-12—Own vaults. 5-12—Federal reserve bank of home district—(for 14 months only 3-12). 2-12—In reserve or central reserve banks for 36 months, afterward either in own vaults or with federal reserve bank.
Reserve city banks 20% for 60 days 18% thereafter (not including savings deposits)	9-18—Own vaults. 5-18—Federal reserve bank of home district—(for 12 months only 3-18). 4-18—In central reserve banks for 36 months, afterward either in own vaults or with federal reserve bank.
Central reserve city banks 20% for 60 days 18% thereafter (not including savings deposits)	9-18—Own vaults. 5-18—Federal reserve bank of home district—(for 12 months only 3-18). 4-18—Either in own vaults or with federal reserve bank.

Savings Department's Assets To Be Separate.

National banks may set apart for a savings department a portion of paid-up capital and surplus—not less than $15,000 or than a sum equal to 20 per cent. of capital and surplus. Assets of savings and commercial departments to be kept separate.

May apply for power to act as trustee for mortgage loans

Must keep reserve equal to 5 per cent. of deposits.

Savings department may:—1. Loan funds on real estate. 2. Purchase securities authorized by federal reserve board. 3. Pay interest on its deposits.

Federal reserve board to formulate rules governing this department.

Then as to the refunding of United States bonds and retirement of national bank notes. The government 2 per cent. bonds deposited as security for national bank notes are to be exchanged for 3 per cent. 20-year bonds without the circulation privilege. No bank allowed to exchange in any one year more than 5 per cent. of its 2 per cent. bonds so deposited, except that in any case any bank does not turn in its full quota in any year other banks may use allotment.

On expiration of 20 years all 2 per cent. bonds outstanding to be paid and national bank notes redeemed or secured by lawful money.

Meanwhile national banks will continue to receive circulating notes based upon deposit of 2 per cent. bonds.

MONEY MARKETS.

Mr. J. Seath, jr., exchange broker, Traders Bank Building, Toronto, quotes local rates as follows:—

	Between Banks.

New Westminster		417,313	501,364	
Medicine Hat		532,319	523,189	

OIL, BUT HOW MUCH?

The following letter has been sent to *The Monetary Times* from Calgary, and is signed by Messrs. H. A. Sinnott, mayor; J. W. Campbell, president board of trade; O. G. Devenish, president industrial bureau:—

"Attention having been directed from many parts of the world to the reported discovery of crude petroleum in the vicinity of Calgary, it seems expedient that some announcement should be made on the subject with the purpose of preventing any false or harmful statement or statements being circulated with respect to the result of the oil-boring operations in this territory.

"After several months of boring, crude petroleum of a limited quantity was struck on October 7th, at a depth of 1,562 feet, in the boring upon the property of the Calgary Petroleum Products Company, Limited, located in Section 6, Township 20, Range 2, west of the fifth meridian.

"It is impossible to state whether the oil found merely came from a seepage, or indicates the existence of a large deposit at a greater or lesser distance or depth. Meanwhile boring continues with some promise of ultimate success, but until oil has been struck in volume, the public are warned against placing too great confidence in circulated reports, and particularly urged to exercise care in investments in oil leases, or in the stocks of companies or syndicates which have been or may be formed for oil exploitations."

ANOTHER BANK BONUS

The Bank of Toronto has declared a quarterly dividend of 2¾ per cent., and a bonus of 1 per cent. payable on December 1st, to shareholders of record of November 14th.

SHUSHANNA GOLD RUSH

In a circus-style advertisement in a Vancouver paper of an offering of shares, it is stated that the Shushanna Mining and Trading Company, Limited, was incorporated on September 20th, 1913, under the Companies Act of British Columbia. "The company's operations, therefore, come under the strict corporation laws of British Columbia, and the stock is fully paid and there is no personal liability." That is all right, but those strict laws do not guarantee that this or any other company has a real mine, or will ever have one.

SPANISH RIVER STATEMENT

There was considerable criticism of the make-up of the Spanish River Pulp & Paper Company's statement at the shareholders' meeting this week, especially regarding the placing of such items as deferred charges as commissions, discounts and expenses in connection with issues of securities on the "asset" side. A number of shareholders did not agree with this, and treated the items as a liability.

The following board of directors was elected: W. E. Stavert, J. Frater Taylor, W. K. Whigham, F. A. Szarvasy, T. H. Watson, H. E. Talbot, and G. H. Mead.

Net profits of $1,500,000 before paying bond interest on short term notes and sinking funds was the estimate made by Mr. T. H. Watson for the current year.

A special meeting of shareholders was held before the annual meeting, at which a by-law authorizing the issue of £300,000 short term notes for periods of two and three years was passed, and also a by-law reducing the number of directors to seven.

NORWAY SENDING PULP TO CANADA.

Monetary Times Office,
Montreal, October 29th.

A Norwegian steamer has reached Montreal with a cargo of wood pulp. This is the second importation of wood pulp into Canada within a few weeks. A local pulp and paper man explains that it is possible for Swedish and Norwegian manufacturers to ship wood pulp into this country for various reasons. There is a clause in the tariff which offers a rebate of 99 per cent. on the duty on pulp wood imported into this country, provided it can be proved that the pulp is manufactured into paper and re-shipped out of the country. Wood pulp can be manufactured in Norway and Sweden at a lower cost than in Canada, for the reason that Scandinavian labor is much cheaper and factories can be erected at a cost or from 30 per cent. to 50 per cent. less than here. There is also the question of ocean freight rates. Norwegian vessels can carry wood pulp from home ports to Canada at low cost; the boat which arrived this week was a new boat and was coming to this country for a cargo of grain. It therefore could carry wood pulp as ballast at a very low rate.

Local pulp men say that when the 99 per cent. rebate clause was put in the tariff, it was not intended that Canadian pulp and paper manufacturers should be adversely affected and it is probable that the matter will come up for discussion at the next session of parliament. The opinion prevails that within the next 10 or 12 months, 10,000 tons of Swedish and Norwegian pulp are likely to be imported into Canada.

◆

The Bankers' Bond Company, Limited, Toronto, have disposed of an issue of $109,000 15 and 20 year St. Catharines, Ont., debentures.

Sir Donald Mann denies the story circulated that the Canadian Northern Railway will ask for a government guarantee of a large bond issue.

STEEL PRODUCTS COMPANY DECLARED DIVIDEND

Long Established Companies Joined Forces—Capitalization and Outlook

The Ontario Steel Products Company, Limited, declared a dividend on their preferred stock last week to all shareholders of record on the 31st instant, and payable on the 15th November.

The Ontario Steel Products Company was formed for the purpose of acquiring the properties, assets, rights, claims and privileges of the Gananoque Spring and Axle Company, Limited, of Gananoque, and D. F. Jones Manufacturing Company, Limited, of Gananoque, the latter company being manufacturers of shovels, spades and draining tools.

These businesses were founded in 1860 and 1852, respectively, and are two of the oldest established manufacturing concerns in Canada. In 1876 the Gananoque Spring Manufacturing Company, Limited, was incorporated. In 1884 this company amalgamated with Byers Bros. & Company (manufacturers of axles) under the style of the Gananoque Spring and Axle Company, Limited. In the same year, D. F. Jones & Company also changed from private ownership, the D. F Jones Manufacturing Company, Limited, being incorporated to take over the shovel business.

Interested in Automobile Industry.

In 1909, realizing the development likely to occur in the automobile spring business, and desiring a factory in close touch with the Western Ontario trade, the Gananoque Spring and Axle Company purchased the Dowsley Spring and Axle Company, Limited, of Chatham.

The company's capitalization is as follows: $600,000 6 per cent. 30-year first mortgage sinking fund gold bonds, $750,000 7 per cent. cumulative preferred stock, $750,000 common stock.

After charging all expenses of operations of every description, including allowance for maintenance of the plants and properties, but excluding any special charge for depreciation, as certified by Messrs. Price, Waterhouse & Company, Chartered Accountants, the net earnings of the company are:—

1910	$ 92,347.49	
1911	105,442.84	
1912	101,937.68	
1913 (over)	118,000.00	
		$417,728.01
Being an average for four years of over		$104,432.00

The reduction in 1912 was due to partial suspension of operations during alterations and erection of extensive new buildings and equipment to all three plants.

Estimates for Current Year.

The estimated net earnings for year ending 1st July, 1914	$160,000.00
Fixed charges, interest on bonds	36,000.00
Balance for preferred stock, equal to 16.5 per cent.	$124,000.00
Preferred stock 7 per cent. dividend	52,500.00
Available for common stock, equal to 9.46 per cent.	$ 71,500.00

An issue of $150,000 of the company's preference shares is being handled by Messrs. Richardson & Company Montreal.

◆

ALTERATIONS IN CAPITAL

The following companies increased their capital stock:—

Landau & Cormack, Limited, from the sum of $50,000 to the sum of $200,000.

Calgary Tannery Company, Limited, from the sum of $50,000 to the sum of $100,000, and the capital of Royal Fruit Company, Limited, has been reduced from the sum of $50,000 to the sum of $25,000.

◆

UNIVERSITY COURSE IN HIGHER ACCOUNTING

A special course of lectures on Higher Accountancy is being held at the Arts Building, McGill University, Montreal. Enrollments may be made at any time during November. The course is comprehensive in scope, the lecturer being Mr. David S. Kerr, the well-known chartered accountant. His name is a guarantee of an intelligent and easily understood exposition of his subject.

BORROW FOR ESSENTIAL EXPENDITURES ONLY

Canadian Banking Authority Tells of Conditions in London

Sir Frederick Taylor, manager of the London branch of the Bank of Montreal, who has often contributed valuable articles to *The Monetary Times*, is visiting Canada.

He said at Montreal:—"All borrowers throughout the world that depend on the London market for their financial requirements have of late found, and are now finding it not only wise, but imperative to restrict the size of their flotation to the smallest extent possible and also to limit their commitments to essential expenditures.

"Furthermore, owing to the money crisis, which, by the way, is still in progress, the terms to business borrowers have been on a steadily rising scale, and far more onerous than for many years past.

Canadian Issues Will be Scrutinized.

"These remarks apply to Canada with this addition, that the reception accorded Canadian securities in London for several years past has vanished, and although our credit —I am speaking generally—continues good, and the Dominion as a whole will doubtless be able to continue to borrow in London, it will be with less ease, and consequently in smaller volume than in the past, besides which all offerings will be subject to careful scrutiny.

"It will of course be understood that my remarks do not in any way refer to the securities of the government of the Dominion of Canada, which are in a class by themselves.

Advantageous to Some.

"The British public have not lost confidence in Canada and Canadian institutions by a great deal," added Sir Frederick. "What I mean is that what might be termed the craze for Canada and Canadian investments is, let us say, in suspense. The condition in question was doubtless taken advantage of by certain individuals on both sides of the ocean, to their personal advantage, but greatly to the disadvantage of Canada's credit and the British investors' pocket."

◆

SASKATCHEWAN PROPOSALS AND MONEY VALUE

Regarding the proposals of the Saskatchewan royal commission to form a mortgage association, details of which were printed in *The Monetary Times* last week, a correspondent writes:—

"The recommendation that money be raised on the credit of the government, and that such money be loaned to farmers at cost, is all right and quite sound as far as I can see, provided the province is prepared to use its credit for this purpose, and the borrowers are prepared to run the risk of any losses which may result, up to the amount of their loans as is suggested. But why should such loans be confined to farmers? Surely the manufacturers, tradesmen, miners and others, living within the province, and whose credit is to be equally pledged, should have as much right to the advantages.

"Then again, why should the government stop at loaning money to farmers, and possibly others, when they could raise wheat and farm stuffs themselves? There is also no valid reason why the Saskatchewan government should not act as retailers themselves, and thus supply the consumers directly. This would do away with the necessity of establishing rural co-operative societies for purchasing and selling farm products and supplies as recommended.

"Saskatchewan, with its present little population, would, I think, be perfectly within its rights to do all this and more, but must not run away with the idea that it can in any way affect the value of money. The province can only strain its credit to a certain extent.

The Commissioners do not express any opinion as to the limitations of the borrowing powers, but the province can, of course, pledge its credit up to the limit, whatever that may be, and loan the proceeds to whomsoever they will at such rates of interest as will cover the cost of the money and its administration, etc., or at no interest at all should they so decide.

"The adoption of the suggestions of the commission would simply mean that other money seeking investment would look elsewhere than to Saskatchewan while the Utopian season lasts."

◆

A sequel of the appointment of a wiring inspector by the London, Ont., council, at its coming session will likely be the condemnation of the electric wiring in many London homes.

BANKERS, OLD AND NEW

No Prosperity Without Good Monetary Facilities—Modern System is Best

I can remember a time when all bank officers wore whiskers. The president of a bank was clothed in solemn black and cultivated a sad, lugubrious manner. Usually his son was cashier, and a near relative vice president. The whole atmosphere of a bank was hushed, depressing, saturated with gloom.

In those days I was a farmer; and there was a suspicion among farmers, founded more or less on experience, that the intent of the banker was to take advantage of the necessities of his clients.

Farmers did not trust the bankers as a rule; and certainly, as a rule, bankers did not trust the farmers. I can swear to that, says Elbert Hubbard in the Fra. My earliest childhood recollections go back to the time when a bank president drove out to our farm and took back to town with him our best milch cow, because we could not pay interest on the mortgage. The mortgage was a thing that gnawed night and day. If one stopped and listened closely he could hear it.

Food Supply and Transportation.

There is a new way, and this new way has crept silently, surely, into the business of banking.

Banking has always stood as a symbol of conservatism. It is wisely conservative yet, but gradually there have been instances of its being sensibly radical, for every sane man is both conservative and radical. "There is a time for everything," said Ecclesiastes.

No country is more prosperous than its farmers. When the farmers prosper, we all prosper. Food is the principal need; and we get our food out of the soil. The greatest agricultural district in the world is represented by taking the city of Chicago as a centre, and throwing a line out in a radius of five hundred miles in every direction. The principal products are corn, cattle, hogs, sheep, wheat, oats, potatoes and the industrious hen.

The second and most important thing in the world, next to food-supply, is transportation. Unless an article is at a certain place at a certain time, it possesses no value. Food separated from human bodies is of no avail.

If it is true that farming and railroading move together, hand in hand, as a business, it is also true that there is no great and permanent prosperity for either farmers or railroads unless there are good banking facilities.

What Banks Deal In.

A bank deals in just one thing, and that is credit. Ninety-five per cent. of all banking in America is carried on with the aid of checks. Ninety-five per cent. of all business men in a prosperous and growing country are borrowers at some time during the year. And in any event, every business man must know that if he wants money he can get it. The knowledge that he can get it often gives him the courage that pulls him through without it.

Good banking cements the entire business fabric into a solidarity of mutual faith and friendship. The men who produce wealth must have faith in the banks. When they have this faith they deposit their money, thus signifying their willingness to trust the bankers. Then the bankers must reciprocate by showing their willingness to trust legitimate business. The old-time banker, with his shaven upper lip, who sneezed twice and coughed once when you hinted at your need for credit, is now practically out of the game. The new way has eliminated him. Cold storage is one thing, banking another.

A good banker does not regard his customer with suspicion. The modern banker is human. He is a man who can laugh. He has a good digestion, a good circulation—he is on good terms with himself and with his customers. He has sympathy and imagination. He is a business man first, and after that a banker.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 24th, 1913:—

La Rose Mines, 71,900; Beaver Mines, 126,280; Dome Mines, 2,000; total, 200,180. The total shipments since January 1st, are now 31,497,356 pounds, or 15,749 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,500 tons.

ORGANIZED FARMERS AND THE TARIFF

Suggested Changes in British Preference—Co-operative Societies

At a meeting of the Canadian council of agriculture, at which representatives of the Saskatchewan and Manitoba Grain Growers' Associations and the United Farmers of Alberta were present, it was decided to take steps for a deputation representing the organized farmers of Canada to proceed to Ottawa, before or near the opening of the next session of parliament, to lay before the government representations embodied in a series of resolutions dealing with the tariff, co-operative legislation and a sample market.

Extend Benefits to Britain.

The resolution dealing with the tariff follows:—

"(1) That we urge the parliament of Canada to increase, at its first session, the British preference to at least 50 per cent. and to provide for a gradual increase from year to year until we have free trade with Great Britain in five years.

"(2) That parliament accept the offer of the United States of a free interchange of all agricultural and animal products between Canada and the United States.

"(3) That all foodstuffs not provided for in the above offer of the United States be transferred to the free list.

"(4) That agricultural implements, lumber and cement be transferred to the free list.

"(5) That pending the passage of legislation asked for herein, any duties now imposed under Canadian customs tariff which are the means of countervailing duties being imposed against any food products of the country by any foreign country be immediately removed.

"(6) That any tariff or trade concession granted to any other country be immediately extended to Great Britain."

Co-operatives of All Kinds.

Other resolutions ask for legislation to permit co-operative societies of all kinds, whether for credit or trade, and for the inspection of all scales in grain elevators and warehouses to be placed in the jurisdiction of the board of grain commissioners.

A resolution was also passed against the establishment of a sample market until such time as the grain growers are agreed that the same can be operated to their benefit.

SCHOOL DISTRICTS EMPOWERED TO BORROW MONEY

The following school districts have been authorized to borrow money. The particulars are given in order, name and number of school district, amount required, and name of secretary-treasurer:—

Saskatchewan.

Product, No. 2958, $1,200. Geo. Prior, Product.
Spyer, No. 3033, $1,700. Christ Holfer, Prussia.
Eastbrook, No. 2925, $1,200. L. Harvey, Eastbrook.
Inverness, No. 1265, $1,800. L. Findlater, Broderick.
Beaver Hills, No. 2973, $1,100. G. Maradyn, Hubbard.
Zentner, No. 2976, $1,200. Jos. K. Zentner, Govenlock.
Hudson, No. 3027, $2,000. R. H. Adams, Sunny View.
Osborne, No. 602, $350. A. E. Spence, Prince Albert.
Stearns, No. 1306, $18,000. G. Haskell, Buffalo Head.
Stony Vista, No. 3,000, $2,000. Thos. Annett, Fairmount.
Pensance, No. 3026, $2,000. Arnold Brammer, Penzance.
Glenbogie, No. 3022, $1,100. Chas. W. Ilsley, Glenbogie.
Golden Acre, No. 3064, $1,000. A. G. Schmidt, Hillsley.
Ottenhouse, No. 4 R. C. S., $1,500. Anton Loster, Grayson.
Avonlea Village, No. 979, $6,000. Thos. H. Clay, Avonlea.
Summit Prairie, No. 2916, $1,200. T. B. Odegaard, Canwood.
Wrightville, No. 3050, $2,000. R. J. Gordon, Wrightville.
Battleford, No. 71, $20,000. H. C. Burlingham, Battleford.

Alberta.

Airlie, No. 2980, $1,200. W. Cargill, Chauvin.
St. Lina, No. 2870, $1,200. E. Mageau, St. Lina.
Pearsonville, No. 2879, $1,600. E. A. Coe, Suffield.
Kingman, No. 2867, $1,250. T. J. Rogness, Kingman.
Ozark, No. 2989, $1,500. R. E. Baldridge, Gopher Head.

The Imperial Bank has opened a branch at Wynyard Sask., and a sub-branch at Candahar, Sask., under the management of Mr. T. B. Baker.

PROPOSED NORTH RAILWAY COMPANY AND ITS INTENTIONS

Will Connect Montreal With Transcontinental—Surveys and Expectations

Monetary Times Office,
Montreal, October 29th.

Mr. F. H. Clergue has been in Montreal in connection with matters of interest to the North Railway Company and Hudson Bay Steamship Lines.

The North Railway is a project in which Mr. Clergue became interested some time ago and has since been engaged in promoting. A charter was granted at the recent session of parliament. The object of the railway is to connect Montreal with the Transcontinental at a point almost due north of Ottawa. While this is the first object to be attained, it is also the intention to continue the line north to Nottaway on James Bay. In this connection appears the object of forming the Hudson Bay Steamship Lines. The steamships will ply between Nottaway on James Bay and Port Nelson on James Bay, the terminus of the Hudson Bay Railway, which is now being constructed by the government from La Pas down to Hudson Bay.

Effectiveness Has Evoked Discussion.

Much discussion has been indulged in from time to time as to the effectiveness of this new railway, more especially as the navigation of Hudson Bay and Hudson Straits is only open a few months of the year, and is said even during that period to be surmounted with great difficulties in the matter of ice movements from the north. The promoters will take advantage of any movement of grain or other freight arising in the north land.

Mr. Clergue in an interview stated that the company was assured of a splendid harbor at Nottaway, inasmuch as the latest government hydro-graphic survey showed a depth of 40 feet at that port at low tide.

Discussion has arisen as to whether or not the North Railway would pass through Ottawa to connect with the Transcontinental. Mr. Clergue stated that there was disagreement on this matter, inasmuch as if the railway touched at Ottawa, it would have to be diverted out of its direct route, thus increasing its mileage and requiring two hours' longer time to operate trains between Montreal and the Transcontinental.

However, if the government wished the railway to touch at Ottawa, the company would doubtless accede.

Survey Continues North.

The new railway has been surveyed as far as Manawaki on the direct route from Montreal, which is the terminus of the Ottawa-Manawaki branch of the Canadian Pacific Railway. It is the intention of the new company to touch at Manawaki and to cross the Gatineau at this point. If the government insists upon the new line going via Ottawa, the survey which has been completed will, in large part, be wasted. From Manawaki on to the Transcontinental, the present survey will be available. The survey is now proceeding northward from the junction of the Transcontinental to Nottaway.

Mr. Clergue expressed confidence in the new line and expects it will attract a heavy traffic in a few years. The head office of the new undertaking is in the Canadian Express Building, Mr. C. J. Smith, formerly general manager of the Richelieu and Ontario Company, being its general manager.

◆

Losses by fire at sea are becoming increasingly numerous. Last month the destruction of the Liverpool steamer Templemore by fire in the North Atlantic involved underwriters in a loss of £290,000. The emigrant ship Volturno was insured on a value of £450,000, but nothing is known of the cargo. In the nine months of this year so far no less than 336 total and partial losses through fire have been reported. In a recent underwriters' report it is remarked that "in spite of all efforts to ascertain the reason for these outbreaks, very little light has been thrown on the subject." It is agreed, however, that the great centres of danger are the coal bunkers, the cargo, and, last but not least, the electric installations.

◆

The Home Bank of Canada has declared a quarterly dividend of 1¾ per cent., payable on December 1st to shareholders of record November 16th.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Temiskaming Mines Company.—The Temiskaming Mining Company is preparing to issue a statement to shareholders stating that, owing to unfavorable condition of the mine, no dividend will be paid from profits made.

St. Lawrence and Chicago Navigation Company.—The St. Lawrence and Chicago Navigation Company are to issue $140,000 new stock to pay for the new steamer "James Carruthers." Shareholders of record November 15th have the privilege to subscribe at par; 25 per cent. is payable on December 15th, and 75 per cent. on January 5th next.

Granby, Limited.—It is understood, says a New York despatch, that the Granby Consolidated Mining, Smelting and Power Company, Limited, has taken option on several copper properties in British Columbia, but the examination of them has not progressed far enough to warrant the management in making any statement at present.

Quebec Central Railway.—Gross earnings of the Quebec Central Railway for the year ended June 30th last were $1,529,741 as against $1,354,811 in 1912. The net figures were $463,201 as compared with $410,835 the previous year. Surplus account was $223,831, an increase of $82,487.

The latter is equal to 6.61 per cent. on the outstanding capital stock, as compared with 4.15 per cent. the year before.

Dominion Power and Transmission Company.—Earnings of the Dominion Power and Transmission Company are showing increases, and for the twelve months ended August 31st, 1913, gross earnings were $2,734,051, as against gross of $2,473,003 for the preceding year. Operating expenses increased about $227,000, leaving net earnings of $1,203,655 as compared with a net of $1,170,320 for the year ended August 31st, 1912.

Temiskaming and Hudson Bay Mining Company.—A falling off in the amount of ore produced during the past year is shown in the annual report of the Temiskaming and Hudson Bay Mining Company. Production for the year was 659,972 ounces. The cost per ounce was 18 cents. Dividends paid during the year were 2,400 per cent., or $186,264. The mill ran steadily and treated 22,437 tons of ore in the year, an increase of 998 tons over the previous year. It was treated at a cost of $6,214 less.

Brazilian Traction, Light and Power Company, Limited.—The following is a statement of combined earnings and expenses of the tramways, gas, electric lighting, power, and telephone services, operated by subsidiary companies, controlled by this company, for the month of September, 1913:—

	1913.	1912.	Increase.
Total gross earnings ...	$ 1,965,326	$ 1,691,298	$ 274,028
Operating expenses	865,400	737,397	128,003
Net earnings	1,099,926	953,901	146,025
Aggregate gross earnings from January 1st	17,589,764	15,184,667	2,405,097
Aggregate net earnings from January 1st	9,467,355	8,182,546	1,284,809

West Kootenay Power and Light Company.—At the adjourned annual meeting of the West Kootenay Power and Light Company, held at Montreal, the company reported gross receipts of $415,413, an increase of $82,549. Operating expenses were $115,279, an increase of only $5,022, leaving a net of $300,134, or an increase of $77,527, while gross receipts registered a gain of approximately 25 per cent. Operating expenditure, including maintenance, was less than five per cent. higher, leaving a gain of just a little less than 35 per cent. in net earnings.

After the payment of interest on the West Kootenay Power and Light Company's bonds and sinking fund in connection therewith, interest on the Cascade Company's bonds and sinking funds, therewith, and the usual dividends on the preferred and common stock, a balance of $74,919 was carried forward to the credit of profit and loss, or $54,393 more than in the previous year. This result was obtained despite the fact that the company was paying dividends on an additional $100,000 preferred stock, and that a full dividend of four per cent. was paid on the common, against 2½ in the year previous. With the balance carried forward out of the year's earnings, the total at credit of profit and loss at the end of the year was $248,473.

The directors were re-elected, with the addition of Mr. J. Shaughnessy, who fills the vacancy left by the death of the late president, Mr. W. M. Doull. Mr. C. R. Hosmer, who was recently elected president, in succession to Mr. Doull, was re-elected to that office.

BANK DEPOSITS EXCEED A BILLION DOLLARS

September Bank Statement Indicates a Healthy Financial Condition, Despite Tight Money

	September, 1912.	August, 1913.	September, 1913.	Year's inc. or dec.	Month's inc. or dec.

---

*Including loans to municipalities.

The above are the principal items in the September bank statement. They reveal several interesting features, chief among which, perhaps, is an increase of about $25,000,000 in the deposits account, making that account, in excess of a billion dollars. The demand deposits are chiefly responsible for this result, their increase being $23,415,588 during the month. Loans to municipalities have been substantially reduced, the figures in July (the first month such a return was required), being $43,000,000; in August, $41,000,000; and in September, $37,000,000. Circulation expanded by $5,268,605, or 4.8 per cent. This is due to the crop movement, but there is still an aggregate margin of about $5,000,000 before it will be necessary to utilize emergency circulation.

At the end of September, the deposits in the central gold reserve totalled $3,350,000, these seven banks contributing as follows:—

Bank of Montreal	$ 500,000
Bank of Nova Scotia	500,000
Royal Bank	1,000,000
Dominion Bank	500,000
Standard Bank	100,000
Bank of Ottawa	250,000
Imperial Bank	500,000

For every dollar deposited in gold in this reserve the banks making the deposit may issue an equivalent in note circulation. This is in addition to the ordinary powers and those exercised under the provisions governing emergency circulation.

Canadian Loans for a Year.

The following table shows the trend of the Canadian loans accounts for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—September	$859,341,193	$75,205,261
October	879,676,655	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69.982,540
June	899,260,009	68,642,377
July	901,550,453	67,991,255
August	899,132,894	67,233,983
September	903,717,013	70,047,291

Current loans in Canada, (which we have made, include loans to municipalities for the sake of comparison), increased during September by about $4,000,000, or 0.50 per cent. This is the highest point at which current loans have been during the past thirteen months, and is $43,000,000 or 5.1 per cent. greater than a year ago.

Call loans in Canada made a gain during September of about $3,000,000, but compared with last year there is a decrease of about $5,000,000.

Loans Record of Four Years.

The following table shows the expansion of loans at home and abroad, during the past four years:—

September.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909 ..	$560,206,621	$32,981,183	$56,124,620	$131,634.384
1910 ..	668,976,522	40,190,240	62,428,576	103,534,884
1911 ..	749,007,607	35,587,127	67,717,991	93.517.076
1912 ..	859,341,193	39,440,472	75,205,261	112.767,036
1913 ..	903,717,013	46,402,913	70,047,291	86,639,411

Current loans in Canada during the past four years have almost doubled. Call loans have varied considerably, reaching a high point, $75,000,000, a year ago. Current loans abroad have not increased greatly, and call loans out of Canada show a substantial decline compared with the figures of September, 1909.

Deposits at Home.

The following table shows the course of domestic deposits accounts for the past thirteen months:—

	On demand.	After notice.
1912—September	$374,368,917	$640,536,652
October	383,814,572	640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,346
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608
June	362,769,928	622,928,969
July	356,585,196	621,347,388
August	358,321,925	619,032,847
September	381,737,513	621,249,585

The deposits record for the past five years is given in the following table compiled by *The Monetary Times*:—

September.	On demand.	After notice.	Total.
1909	$239,967,052	$474,103,799	$714,070,851
1910	273,529,461	545,630,667	819;160,128
1911	313,584,893	577,591,045	891,175,938
1912	374,368,917	640,536,652	1,014,905,569
1913	381,737,513	621,249,585	1,002,987,098

The substantial increase in deposits during September has once again brought the total of demand and after notice deposits to over $1,000,000,000. This record was first made in 1912, but was not maintained during the current year. It will be interesting to watch whether the billion dollar total can be maintained for any considerable time.

Reducing Municipal Loans.

During the past few months the process of reducing municipal loans has been steadily proceeding. Since July, there has been a reduction in bank loans to municipalities of $6,000,000, which doubtless represents the sale of large blocks of municipal securities. Every bank has a share of this business. Ten of the active banks, however, are responsible for nearly $30,000,000 of the total loans to municipalities amounting to $37,000,000.

The following table shows the individual banks that in September issued notes in excess of paid-up capital, taking advantage of the crop movement provision of the Bank Act:—

Bank.	Paid up capital.	Circulation.
Montreal	$16,000,000	$16,575,810
Nationale	2,000,000	2,059,705
Provinciale	1,000,000	1,035,928
Union	5,000,000	5,299,504
Royal	11,560,000	12,020,664
Standard	2,742,834	2,904,983
Ottawa	3,948,720	4,052,765
Metropolitan	1,000,000	1,037,377
Sterling	1,140,507	1,160,685

The bank statement, as a whole, represents a healthy financial position, despite tight money. Unbiased critics give credit to the banks for their conservative policy during the speculative days of the past few years—a policy which has resulted in business and financial quiet in 1913, rather than in business and financial panic.

Chartered Banks' Statement to the

T. C. BOVILLE,

Deputy Minister of Finance

PECULIAR FEATURE OF SURETY INSURANCE

Personal versus Corporation Suretyship—Varieties of Bonds Indicate Field of Operations

The variety of suretyship is limited only by the limitations upon the contracts between men and the obligations which one man may owe another. The mere enumeration of the titles of the various classes into which surety companies have divided their business for the purpose of obtaining and preserving statistics serves to indicate the wide field over which suretyship extends. The classes of suretyship were enumerated by Mr. W. H. Hall, of the Canadian Surety Company in a paper given some time ago.

Bonds guaranteeing the fidelity of employees of banks, trust and insurance companies, building and loan associations, railroads, other public service corporations, mercantile concerns, stock exchanges, benevolent and secret orders, clubs and hotels, labor organizations, theatres, and then, that none may escape, miscellaneous.

Bonds guaranteeing the fidelity of public officers of countries, provinces, states, municipalities, including treasurers, tax collectors, sheriffs, army officers, postmasters, clerks, etc., etc.

Bonds required in judicial proceedings—administrators, executors, guardians, trustees of express trusts, assignees, trustees and receivers in bankruptcy, liquidators, committees of incompetent persons, conservators; bonds on appeal, from judgments, on attachment, indemnity to sheriff, on injunction, mechanics' lien, stipulation for value, admiralty bonds, and land damage bonds.

Governmental Requirments are Met.

Bonds required for licenses, franchises, etc.; bonds under the Customs laws; under the Internal Revenue laws; common carriers' bonds; permit bonds, statutory warehouse bonds; bonds to permit the issuance of duplicates of lost securities, etc.

Bonds required in various commercial transactions; construction contract bonds, supply and miscellaneous contract bonds, bonds guaranteeing the safety of deposits in banks, lease bonds, etc., etc.

All these various classes of suretyship have but one thing in common. That is, that there is always a principal, a surety, and an obligee, and therein it is distinguished from insurance proper, wherein there is no principal, there being merely the insured and the insurer.

Referring to contract bonds, let us see specifically how closely related suretyship is to that phase of business activity.

If you contract to build a bridge, or to erect any kind of public structure, you must furnish a bond guaranteeing that you, or your surety, in case you fail, will complete the work or pay the damages.

Are you about to sign a street paving contract? The law requires a bond.

If you have contracted to furnish the government or municipality with supplies of any description, you will find that one of the conditions of the contract is that you must file a bond guaranteeing that you will fulfil it.

No matter what your activity in this respect may be, whether it means removing refuse, erecting buildings, laying sidewalks, spanning rivers, the community demands that your ability and financial strength alone shall not be relied upon, but back of all this must be further security in the shape of the bond of your surety, in case you fail.

Insurance of Business Hazards.

It is to the interest of every business man, therefore, to promote the spread of corporate suretyship, to the end that he may deal with whom he will and be able to obtain responsible guaranty that the party with whom he desires to deal will perform his contracts. In addition to that, suretyship so far partakes of the character of insurance that to meet the thousand and one business hazards which, if in any particular case they overtook an individual, might seriously embarrass him, the corporate surety can charge a sufficient fee to cover the average of such hazards and thereby distribute the risk over all the business, the consumer paying merely a premium to insure him against that average hazard.

There is a peculiarity in the surety business wherein it is different from other kinds of insurance business. In every other line of insurance the companies engaged in that insurance are the only sources from which that insurance can be obtained. There is not one of you that can insure his life except with a life office, or house against fire anywhere except in a fire insurance company. None of you can procure health or accident insurance except from a company engaged in that business, but in suretyship, if any of you has to give bond, you can go to your nearest neighbor and get that bond from him if you want to, and you might get it for nothing.

Any man with a house and a piece of land, or any man with a piece of land without a house can give a bond of suretyship of almost any kind whatever. So that the competition which we have is not the competition alone with other companies engaged in the surety business, but we have the competition of personal sureties all over the country.

But this is changing and some of the reasons among others why corporate suretyship is superseding personal sureties, and why it is becoming so strongly in favor, when a responsible company is selected are:—

First—Litigation is avoided. Second—Losses are paid promptly. Third—It obviates frequent inquiry as to the responsibility of bondsmen. Fourth—It prevents the possible removal from the jurisdiction of the bondsman. Fifth—It is a constant incentive to right doing on the part of the persons bonded. Sixth—It relieves those required to give bonds from incurring obligations to any one. Seventh—It avoids the possibility of the bondsman dying before the termination of the trust and his estate being distributed among his heirs. Eight—It relieves those who are asked to be sureties from doing so to their own discomfort and possible loss.

◆

ONTARIO MINISTER'S LARGE PROPHECY

"It is intended to place a crown land agency at the town of Hearst, Northern Ontario," says Hon. H. W. Hearst, Ontario minister of lands, forests and mines in his latest report, "and to open townships there for sale and settlement early in the coming year. It is safe to say," he adds, "that ultimately the region extending from the Quebec boundary on the east to the boundary of the Province of Ontario on the west, and from the Canadian Pacific Railway north to the height of land, will afford homes for millions of people and support them in comfortable circumstances on their farms. In addition, large towns are certain to spring up, which will afford markets for a good proportion of what the farmers raise. This may seem a large prophecy, but when it is remembered that the clay belt is as great in area as the present settled area of Ontario, there is no exaggeration in the statement."

◆

CANADA SUPPLIES TWO-THIRDS OF WORLD'S NICKEL

Two-thirds of the world's nickel supply comes from Canada. The Canadian nickel ore deposits occur in Ontario, and the only other extensive deposits from which large outputs are obtained are in New Caledonia, France. The mines there, which produce practically the remaining third of the world's supply, are controlled by France, and the Krupp Company is understood to have obtained some control in the interests of Germany. The most important use of nickel is in the manufacture of nickel steel, largely required for the manufacture of guns. The Canadian export, therefore, would be of great importance in case of war, and other European countries might be seriously hampered should the output be curtailed or stopped.

The mines of the Sudbury district *The Monetary Times* is informed by the provincial bureau of mines, continued to increase their output this year and the outlook is for still further production. The Canadian Copper Company and the Mond Nickel Company remain the sole producers of nickel matte. Recent drilling operations have proven the existence of very large ore reserves. The Alexo mine, on the Porcupine branch of the Temiskaming and Northern Ontario Railway is interesting as being separated about 140 miles in a direct line from the Sudbury mines, and so proving the existence of ore quite outside the older field. The shipments are made to the Mond Company's new smelting plant at Coniston, which came into operation early last year.

A London writer says:—"Canadian nickel ores have not the advantage of a monopoly, such as Germany possesses in the case of potash. Deposits of the ore are being developed elsewhere, at present no doubt on a relatively small scale, whilst others are being reopened, such as those in North and South Carolina in the United States, in Greece, and other countries. A determination by Canada to restrict the export would give an enormous impetus to these enterprises. Whether they could increase their output so as seriously to compete with Canada for the world's market may be doubted, but it is possible."

◆

At the annual meeting of the Charles Dalton Fox Company, a dividend of 40 per cent. was declared, profits for the year being $254,000, on a capitalization of $625,000. Enough stock of 1914 had been sold in advance to warrant 20 per cent., even if no other sales were made. Foxes are now on the new ranch near Charlottetown. The company will also raise mink and skunk next year. The old directorate was re-elected, including Messrs. Alonzo Smith of Pugwash, and A. Loggie of Loggieville.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Aylmer, Ont.—October 18—Mr. E. Schiber's residence. Loss and cause unknown.

Central Onslow, N.S.—October 18—Mr. J. Wilson's barn. Loss and cause unknown.

Tilbury, Ont.—October 22—Mr. D. Burns' storehouse. Loss $1,500. Cause unknown.

St. Hilaire, Que.—October 18—St. Antoine parish church. Loss $45,000. Cause unknown.

Radville, Sask.—October 22—Mr. C. S. Hill's oil house. Loss $1,500. Cause unknown.

Kelowna, B.C.—October 16—Mr. C. Clarke's residence. Loss $2,000. Cause unknown.

Chilliwack, B.C.—October 17—Mr. W. H. Bloomer's residence. Loss and cause unknown.

Haileybury, Ont.—October 23—Tug "Scotsman" damaged. Loss and cause unknown.

Ottawa, Ont.—October 17—Osgoode Hotel stables. Loss $500. Cause, supposed incendiary.

Canterbury Station, N.B.—October 22—Mr. H. N. Grant's barn, etc. Loss $5,000. Cause unknown.

Elk Lake, Ont.—October 16—Mr. A. Skill's residence. Loss $3,000. Insurance $2,000. Cause, stove.

Hamilton, Ont.—October 23—Unitarian Church, Main and Walnut Street. Loss $100. Cause unknown.

Owen Sound, Ont.—October 22—Mr. W. G. Morgan's clothing store. Loss unknown. Cause, wiring.

Swift Current, Sask.—October 16—Mr. H. McCoy's residence, south-east of city. Loss and cause unknown.

Listowel, Ont.—October 17—Mr. J. Tinnerg's blacksmith shop. Loss, stock and tools, $300. Cause unknown.

Vancouver, B.C.—October 20—St. Peter's Church, Main Street. Loss unknown. Cause, supposed incendiary.

Mosa Township, Ont.—October 21—Mr. N. Munro's barns. Loss $3,000. Insurance $1,000. Cause unknown.

Cowansville, Que.—October 21—Mr. T. Strange's barn. Loss $2,000. Insurance $1,500. Cause, fuse from dynamite charge.

Selkirk, Man.—October 20—Mr. E. Millidge's barns, Superior Street. Loss $7,000. Insurance $2,500. Cause unknown.

Victoria, B.C.—October 19—Canadian Pacific Railway ferry "Adelaide." Loss slight. Cause, supposed dropped cigarette.

St. Thomas, Ont.—October 26—Michigan Central and Canadian Pacific Railway freight sheds. Loss $1,000. Cause unknown.

Clifford, Ont.—October 25—Mr. J. Range's furniture workshop, and Mr. C. H. Willett's barber shop. Loss and cause unknown.

Welland, Ont.—October 24—Mrs. G. Hullon's residence, Mill Street. Loss $200. Insured with Queen's Insurance Company. Cause, supposed defective chimney.

Edmonton, Alta.—October 15—Great West Clothing Company, 448 Jasper Street East. Loss and cause unknown. Lewis Brothers Cafe, First Street. Loss unknown. Cause, range.

Winnipeg, Man.—October 16—Mrs. Potter's residence, 137 Carlton Street. Loss $500. Cause unknown.

October 20—Mr. F. Tozer's residence. Loss $400. Cause unknown.

Montreal, Que.—October 17—St. George's School, Bernard and Waverley Streets. Loss $10,000. Insurance as follows:—Guardian, $35,000; Connecticut, $10,000; Union of Paris, $10,000; Norwich Union, $6,000. Cause unknown.

London, Ont.—October 27—London Bed and Mattress Company's factory. Loss $17,000. Insurance $17,000. Cause, supposed wiring. Ross and Wright, adjusters for the assured.

October 21—P. Forgue's barn, 633 Chambord Street. Loss and cause unknown.

October 22—Brodeur Company, Limited, premises, 84-86 St. Peter Street. Loss $25,000. Insurance on buildings, Equitable, $22,000; loss, $5,000. On stock, Mount Royal, $5,000, and Royal, $7,000. On fixtures, Equitable, $1,500; Norwich Union, $2,500, and Royal, $1,000. On paintings, Mount Royal, $2,500. Cause unknown.

Toronto, Ont.—October 14—W. Long Piano Company's store, 164-166 Queen Street West. Loss, stock, $100; building, $50. Cause, ignition of boiling wax. Burton and Young's store, rear 176 Christie Street. Loss, building, $300; contents, $25. Cause unknown.

October 15—Moving picture theatre, 334 Queen Street West. Loss $500. Cause, overheated electric heater. Mr. J. Slaughter's premises, 61 Carlton Street. Loss $100. Cause, sparks from chimney. Sheds rear 32, 34, 36 Mercer Street. Loss $185. Cause unknown.

October 16—Mr. J. Coughlan's residence, 514 Adelaide Street West. Loss, building, $15; contents, $25. Cause unknown. Mr. R. Bigley's foundry, rear 252 Macdonell Avenue. Loss $400. Cause, hot castings ignited woodwork.

October 21—Canada Foundry Company's shed. Loss $200. Cause unknown.

October 22—Auto, 12 McMurrich Street Loss $100. Cause, engine backfiring. Mr. A. Kissock's carpenter shop, rear 193 Carlton Street. Loss, contents, $50; building, $10. Cause unknown.

October 22—Mr. J. Rotterdam's store, 911 Yonge Street. Loss, contents, $50; building, $20. Cause unknown. Mrs. Bradfield's shed, rear 200½ Carlton Street. Loss, building, $200. Mr. W. H. Harris' shed, rear 202 Carlton Street. Loss, contents, $100; buildings, $200. Miss Hunter's shed, rear 204 Carlton Street. Loss, contents, $400; building, $200. Dr. W. H. Mosely's shed, rear 206 Carlton Street. Loss, building, $50. Cause unknown.

October 23—Messrs. J. C. Greene Company, 72 Wellington Street West. Loss $50. Cause, spark from motor. Messrs. Meen and Meen's office, 1308 Queen Street East. Loss $150. Cause, overheated grate. Toronto Silver Plate Company's premises. Loss, building, $25; contents, $150. Cause, sparks.

October 25—Mr. A. Martin's residence, 999 Queen Street East. Loss, contents, $50; building, $5. Cause, papers falling on stove.

October 26—Mr. D. Discardis' store, 202 Teraulay Street. Loss unknown. Cause, incendiary. Mr. S. A. Frost's store, 284 College Street. Loss, contents, $200; building, $200. Cause, defective stove pipe.

October 27—Mr. W. Speer's automobile, 1764 Dundas Street. Loss $200. Cause, spark from pipe ignited gasoline. Mr. W. Gardner's auto, 1609 Queen Street West. Loss unknown. Cause, collision. Store, 341 King Street East. Loss $25. Cause, fumigating building.

October 29—522 Delaware Avenue, owned by Mr. J. Hotchkiss. Loss $800. Insurance, Royal, $900. Cause unknown. Ross and Wright adjusters for the assured.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Milestone, Sask.—Mr. O. K. Wilson's elevator, etc. Loss, building, $7,000. Insurance, factories, $5,000; contents, $18,000. Insurance, Rimouski, $5,000; Phoenix, $5,000; Factories, $5,500. Cause, incendiary.

◆

GRAND TRUNK TRAFFIC STATISTICS

The following table shows the traffic statistics of the Grand Trunk Railway Company for 1913 compared with the returns for 1912,—

	1913.	1912.	Increase or Decrease.
Passengers carried	5,978,560	5,530,072	+ 443,488
Average fare per passenger	46.80d.	44.95d.	+ 1.85d.
Tons of freight and live stock	11,181,698	9,388,829	+ 1,792,869
Average rate per ton	61.56d.	63.81d.	— 2.25d.
Tons carried one mile	2,025,819,981	1,779,753,535	+246,066,446
Earnings per train mile	95.39d.	89.75d.	+ 5.64d.

The average rate per ton mile on the entire freight business was 0.69 of a cent, compared with 0.68 of a cent in the corresponding half-year.

The working expenses, excluding taxes, amounted in the half-year to £3,149.262, or 72.14 per cent. of the gross receipts, as compared with £2,748,575, or 71.68 per cent., an increase in amount of £400,687, and in the proportion to the gross receipts of 0.46 per cent.

STRONG POINTS IN CANADIAN BANKING

Dominion Has Been Fortunate in Surmounting Obstacles and in Its Financial Administrators

As a "new" country passes from stage to stage in its opening up and general development, its government is faced with a continuous series of obstacles to be surmounted, dangers to be avoided, financial, economic, and administrative problems to be solved, intimates the London Economist in a recent article. But in point of importance and of difficulty no problem exceeds that of establishing and maintaining a sound and elastic banking system.

The achievement of this task constitutes the greatest safeguard against the hundred and one perils that follow in the train of rapid development and heavy borrowing. In this respect Canada has been most fortunate, for she has been able to boast among her administrators a series of men who, by their ability and financial knowledge, have succeeded in elaborating a system which has often evoked the envy of other countries. Indeed, only a very few months ago President Woodrow Wilson, comparing the two countries, is reported as saying: "Canada is vastly ahead of us in things that make for more orderly life and steady business. We have staggered from panic to panic, while their banking system, their financial system, and their corporation system are on a stable basis that we have not known or reached America is far behind."

Began With Provincial Charters.

The history of Canadian banking may be said to begin with the years 1821 and 1822, when the provinces of Ontario and Quebec granted charters. Other provinces quickly followed suit. All these early charters were on the same plan; they were taken as the basis for the Canadian Bank Act of 1871, from which, although revision has been applied from time to time, no really radical changes have been made.

Of course, the banking system in the Dominion, as elsewhere, has had its weak spots, bad banking, and occasional failures; but, generally speaking, the system has proved itself capable of withstanding creditably crises which caused much more serious dislocation elsewhere. A feature of the Dominion bank law is the obligation for a revision every ten years. Thus every decade legislators are able calmly and leisurely to review the position in the light of recent experience, and to discuss with the leading authorities possible readjustment of detail. Moreover, this statutory periodical revision saves the Dominion from the sudden outcries for reform which are prominent in the financial and political financial circles in the United States and other countries.

Nor must it be forgotten, when credit is given to the Canadian for working out his own banking salvation, that the guiding hand of the Colonial Office has not seldom lent valuable assistance by the employment of its veto on ill-considered proposals, and dangerous departures from the bed-rock principles of the system.

Wherein the Strength Lies.

The strongest points of the system are the elasticity of the note issue and the widespread network of branches—two features essential to the many-sided development of the hitherto untouched resources of a new country. The decennial revision of 1910 contained an important clause, granting considerable relaxation of the note issue regulations at the time of year when the movement of crops causes a strain upon monetary resources. By this provision, banks are permitted, in the period October 1st to January 31st, to increase their note issue by an amount not exceeding 15 per cent. of the combined paid-up capital and reserve.

There are, however, special provisions as to note issue for the Bank of British North America. As regards the growth in the number of branches, whereas thirteen years ago four banks with London branches had less than 100 branches, seven banks in the figures for 1913 have something like 1,000 between them. The rise in the bank deposits is phenomenal; from 41 per cent. of total liabilities in 1890 they grew to 52½ per cent. in the next decade, and by 1910 to 72½ per cent. The decrease of discounts and advances in 1908 and 1909 is a result of the American crisis Since those years discounts and advances have risen very greatly, money at call having been withdrawn from New York to meet the increasing requirements of Canadian activity.

Union Bank Was New Arrival.

The figures this year include one more bank than last year, the addition being the Union Bank of Canada. Even allowing for this addition, there has been a large increase in deposits and in discounts and advances, while the effect of the new regulation mentioned above is to be seen in the continued growth of the note issue. An interesting clause of the revised Bank Act which has recently come into force is that the banks in future will have to state their loans to municipalities. This is of importance, in view of the rather common idea that Canadian banks are so heavily loaded with loans to municipalities that the difficulty of floating issues on the London market is a very serious matter for them, because the loans tend to become fixtures. These items, therefore, in the latest reports of the Canadian banks deserve attention. It will be seen that the amount of such loans in the aggregate is very large. In view of the common anxiety expressed at present as to the inflation of Canadian land values, it is, perhaps, worth while to repeat here the well-known fact that Canadian banks are not permitted to make advances on the security of real estate.

PROVINCIAL PREMIERS' RECOMMENDATIONS

These five proposals have been placed before Premier Borden as the unanimous requests of the interprovincial conference at Ottawa:—

That the provincial subsidies be increased by an amount equal to ten per cent. of the combined customs and excise revenues of the Dominion.

That the salaries of Lieutenant-Governors be increased.

That the executive heads of the provinces be known as "Governors" instead of "Lieutenant-Governors."

That the Dominion government take up the question of the stock and debentures of the provincial governments being added to the British trustee list.

That the postal regulations of the Dominion be amended to provide for the free carriage of Provincial Government documents.

SATISFACTORY CONTRACTS HELPED CONSUMERS' GAS COMPANY

A satisfactory twelve-month was experienced by the Consumers' Gas Company of Toronto, as evidenced from the address of President A. W. Austin, who noted "A year characterized by the greatest expansion of business in the company's history," at the company's sixty-fifth annual meeting. and the following figures:—

The output of gas for the year totalled 3,492,087,000 cubic feet, an increase of 372,339,000 over the output of the preceding year. Gas rental amounted to $2,294,308 from 91,284 meters, against $2,058,140 from 82,022 meters in the preceding year. New services to the number of 7,903 were put in during the year, and 36 miles of street mains were laid.

A balance of $841,981 is shown for the year ended September 30th, this together with $13,417 from the reserve fund, was allotted as follows:—Interest, $8,781; dividends, $445,160; plant and building renewal fund, $401,457; this latter now totals $1,027,013; the previous year's total being $978,759, out of which there was expended $353,203. The company's assets are valued at $9,889,152, the chief items being real estate. plant and equipment, $8,854,518.

The president pointed out that had the company been fortunate enough to make favorable contracts in advance, the rise in the market price of coal and gas oil would have made a difference of more than two hundred thousand dollars per year to the company, and that they would have had to raise the price of gas had they to pay the current prices for these commodities.

Mr. Austin's remarks included a forecast as to the need of further financing owing to the requirements of such a growing city as Toronto. He said the plant necessary for a successful gas works cannot be erected in a short space of time, consequently we have to look far ahead if we are to take care of all the business that will likely be offered. To do this means also financing ahead, and as the amount of capital required as the company grows will be larger in proportion than in the past, with this fact before us it is a very important question for your directors to consider this coming year. It appears to us that some means of disposing of stock, other than the present authorized modes of auction or tender, should be introduced. In the past, with smaller amounts of stock offered, the requirements were mostly met by auction sales, but our experience of late has demonstrated that that method is not satisfactory. Under the recent power given to us to sell by tender your directors will likely make an offering by tender in the near future. While our credit is good and our bankers have been accommodating, still we do not like borrowing any more than we can help, especially when interest rates are so high.

The work of Mr. A. Hewitt, the general manager, was referred to by the president in complimentary terms, and mention was made of the fact that the company's clientele would soon number one hundred thousand.

The following rural telephone companies have been incorporated in Saskatchewan: Bright Rural Telephone Company, Limited, Loreburn, $240. Wilcox Independent Rural Telephone Company, Limited, Wilcox, $100.

GRAIN, LAND AND TRACTION COMPANIES

Building and Allied Interests Are Prominent in This Week's Incorporations

New incorporations number sixty-five, the head offices of these companies are located in six provinces. The total capitalization amounts to $25,632,000, the largest companies being as follows:—

The Canadian North-West Grain Company, Limited, Saskatoon, Sask.	$ 1,000,000
Ottawa Traction Company, Limited, Ottawa, Ont.	10,000,000
Canadian Northern Town Properties Company, Limited	10,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	17	$ 1,209,500
Manitoba	1	100,000
Alberta	16	455,000
Saskatchewan	8	1,297,500
Ontario	22	22,520,000
New Brunswick	1	50,000
	65	$25,632,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Wolseley, Sask.—The Wolseley Tennis Club, Limited $2,500.

Empress, Alta.—The Empress Hotel Company, Limited. $40,000.

Redcliff, Alta.—Redcliff Properties Company, Limited, $15,000.

Strathmore, Alta.—Strathmore Trading Company, Limited, $20,000.

Regina, Sask.—Capital City Investment Company, Limited, $175,000.

Bolton, Ont.—Bolton Bowling Club. R. Smith, E. A. Walshaw, A. A. McFall.

Prince Albert, Sask.—The Safety Storage and Distributing Company, Limited, $25,000.

Drummondville, Que.—Napoleon Mill, Limited, $75,000. N. Garceau, A. Mercure, N. Lauziere.

Walkerville, Ont.—Heinze Electric Company, Limited, $50,000. P. Butler, B. B. Ames, B. Ames.

Georgetown, Ont.—Gummed Papers, Limited, $50,000. R. R. Barber, E. R. Colbert, G. F. McFarland.

Ottawa, Ont.—Ottawa Traction Company, Limited, $10,000,000. J. F. Orde, E. J. Chambers, M. B. Moir.

Dorchester, N.B.—Oxford Worsteds Linens, Limited $50,000. C. S. Hickman, J. F. Teed, A. B. Pipes.

Saint Hyacinthe, Que.—Le Credit National, Limited, $15,000. L. A. Cadorette, L. Langelier, O. Pothier.

Fort Frances, Ont.—The A. M. Shaw Company, Limited, $40,000. A. McE. Shaw, A. E. Carter, J. S. Nolan.

Windsor, Ont.—Seely Manufacturing Company, Limited, $100,000. J. E. Smith, A. C. Leonard, E. C. Smith.

Guelph, Ont.—The Peerless Rubber Company, Limited. $160,000. J. H. McElderry, A. B. Cabeldu, P. J. Ryde.

Chatham, Ont.—The National Forging Company, Limited, $100,000. G. H. Quennard, R. W. Hees, E. G. Odette.

Napierreville, Que.—Napierreville Lumber Manufacturing Company, Limited, $49,000. J. E. A. Decelles, A. Cyr, A. P. Beaulieu.

Winnipeg, Man.—The Manitoba Electric Water Heating Company, Limited, $100,000. R. R. Lockhart, G. A. Glines W. E. Wright.

Three Rivers, Que.—Cap de la Magdeleine Manufacturing Company, Limited, $49,500. G. A. Coderre, J. Narcisse Boivin, R. Beauchesne.

Calgary, Alta.—Toole, Peet & Company, Limited, $100,000. National Electric Manufacturing Company, Limited, $10,000. F. A. Nutting & Company, Limited, $10,000.

Saskatoon, Sask.—The Western Club, Limited, $20,000 The Hoffman Agencies, Limited, $25,000. The Canadian North-West Grain Company, Limited, $1,000,000. Ciceter Estate Elevator Company, Limited. $25,000. Quill Plains Colonization Company, Limited, $25,000.

Hamilton, Ont.—Hamilton Home Construction Company Limited, $100,000. T. A. Silverthorn, J. H. Flett, C. Bowman. Canadian Employment Bureau, $40,000. W. A. Welsh, J. C. Truax, S. E. Barlow, Caledonia Real Estate Corporation, Limited, $200,000. L. Mitchell, F. H. Gage, T. J. Quinsey.

Edmonton, Alta.—The Evangelical Lutheran Immanuels Gemeinde in Edmonton. Uncas Land and Development Company, Limited, $10,000. The Edmonton Canoe Club, Limited, $10,000. Sullivans, Limited, $25,000. Central Peace River Holdings, Limited, $25,000. La Fonciere Francoise, Limited, $40,000. New Method Laundry, Limited, $10,000. Automobile Supplies Association, Limited, $10,000. Esdale Press, Limited, $100,000. Edmonton Soap Works, Limited, $20,000. Delicatessen, Limited, $10,000.

Montreal, Que.—Biens-Fonds St. Leonard, Limited, $100,000. H. Vannini, C. Beauchamp, E. D. Marceau. The Pierson Gas Producer Plant Company, Limited, $100,000. P. V. Rougier, A. Decary, A. de Montgaillard. Parker's Limited, $50,000. G. G. Parker, H. C. Parker, R. F. Stockwell. East End Sand and Gravel Company, Limited, $50,000. J. A. Mann, C. C. MacKinnon, H. R. Mulvena. Davies, Clark, Limited, $30,000. T. H. Davies, E. E. Howard, H. U. P. Aylmer. Michelin Tire Company of Canada, Limited $40,000. A. E. Woodworth, A. B. Wright, A. Charters. Anglo-Canadian Film Exchange Company, Limited, $100,000 A. D. Munro, L. P. MacLeod, J. Law. Rideau Shoe Company, Limited, $1,000. G. V. Cousins A. E. Elder, P. F. Brown. The W. W. Butler Company, Limited, $100,000. J. A. Mann, C. G. MacKinnon, H. R. Mulvena. Professional Service Association, $125,000. A. Vincent, J. R. Giroux, J. B. A. Pelletier. The Florenceville Land Company, $25,000 J. A. Mann, C. Gordon MacKinnon, H. R. Mulvena. La Compagnie Ouvriere de Garanties et Placements, Limited, $250,000. G. Mayrand, J. J. Johnson, J. A. Chagnon. City and District Land and Investment Company, $50,000. C Gaudet, E. W. Parker, J. S. G. Dillon.

Toronto, Ont.—Dominion Tactile Press. A. Gate, G. J Gate, C. Elliott. The Cobalt Reduction Company, Limited, $350,000. A. Chenier, P. Stokes, E. Glen. The Uxbridge Foundry Company, Limited, $40,000. W. S. Thomas, W. J. Mitchell, R. J. Christie. General Investments. Limited. $40,000. A. H. Goodenow, A. H. Moore, D. A. Atkinson. Toms Contracting Company, Limited, $40,000. F. P. Toms, C. G. Toms, H. H. Toms. Oshawa Central Land Company, Limited, $40,000. R. Perkins, J. N. Dean, G. B. Scholl. Coleman Fare Box Company, Limited, $75,000. A. Burrows. W. H. Knowlton, A. C. Burrows. Niagara Farms, Limited, $30,000. R. H. Cuthbert, J. H. Whitcomb, M. Morgan. Ice Cream Cones, Limited, $40,000. Alan Gilmour, A. Cochrane, W. C. Johnston. The Van Buren Excavator Company, Limited, $75,000. W. A. J. Case, H. E. Wallace, J. B. Taylor. Canadian Northern Town Properties Company, Limited, $10,000,000. G. Ruel, R. H. Montague Temple, A J. Reid. Gray Pneumatic System, Limited, $500,000. J. MacI. Duff, F. Regan, W. G. Hanna. Black Banks Pedigreed Prince Edward Island Silver Black Fox Company, Limited, $450,000. C. F. Ritchie, J. H. Oldham, W. J. Beaton.

CANADA BOUGHT LESS FROM BRITAIN

Official figures of the trade between Canada and Great Britain for the month of September are as follows:—

	September, 1913.	September, 1912.
From Canada.		
Wheat	£6,065,423	£6,322,109
Oats	624,558	558,879
Maize	64,773	17,773
Cattle	36,212	140,315
Bacon	689,207	947,569
Hams	280,778	181,614
Butter	4,522	134
Cheese	2,656,571	2,967,386
Canned salmon	600,586	633,990
To Canada—		
Spirits	510,460	515,988
Sugar	36,445	115,831
Iron ore	2,699	9,102
Wool	79,165	93,862
Pig-iron	118,652	165,334
Rails	3,784	11,822
Ship, etc., plates	33,869	19,087
Galvanized sheets	400,162	252,697
Pig lead	103,717	184,058
Unwrought tin	134,038	149,942

Mayor Rudolph Blankenburg, of Philadelphia, announces that the $2,200,000 thirty-year 4 per cent. bonds, authorized by the Philadelphia City Council on October 3rd, will be offered at par, on public subscription, beginning next Monday. In view of their success in selling the major portion of a $7,000,000 issue last May, Mayor Blankenburg, and his associates, think that they will have no trouble in placing this loan "over the counter." Such sales in Canada have not proved a great success.

COMPETITION AFFECTS LUMBER TRADE

The export trade of lumber from Canada to Great Britain is decreasing because of the competition of Baltic woods from Russia, and the poor equipment for handling lumber in the harbor of Montreal, according to the statement of Mr. J. W. Todd, manager of the firm of Watson & Todd, one of the chief lumber-exporting companies of Canada.

"The poor facilities for handling lumber in the port of Montreal are making it more expensive every year," remarked Mr. Todd, "and exporters have to pay considerable freight car rental through no fault of our own, because the harbor is not able to handle the business."

Another factor placing Canadian lumbermen at a disadvantage in competing with the Russian dealers, Mr. Todd said, was the recent increase in ocean rates from thirty shillings, per St. Petersburg standard, to forty shillings per standard on lumber being shipped from here to Liverpool.

QUEBEC, THE PORT WITH A FUTURE

That the new deep wharfage and dock and improved railway facilities would make Quebec the head of navigation for large steamers, and eventually the chief passenger traffic centre of the Dominion, leaving the handling of freight to Montreal, was the inference drawn from Hon. R. L. Borden's speech at Quebec at a banquet tendered him by the citizens on his recent visit.

"Having regard to the probable development of western traffic to Quebec, and its wonderful possibilities, and seeing also the necessity of providing adequately for future development, the government thought it desirable to possess an extensive water front on the St. Lawrence. With this view we have acquired three miles of the best water front in Quebec, extending from Sillery to Cape Diamond, and portions of the water front from Cape Diamond to the Champlain Market have also been secured.

"This magnificent water front will give to the government, and to the harbor commission, an opportunity for unlimited development of port and terminal facilities, and I hope you will agree that in looking forward to the possibilities of the future, the government have taken no unwise course. In adopting this policy," said the Premier, "we are acting, not in the interest of Quebec alone, but in the interest of all Canada. Canada, as a whole, is concerned in the provision of modern and effective facilities necessary for the outflow of commerce at all its great ports.

"It is not difficult to understand that the St. Lawrence route cannot hold its own in competition with other routes, unless vessels of the largest tonnage can be docked and repaired in case of necessity."

They are now calling Felix Diaz a coward. In Mexico it is only the cowards who are reasonably good life insurance risks.—Toronto Mail and Empire.

Tenders Wanted for Debenture Issue

$50,000.00

AT 6% INTEREST

THE TOWN OF PARRY SOUND will receive up to Tuesday, November 4th next, tenders for the above issue consisting of Smelter Loan, 20 years, $25,000.00, and Smelter Bonus, 30 years, $25,000.00. By-law 388 validated by Special Act in 1912. Each series repayable in equal annual instalments of Principal and Interest. Date of issue, January 1st, 1913. Tenders to be with accrued interest added. Further particulars upon request to

J. D. BROUGHTON, *Treasurer.*

COMPANIES RECEIVE PROVINCIAL REGISTRATION

The following companies have been registered to do business in Alberta:—

Terminal Cities of Canada, Limited. Head office, Montreal; capital, $2,300,000.

The Bourdon Investment Company, Limited. Head office, Winnipeg; capital, $20,000.

The following company has been registered to do business in Saskatchewan:—

Eastern and Prairie Lands Investment Company, Limited.

The following company has been authorized to do business in Quebec:—

The Sutherland Construction Company, Limited. Head office, Montreal, Que.

CANADIAN CEREAL COMPANY APPOINTS COMMITTEE

At a meeting of the bondholders of the Canadian Cereal and Flour Mills, Limited, held at Montreal, a committee of three was appointed to inquire into the affairs of the company and report back to another meeting of the bondholders, which will be held on November 19th.

The committee appointed was composed of Kenneth W. Blackwell, A. F. Riddell and S. A. Heward. The company, it is understood, contemplates the operation of two or possibly three of the largest mills. The company at present have eleven scattered throughout Ontario. The outstanding bonds of the company amount to $625,000, and have a fairly wide distribution, largely in Canada. In this case the English holdings are said to be comparatively small. Against the $625,000 bonds the statement of the company a year ago showed total assets of $1,277,231, of which $1,023,047 was in plant, etc., and the balance in surplus of liquid assets over

ARRANGEMENTS FOR WORLD'S INSURANCE CONGRESS

The work in connection with the World Insurance Congress has been quietly going on, and even those who originally conceived the project of a representative gathering of insurance men at the Panama Pacific Exposition have been surprised at the interest displayed. Already 100,000 insurance men are assured to swell the attendance at the exposition, and twenty-nine life insurance companies have also signified their intention of holding their annual agency meetings at San Francisco in 1915. Then practically all well-known national insurance organizations have decided to hold their conventions for 1915 on the coast, and have appointed, with few exceptions, representatives to sit in the national council, which will be the executive body to map out the plans of the congress. This congress will hold its first meeting in the spring of 1914, probably in April, and its membership will comprise all branches of the insurance business, stock, fraternal, and assessment.

The possibilities for a gathering of insurance men of such a representative nature are good when it is considered that the nucleus is presented for a permanent organization embracing all of the insurance interests. The congress itself will take place during the first two weeks of October, 1915, and during that period the exposition will be closed to all gatherings outside of the insurance business.

Mr. W. L. Hathaway, the insurance commissioner of the exposition, and who has active charge of the world's Insurance Congress, has devoted much time to further the work, and has established the plan on a substantial basis.

Chief Justice Meredith extended the time allowed the Grand Valley Railway Company in which to decide whether or not they will comply with the conditions imposed until November 23rd. These conditions include the placing of modern cars on the streets within a year; the construction of lines on five pieces of streets, and to operate cars to West Brantford, within thirty days after the completion of the bridge by the city. Colored lights must be provided to indicate the various routes at night. Payment of all moneys in arrears must be made before January 23rd, 1914, and moneys falling due thereafter must be paid as soon as they fall due. Any dispute regarding the construction and cars must be referred to the engineer of the railway board, while the local master at Brantford will decide disputes as to the payment of debts. In the event of non-compliance with these conditions the city may take possession of the streets, but not of the assets of the company.

DEBENTURES FOR SALE

TOWN OF SOURIS

ELECTRIC LIGHT DEBENTURES FOR SALE

Sealed Tenders addressed to the undersigned will be received up to **6 o'clock p.m., November 10th, 1913,** for the purchase of $40,000 30-year Debentures, with coupons attached, dated December 1st, 1913, A.D., bearing 6½ per cent. interest, payable in annual instalments of principal and interest.

SIXTY-FIFTH ANNUAL REPORT
OF THE
CONSUMERS' GAS COMPANY
OF TORONTO

In presenting the Sixty-fifth Annual Report, the Directors are pleased to be able to lay before the Stockholders a very satisfactory statement of the business and progress of the Company for the past year.

The output of gas for the year has amounted to 3,492,087,000 cubic feet, an increase over the output for the preceding year of 372,339,000 cubic feet.

7,903 new services have been put in, and 36 miles of street mains have been laid.

The extensions to the Works, referred to in the last Annual Report, are nearing completion. These consist of a Generator House, Exhauster and Blower House, Purifier House, Boiler House, Generators, Superheaters, Carburettors, Exhausters, Tar Extractors, 2-300 H.P., Dry Back, Marine Type, Multitubular Boilers with Accessories, Purifiers, Steel Oil Storage Tank, Concrete Tar Tanks, Gas Holder, Coal and Coke Conveyors, Coal Storage Hoppers, Station Meter, etc. The new plant will have a manufacturing capacity of 4,000,000 cubic feet of gas per day. The demand for gas is increasing so rapidly, however, that your Directors already find it necessary to consider plans for the further enlargement of the Company's Works, and for increasing the capacity of its Distribution System.

The continued advance in the cost of materials used in the manufacture of gas, and the higher labor costs, have given your Directors much concern, and but for the very favorable contracts for Coal and Gas Oil, made by the Company prior to the rise in the market prices of these commodities, consumers could not have been supplied with gas at the extremely low rates which at present prevail in Toronto.

Large increases have also been made in the assessment of the Company's property for Municipal Taxes, necessarily adding to the cost of gas.

In accordance with the By-Laws passed by the Shareholders at a Special Meeting held on the 9th April, 1913 application was made for Supplementary Letters Patent, which were granted on the 15th April, 1913, authorizing the Company, amongst other things, to extend its works and pipes and exercise its powers within the Townships adjoining the limits of the City of Toronto and the limits of the Township of York; empowering the Directors from time to time to sell the unissued shares of the Company's authorized capital stock either by public auction or by tender, and to fix the terms and conditions upon which such sales shall be made.

To provide the additional capital necessary for the requirements of the Company, your Directors offered for sale by public auction, on the 26th June, 1913, 10,000 shares of the capital stock of the Company, having a par value of $500,000.00. 6,810 shares, having a par value of $340,500.00, were sold, the premium realized amounting to $227,600.00.

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Rental.
Year ending 30th September, 1913	91,284	$2,294,308.21
" " " 1912	82,022	2,058,140.63
Showing an increase of	9,262	$ 236,167.58

All of which is respectfully submitted.

A. W. AUSTIN,
President.

PRESIDENT'S ADDRESS

In moving the adoption of the Annual Report, the President said:—

The accounts we are presenting need no explanation from me to secure your approval. The figures speak for themselves, and I have little to say beyond summarizing the general outcome.

The Directors in submitting the Statement, do so with a feeling of satisfaction, knowing that it is one of which they, as well as the Shareholders, may be proud.

The year has been an eventful one, for it has been characterized by the greatest expansion of business in the Company's history. This has necessitated a continuance o our building and extending operations in order to keep ahead of the tremendous demand for gas.

Our record is, indeed, a very important page in the annals of modern gas manufacture, as well as its distribution.

In comparison with other gas companies in America, we still have the lowest Capital Stock expended per mile, and in proportion to population, most mileage.

The plant necessary for a successful Gas Works cannot be erected in a short space of time, consequently we have to look far ahead, if we are to take care of all the business that will likely be offered. To do this means also financing ahead, and, as the amount of capital required as the Company grows will be larger in proportion than in the past, with this fact before us, it is a very important question for your Directors to consider this coming year. It appears to us that some means of disposing of Stock, other than the present authorized modes of auction or tender, should be introduced. In the past, with smaller amounts of stock offered, the requirements were mostly met by auction sales, but our experience of late has demonstrated that that method is not satisfactory. Under the recent power given to us to sell by tender your Directors will likely make an offering by tender in the near future. While our credit is good, and our Bankers have been very accommodating, still we do not like borrowing any more than we can help, especially when interest rates are so high.

To give you an idea of how the rise in price of coal and oil would have affected us had we not been fortunate enough to make favorable contracts in advance, I may say that the rise in the market prices of coal and gas oil would have made a difference of more than Two Hundred Thousand Dollars per year to us, and we would undoubtedly have had to raise the price of gas had we to pay current prices for these commodities.

When I tell you that we will soon have a hundred thousand customers to take care of, more by about twenty thousand than even our City Waterworks Department have at present, you will understand what it means to read meters, get out accounts, and collect same monthly, and I desire here to make our recognition of the ability and fidelity of the General Manager, officers, and other employees of the Company, and of the interest taken in its affairs throughout the year. The total number of employees is now about fifteen hundred.

The following gentlemen were unanimously re-elected as Directors for the ensuing year: A. W. Austin, Wellington Francis, K.C., A. H. Campbell, Sir Wm. Mortimer Clark, K.C., LL.D., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L., Herbert Langlois, Thomas Long. Sir Edmund Osler, M.P.

At a meeting of the Board held subsequently, Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President respectively for the ensuing year.

WISCONSIN STATE IN INSURANCE BUSINESS

The first policies in a state life insurance fund in America were issued on Monday by the insurance department of Wisconsin. Former Speaker Charles A. Ingram, of Durand, who introduced the bill in 1911 session to create state insurance, received the first policy.

The law making provision for state life insurance was enacted after the idea had been worked out by Commissioner of Insurance Ekern and a legislative committee. A study had been made of similar laws in Germany, Great Britain, Italy and Belgium. No policy is issued for a larger amount than $1,000. When the number of policyholders reaches 1,000, the maximum policy issued will be for $2,000, and when the number reaches 2,000, the maximum policy will be for $3,000, the highest amount authorized.

CHANGES IN COMPANIES' NAMES

The following companies in Canada have changed their corporate names:—

Clarke's Dairy, Limited, to that of Silver Spring Dairy Farms, Limited.

Herbert Lubin & Company, Limited, to that of Mutual Bond and Realties Corporation of Canada, Limited.

The following Saskatchewan companies have changed their name:—

Canadian Farms, Limited, to Adcotte Stock Farms, Limited.

The American Securities, Limited, to the British Western Securities, Limited.

Western Clays, Limited, of Alberta, to Western Clays (1912), Limited.

THOS. F. HOW,
General Manager

The Bank of Toronto, Toronto,
October 29th, 1913.

LACK OF MONEY HURTS GRAND TRUNK

The financial stringency in Canada generally is retarding progress, according to Mr. E. J. Chamberlin, president of the Grand Trunk, who says he would like to make many improvements and additions to the road, but his hand is stayed owing to the lack of money.

In speaking of the badly needed new station for Montreal and the elevation of the tracks to St. Henry, Mr. Chamberlin said that whereas a few years ago the elevation of the tracks would have cost about $3,000,000, now the cost would be between $10,000,000 and $15,000,000.

Referring to the Toronto and Montreal stations, he said that it would be ruinous to their business to have both jobs on their hands at the same time, and would mean a disbursement of $20,000,000 to $25,000,000.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

"MADE UP TO A STANDARD, NOT DOWN TO A PRICE"

Few Cars Can Compare With the Russell-Knight

The experience and training of every KNIGHT engineer the world over is embodied in the Russell-Knight—to make it beyond all question a superior car. So that in the Russell you get the maximum of everything you want in your car.

Immense reserve power: Silent, and unfaltering; from the most advanced engine in the world. Power—uniform, vibrationless, more than ample for any demand.

Controlled with every known motoring convenience. Put in operation by the Russell electric starter that adds no weight nor additional gear to the car. Centred in left-side drive with levers in the natural, right-hand position.

Applied to the most comfortable car ever built; with long wheel base to impart a cradle-like smoothness to the motion; with long and extra wide resilient springs to smooth out every inequality of the road; with 12-inch deep Turkish cushions on patented springs to give a new meaning to luxury; with tonneau heated from the exhaust at will and protected by an auxiliary windshield, to render Winter motoring or fast driving a pleasure for ALL.

In every detail the Russell-Knight is a **proven** car—proven **right** by twelve months' rigorous test under every condition of road and climate. It is a car of certain satisfaction.

Judge it by every known test of car worth—power, comfort, flexibility, silence, speed. Your own experience will be your strongest advisor that the Russell is the car for you to own.

Russell-Knight 1914 Chassis and Standard Bodies are as follows:

Russell-Knight, 4-cylinder "28"		**Russell-Knight, 6-cylinder "42"**	
Roadster Model	**$3,200**	**7-Passenger Touring Car**	**$5,000**
5-Passenger Touring Car	**$3,250**	**5-Passenger Phaeton**	**$5,000**

Both Chassis are built with Landaulet and Limousine bodies at proportionate prices. Catalogue on request. All quotations F.O.B., West Toronto.

RUSSELL MOTOR CAR CO. Limited

GRAND TRUNK NOTES SOLD

New York House Buys Big Block—St. Maurice Cotton Bonds Offered

Messrs. Blair and Company, New York, have purchased from the Grand Trunk Railway Company $2,500,000 4½ per cent. equipment trust notes, maturing in semi-annual instalments to 1923. The notes will be a lien on all-steel passenger and stock and flat cars shortly to be delivered. The railway company paid 10 per cent. of the cost of the equipment in cash.

St. Maurice Cotton Bonds.

Messrs. Greenshields and Company, Montreal, are offering part of a 6 per cent. bond issue of the St. Maurice Valley Cotton Mills at 96 and accrued interest, with a bonus of 40 per cent. common stock.

The company is an extension of the Wabasso Cotton Company and has a capacity of 900 looms and 75,000 spindles.

The entire $1,250,000 capital stock of the St. Maurice Valley Cotton Mills, Limited, is owned by the Wabasso Cotton Company, which has issued in exchange $1,250,000 common stock of the Wabasso Company.

Municipal Bonds for Sale.

Tenders for a loan of $50,000 at 6 per cent., are desired by Tuesday, by Parry Sound, Ontario, in connection with a proposed smelter industry.

Prince Albert, Saskatchewan, is asking for tenders for an issue of debentures, totalling over $900,000.

Westmount sinking fund commissioners are desirous of acquiring $30,000 of municipal debentures, those of Westmount receiving the preference.

The Bank of Montreal will finance the entire $13,500,000 loan that will be required for the carrying out of the Shoal Lake water project of Winnipeg.

◆

TO CARRY LUMBER THROUGH PANAMA

Mr. B. A. Johnson, the lumber specialist of the Lumber World Review, who has been covering the west coast with a view of finding out something about the probable water rates from the Pacific to the eastern seaboard by way of the Panama Canal on lumber, reports that not less than three lines of lumber-carrying steamships are being arranged, but that the water rates and the extent of readjustment of rail rates are still uncertain. Mr. R. Dollar, the San Francisco shipper, figures that the water rate should be about $11.38 for 1,000 feet. A leading lumber manufacture interested in three or four Puget Sound mills, declares that he will not consider shipments at anything above $8, between the Pacific and the New England coast. A well-known lumberman on the Mexican coast says $9 will cover the rate. Coast lumber producers expect to compete through Atlantic ports as far west as Buffalo and eastern Ohio.

◆

PRODUCTION OF PRECIOUS METALS

Canada's department of mines returns show that last year's production of the precious metals, gold and silver, was as below:—

The total value of gold produced in 1912 was $12,648,794, representing 611,885 fine ounces, as compared with $9,781,077, representing 473,159 fine ounces of metal in 1911. The Yukon placer production in 1912 was 267,988 fine ounces, valued at $5,539,808.

Of the total production in 1912, about $6,106,677 were derived from alluvial workings; $2,270,331 as bullion from milling ores, and $4,271,786 from ores and concentrates sent to smelters. In 1911, $5,014,207 were derived from alluvial workings; $513,991 as bullion from milling ores, and $4,252,879 from ores and concentrates sent to smelters.

The exports of gold-bearing dust, quartz, nuggets, and gold in ore, etc., in 1912, were valued at $10,014,654, as against $7,493,523 in 1911.

The production of silver contained in bullion, or estimated as recovered from mattes and ore, etc., exported, was in 1912 31,955,560 fine ounces, valued at $19,440,165, as compared with a production of 32,559,044 fine ounces, valued at $17,355,272 in 1911. About 91.4 per cent. of the production in 1912 was derived from the Cobalt district of Ontario. The production of silver in 1905 was only 6,000,023 ounces and in 1900 4,468,225 ounces. The exports of silver contained in ores, mattes, etc., in 1912 were 34,911,922 ounces, valued at $19,494,416, as against exports of 31,216,725 ounces, valued at $15,807,366 in 1911. The imports of silver bullion during the calendar year 1912 were valued at $1,100,344 as compared with $847,645 in 1911.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

MacNutt, Sask.—The council has been authorized to borrow $1,000. J. T. Gibson, secretary-treasurer.

Lebret Village, Sask.—The council has been authorized to borrow $1,000. J. Z. La Fleur, secretary-treasurer.

Loreburn R.M. No. 254.—The council have been authorized to borrow $12,000. G. Baldwin, secretary-treasurer.

Parry Sound, Ont.—Up to November 4th for $50,000 debentures. J. B. Broughton, treasurer. (Official advertisement appears on another page).

Prince Albert, Sask.—Up to November 21st, $976,940 5 per cent. debentures. C. O. Davidson, city clerk. (Official advertisement appears on another page).

Port Stanley, Ont.—Up to November 10th for $3,450 6 per cent. 5-year debentures. J. Gough, clerk. (Official advertisement appears on another page.)

Keewatin, Ont.—Up to November 15 for $10,000 5 per cent. 20-year debentures. W. J. Craig, town clerk. (Official advertisement appears on another page).

Swan River S.D., Man.—Up to December 4 for $4,000 5½ per cent. debentures. C. A. Lewis, secretary-treasurer. (Official advertisement appears on another page.)

Souris, Man.—Up to November 10th, for $40,000 6½ per cent. 30-year debentures. J. W. Breakey, secretary-treasurer. (Official advertisement appears on another page.)

RAILWAY EARNINGS

The following are the railroad earnings for the month of September and first three weeks of October:—

Canadian Pacific Railway.

	1913.	1912.	Inc. or dec.
Sept. 7th	$2,496,000	$2,649,000	— $153,000
Sept. 14th	2,462,000	2,667,000	— 205,000
Sept. 21st	2,769,000	2,549,000	+ 220,000
Sept. 30th	4,160,000	3,457,000	+ 703,000
	$11,887,000	$11,322,000	+ $565,000
Oct. 7th	$3,145.000	$2,765,000	+ $380,000
Oct. 14th	3,298,000	2,957,000	+ 341,000
Oct. 21st	3,254,000	2,945,000	+ 309,000

Grand Trunk Railway.

Sept. 7th	$1,099,259	$1,082,457	+ $ 16,802
Sept. 14th	1,144,856	1,110,514	+ 34,342
Sept. 21st	1,134,021	1,101,588	+ 32,433
Sept. 30th	1,492,505	1,464,723	+ 27,782
	$4,870,641	$4,759,282	+ $111,359
Oct. 7th	$1,088,759	$1,058,587	+ $ 30,172
Oct. 14th	1,083,182	1,063,161	+ 20,021
Oct. 21st	1,163,390	1,143,369	+ 31,245

Canadian Northern Railway.

Sept. 7th	$ 382,400	$ 376,400	+ $ 6,000
Sept. 14th	398,000	378,300	+ 19,700
Sept. 21st	488,200	390,200	+ 98,000
Sept. 30th	726,300	526,600	+ 199,700
	$1,994,900	$1,671,500	+ $323,400
Oct. 7th	$ 557,560	$ 471,700	+ $103,000
Oct. 14th	593,700	523,700	+ 70,000
Oct. 21st	609,900	561,100	+ 48,800

Temiskaming and Northern Ontario.

Sept. 7th	$ 33,546	$ 30,635	+ $ 2,911
Sept. 14th	34,435	29,597	+ 4,838
Sept. 21st	30,595	29,171	+ 1,427
Sept. 30th	45,031	37,674	+ 7,357
	$ 143,610	$ 127,067	+ $ 16,533
Oct. 7th	$ 35,296	$ 26,045	+ $ 9,251
Oct. 14th	34,883	34,156	+ 727

NEGLECT OF THE "SMALL INVESTOR"

Some reasons as to why loans in London fail are cited in folders of Reuter's telegraph agency. Although these pamphlets are circulated with the object of securing advertisements, they contain facts which are not always sufficiently recognized by large financial houses. "How is it," it is asked, "that the public refuses to subscribe to a good investment, even although the first financiers of the land, with all their ability, are willing to ensure that they will take it? How is it that the shares of some pushing speculative company, with doubtful prospects, may be readily subscribed or bought, while first-class investments are ignored?

"One answer to the question is that the public is not sufficiently aware of the opportunities of these investments. As a rule, because of the dignity or something of the sort of those responsible, the loan issues are grossly under-advertised. The experienced financier, the careful reader of city articles, and so on, may realize their attractions, but they are not properly explained to the great public, and the issuing houses will not stoop from their pedestal to explain. Thus the sound loan is pushed aside by the more enterprising company monger, market-maker, or bucket shop keeper, who knows how to present his wares attractively. The brief technical prospectus issued by the representatives of nations and states and cities makes no appeal to the great public, with the result that it holds aloof."

There is considerable truth in this. Frequently the "small" investor in Great Britain is appealed to and reached by so-called investment offerings which are not worth a sou. A typical example is the offering in Great Britain of 20,000 shares of $100 each of the Union Life Assurance Company of Toronto. At the time of the offering the company was in deep water, yet $700,000 worth of shares were sold at a premium, and every British investor who subscribed paid cash in full. A quotation on the stock could not be obtained at the time in Canada. That is only one instance of over half a million dollars going into polluted financial channels when available there were clean investment streams. The latter, however, were not properly advertised. The reputable financial house should learn the art of finding the "small" investor. This would accomplish two things—give more business to the legitimate house and help to strangle the unscrupulous promoter.

SHAREHOLDERS' RIGHTS

According to information received by *The Monetary Times*, the annual meeting of the Spanish River Pulp and Paper Company and the Russell Motor Company broke away from Canadian precedent. Usually such a gathering consists of a congregation of officers, directors, president, some silent shareholders and many powerful proxies. Typewritten resolutions prepared beforehand are submitted at the meeting and made into the unanimously passed brand with the accuracy and rapidity of a sausage machine. The shareholders merely hold up their right hand timidly, or say "Aye" in a whisper. This universal approval on the shareholders' part may have been the result of good management and finance, for seldom have Canadian shareholders had just cause to complain.

During the past few years, however, some of our companies have passed days of strenuous financing. They have not made the annual statement look the most cheerful of documents. This fact has brought with it a new type of shareholder. He was content in the olden days to sit quietly at an annual meeting where everything was obviously cut and dried. According to reliable reports, the directors and officers of the Spanish River and the

Russell Motor companies were somewhat riled when shareholders asked awkward questions and were bold enough to take a hand in the proceedings. There is no need to detail those questions here. It is necessary only to record the fact that if officers and directors obtain the money of investors for various enterprises, and those enterprises experience a bad time, are unsuccessful or mismanaged, the officers and directors must expect to arouse questions and the ire of the shareholder and to meet those questions and that ire in the flesh at the annual meeting. The shareholder has every right to legitimate information regarding the affairs of the company which he and his colleagues have helped to finance. If this point is not conceded, officers and directors may have to whistle for their new capital, much longer than they care.

NOT ALL CANADA'S FAULT

In these days when Canadian flotations are subject to so much criticism, often unfair, it is only right to record that Canada is not responsible for the desperate state of affairs of the British Columbian Fisheries, Limited. As our contemporary, "Canada," says: "This concern was entirely originated and controlled in Great Britain and it is not a Canadian-controlled company which has brought loss to the shareholders. There has been so much feeling aroused in consequence of some Canadian companies which have gone astray that it is only fair to make clear that this British Columbian Fisheries Company does not come under that category."

Some little blame in connection with Union Life affairs must also be placed in England. In the prospectus of that company's offering there is a report of Mr. E. A. Rusher, F.I.A., F.S.S., of the Prudential Assurance Company (of England), who was, according to the prospectus "invited to investigate the business of the company with special reference to the proposed increase of share capital." Much of the stock was probably purchased because of Mr. Rusher's glowing report, which was given considerable prominence in the prospectus. Here are two paragraphs from that report:—

> "As bearing upon future prospects, I understand that the previously existing arrangement with the National Agency Company has been determined, and that a new arrangement has been entered into whereby that company accepts, in return for its services, an annual payment of £8,000 plus a sum equivalent to three per cent. upon the total premiums paid in the year.
>
> "Taking this arrangement into consideration, and assuming that the same care as hitherto continues to be exercised in the management of the business, I am of opinion, after thorough examination of the facts placed at my disposal, that the existing business should be sufficient to provide an immediate dividend at a fair rate on the whole of the $1,100,000 share capital, and that even if the business should not increase at quite so rapid a rate as indicated by the figures for 1909, the company will in a very short time be in a position to pay a dividend at a substantially higher rate."

It is obvious that Mr. Rusher did not investigate very deeply. Possibly he investigated only the facts, figures and literature given to him by Mr. Pollman Evans, or others connected with the Union Life Assurance Company. Now that the National Agency Company is being wound up, and the Union Life Assurance Company is dead, Mr. Rusher's opinions look somewhat sickly.

The Monetary Times has no wish to excuse the mismanagers of the Union Life, but merely desires to express a hope that Mr. Rusher feels a trifle sorry.

WILL CANADA BENEFIT?

There is not uniformity of opinion respecting the benefits the Panama Canal will give Canada. Many authorities have asserted that British Columbia particularly, and the western provinces generally, will be influenced favorably by the advent of the Canal. Last week Mr. W. E. Mullins, representing large United States interests in Central America, stated in a Toronto interview that as far as he could see, the opening of the Canal would have little influence upon Canadian trade, other than sending coarse commodities from Pacific ports without breaking bulk, instead of via the transcontinental routes. The greatest benefit will accrue to the Pacific coast of South America, where 15,000,000 people now reside, as well as to the Northern American coast to San Francisco and Seattle. Already the Hamburg-American Line have formed an American company, with large dock privileges upon the Pacific coast, in order to escape excessive tolls for foreign vessels.

Canada, in Mr. Mullins' opinion, can have but little local trade with Southern American ports and the West Indies unless she organizes direct steamship routes, and until such is accomplished the opening of the Canal will affect this country but little, except that the heavy timber of Vancouver will undoubtedly go south, where it is so much desired.

The central and northern South American countries, Mr. Mullins says, are rich with the soil only slightly disturbed, and the opening of the Canal will afford many investors ample use for spare capital.

It is to be hoped that the enthusiasm of Mr. Mullins for the future of the South American republics has merely dimmed his eyes when turned to the Canadian position. Broadly, it should be safe to prophesy that Western Canada will benefit from the operation of the Canal. As to the extent of the benefits, only the operation of the waterway can demonstrate.

On this point the New York Journal of Commerce says: "There is some evidence that the Panama Canal is being overworked both as a topic of commercial discussion and as a basis for immediate trade growth. It is interesting to note that one or more of the conventions that were to have been held for debating its possibilities have been abandoned and that the predictions of what will result from its operation are assuming a more moderate tone. This is in line with the results of further study. The canal will be an important avenue of commerce and will open new channels of trade not hitherto available, but its effects, whatever they may be, will become evident only after a time. Immediate transformation of conditions is not to be looked for."

WESTERN CANADA AND CRITICISM

The Monetary Times has frequently noticed the apparent dislike of Western Canada for criticism of the West in any shape or form. We have hesitated to write about it, but this week an Edmonton correspondent gives the lead. He says: "I have often wondered why the West is so touchy of criticism, even of helpful criticism. One would suppose that a country developing so rapidly as is the West, with so many new problems arising, upon which we have little in the way of experience or precedent, would be only too glad to give careful consideration to helpful criticism. It is inevitable that we will make mistakes, and that conditions will arise which were not intended or foreseen, producing results which were not anticipated, or which perhaps are not at once apparent to us who are so close to the work. We should, indeed, be ready to welcome suggestions, even if in form bordering on criticism, which may be offered by outside students of our economic conditions. If we have economic conditions which are undesirable, and not in the best interests of the West, surely it is no remedy to refuse to recognize the existence of those conditions, and abuse the good friend who points them out to us. Surely Western Canada, with its enormous wealth of resources, is not in such a bad way that it cannot stand having the weak spots in its process of development pointed out in a friendly way. Personally, I have altogether too much faith in the West to have any patience with those who grow peevish under such friendly criticism.

"Can those people who are so ready to fly to arms and resent anything which savors of criticism of the West, no matter on what subject, or with what motive it is offered, be properly considered as in any sense representing the real West? The West is really being made and developed, not by the men who are selling subdivisions, or by publications carrying big advertising contracts with such men, but by the men who are establishing and developing great commercial houses, building up industrial enterprises, exploiting the natural resources of the country by the development of coal mines, timber, and other natural wealth, and the minds controlling our great railway enterprises. Are such men, who have really done things in the West, found in the ranks of those who show such ready resentment of reasonable and helpful criticism, showing us the spots that need strengthening? I think that such men will invariably be found ready to accept such criticism in the spirit in which it is offered, rather than to get fussed up over it."

This sensible comment of a Westerner on the West is published merely as a gentle hint. Western Canada is a healthy youth and should be able to receive criticism and to discuss it in a friendly way. The West should not emulate the handsome young lady, fashionably dressed, who slapped another's face because attention was drawn to a trailing tape in her attire.

A PLEA FOR SAFE BONDS

"The country is waterlogged with bonds. Confidence cannot be restored until the name bond has won back something of its old standard." These words of Mr. James J. Hill at the Chicago convention of the Investment Bankers' Association of America, express the opinion of many who have hesitated to speak it. Mr. Hill's dictum applies just as well in Canada, where some financing during recent years has rubbed away the gold plate attraction of bonds, more especially industrial, in the eyes of the investor. One hears complaint that it has been difficult to sell industrial bonds. Can there be just complaint or wonder at the fact, when it is recalled that the Amalgamated Asbestos Corporation wiped out 75 per cent. of the par value of its bonds; the Black Lake Asbestos Company found new bond financing necessary; the Spanish River Pulp and Paper Company had to rearrange its finances and issue short-term notes; the Canadian Coal and Coke Company was obliged to reorganize, the holders of 6 per cent. bonds having to take an exchange of 7 per cent. preferred stock; the Canadian Cereal and Flour Mills were compelled to go to a receiver; and so on?

All these incidents tend to make the investor ask the question noted in these columns some weeks ago, When is a bond not a bond? Every such case brings the bond into disrepute and naturally makes the investor hesitate. Mr. Hill's words are of value at this time. "Formerly," he said, "and always, in a properly financed undertaking the limit of a bond issue is the total cash value of tangible property in possession; not its value for the uses to which it is being or is to be put, but its value as an asset for immediate conversion by forced sale at any time into cash. Under this rule the investor might rest secure. The worst that could happen to him would be to have to take over this property in case of a receivership, wind up the business and get back his money. About all that he could lose would be the interest on his investment for the unrealized term of the life of his bond. Now it is altogether different. Not only wildcat concerns, which are outside the range of this discussion, but companies of real merit and solvency, conducted by men who would scorn to do an act commonly recognized as dishonorable, do not hesitate to bond their business for very much more than could be obtained from either a forced sale or a careful liquidation.

"There would be little need for blue sky laws if all who engage in your business were bound by a code, both moral and legal, to stamp out, not only the obviously wildcat security, but every other that has a surplus of prospectus and a deficit of live assets behind it. The investment market cannot know a prosperous activity, accompanied by feverish starts, to be followed by still more pronounced reactions, until the immutable laws of credit have been generally recognized and respected."

Those in Canada's financial spheres who have indulged in this new style of finance, will have to get back to the old paths, those followed by honest financiers whose bond was as good as their word. In short, as *The Monetary Times* stated in July, a holder of Canadian bonds should know that he has a security which cannot be swept away at the whim or in the troublous times of company promoters, reorganizers and financiers. The sooner we get back to the English idea that a bond is an investment surrounded with a fence of financial purity, and live up to that idea, the better will it be for Canadian credit.

SMALL CHANGE

The Canadian coffin trust gives the cost of living a rival.

* * * *

Rhode Island was shaken by earthquake, a gift of its capital.

* * * *

"Waterlogged with bonds" is correct, and the wading is being done with investors' rubber boots.

* * * *

British Postmaster-General Samuel found amusement in Canada's telephones. How on earth did he do it?

* * * *

Canadian makers should watch Mrs. Pankhurst, who may try to hide in a cheese and get sent to Mr. Asquith.

* * * *

Too many wildcats with surplus of prospectus, says James J. Hill. In other words, the animal's tale wags the body.

* * * *

Utah State insurance commissioner does not approve group insurance—forgetting it cannot be otherwise in a Mormon State?

* * * *

A contemporary says "German visitors will inspect pen at Kingston"—referring, of course, to the one that is mightier than high finance.

* * * *

The evidence of Mr. H. Symons, K.C., indicates that during most of the happenings in the Union Life offices he was, well, just Simple Symons.

* * * *

Which is more tiring, money market opinions of Canadians returned from England or distinguished Britishers' surprise with Canada's civilization?

* * * *

Mr. W. Maclean, M.P., will probably be anxious as to where the gentleman who writes Toronto World politics on the front page, Polycarp le Blanc, can wash his feet.

INVESTORS WAIT TILL UNDERWRITERS HAVE ANGLED

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

CAUTION IN EVIDENCE IN LONDON

Future is Obscure—Canadian Securities Show Stability

(Central News cable to *The Monetary Times.*)

London, November 7th.—Following a shakeout early in the week, a better feeling developed in the securities markets and the tone to-day was firm in the main, although final prices were below the best level of the session. Caution is in evidence everywhere, however, because the outlook for the future is obscure and by reason of the fact that there has been a heavy shrinkage in funds for investment in recent months. It is known that officials of prominent banking institutions would depreciate any activity in the share market.

Canadian Securities Strong.

Canadian securities show stability, with the exception of those of utilities corporations. The offering of £1,500,000 Canadian Northern land bonds went well. The loan, nevertheless, was quoted at a discount of 1½, Hudson Bay shares have been strong because of a proposed issue of £1,000,000 new preferred stock, with rights to holders.

This evening it was announced that £100,000 gold had been taken by Heidelbach, Ickelheimer and Company, of New York, for shipment there by the steamer Mauretania, which is scheduled to sail on Saturday. Consols had an easier tone to-day in spite of the fact that the Bank of England obtained £251,000 gold on balance to-day. The Egyptian demand for the precious metal is nearly over.

Bank of England Statement.

The loan market is working upon a narrow margin. Yesterday's weekly statement of the Bank of England showed that the amount of market funds with the Bank is about £3,000,000 less than it was at this time last year at £42,396,000. The proportion of the Bank's reserve to liabilities this week is 53.40 per cent., against 54.50 per cent. last week and 47½ per cent. a year ago.

To-morrow £3,000,000 treasury bills will be paid for.

CANADA GOT MUCH CASH

*London, October 31.—To-day's returns for October show, despite the stringency, that Canada continued to receive a very large share of British investors' money.

Canadian issues for the month exceeded $12,500,000. All the Canadian issues are western, namely: City of Vancouver, British Columbia Electric; Province of Alberta, West Canada Mortgage Company, city of North Battleford.

SASKATCHEWAN NOTE ISSUE

*London, November 3.—The province of Saskatchewan one-year notes recently placed on basis 5½ per cent. total £300,000.

CANADIAN NORTHERN'S NEW LOAN

*London, November 3.—The underwriting of the Canadian Northern £1,500,000 ten-year fives at 95 has been completed. The bonds are a direct obligation of the company secured collaterally upon land grants.

APPLE PRICES IN LONDON

†London November 3.—Canadian apples were quoted here as follows: Nova Scotian Grevensteins, 20-24 sh.; Blenheims, 18-20 sh.; King's, 20-24 sh.; Ribstons, 16-18 sh.; Wealthies, 14-15 sh.

CANADIAN PRICES IN LONDON

†London November 3.—During the past week two changes occurred in the position of Canadian funds at this centre.

Province of Manitoba registered, 1950, 90-92.

Newfoundland inscribed, 1945, 3½ per cent., 89-91.

CANADIAN LOANS AT A DISCOUNT

†London, November 3.—Recent Canadian issue prices show but slight improvement. Dominion fours at one-quarter per cent. discount; Edmonton issue is at 1¾ per cent. discount; and Vancouver loan at 1⅝ per cent. discount.

Province of Manitoba registered stock, 1950, is quoted at 90-92, and Newfoundland inscribed stock, 1945, 3½ per cent., or 89-91.

OPPOSE WESTMINSTER SITE

†London, November 3.—The Canadian Associated Press learns that a petition signed by every Canadian agent-general and all the leading banking and financial houses doing a Canadian business here, will in a few days be cabled to Premier Borden urging him to reject the Westminster site for Dominion offices.

The petition will express no opinion regarding Earl Grey's Aldwych scheme, but will express the emphatic conviction that the Westminster proposition is entirely unsuitable.

CANADIAN CHEESE AND ITS QUESTION

†London November 3.—Inasmuch as the instance is by no means a solitary one, the following facts will be of considerable interest to Canadian cheesemakers:

A grocer at Sunderland yesterday made a curious discovery. When cutting through a cheese his wire encountered some hard substance and he was obliged to finish cutting it with a knife. In the centre of the cheese he found a small tin box, containing pennies, and a request that the finder would communicate with the New Zealand cheese manufacturer, informing him as to whether the cheese was purchased as New Zealand or Canadian. The tradesman has complied with the request, telling the New Zealand man that the cheese was sold to him as Canadian produce.

BRITISH COLUMBIA FISHERIES COMPANY TO A RECEIVER

*London, November 3.—The report that the British Columbia Fisheries Company, which has recently gone into receivership, is accepted as confirming the recent criticism of the management as it shows that the expenditure greatly exceeded the estimates.

Apparently the directors, of whom Sir George Doughty was chief, embarked on enterprises which were foreign to the original scheme, involving other expenses, including an experiment of deep-sea trawling, which amounted to £25,200, against which sales and stock amounted to only £11,100.

CANADIAN WHEAT MARKET PUZZLES

*London, November 3.—The Canadian wheat situation is somewhat puzzling the London market. One of the highest grain authorities here answering my questions says: "We, so far, have imported 45 million dollars worth of this year's Canadian crop. Then without notice, for reasons we cannot understand, the price was suddenly raised beyond our reach. Importations, therefore, practically ceased, and we are importing what we need from other countries like Russia. The question arises, "Why this sudden prohibitive rise? Are the Minneapolis and Chicago buyers gambling in options, hoping to get complete command of the Canadian hard wheat supply? The banks are so largely in control of the Canadian crop that the question is also raised 'what is their present attitude?' "

**Montreal Star* cable.

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

OTHER REASONS FOR LOAN FIASCOS

Investors Sit Outside Till Flotations Are Over, Waiting for Later Market Bargains

(Central News letter to *The Monetary Times*).

London, November 1.—The decision of underwriters to refuse fresh capital flotation business for the present is bearing its fruit, and though the market has hardly yet felt the full effects of this decision, owing to the appearance of the £2,300,000 St. Petersburg loan and one or two smaller emissions, for which arrangements had been completed before underwriters had adopted their non-possumus attitude, the knowledge that the flood of new capital was to be stopped has appreciably tinged sentiment. With fewer opportunities offering to them outside the stock markets investors are more inclined to hunt around for the many bargains, which are now offering, and practically all the principal departments have felt the effects of this impetus.

Erroneous Ideas on Loan Fiascos.

In some quarters quite erroneous conclusions were drawn from the notable loan fiascos recorded during the last few weeks. The reserve of real buyers in these instances may to some extent have been bred of general conditions, but it is very clear from the satisfactory manner, in which the blocks of unsubscribed bonds, which were left with the underwriters are now being absorbed, that no deep-seated distrust existed. The truth would seem to be that in view of the non-success of so many preceding loan operations this year in London, investors have definitely adopted the policy of waiting until flotations are over on the chance of being able to pick up the scrips cheaper on market than by tender.

Underwriters to Blame.

Underwriters have largely themselves to thank for the development of this attitude among the public, because earlier in the year, when the investment market was in a state of congestion, they, on several occasions, invited the participation of the public directly in underwriting with the idea of better distributing responsibility in the case of the partial failure of offerings. The public has thus been spoiled, for on those occasions, it not only got the usual turn which is secured on tendering for a new issue, but they got a good portion of the underwriting commission as well, which is practically equivalent to the discount on new scrips, which they now seem to think is their due.

(Central News letter to *The Monetary Times*).

London, November 1.—The substantial recovery in Canadian Pacific has been partly in sympathy with American rails, and buying has certainly been in evidence from New York. But the improvement is also attributed to other important causes. Disturbing rumors of strain if not actual embarrassment, in Montreal, were current here. Emphatic contradiction of these stories both by cables and by Canadian banking representatives in London stiffened the Canadian group generally, and Canadian Pacifics have had yet another helpful factor in the payment a few days ago of the final instalment of £4,200,000 on the last share issue.

The approach of this payment was probably rightly held accountable for a good portion of the recent selling, especially as regards offerings on Berlin account, but now that no further calls have to be faced, there is judged in the market to be nothing between the stock and a materially higher quotation, if excellent current traffics are maintained, as would seem likely to be the case. Grand Trunks have not moved in sympathy with Canadian Pacific to any extent. The substantial increase in working expenses recorded in the half yearly report in conjunction with the smallness of current traffic gains, makes dealers less optimistic about the dividend outlook.

MAYOR OF LEVIS HUSTLING IN LONDON

*London, November 3.—Mr. Bernier, M.P., of Quebec, and mayor of Levis, while here has been studying shipping matters, and says the establishment of the new Quebec drydock, of which Premier Borden has just cut the first sod, is expected to lower the insurance rates for the lower St. Lawrence during the summer months. But as winter navigation will be a new departure, the rates will probably go up for the winter months.

Much satisfaction is expressed here that a drydock is being constructed to accommodate ships of war as well as merchant vessels. Mr. Bernier has been making the attractions of Levis for manufacturing and shipping enterprises better known here, hoping that the new dock and railway expansions will induce the advent of British industrial capitalists.

SAYS CANADA IS GOING TOO FAST

*London November 3.—Colonel F. S. Meighen, president of the Lake of the Woods Milling Company, as a bank director, has mixed very much during the last few days with London financiers, and says:—

"The London market has not taken very kindly to Canadian issues lately. This is not altogether bad for us, as we were going a little too fast. In some respects Canada's trade is better than ever, but the weak spot is that too many concerns are over-capitalized. Some men have grown rich in Canada by selling wind and water to the British investor. I should like to see a Royal Commission appointed to examine this question and would recommend legislation to prevent over-capitalization. This over-capitalization is possibly the reason of London's recent attitude towards Canadian issues."

Colonel Meighen says that the recent allegation in the Times presumably originating with the Shipping Federation, that Canadian milling was a monopoly, is utterly false.

"What is really wanted," continued Colonel Meighen, "if ocean freight rates are to be lowered, is more tramp steamers into Montreal; these are only attainable by ordering sufficient British goods to bring the tramps with cargoes so they may return with wheat."

SECURITIES LISTED IN LONDON.

*London, November 4.—Listed to-day:—British Columbia Breweries, $2,750,000 sixes; city of Ottawa, £189,600 four halves, with November 7 as special settling day.

SIR FREDERICK TAYLOR.

*London, November 4.—Sir Frederick Williams Taylor's appointment as general manager of the Bank of Montreal, was not unexpected here. The appointment deprives Canada, in England, of a most active and spirited champion.

DEMAND BRITISH COLUMBIA FISHERIES INQUIRY.

*London, November 4.—Disclosures of the British Columbia Fisheries Company's finances are characterized by the Financial Times as one of the most amazing confessions of mismanagement and reckless expenditure ever heard of. Some shareholders demand compulsory liquidation and a thorough investigation of the whole history of the concern and the exact present value of the properties in Vancouver.

CANADIAN NORTHERN LOAN WELL TAKEN.

†London, November 5.—It is officially stated that applications for a million and a half sterling of the Canadian Northern issue of 5 per cent. 10-year debentures at 95, amounted in all to 60 per cent. of the total.

FURTHER CABLE NEWS on Page 745.

MEREDITH IS BANK OF MONTREAL PRESIDENT

Sir Frederick Taylor Succeeds as General Manager and A. D. Braithwaite Becomes Assistant

Mr. H. V. Meredith has become president and chief executive officer of the Bank of Montreal, in place of Mr. R. B. Angus, who has retired from that position at his own request, but who remains a member of the directorate.

MR. H. V. MEREDITH
President of the Bank of Montreal

Sir Frederick Taylor, manager of the bank's London branch, becomes general manager, and will assume his new duties early next year. His successor in London has not yet been appointed.

Mr. A. D. Braithwaite, superintendent of Ontario branches, becomes assistant general manager.

Mr. R. B. Angus.

Mr. Angus has been associated with the Bank of Montreal for 56 years, having entered its service in 1857. He advanced rapidly in the service of the bank, and in three years he had risen to the post of accountant, and in 1862 was sent to Chicago to assume charge of the agency there, later being entrusted with the associate management of the New York agency. In 1864 he returned to Montreal as manager of the local business, and in 1869 succeeded the late Mr. E. H. King as general manager of the bank.

SIR FREDERICK TAYLOR
General Manager of the Bank of Montreal

Mr. Angus was one of the first promoters of the Canadian Pacific Railway. After ten years as general manager Mr. Angus was called to another sphere. When several prominent men connected with the Bank of Montreal purchased the Dutch interests in the St. Paul, Minneapolis and Manitoba Railway, those interested asked him to leave the bank and become their representative in St. Paul, which he did.

On July 22nd, 1910, Mr. Angus was elected president of the Bank of Montreal in succession to the late Sir George Drummond. Mr. Angus is in his 83rd year, having been born at Bathgate, Scotland, on May 28th, 1831.

Throughout his business life, Mr. H. V. Meredith has spent his time in the service of the bank. Commencing in the Hamilton branch, he later became assistant inspector. In 1889, he was appointed manager at Montreal, and soon after assistant general manager of the bank. In 1910 he was elected a director, in the next year was made general manager of the bank, and in 1912 vice-president. Mr. Meredith is a director of many enterprises in addition to the Bank of Montreal, including the Mackay Companies, in which his associate Canadian trustee is Sir Edmund Osler. Mr. Meredith is a son of the late John Cook Meredith, London, Ontario, and is a brother of Sir William Meredith, Chief Justice of Ontario, and of Chief Justice Meredith of the Ontario Court of Common Pleas.

MR. R. B. ANGUS
Retiring from Presidency of the Bank of Montreal

MR. A. D. BRAITHWAITE
Assistant General Manager, Bank of Montreal

Mr. Meredith is well known in the banking world, not only in Canada, but also in New York and London. He is a first-class banker and a citizen well respected. One who knows him intimately some time ago remarked: "No matter what he gets, it will be none too good for him." These words apply not only to the presidency of the bank, but may still contain a wish which Canada later would like to see materialized in England.

On one occasion, the Hon. Rodolphe Lemieux expressed the opinion that Sir Frederick Taylor was "an extraordinary man," adding: "Few can realize the amount of good he is doing the Dominion while ably discharging the duties of his high office at the same time." Sir Frederick is another eminent banker, who acquired his banking education in the service of the Bank of Montreal in various centres. Before he went to London, he managed the Chicago agency of the bank. In London, the committee associated with him are Lord Strathcona and Sir Thomas Skinner, Bart.

The Bank of Montreal has conducted considerable financing for Canada's federal and provincial governments and for many municipal and industrial borrowers. Sir Frederick rapidly became recognized in London as an authority of no mean ability, not only on Canada and Canadian finance, but on banking and finance generally. He recently won the Society of Arts' gold medal for his paper on the Canadian banking system, and delivered an important address in 1912 on Canadian borrowings to the Royal Colonial Institute. Sir Frederick was knighted by the King on New Year's Day, 1913. He has contributed to *The Monetary Times* some of the most valuable financial articles ever printed in Canada.

Mr. A. D. Braithwaite.

Mr. A. D. Braithwaite, who becomes assistant general manager of the Bank of Montreal, is an experienced banker. As the representative of that bank, he undertook the heavy duties in connection with the liquidation of the Ontario Bank. To facilitate this work, he was made general manager of the institution after the Bank of Montreal had taken charge of its affairs. During his residence in Toronto as manager of the Bank of Montreal there he was prominent in financial affairs. Before coming to Toronto Mr. Braithwaite was manager or acting manager successively at Regina, Calgary and Hamilton.

Mr. Braithwaite is a banker of great ability, which receives still further recognition in the form of the new appointment.

COMPANY INCORPORATION AND LICENSING

What Does the Supreme Court Decision Mean?—Views of Leading Barrister

The judges of the Supreme Court have, as recently noted in *The Monetary Times*, handed down their judgments in the stated case referred to them by the Dominion Government covering disputed questions with respect to the jurisdiction of the provinces and the Dominion over the incorporation and licensing of companies. There seems to be some doubt as to the exact meaning of the judgments. Mr. F. W. Wegenast, of the legal department of the Canadian Manufacturers' Association, in a letter to the members of the Association, says that while the stated case embraced a variety of questions, the two chief questions were:—

First, whether a company incorporated under a provincial charter was competent to carry on business outside the incorporating province; and

Second, whether a company incorporated under a Dominion charter could be required to become licensed or registered under the provincial licensing Acts before carrying on business in the different provinces.

Cites an Illustration.

"As to the first question," adds Mr. Wegenast, "it is difficult to summarize the opinions of the judges in general terms. Their effect may best be indicated by the illustration of a company incorporated under a provincial charter to manufacture, buy and sell agricultural implements. Three of the six judges held in effect that such a company could not carry on its manufacturing outside the incorporating province, though it might purchase its machinery and materials, and perhaps sell its products, outside the province.

"As to the second question, the majority of the judges held that provincial Licensing Acts are valid if bona fide for the purpose of taxation. Only one judge goes to the length of supporting specifically the Licensing Act of the Province of British Columbia.

Another Case for Privy Council.

"It is expected that the stated case will be appealed to the Privy Council. In the meantime there has also been brought before the Privy Council a case, the John Deere Plow Company v. Wharton, raising directly the question of the validity of the British Columbia Act in its application to Dominion companies. The appeal in this case will probably be heard at the June, 1914, sittings of the Privy Council and a decision rendered soon thereafter."

WILL BE CONTRACTION IN WORLD'S TRADE

English Authority Says It Has Been Almost Impossible to Obtain Capital

Sir George Paish, editor of the London Statist, is in America to ascertain how far the world conditions of credit are affecting and are likely to affect the prosperity of the American people.

To The Wall Street Journal, Sir George said: "After the long period of excellent credit in which the younger countries of the world have been able to borrow large sums of money for their development, there has been since the Balkan war began ever increasing difficulty in obtaining loans of capital needed to complete the great works under construction all over the world; and it has been almost impossible to obtain new capital for new work.

Will Check Trade.

"The result of this condition of things is great financial stringency in all countries, and a severe check has been given to the general prosperity and to the great activity of trade.

"Having regard to the difficulties experienced by borrowers everywhere, it is obvious that efforts must be concentrated on completing work already commenced and that no fresh work will be begun until after capital and banking money become much more plentiful. Consequently somewhat severe contraction in the world's trade seems to be inevitable. How far this contraction will go will depend upon two or three countries, more particularly the United States, France and England.

Is to Visit Canada.

"My present visit to this country is for the purpose of ascertaining how far the conditions in the United States make for the maintenance of world prosperity, or rather how far they will contribute to prevent extreme trade depression the world over."

Sir George purposes traveling extensively, visiting the more important cities of the United States and Canada.

SASKATOON'S INSURANCE BILL

According to the compilation Saskatoon's civic insurance by the city auditor, the corporation of the city of Saskatoon is carrying the amount of $830,827.93 in insurance, on which the sum of $15,161.10 was paid in premiums between the first of the year and the present time.

The biggest item in this list is that for boiler insurance which totals the large sum of $100,000. This is carried on the boilers at the power-house and the pumping plant.

Other departments in order of their amounts are as follows:—Power-house, $90,000; street railway, $95,000; storehouse contents and buildings, $75,000; pumping station, $75,000; fair buildings, $67,950; hospitals, $56,000; fire-halls, $54,360; city stables and material yard, $47,000; city hall, $37,500; nurses' home, $27,500.

Many other small amounts make up this total including fidelity bonds, twelve of the city employees being bonded at the present time.

IMPERIAL LOAN MAY BE WOUND UP

Application has been made before Mr. Justice Lennox at Osgoode Hall, Toronto, on behalf of Mr. G. T. Clarkson, liquidator of the Union Life, for an order for the winding up of the Imperial Loan and Investment Company. The application was made on statutory grounds, the company having failed to pay the liquidator, after due notice, $45,610, said to be owing to the Union Life estate. By mutual consent the matter was enlarged, to come up again on twelve days' notice. A previous application for the liquidation of the company had been made in Hamilton and enlarged. Both applications will be dealt with simultaneously. Mr. Clarkson, in his petition, said it was desirable that the affairs and business of the company should be investigated, together with the personal accounts of the president, directors and shareholders, also the claims of the different creditors. The company was incorporated in 1881, with a nominal capital of $1,000,000, of which, according to the last published report, $735,642 was paid up. The head office of the concern was in Toronto, and its directors were as follows: Messrs. D. A. Burns, president; Edw. B. Brown, vice-president; H. Pollman Evans, E. T. Taylor, K.C., of Winnipeg; W. M. German, K.C., Welland, and Gerald Muntz, manager and secretary.

ORDERS FOR EIGHT YEARS' OUTPUT

Chicoutimi Bondholders Confirm Bond Exchange—Capacity Is Now Increased

Monetary Times Office,
Montreal, Nov. 6th.

The bondholders of the Chicoutimi Pulp Company have agreed to exchange the 5 per cent. 30-year bonds of the company for bonds bearing interest at the rate of 6 per cent., but being otherwise the same as the old issue. The total amount of bonds involved in the exchange is $928,000.

The Chicoutimi Pulp Company has also taken out supplementary letters patent authorizing an increase in its capital stock to $7,500,000 from $1,000,000, to be divided into 40,000 shares of common stock and 25,000 shares of 7 per cent. cumulative participating preference shares. Instead of issuing 25,000 cumulative participating preference shares of the par value of $100 each, the company may in its discretion, issue $500,000 cumulative participating preference shares of the par value of £1 sterling each.

The dividend on the preference shares will be cumulative from the first day of January next, and holders of shares shall be entitled to participate pari passu with the ordinary shares in the surplus profits, after paying the fixed dividend for such year of the said preference shares and the like dividend for the ordinary shares.

In Priority to Ordinary Shares.

The preference stock shall rank, both as regards dividend and capital, in priority to ordinary shares, and in the event of winding up, the preference shares shall be entitled to the amount of the shares, plus the dividend, before the common shareholders get anything; and after the common stock is paid off the preferred shall rank pari passu with the common in the distribution of surplus assets.

Preference shares shall not be redeemable save in the event of liquidation or winding up, whether voluntary or involuntary.

No immediate extensions to plant are contemplated by the company, according to Mr. J. E. A. Dubuc, managing director, and in the present state of the money market it is not proposed to make any issue of securities. The company, however, recently completed the installation of twelve new grinders and has brought the total capacity of its plant to 250 tons of dry pulp a day.

For Practically Eight Years' Output.

Mr. Dubuc's announcement that his company has orders on its books at the present time amounting to $16,000,000, and covering practically the entire output of its mills for the next eight years, will be received with interest. The greater part of the output for the eight years has been contracted for by a large English house, but the company is also a large shipper to the United States, the Tidewater Mills, of New York, being among the purchasers of its product.

◆

MAY DEMAND INSURANCE ACT.

An Ottawa dispatch says that following the investigation, ordered and paid for by the government, into the affairs and management of the Union Life Assurance Company, it is probable that the government will introduce legislation amending the insurance act with a view of preventing losses such as have been incurred in the administration of the company under investigation.

CALGARY AND EDMONTON ACTIVITIES

Public Warned Regarding Oil Companies—Tenders for Work on Market

(Special Correspondence).

There are no new developments in the oil situation, in so far as the discovery well is concerned. A director of the Calgary Petroleum Products Company, owners of the producing well, stated that while drilling proceeded, no more oil was being drawn from the well. Operations for the future could not be stated with any degree of certainty, for the reason that these must be determined by what the drill met in its downward course.

Meanwhile a number of companies are organizing to exploit oil leases and the territory being filed on is now extending northwesterly from Calgary throughout the areas where indications of oil have been shown for years.

The possibility of the public being stampeded into subscribing shares in irresponsible companies, has become more remote.

Municipal Owned Plants.

Calgary's municipal paving plant shows a saving of $35,000 on work already done when the cost is compared with prices paid to contractors. The municipal plant has laid 140,000 square yards at $2.15 per square yard, which is 25 cents under the minimum contract price of last year.

A vote on a proposal to construct an addition to the street railway system put forward by private parties who offered to bear the whole cost, including maintenance for four years, and then hand the extension over to the city, was carried.

The coal which the city of Edmonton will burn during the next twelve months in the production of steam for the operation of the various municipally owned public utilities consisting of street railway, electric light, water service, telephone system and for the sale of electric energy, will cost just under $2.15 per ton The city commissioners have placed contracts with local mines for 44,000 tons at slightly varying prices aggregating $96,500. The contracts call principally for screened mine run and nut coal.

It has been decided to proceed with the public market project. The city commissioners are inviting tenders for excavation for the basement and foundations, and the superstructure is to be erected early in the spring. The plans call for a substantial brick building, three stories and basement, embodying ideas to render the building of the greatest service and convenience to the public. The estimated cost is $110,000.

Canadian Pacific Completes Bridge.

The completion of the great high level bridge over the Saskatchewan, built by the Canadian Pacific Railway, has relieved that company of the expense of transferring freight traffic from their south side terminals over the E. Y. & P. line. Consequently tariffs to Edmonton on non-competitive traffic have been cancelled and new tariffs are being issued which will effect a saving to Edmonton consignees on such traffic of from $5 to $10 a car.

◆

QUEBEC ACCOUNTANTS' OFFICERS.

The first annual general meeting of the Institute of Accountants and Auditors of the province of Quebec was held last week, and the following officers were elected for the ensuing year:—

President, Mr. George Gonthier; first vice-president, Mr. H. J. Ross; second vice-president, Mr. Alex. Desmarteau; treasurer, Mr. J. J. Robson; secretary, Mr. Henri Viau; council, Messrs. Alph. Turcotte, E. A. Wright, Arthur Gagnon, Robert Stewart.

◆

GREATER CONTROL OVER PUBLIC EXPENDITURES.

The meeting of the Government treasury board, on Tuesday was the first held under a reorganized plan, which will provide for more adequate checking of estimates and expenditures, ensure uniformity in bookkeeping methods and give the treasury board increased jurisdiction. The report of Sir Geo. Murray made recommendations both as regards the civil service and the government. The latter, with some changes, have now been put into force by order-in-council The most pronounced divergence is the continuation of the treasury board, which Sir George thought should be abolished, but which is to be kept on and will be made an instrument of greater effectiveness.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canadian Cereal and Milling Company, Limited.—The Canadian Cereal and Milling Company, Limited, has had a receiver appointed to look after the interests of the bondholders.

Hollinger Mines.—According to the general manager's report for the four weeks ended October 7th, the Hollinger mine made a gross profit of $131,510.18, leaving the surplus at $722,579.60, after distributing $1,170,000.

Intercolonial Coal Mining Company.—The half-yearly interest, due October 1st, on the $232,000 5 per cent. bond issue of the Intercolonial Coal Mining Company, Limited, has not been paid, and the financial circumstances which brought this to pass will be laid before the shareholders at the special meeting of the company on Thursday, November 20th.

Cape Breton Electric Company, Limited.—Total railway earnings of the Cape Breton Electric Company, Limited, for the seven days ending October 25th, 1913, and for the corresponding days of preceding year, were as under:—

1913	$5,381
1912	4,567
Increase	$ 814

Bell Telephone Company.—The Bell Telephone Company's appointment of the Royal Trust Company as transfer agent and the Montreal Trust Company as registrar, is one that is appreciated throughout the Dominion as facilitating the transaction of business in the company's shares. The appointments take effect November 1st. Transfers on the new stock issued early in the year, will, however, be made as usual at the company's office until the shares are fully paid up.

Unity Building Company.—The Unity Building Company, owners of the Unity Building, 46 St. Alexander Street, have decided to defer payment of their bond interest.

Mr. George R. Lighthall, president of the company, states that while that bond interest had not been paid, the financial standing of the company was not such as to cause worry. The building has only recently been completed, 45 per cent. of the space being still unoccupied. This, together with the fact that much money was expended in alterations to the building, account for the present conditions.

British Columbia Copper Company.—As a result of the exploration work in which the British Columbia Copper Company has been engaged for eighteen months and now nearing completion, it will be necessary for the company to do some financing for developing the new ore, though this may not be done during present stringency.

The work has resulted in blocking out a large amount of 1.9 per cent. ore from which it is expected about 60,000,000 pounds of fine copper will be produced. There is also a large amount of new ore in sight. Most of the prospecting work was done in Copper Mountain, where the company's other mines are located.

This work has cost the company between $300,000 and $400,000 for options, development and purchase of properties. It was to provide money for these additional properties that the directors decided not to pay the quarterly dividend of 3 per cent. last March.

Nova Scotia Steel and Coal Company.—Mr. R. E. Harris, president of the Nova Scotia Steel and Coal Company, in a letter published in connection with the recent offering of debenture stock in London, states:—

For the year 1913, the profits from our iron and steel business for the first five months have exceeded those of the same department for the full year 1912, and we have sold an increased quantity of iron ore at better prices than prevailed last year.

There has been a large demand for coal, and the whole output of the company for the year has already been disposed of.

Under these circumstances, I have no doubt that our earnings for the present year will show a considerable increase over any previous year in the history of the company.

The proceeds of the $2,000,000 of debenture stock now being issued, will be used to repay a part of the expenditure on capital account for the past year, and the balance is being applied in equipping a new colliery, a new open-hearth furnace, and other improvements and additions to plant and equipment to provide for still larger outputs, thereby adding to the earning power of the company.

VALUE OF LIFE INSURANCE

XXXVII.

How to Convert Incomes

BY C. A. HASTINGS.

In this article, I propose to point out how it is possible to safeguard the future of a wife when she is left alone in the world. Thanks to competition, the public have now the benefit of a greater variety of policies than in the past. By the following method, men of limited means, are in a position to do justice to their wives. To a large class of men who carry endowment insurance and who live long enough to see their policies mature, and receive the sum assured during their lifetime, whether it is with or without bonus, it is a luxury, for these men are certain of an income, and therefore it really amounts to an injustice to the wife unless the money received is so taken care of that every cent of it is available when the husband dies, and the income is suddenly and permanently cut off forever.

Contingent Annuity Policy.

Under a contingent annuity policy the husband deposits a stated premium which will guarantee an annuity to his wife for life, the first instalment payable at his death. If the wife predeceases the husband the policy becomes null and void, but to the man, whose desire is not to secure for his widow the largest amount of fixed life annuity, by depositing a little larger premium they will all be returned to him, should this event occur.

Future Protection of Wives.

Policies of this nature are extremely beneficial to those who become pensioners, those who derive an income from life interests and those who are without capital, but are drawing an assured income during their lifetime. The husband is always safe, but if his one aim and wish is to protect, financially, the future of his wife, if and when she is left all alone in the world, I have here indicated how he can do so at a cost that is no burden to him.

PERSONAL NOTES

Mr. C. G. McLean has been appointed managing director of the Ontario Fire Insurance Company, Vancouver.

Mr. R. M. White, Toronto, manager of the Royal Securities Corporation, leaves for London, England, next Saturday.

Prof. R. W. Brock, director of the geological survey, is to be made deputy minister of mines, succeeding Mr. A. P. Low.

Mr. F. White, sub-manager of the Sun Insurance Company of England, is on a business visit to Canada and the United States.

Mr. Charles P. Muckle, B.A., has joined the staff of the Excelsior Life as head of the company's advertising and publication department.

Mr. Thomas Taylor, M.P.P., Winnipeg, visited Vancouver recently on business connected with the Great West Life Assurance Company.

Mr. J. K. L. Ross of Montreal, has been elected to fill vacant directorship in the Canadian General Electric Company's board, caused by the death of his father.

Mr. J. Lyster, manager for the Montreal division of the Great West Life Assurance Company, and one of the best known insurance men in that city, died suddenly on Saturday last.

Mr. M. J. Savage has resigned his position with the Bank of Toronto to enter the employ of Messrs. N. L. Martin & Company, assignees, Toronto. His friends anticipate for him a bright future in his new work.

Mr. Willett G. Miller, LL.D., Ontario Provincial Geologist, was recently tendered a complimentary banquet and presented with his portrait in oils, by the mining men of Ontario and other parts of the Dominion, at the Toronto Club.

◆

A new firm under the name of "Credit-Canada, Limited," has been organized at Montreal to deal in bonds and real estate. Mr. Rene T. Leclerc, formerly of the Canada Investment, Limited, is the managing director and Mr. E. A. Ouimet, of Gravel and Ouimet, is the secretary. The other officers of the company are the Honorable J. Adel. Ouimet, president, Honorable H. B. Rainville, vice-president.

TORONTO STOCK EXCHANGE IS A VETERAN

Was Formed in 1852 and Even Then British Capital Was Being Sought for Canada—New Premises Being Built

Within a short time, the members of the Toronto Stock Exchange will move into their new premises. Although the Exchange was formed on July 26th, 1852, it was not until 1861 that regular sessions of the board were held, the members in the interval going to one another's office, and transacting business in that way.

On October 18th, 1861, twenty-four members paid the annual due. In 1871 the entrance fee, which up to this time was nil, was made $5.00, and annual due $25.00, the former figure being the value of a membership, which has gradually increased, until now it is $20,000.00 and the membership is fifty.

In 1871 the listing fee was $10.00; to-day it is $300.00.

In 1879, a special act of incorporation by the Ontario legislature was granted the Exchange.

Site for New Building.

On August 18th, 1911, a special meeting of the members was held in the Exchange, situated in the National Trust Building, 20 King Street East, where it had been since 1900—previously to that having rented rooms on the north side of King Street, between Victoria and Toronto Streets—when it was carried unanimously that the property offered by Sir H. M. Pellatt, Nos. 84 and 86 Bay Street, be acquired at a cost of $153,000.00 and a suitable building erected. Subsequently the Mark Fisher Building to the south, No. 82 Bay Street, in order to provide further extension in the future, was acquired at a cost of $108,000.00.

Mr. W. H. Brouse, who during his presidency in the years 1910-1911, and who had been the leading spirit in bringing forward the matter of a new Exchange before the members, on his vacating office in June, 1912, was elected chairman of the building committee, with Mr. E. B. Freeland and Mr. G. Tower Fergusson as associates, and the president, Mr. F. Gordon Osler, ex-officio member. Mr. J. M. Lyle was the architect selected under competition plan contract.

The estimated cost of the new Exchange Building is $130,000 to $140,000, including architect fees, but excluding cost of land, and the Mark Fisher Building incorporated therein.

How the Exchange Commenced.

How the Toronto exchange had its beginning is told in a newspaper clipping of August 14th, 1852, and printed in an interesting pamphlet prepared by Mr. Lyndhurst Ogden, the well-known and popular assistant secretary of the Exchange. This clipping says:—

"It has, for some time past, been in contemplation to establish a Stock Exchange in Toronto, for the purpose of affording to all parties interested in the transfer of stocks, and other public securities, greater facilities in effecting their respective operations, than are at present possessed, and also to extend the circulation of Canadian credit and establish a uniform charge for the transaction of all business coming within the range of stock or share broker. With this object in view a meeting of gentlemen engaged in this business was held to-day, for the purpose of taking the subject into consideration. Mr. Barrow was called to the chair, and Mr. James Fraser, requested to act as secretary.

"After the subject had been thoroughly discussed, and the advantages of such an institution in Canada had been clearly set forth, the following resolutions were unanimously adopted:—

"1. Resolved,—That the great increase in business in stocks and the importance now attaching to Canadian securities generally render it expedient to form a Stock Exchange in this city.

Capital Turning to Canada in 1852.

"2. Resolved,—That in consequence of the very low rate of interest obtained in the London market, capitalists have been induced to turn their attention to Canada, offering, as it does, good security and better rate of interest on investments, and it is, therefore, desirable to fix that attention more firmly upon the advantages of Canadian securities generally.

"3. Resolved,—That Toronto, being the most central point of attraction to capitalists seeking investments in Canada, this city is deemed and considered to be in every respect the most convenient locality in which to establish an Association of Brokers.

"4. Resolved,—That as citizens of Toronto we consider we are discharging an important duty in taking the lead in Canada by the establishment of an Association, as well adapted to promote and extend the general interests of this province.

"5. Resolved, therefore, that, the gentlemen now present do constitute themselves an association to be dominated the Toronto Stock Exchange."

It is evident from the above that Canada was seeking to attract the British investor as long ago as 1852. The success achieved is indicated by the fact that to date Great Britain has loaned the Dominion over £400,000,000.

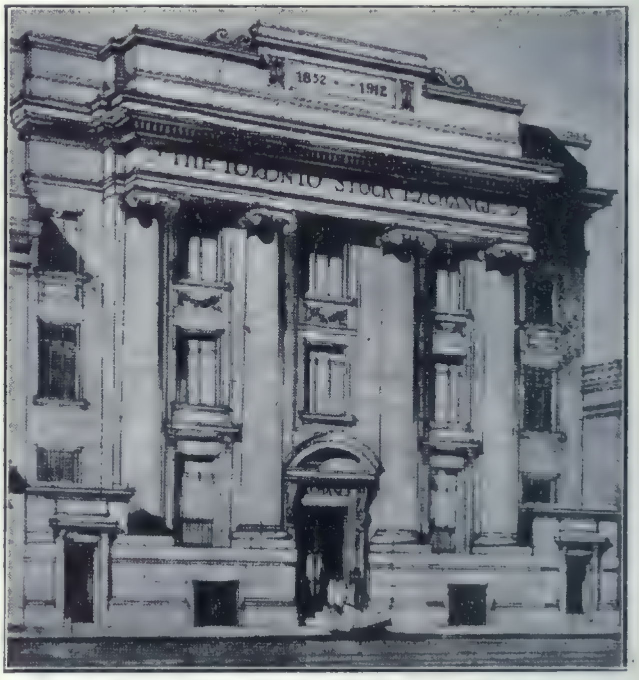
Presidents of Past Years.

The presidents of the Toronto Stock Exchange since 1861 have been as follow:—

1861-1863, Herbert Mortimer; 1864, W. Alexander; 1865, J. C. Stikeman; 1866, E. Bradburne; 1867, Herbert Mortimer; 1868-1870, H. L. Hime; 1871-1872, W. G. Cassels; 1873-1875, J. Browne; 1876-1880, H. Pellatt, Sr.; 1881, W. Hope; 1882-1883, R. Beaty; 1884, H. R. Forbes; 1885, J. Stark; 1886, W. J. Baines; 1887, H. C. Hammond; 1888-1889, H. L. Hime; 1890-1891, W. Gibson Cassels; 1892, C. S. Gzowski; 1893-1894, J. Stark; 1895, J. W. Beaty; 1896-1897, A. E. Ames; 1898-1899, G. T. Fergusson; 1900-1901, J. L. Campbell, 1902-1903, R. A. Smith; 1904-1905, R. H. Temple; 1906-1907, A. P. Burritt; 1908-1909, J. O. Buchanan; 1910-1911, W. H. Brouse; 1912-1913, F. G. Osler

Exchange Officers To-Day.

The present officers of the Exchange are as follow: F. G. Osler, president; E. B. Freeland, vice-president; S. Temple Blackwood, secretary; H. R. Tudhope, treasurer. The executive committee are Messrs. W. H. Brouse, J. O. Buchanan and G. Tower Fergusson.



Toronto's New Stock Exchange Building

Mr. Lyndhurst Ogden has been assistant secretary of the Toronto Stock Exchange since 1881.

On the opposite page is a reproduction of an old transaction sheet of the Exchange. A careful examination will afford considerable interest.

◆

ANOTHER REASON FOR TIGHT MONEY

A London cable says that an enormous aggregate of European loans is under contemplation in that market. Computations now available show that included in the total are: France, £52,000,000; Turkey, £28,000,000; Austria, £20,000,000; Bulgaria, £15,000,000; Greece, Servia and Roumania, £10,000,000 each, or total of £146,000,000.

About £2,000,000 of Roumania's approaching loan will be issued in London at the rate of 4½ per cent., offered at 93. Most of these loans cannot be issued during the current year. Nearly all the money is required for war purposes.

◆

The following company in Canada has changed its name: Herbert Lubin and Company, Limited, to Mutual Bond and Realties Corporation of Canada, Limited.

The name given by the Canadian Pacific Railway to the new town south of Medicine Hat, Alta., where the Canada Cement Company is building its plant, is Dauntless. It was formerly called Delane.

Mr. T. H. Carling, head of the Carling Brewery Company, is authority for the statement that the plan of English capitalists to merge the breweries of Canada has fallen flat, apparently through lack of capital sufficient to float a combine on the scale that was contemplated.

Province Ontario County Debentures.—In demand, but very scarce.
City Toronto.—Readily Sold at 6¾. Few Offering.

HOW TWO LIFE COMPANIES LOST A PROSPECT

Sequel to the Prospect's Story—Underwriter Says Applicant's Brevity Was Too Pronounced

Editor, The Monetary Times,

Sir,—On page 707, of your issue of November 1st, there is related under the heading "How Two Life Insurance Companies Lost a Prospect," the experience of a young man who desired to place some life insurance upon his life.

This gentleman recounts his experience with two companies, one a United States company and one a Canadian company and recites the contents of the letters he received from them. It might be interesting to know of the letter which he wrote to them. He wrote as follows:—"Kindly mail me particulars of your endowment policies," giving as his address "General Delivery." As any one familiar with life insurance knows, there are many forms of endowment policies, with premium rates at all ages from 20 to 60. The "prospect's" letter was therefore indefinite, and he could not expect any very definite information in the reply to his letter.

The reply from the United States company was admittedly crude and not very courteous, and could scarcely be expected to bring any frank response.

The reply of the manager of the Canadian company is scarcely open to such criticism for it was entirely courteous and asked for data which was necessary to admit of the giving of definite and helpful information. The prospect failed to reciprocate by neglecting to reply to this letter, and thus lost the opportunity of securing expert advice and the most full and frank explanation as to plans, rates and policy contracts. He started out with a wrong attitude toward insurance salesmen, for he begins his article thus:—"Not desiring a visit of aggressive life insurance solicitors or to listen to their cajoleries." This mistaken idea of the function of the present day life insurance salesman led him to distrust from the beginning, and influenced him to the somewhat crude expedient of withholding his address. It further influenced him to read wrong motives into the letter of the Canadian company and to entertain the suspicion that the failure to give information implied a hestitancy to give it.

Average Man Not Conversant.

It is admitted by any one having experience in the selling of life insurance that the average man is not sufficiently conversant with the different policies of insurance and their uses to know just what particular plan he should select, and he is wise in not trying to arrive at a conclusion himself, but in taking advantage of an experienced insurance man's advice. In these days of "scientific salesmanship," life insurance salesmanship consists, not in indulging in "cajoleries" to secure the application with the sole object of bringing commission to the pocket of the agent, but in giving to the prospect the benefit of training and experience, and in being of real and genuine service to him.

In this era of world-wide business intercourse, and of innumerable business relationships, it must ever be the aim of those who would build securely and permanently and attain real success to follow the law of service and to live the golden rule. Only in this way can public confidence be secured, only in this way can any institution be a lasting and useful factor in the community and in the world.

Life insurance is not a cold business proposition, but an institution, based upon sentiment, the love of home and family. Life insurance companies of to-day who are properly fulfilling their function in the state, and are building upon a foundation of rock and not of sand, are those companies who, place the interest of their policyholders before all else; for, indeed, the life insurance company is the servant of its policyholders, the custodian of their funds, the guardian and trustee to their beneficiaries.

Salesmen Serve Public's Needs.

The life insurance agent of to-day is not one who, when all else has failed, turns to life insurance and, for a time, draws sustenance from the pockets of his friends who feel inclined to help him out, is not one who earns his bread by the sweat of his tongue and closes business by lingual force and persistence, but rather, he is one who has by training and study become competent to advise in matters of life insurance, and is able to be of real and lasting service to each and every one of his clients. He becomes their insurance adviser, thinking not so much of commissions as of the interests of his clients. He uses his brain and his heart rather than his tongue; he is welcomed, rather than avoided, and justly so, for who comes into closer relationship with his clients than the life insurance advisor. He knows their ages, their family history, their financial condition, their home responsibilities and their business worries, for it is only when he knows these facts that he is in a position to advise wisely.

It will, therefore, be seen that the prospect started out with a mistaken premise and assumed that he was entitled to detailed information when he had withheld all the data which the life insurance manager had to have before he could give any advice whatever without prejudicing his professional standing.

This comment upon the article of November 1st, has been submitted, not so much by way of criticism of the prospect's conclusions, but for the purpose of dissipating the mistaken idea so many people have of the function of the present-day life insurance salesman. The life insurance salesman who is properly fulfilling his duty to himself and to society is not worrying about "prospects," but is kept busy serving the needs of those who come to him voluntarily in ever-increasing numbers for advice and counsel. "He profits most who serves best."

Yours, etc.,

"LIFE UNDERWRITER."

Toronto, November 5th.

IS OTTAWA TRACTION ACQUIRING COMPANIES?

Capitalization Could Take Over Assets—Montreal Financiers Have Holdings

Monetary Times Office,
Montreal, November 6.

Interest is shown over the new incorporation at Ottawa under the title of the Ottawa Traction Company, Limited, with a capital of $10,000,000, more particularly because of the fact that much of Ottawa Light, Heat and Power stock is held in Montreal, and it is thought possible that the new company may have been formed to take over this company, together with the Ottawa Electric Railway, which at present operates the street railway system of that city. For some years it has been considered that the two companies would be merged.

There is considerable similarity of interest, but apparently no very strong desire on the part of the larger holders of the different companies to bring about such an amalgamation. Possibly the directors of the separate companies may consider that their own plans concerning the development of the separate companies should be brought to completion before any attempt should be made to bring about a merger, or it may be that Ottawa is not yet large enough to make an amalgamation of this character sufficiently remunerative to the promoters.

Reached Record in Earnings.

It was in May last that the announcement was made of a new issue of $800,000 of stock in the Ottawa Power Company. Both the Power Company and the Electric Railway Company reached a record in the matter of earnings last year and the outlook was considered most hopeful in each instance.

The Ottawa Light, Heat and Power Company is, itself, an amalgamation of, or a holding company for, the Ottawa Electric Company and the Ottawa Gas Company. The authorized capital of the company is now $5,000,000 and the issued capital $2,784,400. It is considered that the company is now virtually on a 10 per cent. basis.

Ten Million Dollar Company Could Manage.

The Ottawa Electric Railway Company has an authorized capital of $2,000,000 and a subscribed and paid-up capital of $1,876,900, together with a bond issue of $500,000 of 4 per cent. Therefore, a company with a capital of $10,000,000 could readily take over the combined assets of both companies.

Mr. T. Ahearn of Ottawa, is president of both the light, heat and power company and the electric railway, and Mr. Warren Y. Soper of Ottawa, who is a director of the light, heat and power company, is vice-president of the electric railway, otherwise there is no similarity between the directorates.

◆

BUFFALO MINES' REPORT.

The mill report for the month of September for the Buffalo mines reads:—

Mill ran, hours	605½
Ore milled, tons	5.744
Average assay per ton before milling, ounces	20.83
Ounces of silver recovered	99.043
Ounces of silver paid for during month	207.054

Dividend No. 53, 5 per cent., No. 54, 15 per cent., paid October 1, 1913.

Total dividends paid, $2.437,000.

ADDITIONAL CABLE NEWS

(Continued from page 737.)

HUDSON BAY COMPANY TO INCREASE CAPITAL.

†London, November 5.—An extraordinary general court of the Hudson Bay Company has been convened for November 24, when a resolution will be submitted increasing the capital of the company by the creation of 200,000 5 per cent. cumulative preference shares of £5 each to rank equally with those already existing, the shares to be offered at par to the holders of not fewer than five of the existing ordinary shares of the company in the proportion of one preference share for every five, or multiple of five, ordinary shares. The capital is said to be for developing the company's store business.

---

†Canadian Associated Press cable.

MONEY WILL CONTINUE TIGHT.

*London November 5.—The Canadian Gazette commenting on the purchase by Harris and Son, Boston, of $1,626,000 of Vancouver 4½ per cents., says this co-operation is valuable alike to borrowers and the London market. Never probably was there such a crowd of would-be borrowers hovering over the money markets of Western Europe as now.

Money must therefore remain dear for some time. Even the British treasury is paying nearly 4¾ per cent. in discounting three-months' bills.

**Montreal Star* cable.

IMPERIAL UNDERWRITERS IN ACTIVE BUSINESS.

A reference to the Imperial Underwriters Corporation of Canada in *The Monetary Times* of October 4th, may not have been quite clear to readers. The notice that the company had ceased to do business, referred to the old company and was necessary before the release of the securities, held by the British Columbia government, could be secured. The Imperial Underwriters Corporation of Vernon was purchased by the Sun Insurance Office of London, England, and a new company called the Imperial Underwriters Corporation of Canada was incorporated by special act of the Dominion parliament to take it over.

A Dominion license was secured for the new company, the policies of which are guaranteed by the Sun, who are rapidly establishing the Imperial Underwriters Corporation of Canada from coast to coast.

The Sun, with head office in London, England, is the oldest insurance company in the world, having been founded in 1710. Its age, however, has not affected its enterprise, nor the good reputation of its policies. Mr. H. M. Blackburn, at Toronto, is manager of the Canadian branch.

BANK CLEARING HOUSE RETURNS.

BANKER'S VIEWS OF SASKATCHEWAN PROPOSALS

Implement Man Usually Gets Paid First and the Bank Last

A Canadian banker, in a letter to the editor of *The Monetary Times*, commenting on the proposals of the Saskatchewan royal commission regarding agricultural credits, says:—

"I am glad the commissioners have recognized that the banks have attempted to fulfil their mission, by opening offices and otherwise. I note they say that until recently the banks have afforded abundance of credit. Is there not a possibility of that credit being overdone?

Who Are Paid First?

"When the money comes for the crop, who are the first paid? Experience goes to show that the implement men are always on hand to get the proceeds from the harvest. The mortgage interest has to be paid, where there is a mortgage—an all-too-common condition of things in the Northwest. The merchant comes third, so that the farmer may get credit for needed supplies, and the bank comes last, because the farmers have not become imbued with the idea that the bank requires payment as urgently as the others named. When the banks adopt the method of seeking the farmer to get a part of the proceeds of his crop, the possibility is that the loans will not be so dead as in many cases they are now. I would be glad to think that the virtue of promptness had been inculcated as a business habit by the action of the banks, but I have grave doubts.

"Having regard to the complaints made against the banks, that they have sought to dominate the policy of those borrowing from them, we have always considered that it was part of our duty to endeavor to act as counsellors to our customers, and where a man has gone out of his way in investing money while he is still a borrower, it is surely our part to remonstrate with him. I think records show that the banks have not withdrawn credit facilities from the Western provinces.

Overcharge Could be Regulated.

"I am not familiar with the charges for transferring funds, but there is so much competition that I should imagine an overcharge of the kind is easily regulated. I deny that the rate of interest on loans is unnecessarily large It ranges about the same as that charged by mortgage companies and other people lending money in the Northwest.

"That the sympathies of the banks lie rather with the commercial than with the agricultural class is an absolutely erroneous statement, in my opinion. Bank directors and the head offices recognize that they have a duty owing to all classes of the community, and they endeavor to fulfil it as nearly as may be, to the best of their ability."

MONEY MARKETS.

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N. Y. funds	1-64 p.m.	3-64 p.m.	⅛ to ¼
Montreal funds	10c. dis.	Par.	⅛ to ¼
Sterling, 60 days' sight ..	8⅛	8 5-32	8⅜ to 8½
do. demand	9⅛	9 5-32	9⅜ to 9½
Cable transfers	9¼	9 5-16	9½ to 9⅝
Rates in New York—		Actual.	Posted.
Sterling, 60 days' sight ..		4.80.50	4.81½
do. demand		4.85	4.86

Call money in Toronto, 6 to 6½ per cent.

Bank of England rate, 5 per cent.

Open market discount rate in London for short bills, 5 per cent.

MACDONALD COMPANY ISSUES SHORT TERM NOTES.

Arrangements have been completed by the A. Macdonald Company, Limited, with Mr. Macdonald and associates regarding the $691,000, balance due to them on account of purchase price. The sum of $91,000 and interest is to be paid from the issue of preference shares, and the remaining sum of $600,000 is to be converted into $600,000 of one, two and three-year notes, of which Mr. Macdonald and associates take $300,000, while eastern financial interests take $300.000.

The whole of the subscribed preference shares have not yet been taken up, the balance being sufficient to retire the entire note issue, and as these shares are taken up from time to time the proceeds will be utilized to redeem the short-term notes which are redeemable at any time at par and interest.

REVIEW OF THE MONTH

Canadian Flotations in London—Investment Offerings—Dividend Changes—New Stock Exchange Listings

SPECULATIVE AND INVESTMENT OFFERINGS

The following offerings were among those made in Canada during October:—

Empire Life Insurance Company of Canada, Toronto.—Offering of 7,500 shares of $100 at 25 per cent. premium, call being $40. Capital $1,000,000.

OCTOBER DIVIDEND CHANGES

The Russell Motor Company, Limited, decided to pass the dividend on preferred stock.

The Canadian Bank of Commerce declared a bonus of 1 per cent. with the regular quarterly dividend of 2½ per cent.

The Coniagas Mining Company declared the regular quarterly dividend of six, regular quarterly bonus of three, and an additional bonus of five, all payable November 1st.

The Bank of Montreal declared a bonus of 1 per cent., payable November 15th, in addition to regular quarterly dividend of 2½ per cent.

The Pay-as-you-enter Car Corporation deferred its usual quarterly dividend due in October. The company has an issued capital of $1,500,000 preferred stock and $2,750,000 common stock. The initial dividend on the preferred was paid October, 1910, and quarterly dividends at the rate of 1¾ per cent. have been paid up to the current quarter.

The Ontario Steel Products Company, Limited, declared an initial dividend of 7 per cent. on their preferred stock payable on November 15th to shareholders of record of October 31st.

The Bank of Toronto declared a quarterly dividend of 2¾ per cent. and bonus of 1 per cent. payable on December 1st to shareholders of record of November 14th.

The Ford Motor Company of Canuada deferred dividend action, although in good financial shape.

The Temiskaming Mining Company passed its dividend.

The Spanish River Pulp and Paper Company announced that no further dividends would be paid during the currency of a recent issue of £300,000 term notes.

CANADIAN FLOTATIONS IN LONDON IN OCTOBER

The following flotations of interest to Canadians were made in London during October:—

City of Vancouver.—£461,200 4½ per cent. bonds at 95.

City of Burnaby.—£250,000 10 year debentures at 98.

Alberta Province.—£1,000,000 4½ per cent. stock.

City of Edmonton.—£900,700 5 per cent. sterling bonds at 96.

Dominion of Canada.—£3,000,000 4 per cent. stock at 99.

Bell Telephone of Canada.—$4,500,000 5 per cent. bonds at 98½. This issue was made in Canada, United States, and England.

Vancouver Power Company.—£650,000 4¼ per cent. perpetual guaranteed debenture stock at 88.

North Battleford City.—£103,000 5¼ per cent. debentures at 95.

San Martin Mining Company of Canada, Limited.—£150,000 in $5 shares.

Western Canada Mortgage Company.—£300,000 5 per cent. 20-year first mortgage bonds at 94.

Nova Scotia Steel and Coal Company.—£199,500 6 per cents. at 98.

Province of Saskatchewan.—£300,000 1-year notes.

OCTOBER MOVEMENTS OF INSURANCE COMPANIES

The Hudson Bay Insurance Company, Vancouver, transferred its eastern non-tariff business to the Northwestern National, of Milwaukee.

The Winnipeg Life Assurance Company, Winnipeg, with capital of $1,000,000, issued prospectus.

The American Surety Company of New York ceased to do business in Canada and reinsured all its policies with the Canadian Surety Company, of Toronto.

The Home Life Association of Canada elected R. J. McLaughlin, K.C., president.

The Alberta Saskatchewan Life Insurance Company, with head office at Edmonton, was licensed by the Dominion department of insurance.

BANK OF MONTREAL BONUS

With the regular dividend of 2½ per cent. for the fourth quarter of its year, payable December 1st to stockholders of record October 31st, the Bank of Montreal has declared a bonus of 1 per cent., the second extra distribution for the year, and bringing the total return to shareholders for the twelve months up to $12 a share.

HEAVY CANAL TRAFFIC.

October statistics on Canada's canals give the traffic total as 39,077,369 tons, which is 4,816,103 tons greater than in the same month of 1912. The increase at the Soo was 3,467,889, the Welland 673,359 and the St. Lawrence 744,835, which discrepancies are taken to indicate that much traffic passing through the Canadian Soo reaches the seaboard via United States routes.

BIG LOAN RAISED BY CHURCH.

Negotiations have been completed for the raising of a loan of $600,000 by the Roman Catholic Episcopal Corporation of the diocese of Toronto on church properties throughout the city valued at more than $2,000,000. The loan is being made through the Scottish Widows' Friend and Life Insurance Society, of Edinburgh, at 5½ per cent., and is to run for a period of 15 years.

The Moose Jaw street railway, during the first nine months of 1913 carried 1,859,015 passengers, being an increase of 792,938 over the same period last year.

One hundred vessels will probably winter at the head of the lakes and will be utilized as storage space for grain. This will necessitate the moving of the big freighters through the harbor to get to the spouts of the grain elevators and this will be accomplished by the aid of the ice breaking tugs.

The Saskatchewan Abattoirs, Limited, have commenced operations on their building at Prince Albert, Sask. The company has purchased a cold storage plant. The usual packing products will be handled and it is proposed to manufacture all by-products as well. The primary object of the Saskatchewan Abattoirs, Limited, is to cater and care for the welfare of its agricultural stockholders. Winnipeg quotations will be paid. In addition the breeder will receive his share of the assured profits of operation.

FIFTY THOUSAND DOLLARS DAILY

This Sum is Received by British Columbia Mine Owners —Doukhobors Are Clearing Land

(Staff Correspondence.)

Vancouver, B.C., November 3rd.

One hears of mining in the Kootenay and Boundary, and if a trip is made, a mine is seen here and there and the smoke of smelters is seen at Trail, Grand Forks and Greenwood. The pounding in the concentrators may be heard, but after all one does not appreciate just what production amounts to. Canadian Pacific Railway officials estimate that for every working day, there is a net return of $50,000 to those interested. This figure is based on the amount of ore tonnage the railway carries, and the values of the ores, which are well known. That the large companies are successful is shown by the way in which the Consolidated Mining and Smelting Company is adding to its holdings, one of its latest being the Highland property at Ainsworth; and how the Granby Company is becoming interested in other parts of the province.

The Granby, the Consolidated and the British Columbia Copper companies are three active large companies the investments of which aggregate millions and which are constantly being increased. The visitor to this province notices the note of confidence in towns like Rossland, where there is a pay-roll of nearly a thousand miners. In Greenwood, the British Columbia Copper Company's smelter is working steadily, and at Boundary Creek, the Jewel mine, a gold-bearing property, is being worked again. At Phœnix, copper and gold properties are being worked, and returns from these are direct and profitable.

Marked Activity in Slocan.

In the Slocan district, lying between Slocan and Kootenay lakes, north of Nelson, the centre of the whole southeastern section, there is marked activity. The Standard mine at Silverton cleared $75,000 in September, and for a twelve months' period the net return will be about a million dollars. For ten years work has been going on on the Surprise, back of New Denver. Mr. A. Smith, of New Denver, has plodded on, and now has $300,000 worth of clean silver-lead ore in sight. With him is associated a Mr. Kent of Chicago. Clean ore has also been struck on the property of the Slocan Star Mining Company. The Canadian Pacific Railway is standardizing the railway between Sandon and Kaslo, this will give the latter town on Kootenay Lake direct and short connection with Sandon and New Denver on Slocan Lake and with Nakusp on Upper Arrow Lake.

Doukhobors Get Good Word.

Just what can be done with acreage in British Columbia is demonstrated along the shores of the Arrow Lakes where settlers have taken up desirable locations. General farming is not indulged in particularly, but fruit raising is a feature.

At Brilliant, a short distance from Nelson, the Doukhobors have a large communistic settlement. They have cleared a vast area and their well-tilled ground is in such a location that it can be seen by railway passengers. They are doing much work in clearing and cultivation. They are not regarded favorably because of their class and also because living as a community they buy direct from the wholesalers on the coast. But the time will likely come when the community will cease to exist, and as the younger generation grows up, British Columbia will have sturdy stock and an area of farms unequalled in the best part of Ontario. The Doukhobors are also housed on land near Grand Forks, and are doing the same work there.

In and around Grand Forks are ten thousand acres of land available for cultivation. A considerable quantity of this has already been taken up. Grand Forks, which has also the big Granby smelter, is one of the prosperous towns of the interior.

◆

Because of improved fire fighting facilities, Eburne is to have lower insurance rates.

The new officers of the North Vancouver board of trade are:—Honorary president, Mr. H. H. Stevens, M.P.; president, Mr. Luther Watts-Doney; vice-president, Mr. George H. Morden; secretary-treasurer, Mr. A. B. Chapmen.

The Grain Growers' Grain Company, Winnipeg, has purchased the elevator, grain and feed business of the Grain Growers' British Columbia Agency, Limited, at New Westminster. They will make that city the headquarters for distributing organization in British Columbia.

TEN MORE BOATS FOR HALIFAX

Work on New Terminals—Fish and Fruit Returns Are to Hand

(Special Correspondence.)

Halifax, N.S., November 4th.

With ten additional steamers per month making Halifax their port of call, and the Empresses and Allan boats making it their terminus, a marked increase in shipping tonnage is looked for during the winter season of 1913-14. The winter of 1912-13 showed an increase of over the year previous of 632,000 tons. The boats new to the port, the coming winter, will be six Cunarders a month—two from the New York service and four from the Portland service, two from the Navigazione-Generale-Italiana service, and two from the Norwegian-American Line.

To meet this increased tonnage, the department of railways will have five additional berths fitted for export and import trade.

Progress on Pier and Terminals.

The work on the new pier is progressing favorably. The pier is now out a distance of 500 feet.

Work on the new terminals is progressing. On the site of the new wharves a large force of men are working. Tenders for construction of the third unit, consisting of the landing pier, etc., have been filed with the government, and it is understood there were ten bids for the work, which will amount to some five million dollars.

While the car companies at Halifax and Amherst are closed down for the present, it is understood the former has an order on hand and the work will start in a short time. The car works at New Glasgow are busy on an order of two thousand steel cars, and their maximum output so far, has been 17 per day.

From Land and Sea.

The coal companies are rushed with orders, and the shipping piers at Sydney and Port Hastings are daily surrounded by a large flotilla of vessels awaiting their cargoes. A largely increased year's output is anticipated.

Compared with last year, the apple crop will be small, probably not more than 700,000 barrels; prices, however, have been high, and the farmer has learned the lesson of holding his apples for an advanced market. Last season the English mail boats were used for the purpose of rushing apples to an advancing market, 180,000 barrels having been shipped this way.

The high price of fish continues and the catch will be a little over the average one, while lobsters will show a falling off of about 10 per cent.

Building is brisk throughout the province.—E.A.S.

◆

IN MEDICINE HAT

Medicine Hat mineral authorities have long thought that where there was so much gas and coal, there must be oil in commercial quantities. Up to recently, however, no special effort was made to drill for oil.

Now long lines of men have been seen standing in front of the Dominion land office, in order to get a chance to file for oil. Usually it is a string of homesteaders noted, but there has been a plentiful sprinkling of well-known citizens and business men, who seem to think it is worth while tying up a few sections of oil land. Hundreds of leases have been filed on at the land office. Of course, all the leases must be outside those owned by the city of Medicine Hat and the Canadian Pacific Railway, but many thousands of acres have been filed on north and northwest of this city, and also to the south and southwest.

About seven miles west of the city a well drilling rig has been at work, supposedly boring for gas, but when a depth of 2,700 feet is attained, it is known for a certainty that a point below the gas sand has been reached. Oil seepages have been discovered in several localities, and oil men of experience have looked over the district carefully and made examinations of likely localities.

Mr. W. R. Martin, an oil and gas expert of some 25 years' experience all over the world, maintains that there is much likelihood of finding oil in commercial quantities in the Medicine Hat district. To show his faith, Mr. Martin's company, the International Supply Company, will within sixty days, have an oil drilling rig on the ground, and will immediately start a well.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Rossland, B.C.—October 21—Baptist Church. Loss and cause unknown.

Leamington, Ont.—Deming Temperance hotel. Loss $800. Cause, stove.

Kelowna, B.C.—October 19—Mr C. Clarke's residence. Loss and cause unknown.

Sackville, N.B.—October 23—Mr. F. Fisher's barn. Loss $1,000. Cause unknown.

Wolfville, N.S.—October 25—Mr. H. Leapold's stables. Loss and cause unknown.

Minnedosa, Man.—October 23—Mr. A. Watt's paint shop. Loss $100. Cause unknown.

Langruth, Man.—October 26—Barber shop and pool room. Loss $800. Cause unknown.

Moose Jaw, Sask.—October 27—Mr. J. M. Griffin's automobile. Cause unknown.

Stirling, Ont.—October 17—Mr. W. Gould's residence. Loss $1,500. Cause unknown.

Big Marsh, N.S.—October 19—Messrs. Gillis' sawmill. Loss unknown. Cause, friction.

Windsor, Ont.—October 24—House on Dougall Avenue. Loss unknown. Cause, supposed tramps.

Cookshire, Que.—October 31—Standard Chemical Company's plant. Loss $3,000. Cause unknown.

St. Catharines, Ont.—October 25—Mr. J. Lowe's carriage shop, Mary Street. Loss $25. Cause unknown.

Vancouver, B.C.—October 20—Great Western Smelting and Refining Works. Loss and cause unknown.

Port Maitland, N.S.—October 29—Messrs. Goudie and Porter's buildings. Loss $30,000. Cause unknown.

Victoria, B.C.—October 23—Mr. A. James' residence, 213 Ontario Street. Loss $200. Cause, overheated stove.

Lake Megantic, Que.—October 27—Mr. J. Lemay's residence, 10th range of Whitton. Loss and cause unknown.

Port Arthur, Ont.—October 28—Shed rear 335 Brock Street. Loss $200, insured. Cause, supposed incendiary.

Ganges Harbor, B.C.—October 25—Hotel Ganges, owned by Mr. B. J. Taylor. Loss $15,000. Insured. Cause unknown.

Regina, Sask.—October 27—Mr. J. D. Scott's automobile. Loss $3,000. Insured with Dominion Trust Company. Cause unknown.

Oshawa, Ont.—October 18—Mr. W. Crowell's barn, Ritson Road. Loss unknown. Insurance $1,700, Leaf Fire Company. Cause, supposed incendiary.

Welland, Ont.—October 28—Mrs. G. Hutton's house, Mill Street. Loss $200. Cause, supposed defective chimney.

October 31—Mr. H. Boyle's barn, Hellens Avenue. Loss unknown. Cause, supposed defective wiring.

Quebec, Que.—October 22—Mr. Thivierge's store, St. Joseph Street. Loss $3,000.

October 31—Messrs J. E. Belanger and Company's store. Loss $100,000. "Le Soliel" newspaper plant. Loss unknown. Cause unknown.

Hamilton, Ont.—October 24—Mr. G. E. Mills, brick kiln. Loss $400. Cause unknown.

October 30—Hazell and Dawson's store, Wentworth and Main Streets. Loss, building, $100; contents, $1,000. Cause, supposed defective chimney.

Moncton, N.B.—October 25—Mr. J. D. Le Blanc's pressing shop. Loss unknown. Cause, gasoline ignited.

October 26—Mr. H. M. Wilson's store, Lower Main Street. Loss $8,000. Insurance, Northern, $2,300; Fidelity Underwriters, $3,000. Palatine, $1,000, and $700 on fixtures in Northern. Cause unknown.

Edmonton, Alta.—October 27—Douglas Brothers' store. Loss, building, owned by Mr. J. Walters, $15,000. Insurance $8,000, contents $85,000; insurance $65,000. Cause unknown.

October 30—Thistle Rink, Second Street, and Armories of 101st Regiment. Loss, buildings, owned by McDougall and Secord, $20,000. Cause unknown.

Toronto, Ont.—October 31—Mr. T. Kellickle's stable, 40 Conway Avenue. Loss $700. Cause unknown. Alexander and Cable building, Pearl Street. Loss, Alexander and Cable, $20,000; H. S. Cooper, $500; Aldine Press, $100; J. R Irving, $300. Cause, supposed electrical motor. Temple Building, Richmond and Bay Streets. Loss $25. Cause, boy dropped matches in papers.

Montreal, Que.—October 28—Mr. H. Vineberg's premises, 225 St. George Street. Loss $1,500. Cause unknown.

October 29—Union Cold Storage Building; occupants, Dominion Machinery and Supply Company, and Factory Waste and Metal Company, Industrial Manufacturing Company, Canada Office Furniture Company, Canadian Machinery Agency, and Ives Modern Bedstead Company. Loss $100,000. Cause unknown. Diamond Glass Works, Delormier Avenue. Loss $1,000. Cause, burst oil pipe

A useful and interesting novelty is being issued monthly, by the Home Bank, namely, an historic blotter. It shows that it is forty years to-day since Winnipeg was incorporated as a city, and that on November 26th, 1854, fifty-nine years ago, the Toronto Savings Bank, the original of the Home Bank, was organized.

CANADA'S OCTOBER FIRE LOSSES

Total for Month Showed Small Decrease—Ontario Leads Provinces

The Monetary Times' estimate of Canada's fire loss during October amounted to $1,257,072, compared with September loss of $1,468,324, and $883,949 for the corresponding period of last year. The following is the estimate for the October losses:—

Fires exceeding $10,000	$ 981,038
Small fires	222,069
Estimates for unreported fires	180,465
	$1,383,572

The following are the monthly totals of the losses by fire during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 1,275,246	$ 2,250,550	$ 3,002,650	$ 3,913,385
February	750,625	941,945	1,640,153	2,037,386
March	1,076,253	852,380	2,261,414	1,710,756
April	1,717,237	1,317,900	1,355,055	1,470,622
May	2,735,536	2,564,500	2,251,815	2,123,868
June	1,500,000	1,151,150	4,229,412	3,069,446
July	6,386,674	5,384,300	1,741,371	2,579,698
August	1,667,270	920,000	1,164,760	3,034,775
September	894,125	1,123,550	883,949	1,468,324
October	2,195,781	580,750	1,416,218	1,383,572
November	1,943,708	1,506,500	1,184,010	......
December	1,444,860	2,866,950	1,769,905	......
	$23,593,315	$21,459,575	$22,900,712	$22,781,832

Large Fires.

The fires at which the loss was estimated at $10,000 and over were:—

Sep. 26—Steveston, B.C.	Farm buildings	$ 10,000
Sep. 27—Toronto, Ont.	Manufacturing building	40,000
Oct. 1—Londonderry, N.S.	Hotel	10,000
Oct. 1—Gananoque, Ont.	Spring and axle works	35,338
Oct. 2—Ottawa, Ont.	Residence	10,000
Oct. 3—Pembroke, Ont.	Business block	60,000
Oct. 4—Toronto, Ont.	Garage, etc.	30,000
Oct. 7—Toronto, Ont.	Business block	25,800
Oct. 9—Winona Beach, Ont.	Fishing huts, etc.	10,000
Oct. 10—Morin Heights, Que.	Lumber mill	30,000
Oct. 11—Ottawa, Ont.	Cattle barn	75,000
Oct. 12—Montreal, Que.	Sash and door factory	15,000
Oct. 13—Ottawa, Ont.	Sash and door factory	57,000
Oct. 16—New Liskeard, Ont.	Store	10,000
Oct. 16—Montreal, Que.	Convent	80,000
Oct. 17—Montreal, Que.	School	10,000
Oct. 18—St. Hilaire, Que.	Church	45,000
Oct. 19—Brantford, Ont.	Leather factory	80,000
Oct. 22—Montreal, Que.	Business block	25,000
Oct. 25—Ganges Harbor, B.C.	Hotel	15,000
Oct. 27—London, Ont.	Factory	17,000
Oct. 27—Edmonton, Alta.	Store	110,000
Oct. 29—Montreal, Que.	Business block	100,000
Oct. 29—Port Maitland, N.S.	Business block	30,000
Oct. 30—Edmonton, Alta.	Rink, etc.	30,000
Oct. 31—Toronto, Ont.	Manufacturing building	20,900
Oct. 31—Quebec, Que.	Store, etc.	130,000

Many Structures Damaged.

The structures damaged and destroyed included 53 residences, 36 barns and stables, 26 stores, 16 sheds, 9 hotels, 9 factories, 6 business blocks, 5 schools, 5 workshops, 3 planing mills, 3 warehouses, 3 garages, 3 churches, 3 fish-houses, 2 foundries, 2 apartment houses, 2 sash and door factories, 1 each elevator, wool mill, laundry, armory, brick kiln, newspaper plant, exhibition building, rink, restaurant, bank, oil-house, smoke-house, icehouse, hall, gas works, and picture theatre.

Of the presumed causes, 15 were attributed to incendiaries, 9 matches, 8 sparks, 6 defective chimneys, 5 ignited gasoline, 5 electrical, defects, 5 defective and overheated stoves, 4 tramps, 3 friction, 3 engine backfiring, 2 defective chimneys, 2 dropped cigarettes, 2 overturned lamps, 1 each burst oil-pipe, fuse from dynamite charge, hot ashes, hot castings, lightning, ignition of burning wax, collision, fumigating and smoking in bed.

There were destroyed 56 horses, 6 cows, 4 mules, 12 pigs, 1 squirrel, 1 raccoon, 1 dog, 6,500 bushels of wheat, 10,500 bushels of oats, 6,481 tons hay, 100 tons peas, 100 tons straw, 400 tons ensilage, 300 tons coal, 14 box cars, 14 freight cars, 13 carriages, 4 sleighs, 16 autos, 3 electric cars, 2 tug boats, 1 ferry boat, 800 military uniforms, 50,000 rounds ammunition, set of band instruments, 2 threshing machines, 1 tent.

During September, 15 lost their lives through fire.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22

Arrowood, Sask.	Burning building	1
		15

Provincial Fire Losses.

The fire waste in each province for first nine months of this year has been estimated by *The Monetary Times*, as follows:—

Ontario	$7,322,118
Quebec	3,853,051
Alberta	3,636,431
Manitoba	2,062,797
Saskatchewan	1,945,328
Nova Scotia	1,548,717
New Brunswick	1,057,005
British Columbia	903,594
Prince Edward Island	452,791
	$22,781,822

NOVEMBER FIRES

Lakefield, Ont.—November 1—Strickland homestead. Loss and cause unknown.

Strome, Alta.—November 2—Business section. Loss, $50,000. Cause unknown.

Cobalt, Ont.—November 3—Dane Mining Company's plant. Loss, $5,000. Cause unknown.

St. Catharines, Ont.—November 3—Grand Trunk freight sheds. Loss, $50,000. Cause unknown.

Montreal, Que.—November 1—Shed rear Women's Hospital, 1002 St. Catherines Street. Loss and cause unknown.

Toronto, Ont.—November 1—Mr. S. J. Marchalleck; office 19 Richmond Street East. Loss, contents $50, building $25. Cause, overheated stove. Mrs. Burke's residence, 60 Bellefair Avenue. Loss, $50. Cause, defective gas grate. Mr. S. Sosken, shed, etc. Loss, $35. Cause unknown.

November 2—Queen City Produce Company, 624 Parliament Street. Loss, contents, $800; building, $150. Cause unknown.

November 3—Mr. C. Rollinick's bicycle store, 127 Chestnut Street. Loss, building, $100; contents, $400. Cause unknown. Mr. A. Arego's shed, 105 Elm Street. Loss, contents, $50; building, $50. Cause unknown.

◆

That a fire prevention bureau, under the control of the Montreal fire department, be established; that this bureau comprise a staff of not less than thirty-seven competent inspectors, whose duties should include the frequent inspection of all buildings and premises to see that the by-laws concerning cleanliness of premises, the removal of waste, the disposal of hot ashes, and, generally, all by-laws dealing with the hazard of fire, be strictly enforced: that all matters which have any relation whatever to the safeguarding of life and property from fire, including the erection and maintenance of fire escapes and all other appliances, should be within the jurisdiction of the fire department, were the recommendations of a deputation of Montreal business men to that city's board of control.

BRITISH MANUFACTURERS WILL RUN TRAIN

Exhibition on Wheels Is Likely To Be Seen Here Soon

The study of the trade returns of the Dominion of Canada has forced upon the Canadian chamber of commerce in London that the proportion of Canada's import trade that was being enjoyed by British manufacturers was not satisfactory. Amongst other remedies for this state of affairs that suggested itself to the chamber was that of the provision in Canada of some form of exhibition of British goods, stated Hon. J. A. Turner, chairman of the Canadian Chamber of Commerce in London. He then outlined the proposal and said the council undertook to draft out what was considered to be a practicable proposal for such an exhibition, and ing under advice received from the great Canadian railway companies it appeared that an exhibition train would be the best and most economical way of bringing home to the Canadian people the excellence of British manufactures. The general tenor of the replies from city councils, etc., was such as to give strong grounds for belief that such a project would secure such a measure of support from British manufacturers as to ensure its financial success.

What the Council Proposes.

It is proposed that manufacturing cities in the United Kingdom shall each purchase a high-grade passenger coach from one of the Canadian railways, such coach to be properly fitted up with show cases as a travelling exhibition of the products of those manufacturers in each city who are willing to show their goods to the actual consumers throughout the Dominion of Canada. It is estimated that the cost of building and fitting such an exhibition coach would be roughly £2,500, the initial outlay to be financed so as to spread the capital charge over a period of four years, the minimum time in which it would be possible for the whole of Canada to be thoroughly covered. The annual cost per car of such an exhibition has been worked out to be something between £2,500 and £3,000, these figures include repayment of capital cost, haulage, maintenance and upkeep, salaries and wages, lighting and heating, demurrage at stations, insurance, steamship fares of employees, advertising, postage and incidentals and general administration charges. It is proposed to meet this annual charge by the letting of exhibition space in the car to manufacturers at rates ranging from £30 to £240, according to space desired. For instance it would be possible for a manufacturer to hire a six-foot run of show case to enable him to show his goods to the actual consumer in every city and town visited in a year for £120.

Trade Figures Show British Proportion.

The following trade figures which speak for themselves have been extracted from a preliminary return kindly furnished by the commissioner of customs of the Dominion of Canada:—

Total import trade of Canada for year ended 31st March, 1913	£135,000,000
Total imported from United Kingdom	27,700,000
Total dutiable goods imported into Canada for home consumption	88,300,000
Total dutiable goods imported from United Kingdom	*21,600,000

*Of this figure £18,450,000 was admitted under the British preference averaging 33 1-3 per cent.

	Imported from United Kingdom.	Total Imports.
Cotton and manufactures of	£3,260,000	£5,450,000
Wool “ “ “	5,210,000	6,110,000
Iron and steel “ “	2,200,000	25,820,000
Brass and “ “		
Gutta percha and rubber and manufactures of		
Leather and manufactures of		
Metals (n.o.p.) and manufactures of		
Paper and manufactures of		
Silk “ “ “		
Tobacco “ “ “	4,360,000	16,610,000
Wood “ “ “		
Ale, beer, wines and spirits, billiard tables, cocoa, chocolate, etc., drugs, etc., electrical apparatus, motors, etc., fancy goods, musical instruments, paints and colors, pocket books, purses, etc., post office parcels, soap, tinware, tobacco, pipes		
Total itemized articles	£15,030,000	£53,990,000
The British preference given on the above items was calculated approximately at £1,150,000.		
Other articles not specified above	£6,570,000	£34,310,000
Totals	£21,600,000	£88,300,000

These figures were prepared from the preliminary returns, and while they are approximately correct, they are subject to revision.

Exhibition Train is Practicable.

It would thus appear that with the exception of the great staples of wool and cotton, the exports to the Dominion of the manufactures of the United Kingdom can hardly be termed satisfactory.

H.M. Trade Commissioner for Canada, (Mr. C. Hamilton Wickes), in his report on the trade of Canada for 1912, (Cd. 6870), states:—

"The decline in the proportion of imports from the United Kingdom, which has been gradual and consistent, is a serious matter;" and further:—

"Certain individual firms of the United Kingdom have within the last three or four years not only taken their share of the increased trade, but have actually secured trade which formerly went to the United States;" and further, after describing how an American firm built its own exhibition train, goes on to say:—

"I may here mention that the Canadian Pacific Railway have such a train utilized at times by the Canadian manufacturers' association to tour Canada. Is there any reason why this should not be utilized to exhibit British manufactures right through the Dominion, visiting the principal cities on a regular and published itinerary?"

These extracts show (1) that we are losing rather than increasing our share of the trade, (2) that it is impossible to beat our greatest competitors, and (3) that the chamber's project of an exhibition train is one that is considered practicable and profitable both by our United States rivals. by the Canadian manufacturers, and by H.M. Trade Commissioner for the Dominion of Canada.

LONDON'S INDUSTRIAL BUREAU

The city of London, Ontario, one of the most progressive communities in the province, is forming an industrial bureau. Mr. Gordon Philip is industrial commissioner, the board of directors will be representatives of various affiliated bodies appointed annually, while all citizens are eligible for membership. Here are the various committees connected with the Bureau and their duties:—

Executive Committee—Advances all movements advocated by committees, if approved.

Finance Committee—Controls all funds entrusted to Bureau.

Manufacturing Promotion Committee—Works to secure new industries and to establish a "factory fund" to augment capital of desirable new industries.

Home Reunion Committee—Assists the wives and families of deserving London workmen from Old Country. Supervises immigration. Deals with housing and employment.

Trade Expansion Committee—To bring buyers for what London merchants have to sell by promoting attractions in London. Arranging excursions. "Trade Week" twice a year, etc. Arranges excursions through Western Ontario of London merchants, etc., with fixed itinerary, establishing London as trade centre. "Made-in-London" campaigns, etc.

Advertising and Publicity Committee—Compiling facts and statistics of London's progress. Preparing literature for distribution. Placing and preparing advertising. Preparing articles (news and magazine) for publication and weekly news letter service.

Convention and Entertainment Committee—To secure conventions, and entertain and house convention delegates. Assist trade expansion committee in devising and promoting attractions all the year round to bring people to London.

Educational Committee—Assisting Board of Education in advancing technical and vocational training of London's industrial workers and schoolboys, by securing co-operation of business men.

The new Bureau seems to be planning its work in the right way, and there is every good wish for its success.

◆

A grain exchange has been organized at Moose Jaw, Sask., with Mr. J. T. Snodgrass as president. There have been fifty seats sold. The constitution and by-laws are being prepared and organization work is going ahead. The price of seats are placed at $250 each for the first hundred, and the price thereafter to be fixed by the directorate.

DANGERS IN GROUP INSURANCE

Utah State Commissioner Does Not Altogether Approve —Interesting Views

That the request for approval of a group insurance contract by the Insurance Department should accompany every negotiation for such contract, each case to be decided on its merits, is the decision of Insurance Commissioner Done, of Utah. Three phases of the subject present themselves to him. First, the question whether group insurance under even the most favorable circumstances is entirely fair to other policyholders. Second, whether it may be considered fair in the case of non-participating companies, and unfair in the case of participating companies. Third, what the limit shall be as to the basis on which groups are formed? He does not take into account here the unmistakable conclusion that if group insurance is permitted to include any body of men, no matter how organized or held together, it will lead to a complete readjustment of the agency and medical department of the life companies.

He Cites an Example.

He gives the following example: "If one thousand men of all ages, occupations and habits band themselves together in a sort of business and social organization, there is a serious question whether sufficient homogeneity could be found in such an organization for a group policy. If it can, then it would be an easy matter for all kinds of artificial groups to be formed on such a basis, leavened a little perhaps with the fraternal idea, simply for the purpose of providing insurance for members, some of whom could not secure insurance under rigid medical tests. To me there appears great danger unless group insurance is confined to what I believe was its original purpose; namely, to provide insurance for employees of large establishments where conditions of labor and environment are such as to form an unquestionable basis for a group. But even in such a case, I think the plan more or less experimental and should be carried through with the utmost care."

One Instead of Thousand Investigations.

Mr. W. J. Graham, superintendent of the department of group insurance of the Equitable Life, says:—"Every carefully managed company in selecting individual risks finds it expedient to do a great deal of work that takes time and costs money. In addition to the medical examination, each case must be inspected, to determine whether the applicant is financially responsible; whether his environment is healthful or not, and whether his habits of life are regular or otherwise. In the case of 1,000 individual applicants, there must be 1,000 investigations. But suppose a manufacturing corporation or a department store or a large business firm should apply for insurance on the lives of a group consisting of 1,000 employees. Then the company will be able to make a far more thorough and minute investigation of the group than it could make in each one of a thousand applications from that number of individuals scattered in all directions; for, instead of 1,000 investigations, a single investigation would suffice."

◆

COMPANIES LICENSED AND REGISTERED.

The following companies have been licensed to do business in Ontario:—

Larned, Carter and Company, of the state of Michigan, capital, $25,000.

Ontario Steel Products Company, Limited, Dominion charter, capital, $1,500,000.

The following companies have been registered to do business in the province of Quebec:—

Dominion Trust Company of Vancouver, B.C.

Quebec Savings and Trust Company of Montreal, Que.

The following companies have been authorized to do business in the province of Quebec:—

The Pabos Mercantile Company, head office, Chandler, Que.

The National Railway Association, Limited, head office, Montreal, Que.

The following association has been licensed and registered as a mutual benefit association in the province of Quebec:—L'Association de Bienfaisance et de Retraite des Pompiers de Quebec.

The following company has been licensed to do business in New Brunswick:—

E. Leonard and Sons, Limited, of London, Ont.

The Merchants Bank of Canada have opened a bank at Shaunavon, Saskatchewan.

RAILROAD BONDS AND NOTES

Grand Trunk Equipments Offered in London—Canadian Northern Land Mortgage Debentures

A portion of the 4½ per cent. equipment notes of the Grand Trunk, which were placed in New York, have been offered in London on a 5¼ per cent. basis, but there was no disposition to purchase, owing to adverse exchange conditions.

Lloyd's Bank has been authorized to receive applications for the offer of £1,500,000 five per cent. land mortgage debentures due the first of June, 1923, being issued by the Canadian Northern Railway at a price of 95. The denominations will be £100, £500, and £1,000, payable by the bearer in part or whole on the authorized issue of £3,500,000.

Conditions of Loan.

The debentures bear a direct obligation on the principal and interest of the company, redemption to be effected by purchase at or below par, plus the accrued interest of drawings at par, the company reserving the right at any time to redeem the whole or part at par on one month's notice.

From the instalments still receivable with respect to town properties and lands sold, it is estimated that about £400,000 will be available for redemption eighteen months from date.

Burnaby May Issue Notes.

Burnaby, B.C., may issue $1,500,000 treasury notes in London at 6 per cent.

New capital issues in London during October shows £18,800,000, as against £14,124,000 and £15,100,000 in preceding Octobers. The ten months' total is £208,251,000, against £179,008,000 and £149,029,000 during the corresponding periods in previous years.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended October 31st, 1913:—

Cobalt Lake Mines, 62,560; Lumsden Mining Company, 40,000; Peterson Lake Silver Mines, 69,220; McKinley-Darragh Savage Mines, 384,777; Cobalt Comet Mines, 113,400; Nipissing Mines, 131,240; O'Brien Mines, 151,690; Cobalt Townsite Mines, 148,000; Beaver Consolidated Mines, 64,360; Casey Cobalt Mines, 60,173; total, 1,225,420. The total shipments since January 1st are now 32,722,776 pounds, or 16,361 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

COMPANIES INCREASING CAPITAL STOCK.

The following companies in Canada have increased their capital stock:—

Landau and Cormack, Limited, from $50,000 to $200,000.

Mason and Risch, Limited, from $250,000 to $1,000,000.

The following companies in Manitoba have increased their capital stock:—

Canada Weekly Printing Company, from $20,000 to $30,000.

Stewart Sheaf Loader Company, Limited, from $200,000 to $500,000.

The following company in New Brunswick has increased its capital stock:—

Miramichi Black Fox Company, Limited, from $24,900 to $94,900.

The following company in Quebec has increased its capital stock:—

La Compagnie de Pulpe de Chicoutimi, from $1,000,000 to $7,500,000.

The following company in Ontario has increased its capital stock:—

Monarch Construction and Realty Company, Limited, from $40,000 to $150,000.

◆

The London Financial News, commenting on the Dominion of Canada Mortgage Company, an Edinburgh concern, for the year ending in June, says: "The net income amounted to £822, as compared with £17 for the year previous. To earn the former amount the expenses involved will absorb £370, while the dividend of 4 per cent. recommended will take £655: in view of which the results can scarcely be held to justify the company's twenty-eight years of existence."

IMPORTANCE OF WATERWAYS

New York State Will Do Much To Get Great Lakes Traffic

"The Canadians are thinking and planning in terms of empire and of decades rather than in terms of provinces and a single year.

"They say their three prairie provinces and the hinterland to the north will become the world's granary, and the fact that Canada is already in fifth place among the world's wheat producers and is rapidly advancing to fourth place may indicate that the claim is not without basis. Also, it is a fixed policy with an increasing number of Canadians to keep Canadian commerce in Canadian channels. But commerce pays little attention to political boundaries and political walls.

"Rather, especially in commodities necessary to human happiness, it follows the line of least resistance, the channel that provides the lowest rates, the maximum facilities and the highest speed, and in this view of the situation our line of action is clear," said Mr. Frank S. Ellsworth, of Rochester, at the New York States Waterways Association's Convention.

"Not a sod can be turned, not a foot of steel rail can be laid, not a foot of power transmission wire can be strung in Canada west of the province of Ontario without positively or negatively affecting business in the state of New York.

Exclusively of Agricultural Products.

"That portion of the Canadian traffic in which we are particularly interested comes down the Great Lakes. It is, and for many years will be, composed almost exclusively of agricultural products, while the westbound tonnage will be made up very largely of coal and manufactures. These agricultural products consist almost wholly of wheat, oats, barley and flaxseed, and the traffic originates in the three prairie provinces of Manitoba, Saskatchewan and Alberta.

"And various projects of Canadians, if carried out, would exercise a profound influence, their promoters believe, in regulating freight rates and would also make possible water shipments from near the base of the Rocky Mountains and the edge of the Arctic snow to the Great Lakes and the seaboard.

"Two of the projects are more or less directly connected with the project for a steamship line from Port Nelson, on the west side of Hudson Bay, to England, and the building of a railroad from the Canadian Northern at Le Pas to Port Nelson, as an additional outlet for the western grain.

"Coming down the Great Lakes the first important point the grain vessels pass after leaving Thunder Bay is St. Mary's River, with the city of Sault Ste. Marie, Ontario, on the eastern shore, and another city of the same name on the Michigan shore. On the eastern side is the single Canadian canal and lock, and on the American side is the American canal and two locks. Through these three locks in 1912 there passed 72,472,676 short tons of freight, enough to fill to capacity 2,415,755 30-ton box cars.

"In 1912 the traffic through the American locks was 45 per cent. of the total freight, 55 per cent. of the total net registered tonnage and 44 per cent. of the total number of passengers carried.

Ships and Cargoes Increase.

"The changes in the dimensions and carrying power of freighters on the Great Lakes within 15 years has been notable.

"The first freighter over 500 feet in length appeared in 1904, but the next year there were 23 of them, and the number has steadily increased, 139 vessels more than 500 feet in length having passed the Soo in 1912. Four freighters more than 600 feet in length passed the Soo in 1907, and five years later, in 1912, there were 12. A freighter 625 feet in length is under construction at Port Arthur, and plans for others are either being executed or are under consideration. It is believed that the 700-footer will appear in the near future.

"No cargo of more than 10,000 tons appeared until a single ore vessel with such a cargo came down the Lakes in 1904. In 1912, of the 735 freighters, 362, or 49.2 per cent. carried maximum cargoes of more than 4,000 tons, and 125, or 17 per cent., carried more than 10,000 tons, and 29 carried more than 12,000 tons.

"There are three locks at the Soo, two on the American side and one on the Canadian. On the American side a third lock is well advanced toward completion and a fourth is being built. Announcement has been made within six weeks that the Canadian Government has taken steps to secure land for another ship canal and lock on the Canadian side.

"This new Canadian lock will be between the present lock and the river. It will have a depth of 31 feet over the miter sills and be so arranged that the depth can be increased to be 35 feet without disturbing the lock. The cost is estimated at $20,000,000, and it is planned to have the work completed by the time the new Welland Canal is ready for use, or in about four years. It is worth while noting here that the lock depth of this ship canal is to be the same as that of the new Welland Canal. Possibly it is a part of some general plan of the Canadian department of marine and fisheries to supply a channel of 35 feet in depth from deep water below Montreal through to Fort William in furtherance, perhaps, of the hope that some day ocean-going ships will load at the Lake Superior ports and cross the Atlantic without breaking bulk.

"The Canadian grain receipts at Buffalo for the crop year ending with August 31, 1912, were 148.5 per cent. greater than in 1909, and during the past four years Buffalo was the only one of the American lake grain ports that showed a steady and regular increase from year to year.

"Now as to the Atlantic ports from which Canadian grain was shipped. Speaking only of wheat, the ports were Portland, Me., Boston, New York, Philadelphia and Baltimore. The period covered is the six years ending with 1912. Portland, in 1912, showed an increase over 1907 of 5.26 per cent. in the amount shipped; Boston, 36.23 per cent.; New York, 453.67 per cent.; Philadelphia, 476.18 per cent., and Baltimore away south and with an all rail haul from the Great Lakes, 1,343.85 per cent. In the first place, the small increases in the Portland and Boston tonnage constitute a sufficient answer to the Dominion Marine Association's assertion that the Canadian Pacific is deflecting shipments to those ports; and in the second place that New York, even with her 22,566,120 bushels of Canadian wheat in 1912, and her 453.67 per cent. increase in five years, is not holding her own in the trade, especially when it is considered that in 1912 Baltimore handled 1,239,793 bushels more Canadian wheat than New York did in 1907."

MARITIME PROVINCES USING GOVERNMENT RAILWAYS.

The authorization of the minister of railways for the purchase of additional rolling stock is an indication that the equipment of the government railways is insufficient to cope with demands resulting in some degree from the changes in the United States tariff. These will be of benefit to the farmers, lumbermen, fishermen and lime manufacturers of the Maritime provinces of Canada. The price in the rural districts of New Brunswick jumped in less than a week from 75 cents to $1.20 per barrel, and 25 carloads were shipped over the Canadian government railways billed to New York after the new tariff went into effect, suggests an agent of the Canadian government railways.

The removal of the duty on lumber will be of great benefit and will mean an increase in this trade. The eastern provinces in the past had a large trade in lime with the United States, but a duty was imposed which practically closed the market. This duty has been reduced and it is believed that shipment from these provinces will be resumed.

Everyone knows the history of the fish business: with a large catch down would go the price in South America and Southern Europe and only when catches were small did the people get a fair price. The markets were restricted; in a very few years from now it is probable the half of the annual catch of cod fish will find its way to the United States market. Part of this will go in salt bulk form, some will go fresh in refrigerators, and the rest will go as boneless, shredded and other similar forms. The old manner of disposal will be practically changed.

DEBENTURES FOR SALE

DEBENTURES FOR SALE

TOWNSHIP OF SCARBORO

Tenders addressed to the undersigned will be received up to **November 24th, 1913,** for the purchase of $34,000.00 Twenty-five-year Debentures, with coupons attached for payment of interest, in three separate sets, bearing interest at 5½ per cent., payable yearly.

The Debentures and copies of By-laws can be seen at the Dominion Bank, Market Branch, Toronto.

The highest or any tender not necessarily accepted.

J. H. RICHARDSON,
Treasurer,
West Hill, Ont.

TOWN OF KEEWATIN, ONT.

Tenders will be received up to November 15th, $10,000 20-year 5 per cent. Debentures of the Town of Keewatin, for further particulars, apply to:

W. J. CRAIG,
Town Clerk.

DEBENTURES FOR SALE

Sealed Tenders will be received by the undersigned up to 12 o'clock noon, **Monday, November 17th, 1913,** for the purchase of the following debentures of the Town of North Bay:—

1. $80,000.00—Issue for street improvements, bearing interest at the rate of Five per cent. per annum, payable in Thirty equal annual instalments.
2. $60,500—Local Improvement issue for permanent sidewalks, bearing interest at the rate of Five per cent. per annum, payable in Twenty equal annual instalments.
3. $21,000.00—Local Improvement issue for permanent sidewalks, bearing interest at the rate of Five per cent. per annum, payable in Twenty equal annual instalments.
4. $25,000.00—Local Improvement issue for sanitary sewers, bearing interest at the rate of Five per cent. per annum, payable in Thirty equal annual instalments.
5. $25,000.00—Local Improvement issue for sanitary sewers, bearing interest at the rate of Five per cent. per annum, payable in Thirty equal annual instalments.

Delivery to be made at the Royal Bank of Canada, North Bay, Ont.

M. W. FLANNERY,
Treasurer.

North Bay, November 1st, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

CITY OF PRINCE ALBERT, SASK.

DEBENTURES FOR SALE

Sealed bids addressed to the undersigned will be received up to Friday, November 21st, 1913, for the following city of Prince Albert debentures:—

$904,940	30 years,	interest 5%.
30,000	25 "	" 5%.
21,000	15 "	" 5%.
21,000	10 "	" 5%.
$976,940		

All of above are straight term with Semi-annual Interest coupons attached, and carry the favorable legal opinion of Alexander Bruce, Esq., K.C., of Toronto.

Full information given on application.

(Signed) C. O. DAVIDSON,
City Clerk.

FIFTEEN FIRE COMPANIES TRIED FOREIGN FIELDS

Their Experience Last Year Proved That Home Was a Better Stamping Ground—Companies Interested in Many Lands

Fifteen Canadian fire insurance companies have been attracted to foreign fields to do business. The result in 1912, as shown in the following table, was that the home business on the whole, was more favorable to the companies than the foreign business.

Since 1912, the Nova Scotia Fire has been wound up, and its business reinsured by the Home Insurance Company of New York. The Sovereign Fire reinsured its Canadian business with the Phœnix of Hartford, having previously retired from the United States. The control of the Rimouski Fire has changed hands, which may or may not mean a change of policy, so far as foreign business is concerned.

TRANSPORTATION, LIVE STOCK, AND SPRINKLER LEAKAGE INSURANCE

Sprinkler leakage insurance was carried on in 1912 by five companies, one British and four American. The premiums received during the year amounted to $32,118, and the losses paid to $25,158 with $3,245 losses outstanding at the end of the year.

A license was on the 18th day of May, 1908, issued to the Yorkshire Insurance Company for the transaction of the business of live stock insurance in addition to the business of fire insurance. On November 5th, 1908, a license was issued to the General Animals Insurance Company of Canada for live stock insurance business. The premiums received during the year amounted to $127,533. The losses incurred were $73,598, and losses paid, $70,739, with unsettled claims at the end of the year amounting to $13,506.

Inland transportation insurance was carried on by ten companies, one Canadian, three British and six American. The premiums received amounted to $88,151 and the losses paid to $28,487, with $3,346 outstanding at the end of the year.

Here are the details:—

Montreal, P.Q., October 17th, 1913.

THE BANK OF TORONTO

DIVIDEND No. 129

NOTICE is hereby given that a Dividend of Two and Three-quarters Per Cent. for the current quarter, being at the rate of Eleven Per Cent. per annum, upon the Paid-up Capital Stock of the Bank, has this day been declared, also a bonus of One Per Cent., and that the same will be payable at the Bank and its Branches, on and after the **1st day of December next,** to Shareholders of record at the close of business on the 14th day of November next.

THE TRANSFER BOOKS will be closed from the Fifteenth to the Twenty-fifth days of November next, both days inclusive.

By order of the Board.
THOS. F. HOW,
General Manager
The Bank of Toronto, Toronto,
October 29th, 1913.

NORTHERN CROWN BANK

Head Office, Winnipeg

DIVIDEND No. 14

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid-up capital stock of this bank has been declared for the six months ending November 29th, 1913, and that same will be payable at its banking house in this city and at all its branches on or after the **second day of December** to shareholders of record of the fifteenth day of November, 1913.

By order of the Board.

ROBERT CAMPBELL,
General Manager.
Winnipeg, October 21st, 1913.

UNION BANK OF CANADA

DIVIDEND NO. 107.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this institution has been declared for the current quarter, and that the same will be payable at its Banking House in this city, and also at its branches, on and after Monday, the first day of December next.

The transfer books will be closed from the 17th to the 30th of November, 1913, both days inclusive.

The Annual General Meeting for the election of Directors and other general business, will be held at the Banking House in the city of Winnipeg on Wednesday, the 17th of December, 1913. The chair will be taken at 12 o'clock noon.

By order of the Board,
G. H. BALFOUR,
General Manager.
Winnipeg, October 21st, 1913.

BIRCH IS WANTED BY WOOD WORKERS.

There are three species of birch of commercial importance in Canada, the black, yellow and white, or paper, birch. The former two have the more valuable wood, but are confined to eastern Canada, whereas the paper birch is found in every province of the Dominion, ranging to the limit of tree-growth towards the north and growing well within the Arctic circle in the Mackenzie River basin and in the Yukon.

It is this wide range which contributes largely to its present importance, says a bulletin of the forestry branch of the department of the interior, but the qualities of the wood promise a still greater use in the future, for it is a strong, hard, fine-grained wood which takes a high polish and can be stained to imitate the more expensive woods, such as mahogany, cherry or walnut. Birch formed 28 per cent. of square timber exported from Canada in 1912.

◆

The Dominion Bank has opened a branch at Walkerville, Ont.

Prince Albert, Sask., building permits to October 30th amounted to $1,356,090.

The Royal Bank Building on King Street, Toronto, has been sold to the Dovercourt Land Company.

Plans are being prepared at Vancouver for five million dollars worth of new civic work for next year.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

NEW LAND COMPANIES' CAPITAL

New Elevator Concern—Company Engaged in Canada-West Indies Trade

New incorporations number forty-seven, the head offices of these companies are located in four provinces. The total capitalization amounts to $4,086,700.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Manitoba	13	$ 995,000
Quebec	17	2,055,500
Ontario	10	730,000
New Brunswick	7	306,200
	47	$4,086,700

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Ottawa, Ontario.—Houle and Richard, Limited, $50,000. L. Houle, O. Richard, J. Fortier.

Amherstburg, Ontario.—Bar Point Masonic Club. A. G. Pitts, E. J. LeHeup, W. H. Green.

Gagetown, N.B.—Wassons, Limited, $49,000. C. R. Wasson, E. M. Wasson, J. H. Wasson.

Killarney, Man.—Pierce Hotel Company, Limited, $10,000. J. Undow, L. Undow, S. Pierce.

London, Ont.—Standard Drug, Limited, $25,000. W. C. Zoeliner, A. W. Neal, P. J. Dunnigan.

Fairville, N.B.—Lancaster Lands Company, Limited, $4,900. T. McAvity, N. M. Jones, A. H. Hanington.

Warwick, Que.—The Warwick Pants Manufacturing Company, $10,000. O. Bisaillon, W. Malitz, J. E. Tessier.

Hamilton, Ontario.—Lawrence Park, Hamilton, Limited, $40,000. M. E. Smith, W. H. Seymour, H. D. Petrie.

St. Joseph, Quebec.—The Western Ideal Realty Company, Limited, $75,000. A. Lessard, A. Veilleux, T. Dostie.

Loggieville, N.B.—O'Leary and Montgomery, Limited, $150,000. R. O'Leary, E. O'Leary, W. S. Montgomery.

Newcastle, N.B.—Miramichi Dredging Company, Limited, $4,350. W. H. Belyea, C. C. Hayward, J. Ferguson.

Clinton, Ont.—The Jackson Manufacturing Company, Limited, $150,000. W. Jackson, T. Jackson, H. T. Rance.

Thornbury, Ontario.—The Centre Gray Realty Company, Limited, $40,000. H. D. Petrie, S. L. Heaton, H. G. Ogg.

Hull, Que.—La Compagnie Immobiliere Parc Larocque, Limited, $49,000. C. Brodeur, J. Bourque, D. Levesque.

St. John, N.B.—The Empire Garage and Supply Company, Limited, $24,000. T. J. Durick, H. G. Weekes, J. S. Neill.

Madoc, Ontario.—Geo. H. Gillespie and Company, Limited, $150,000. C. F. Ritchie, J. H. Oldham, W. J. Beaton.

Saint Cabriel de Brandon, Que.—Brandon Overall Company, Limited, $49,000. J. A. Bourbeau, I. Bergeron, J. Boisclair.

Courcelles, Que.—La Cie des Chargeurs Beaudry, Limited, $49,000. V. Dominique Gonthier, J. E. Belanger, J. Francoeur.

Port Credit, Ontario.—The Mississauga Golf and Country Club, Limited, $75,000. H. Robinson, W. K. Murphy, W. Michael Morgan.

Sault Ste. Marie, Ontario.—Northern Building Material and Iron Company, Limited, $50,000. J. Matheson, A. A. Stoness, A. R. Johnston.

Quebec, Que.——Dominion Park, Limited, $300,000. G. Madden, M. Madden, C. V. Griffin. La Compagnie J. B. Drolet, Limited, $49,500. M. L. Blondeau, J. B. Drolet, H. Drolet.

Toronto, Ontario.—Jamaica Food Products, Limited, $50,000. J. F. Boland, F. J. Boland, C. Inrig. Western Ontario Land Company, Limited, $100,000. D. Henderson W. H. McGuire, G. F. Rooney.

Moncton, N.B.—Mapleton Fox and Fur Company, Limited, $24,950. W. K. Gross, F. C. Robinson, F. C. Jones, Little River Silver Black Fox Company, Limited, $49,000. S. S. Ryan, Lane Colpitts, L. W. McAnn.

Montreal, Que.—La Compagnie Zoologique Nationale, $49,000. E. Beauregard, J. E. Labelle, J. A. O'Gleman. European Import Feature Film Company, $30,000. C. Lalumiere, J. Renaud, G. Poliduin. Union Investment Company, Limited, $90,000. T. Rinfret, E. Billette, A. R. Whitney. Belgo Canadian Land Estate Company, Limited, $99,000. A. de Sara-le-Comte, J. H. Forest, D. DeVresse. The Belair Tank and Tower Company, Limited, $20,000. T. Belair, H. Gougeon, J. R. Constantineau. Montreal Sales Company, Limited, $100,000. M. Martineau, I. A. Lambert, A. A. Desjardins. Oldfield Apartments Company, Limited, $500,000. D. Munro, J. S. Smith, R. Delfausse. Canadian Cartage and Storage Company, Limited, $500,000. F. W. Rous, P. L. Smyth, C. H. Grundy. The Nailless Reversible Cushions Rubber Heel Company, Limited, $50,000. J. O. Motard, C. O. Motard, J. O. Motard. Sparrow and Parrish, Limited, $36,000. H. S. Ross, E. R. Angers, O. F. Shearer.

Winnipeg, Man.—Goold Engineering and Supply Company, $20,000. J. L. Stanley Crossen, W. A. Goold, P. R. Crossen. Shipman Electrical Company, Limited, $100,000. C. S. Shipman, S. T. Smith, E. T. Leech. Eastern Terminal Elevator Company, Limited, $250,000. J. A. Richardson, A. C. Ruttan, H. Gauer. Independent Investments, Limited, $20,000. W. J. Donovan, A. M. Doyle, J. Christopherson. Provincial Lands, Limited, $60,000. B. C. Parker, B. C. Parker, Jr., A. J. Nelson. The Canada Brick and Coal Producers, Limited, $250,000. J. F. Walker, A. Farquhar, L. Swanson. The Canon Lake Lumber Company, Limited, $100,000. P. P. Elliott, W. L. McIntosh, G. A. Elliott. The Merchants' and Manufacturers' Protective Association, Limited, $20,000. E. H. Woodfield, A. W. Robertson, H. Wheaton.

◆

CANADA WILL BE BIG COPPER PRODUCER

Industry is Rated an Infant, But Last Year's Returns Showed Good Results

Although copper has been mined for many years in eastern Canada, and the mines of Georgian Bay, in Western Ontario, are of practically the same age as the oldest of the Lake Superior properties in Michigan, the Canadian copper industry did not come to importance until the exploitation of the great nickel-copper deposits of the Sudbury district, beginning with about 1886. Ten years later the production of the Trail district in British Columbia became important, and was followed by far greater developments in the Boundary district of the same province, this field now ranking among the really important copper districts of the world.

In Future Lists of Principal Producers.

Despite its considerable present development, the copper industry of Canada must be rated as merely in its infancy, and the Dominion must be included in any list of the principal copper-producing countries of the present or future. This prophecy was written by a copper expert two years ago and it will likely be realized. Mr. J. McLeish, B.A., chief of the division of the Dominion mineral resources and statistics, shows in his latest report that the production of 1912 was largely increased over previous returns.

The production of copper contained in blister, matte, or ore, which was practically all exported, was 77,832,127 pounds in 1912, valued at $12,718,548, as compared with 55,648,011 pounds in 1911, valued at $6,886,998.

Exports Worth Nine Millions.

The exports in 1912 were reported as 78,488,564 pounds, valued at $9,036,479, as against exports of 55,287,710 pounds, valued at $5,467,725, in 1911. The total imports of copper in 1912 were valued at $7,047,356; and included crude and manufactured copper to the extent of 42,832,747 pounds, valued at $6,741,895, together with other manufactures of copper of which the quantity is not recorded, valued at $305,461. The copper imports in 1911 were valued at $4,936,769, including 37,352,237 pounds of crude and manufactured copper, valued at $4,721,480, and other copper manufactures of which the quantity is not recorded, valued at $215,289.

◆

We are told that Americans have $600,000,000 invested in Canada. Britishers have over two billions. Is it not about time for Canadians to do a little more of their own financing? Has thrift become a lost virtue amongst us?—Brandon News.

OCTOBER MUNICIPAL BOND SALES IN CANADA

Domestic Market Absorbed Two and Three-quarter Millions—Vancouver Issue Taken by United States Buyers

The municipal bond sales in Canada for October, as compiled by *The Monetary Times*, amounted to $2,768,782, compared with $1,663,260 for September, and $1,060,597 for the corresponding period of last year, and making a total for the year of $17,455,611.

Vancouver disposed of an issue amounting to $1,800,000 4½ 1923-28-33 debentures, which were sold to United States investors, and an issue of $20,000 Battleford Protestant School bonds was sold to a Toledo bond house.

Five provinces were in the market. The largest issues were those of Assiniboia R.M., Man., and St. Boniface, Man.

The following are the particulars by provinces:—

Ontario	$1,232,750
Manitoba	1,018,332
Alberta	281,500
Saskatchewan	136,200
Quebec	100,000
	$2,768,782

The following are the monthly totals during 1910, 1911, 1912 and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	383,826
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	2,435,726
July	1,536,424	1,594,566	1,967,476	1,591,924
August	1,312,953	1,493,507	1,649,547	661,300
September	2,841,486	1,748,778	1,998,605	1,663,260
October	2,211,461	1,730,075	1,060,597	2,768,782

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Kingston, Ont.—A by-law to guarantee the bonds of the Kingston Iron and Tube Company, to the extent of $75,000, was passed by the ratepayers.

North Bay, Ont.—Up to November 17th, for $321,500 5 per cent. debentures. Mr. W. Flannery, treasurer. (Official advertisement appears on another page.)

Scarboro Township, Ont.—Up to November 24th, for $34,000 5½ per cent. 25-year debentures. J. H. Richardson, treasurer, West Hill. (Official advertisement appears on another page.)

Prince Albert, Sask.—Up to November 13th, for $26,000 6 per cent. 30-years Protestant public school debentures. G. A. Brown, secretary-treasurer. (Official advertisement appears on another page.)

Winnipeg, Man.—At the recent city council meeting, eight money by-laws, totalling $2,680,000, were passed, they will come before the ratepayers December 12. The by-laws include power distribution, $1,000,000; schools, $1,000,000; general hospital, $270,000; municipal hospital, $100,000; and parks, $100,000.

◆

BONDS OVER THE COUNTER.

Chicago is experimenting with its first over the counter sale of bonds, $1,880,000 being offered to the public in small lots.

◆

WANTS A GOOD OPPORTUNITY.

An advertiser on another page seeks a connection with a first-class financial house. He is well recommended and *The Monetary Times* will be pleased to answer the inquiries of those who reply to the advertisement.

◆

DEBENTURES AWARDED.

St. Thomas, Ont.—$114,160, to local investors, $101,040 to brokers.

Maisonneuve, Que.—$50,000 5 per cent., to Messrs. Hanson Brothers, Montreal.

Beaver Heights S.D., Alta.—$1,200 6¾, to Alberta School Supply Company, Edmonton.

Saskatoon Schools, Sask.—$175,000, to Messrs. Wood, Gundy and Company, Toronto.

Haileybury, Ont.—$20,000 6 per cent. 20-year debentures for filtration plant, to Messrs. G. A. Stimson & Company, Toronto.

Orangeville, Ont.—$9,000 5 per cent. 10 years guaranteed by county of Dufferin, to Messrs. C. H. Burgess and Company.

Niagara Falls, Ont.—$41,423 20-year 5 per cent. debentures for pavements, sidewalks and schools, to Dominion Bond Company, Toronto.

◆

RAILWAY'S SEPTEMBER FIGURES.

The Grand Trunk September statement shows net earnings as follows:—Grand Trunk proper, £6,750 increase; Canadian Atlantic, £5,450 decrease; Grand Trunk and Western, £12,150 decrease; Grand Haven, £2,500 increase; whole system, increase, £8,350, one working day more.

The Canadian Northern Railway's statement of earnings and operating expenses for September shows the following figures:—

	1913.	1912.	Increase.
Gross earnings	$1,994,000	$1,671,500	$323,400
Expenses	1,470,000	1,248,000	222,000
Net earnings	524,000	423,500	101,400
Mileage in operation	4,520	4,297	223

BONDSMEN IN FINANCE.

Mr. John Cooper, of Toronto, is anxious for Canada to throw off the shackles of the borrower. "Why should our prosperity depend upon the amount of money England sends us every year? Should Canada be a slave to a circumstance? If so," he adds, "we be bondsmen in finance, not free."

The rest of Mr. Cooper's complaint is as follows:—

"Much silly talk is indulged in with regard to our loans from England. The truth is that Canada must learn to depend upon herself for new capital. We will not be a great nation until we are financially independent. At present Canada is in the same class as the South America republics—a country doing business on borrowed capital. Unless our bankers arrange to free us from this bondage we shall be forced to organize a new banking system, with a new style of banker at the head of affairs. At present our banks are making a greater profit than any other line of business in Canada. They give their first attention to security and safety, which is right. But they might give even a second thought to the encouraging of savings, but they do not. That same old three per cent. tax stands even when the bankers are getting ten and twelve per cent. There is an old fable of an ostrich and some sand."

There are a few facts which tend to prove that we are bondsmen in finance, although no one seems less happy for that reason. Great Britain has already loaned Canada £400,000,000 and it is not suggested that the end of Canadian development has arrived or that the cultivation of new territory has ceased. Our population is approximately 8,000,000, who have about enough funds among them to make national pin money. It is some consolation to know that other countries are in Canada's position. According to Lord Milner, a dozen nations are scrambling in London for capital and only three—Great Britain, France and the United States—are in a position to throw funds among the scramblers. There is little likelihood that a new banking system will be organized to change Canada from a bondsman to a free man in finance—at least not until we have had a few more hundred millions sterling to build waterways, railroads, industries and the hundred and one other things which a new country must have and cannot finance.

SASKATCHEWAN'S CREDIT PROPOSALS

The suggestion of the Royal Commission on agricultural credit in Saskatchewan that the banks should pay higher rates of interest upon deposits and at the same time that they should lend more freely to the farmer at town rates, without extending the powers of the banks to take security from farmers, seems more quixotic than practical. The suggestion that the farmers should band together for the purpose of lending each other money upon individual securities, the whole guaranteed by the province, but the individuals being responsible for each other's borrowings, to a limited extent, would keep out of such an organization the very men whose securities would be of the greatest value. No well-to-do farmer surely would endorse the note of a comparatively poor farmer as a matter of business. The truth is as regards Saskatchewan, the borrowings of farmers from banks far exceed the amount of money they have on deposit in the banks. In fact, unless it is for the purpose of saving up with a view to paying off debts upon machinery and upon land, a farmer would be foolish to put away his money in a bank when it could be invested to so much better advantage in cattle, horses, additional land, etc.

WHAT THE VALI SAID

A French statistician wrote to the vali of Aleppo, Turkey, and asked these four questions: "What are the imports of Aleppo? What is the water supply? What is the birth-rate? The death-rate?" The vali replied: "It is impossible for any one to know the number of camels that kneel in the markets of Aleppo. The water supply is sufficient. No one ever died of thirst in Aleppo. The mind of Allah alone knows how many children shall be born in this vast city in any given time. As to the death-rate, who would venture to ascertain this, for it is revealed only to the angels of death who shall be taken and who shall be left. O Son of the West, cease your idle and presumptuous questionings, and know that these things are not revealed to the children of men." And it has come to pass that the vali's gentle style has penetrated into some Canadian board rooms.

SOME EARLY HISTORY

Hitherto unpublished history regarding events leading to confederation in Canada and the building of the Canadian Pacific Railroad were given to the Caledonian Society at Montreal in an address by Sir James Grant, of Ottawa, a former member of parliament and a famous medical man. The influence of Sir George Simpson, according to Sir James, has not had its proper place in history. Sir George, who has been dubbed the Scottish Emperor of the fur trade, was at one time employed in the West India trade. Later Lord Selkirk appointed him superintendent of the Hudson's Bay Company's affairs, and after one year of successful service he was chosen governor of the company, which had a London board of governors, deputy governor and five directors. Sir George Simpson was the first governor and chief of Rupert's Land, with unlimited power in his hands. The North West Company and Hudson's Bay Company joined hands in 1821, after which Sir George resided many years in Lachine. He made canoe journeys from Montreal to the Red River more than forty times, and in 1828 crossed the continent in a canoe from Hudson's Bay to Vancouver. Notes of this trip are now in the possession of Sir James Grant. The development in Canada since the days of those canoe trips, has made Canada an important factor in the money markets, although as a borrower. The vast work accomplished since those early years is the best possible reply to critics of the large sums borrowed abroad by the Dominion.

In 1841, Simpson was knighted for important Arctic exploration. He was a director of the Bank of British North America, and the Bank of Montreal. Sir George frequently held council with Sir John Macdonald and on the shoulders of two empire builders rested the acquisition of the great Northwest, and the future of that important territory. According to Sir James Grant, this was, in fact, the foundation of confederation, and the construction of the Canadian Pacific Railway, both in the embryonic stage. In 1865 he delivered an address in Ottawa, on the desirability of joining the various parts of this country together, and placing an iron splint on them, to strengthen the union. Sir John Macdonald sent for Sir James, and asked where he obtained all the information contained in his address. He replied from Sir George Simpson, and the ex-chief factors of the Hudson's Bay Company. He at once said, "you must come into parliament," which Sir James did as representative of the county of Russell, in 1865. In 1872 Sir John Macdonald invited him in the Commons, through Sir John Rose, then finance minister, to take charge of the bill for construction of the Canadian Pacific Railway in his own name, and make the speech for the government. This he did.

Little by little, the pages of Canada's early history are being compiled. The more that is learned, the more is one impressed of what large volumes the Hudson's Bay Company's pioneers could have added to the historical library.

SMALL CHANGE

One can sit almost anywhere and watch the dividends pass.

* * * *

Forestry department says birch is wanted by woodworkers. If they persist, it can be had.

* * * *

New York ironworker got $25,000 for broken neck while Tammany Hall cannot even draw life insurance.

* * * *

Windsor Hotel stock has been imitating the elevator, going up, going down, and now it's stuck between floors.

* * * *

To see Montreal office boys hustling, during this telephone breakdown, is a sight for the gods—or for the Humane Society.

* * * *

The motto over Sir Richard McBride's desk is probably "If you want to know who's boss around here, start something."

* * * *

Montreal paper speaks of "Toronto rumors on iron." The ones we hear are usually served on a silver platter, with taffy to taste.

* * * *

Shareholders of British Columbia Fisheries scarcely know whether to call Sir George Doughty, M.P., a whale of a financier or a giddy old kipper.

* * * *

St. Thomas, Ont., man died last week, aged 103. Short-term notes and long-term hobble skirts were on the top shelf at the time of his birth.

* * * *

Premier Borden is mystified as to how New York reporters know of all his movements. If he stays there long enough, they will do his next session's work.

* * * *

Montreal Herald has ceased to ask every day "Who owns ten thousand shares of Tramways stock?" substituting "Keep your eye on Quebec." Getting warm!

* * * *

Noisy London editor prints front page photo of his wife, as "the charm" of his paper. This leads the way for some of the quiet ones to publish portraits of their howling successes.

* * * *

Montreal Herald continues to ask every day "Who owns ten thousand shares of Tramways stock?" We suspect the answer "Santa Claus," is being held until December 25th.

* * * *

The misapprehension that the Canadian Pacific Railway would probably electrify its system, may have arisen from Canadian Pacific's desire to electrocute the Austrian government system.

* * * *

Two captains the other day reported a new island 30 miles northeast of Sable Island, and now another captain says the island has gone. We suggest that the only way to solve the mystery is to learn what was really in the bottle.

* * * *

Mr. Herbert Samuel, British postmaster-general, should not take seriously Hon. Rodmond Roblin's diatribe. It was merely a cyclone, and the Hon. Rodmond is probably laughing at himself now, just as the sun smiles at the hurricane.

PROVINCIAL SECURITIES AND BRITISH TRUSTEE LIST

Will Any British Government Undertake the Necessary Legislation?—Canada's Case is a Strong One

The pamphlet recently issued by *The Monetary Times* regarding the proposed inclusion of Canadian provincial securities in the British Trustee list has aroused fresh interest in this question. At the interprovincial conference of premiers and cabinet ministers at Ottawa last month, a resolution was passed, unanimously, asking the Dominion government to co-operate with the provincial authorities in an endeavor to get the Imperial government to extend the list by the addition of Canada's provincial securities. *The Monetary Times* has advocated this for several years, as have also many provincial government premiers and ministers, as well as leading financiers here and in London. The London Financial News, referring to the brochure on the subject issued by *The Monetary Times*, states that it should be useful to the trade and industry committee of the Royal Colonial Institute, who for some time past have been dealing with this subject in consultation with the various governments concerned.

Another financial daily of London, The Financial Times, referring to the pamphlet, says that the practical question is: Will any British government undertake such legislation? "As everyone here is of opinion that the inclusion of Colonial Government stocks (on the fulfilment of certain conditions) in the trustee investment list is one of the main reasons, if not the main reason, why Consols have been brought to such a low level," continues our contemporary, "it will probably take a deal of persuasion to carry such a measure through.

To Legislate Away An Anomaly

"The British mind would not worry much over the anomaly that Barbados and Trinidad, and Sierra Leone and Lagos, and Mauritius and other 'colonies or dependencies' within the meaning of the Act are free of the trustee investment list, while such far more important financial entities as Ontario and Quebec and Saskatchewan are not. It would endure the anomaly calmy and with resignation. What is required is to persuade a British government that it is very much to its own interest to legislate the anomaly away."

The same journal thinks that the only step so far in that direction has been taken by the provincial treasurer of Quebec, the Hon. P. S. G. MacKenzie, who pointed out in his budget speech of 1911-12, that great schemes of social reform which must be included in the programme of any British government now wishing to retain power, create immense funds which have to be invested and for which it may not be so easy to find suitable investment as time goes on. Mr. MacKenzie mentions the Irish Land Act, 1909, under which trustees are appointed with power to invest the purchase money received under the Act, and the National Insurance Act, 1911. The latter Act requires that the government and the "approved societies" shall have power to invest in any securities in which trustees are for the time being by law empowered to invest trust funds "or in any other securities for the time being approved by the insurance commissioners."

Enlarge Scope of Trust Funds

"In this latter clause," says The London Financial Times, "it is evidently contemplated that the approved societies will desire more freedom than the Trustee Act allows, and the legislator clearly shows himself willing to grant such freedom. This is exhibiting an indulgence towards trustees—approved societies are surely such—greater than that asked for by the Canadian provincial governments. Would it not be a conservative measure and a sound measure to enlarge the scope of the trust funds marked out by law, so as to include the pre-eminently safe Canadian provincial stocks, and so as to afford the approved societies a wider choice before being driven to apply for the approval of the insurance commissioners for any other investments they happen to fancy, a process which may easily prove conducive to much vexation and loss of time? Legislation in this direction might obviate a good deal of trouble in the smooth working of such Acts as the Irish Land Act of 1909 and the National Insurance Act of 1911, and thus be a distinct benefit to Great Britain and Ireland, as well as to Canada."

Case Is a Strong One

The London Financier and Bullionist, reviewing *The Monetary Times'* pamphlet, admits that the case for inclusion is a strong one, and adds that many, if not all, of Canada's provincial securities are superior in many ways to various stocks in which the British trustee is empowered to invest. Referring to the suggestion of *The Monetary Times* that nothing effectual could be done until the provinces joined forces and made a united appeal to the Imperial government—they have now joined forces—The Financier thinks that even if they made such an appeal the chances of their receiving a favorable response are not very hopeful. Our contemporary continues:—

"The government might sympathize with the demand and admit its justice, but they could not ignore the danger of a further extension of the trustee list. That danger, we think, is possibly exaggerated, for the grand total of Canadian provincial loans does not exceed 100,000,000 dollars, or say, £20,000,000, and such an addition to the list of eligible trustee stocks would be a small one—smaller, indeed, than the additions which are automatically made to it every year by the issue of fresh securities of the trustee class. Nevertheless, in the light of past experience an extension of the trustee list is a task not to be undertaken light-heartedly.

Inflating the List

"In the opinion of competent judges the Colonial Stock Act of 1900, under which colonial government securities were made available for trustees, was a grave financial mistake, excellent as were the intentions of its sponsors. At all events, its effect was to popularize oversea government stocks, to the detriment of home securities. We do not suggest that the Act was the only, or even the most important, factor affecting the price of Consols, but we cannot help being convinced that it tended, by inflating the supply of trustee stocks, to bring down the average market value of all such investments. That being so, no government can afford to make the position worse by augmenting, even by £20,000,000, the available supply of trustee stocks.

"Possibly, when the financial situation is less strained, and the volume of undigested securities is considerably curtailed, the task of adding Canadian provincial stocks to the trustee list can be undertaken without danger, and without injury to the interests of trustees as a whole. Much as we sympathize with the legitimate aspirations of the Canadian provinces that they should not be debarred from a privilege which lesser states enjoy, we are confident that their grievance could not be redressed at present without inflicting some injury on the holders of existing trustee stocks. At present the credit of Canadian provinces stands high, though naturally it is

WESTERN CITY RENEWS TREASURY BILLS IN LONDON

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

LONDON SITUATION NONE TOO BRIGHT

Number of Short-Term Bills To Be Redeemed—Bank of England Position

(Central News letter to *The Monetary Times.*)

London, November 5.—London is now past the turn of the month, and monetary conditions have slackened somewhat, following moderate disbursements, but a general feeling exists that the respite of easier loan rates may not be a long one, and that November will be a difficult period in Lombard Street. The market must wait and see whether this view is merely the outcome of the prevailing spirit of caution, which recurrently develops into pessimism, or not. The money market has commenced loan repayments to the Bank of England. When these repayments are completed, it will still have to redeem a number of short bills, which are held by the central institution, and which mature from time to time as the month advances. Another £3,000,000 Treasury bills have been offered, and will be paid for shortly, thus further trenching upon market supplies of capital. It is still hoped that the ultimate effect of the previous Treasury bill issue and of that which has just been made, will not be to lock up funds in the Treasury for any length of time, since government short borrowing has presumably only been to increase balances against current expenses, but in this connection it must be noted that while government balances with the Bank of England are rather in excess of those banked at this time in 1911, they showed in last week's bank return a decrease of over three millions in comparison with last year's figures. This suggests a probability that the Treasury may be conservative in its payments for some time to come.

Calls on New Capital Issues.

Calls on new capital issues, already made, will be heavy during the month, being considerably in excess of those for the corresponding month a year ago. Meanwhile the flow of new capital flotations has been resumed. The further emission of Canadian Northern Railway land bonds amounting to £1,500,000 is the largest operation just now before the money market, but there are others, which have either just been made or are about to appear, and which total approximately another million. Meanwhile the new capital, which was created in such heavy volume last month—the total emissions representing £21,087,000 against £14,620,000 in October, 1912—has not been nearly all digested yet. Stock Exchange speculative operations are fortunately at a minimum, and there are, therefore, few calls upon the money market in that connection, but, on the whole, there seems to be little likelihood of sustained monetary ease in the near future, quite apart from disturbing external influences, such as Mexico.

Stock Markets Disappointing.

One leading market authority says: "The stock markets remain disappointing. They decline to be comforted. Neither peace in the Balkans nor prospects of cheaper money has cheered them. There seems to be something constitutionally wrong with them, and on certain days they look as if a crisis were approaching—a crisis of over-consumption. The days of over-production are gone. What we are suffering from is the rapid destruction of goods—by war and by extravagance, national and individual. Debts are thereby created faster than new capital accumulates, and the result is that never-ending depreciation in existing securities, which puzzles and disconcerts the investor and keeps him out of the markets. When will it come to an end? Nobody can tell, only that a fall in the value of money would turn the current. Meanwhile, the depreciation leads to losses and failures with their corollaries, forced sales. Thereby further depreciation is caused—a chain without end, resulting in quotations utterly at variance with intrinsic merits or legitimate prospects."

Bank of England Position.

This is a re-statement from the market viewpoint of the note which Lord Milner sounded a few weeks ago, when he expressed the view that demands on money were such all over the world as to render any prolonged return to ease for many years to come a matter of improbability. There are some, however, who dissent from this view as exaggerated, and who believe that if the trade reaction becomes more pronounced funds set free from industrial purposes will have to be placed for at any rate temporary employment in the security markets. A favorable feature at the time of writing is the intimation that the Bank of England will probably secure most of this week's parcel of South African gold in the bullion market. If no foreign demand subsequently develops and the central institution is able to put most of the £800,000, represented by this week's Cape offering, into its vaults, there will undoubtedly develop a much more comfortable feeling with regard to the bank rate outlook.

Canadian securities have been spasmodically weak on the Stock Exchange with other things. There has been persistent selling of Canadian Pacifics. Some of these sales emanated from Berlin, where last week three small brokers failed in connection with the settlement, while two bankers in a larger way had to be assisted. But there has also been some selling from Montreal, which gave rise to a renewal of disturbing rumors. Grand Trunk Railway stocks have been heavy, mainly owing to the keen disappointment felt at the net decrease of £8,350 in October net earnings.

GRAND TRUNK EARNINGS AFFECT MARKET

(Central News letter to *The Monetary Times.*)

London, November 8.—A very gloomy impression has been made by the publication of the Grand Trunk Railway's revenue statement for September. The market has been anticipating an increase in net earnings from £7,000 to £10,000, and thought that in placing the probable expansion at that figure they were acting conservatively. The fact, however, that the net earnings for the month were £8,350, despite the fact that there was one more working day this year, compared with the corresponding month in 1912, has plunged the market for Grand Trunk stocks into depression. The result seems to emphasize the pessimistic tenor of the chairman's remarks at the recent half-yearly meeting. Mr. Smithers on that occasion emphasized the poverty of the company, resulting from the higher wages and the demand for quicker and more luxurious travel. The impression made on some of the best-informed of his hearers was that he was anxious to make out a strong case for the higher rates, which he suggested ought to be allowed, and that, therefore, the speech was to a large extent for Canadian consumption. This reflection did something to modify the heaviness which followed in Grand Trunk issues, but the September statement has now come along and driven home all the "bear" points in the speech with unpleasant force

WESTERN CITY RENEWED BILLS

*London, November 8.—The example of the Winnipeg municipality in repaying short-term notes maturing November 17th is not being followed by another leading western municipality, whose bills are maturing the same date and were renewed yesterday.

BRITISH EXHIBITION TRAIN

†London, November 8.—As already announced, it is proposed that an exhibition train of British manufactures should travel through Canada next year. Up to date, the general suggestion is that there should be eight exhibition cars and sixteen salesmen. It is suggested that it would be better that the large cities in the United Kingdom should each hire a car than that each special trade should have a conveyance of its own. It is recommended that exhibits be in such a form as will enable them to be constantly changed, and, further, in order to ensure freshness of display, alternate exhibits are desirable.

The exhibition train will stay in a town at least two days, and in the more important centres a week or longer. This will give ample time for all articles to be shown in each town. A firm, therefore, may have two independent sets of exhibits to be shown alternately, or they may appear turn and turn about with another firm, thus halving the expense. Practically everything that can be shown in a shop window or carried by a traveller, can be exhibited. Makers of heavy machinery can show models, and, of course, photographs.

Of the £30,000 necessary, the Canadian Pacific Railway charges will come to £15,000.

FRENCH CAPITAL FOR CANADA–LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

CANADA'S SITE IN LONDON

Aldwych and Westminster Choices—Another Scheme for Building Submitted

*London, November 8.—Lord Strathcona maintains official silence regarding the petition of Premier Borden, organized by "Canada" newspaper here, in favor of the Aldwych site in the Strand for the new Canadian Government offices, but it is no secret that he and most of the influential friends of Canada here think that this selection would be a deplorable and most costly mistake.

It is understood that Mr. Borden was fully apprised of their views. They say that twenty years ago the Aldwych proposal might have answered Canada's purpose, but that to-day Canada has won so unique a position in the eyes of the world that she can occupy no secondary place, and not permit her national and Imperial identity to be merged in that of any other Dominion, as it would necessarily be if she occupied the locality where the Australian Commonwealth and the separate Australian States have secured the best positions

In their view, a site like that of Westminster Hospital, immediately facing Westminster Abbey, and the Houses of Parliament in the heart of diplomatic and political London, and as easily accessible as Aldwych from all the financial and commercial quarters, would be far better fitted to Canada's needs and dignity.

(*The Monetary Times* has previously expressed its views in favor of the Aldwych site.—Editor.)

Another Plan for Site.

A later despatch states that a new development has taken place in connection with Earl Grey's project for acquiring the Aldwych site The Standard to-day says that the land in question has been secured by the International and Colonial Commerce Exchange, and before next spring the erection of an imposing building will be begun. The scheme is alternative to that of Earl Grey, and the option is held by Lord Strathcona.

Mr. Ronald Hastings, one of the directors of the exchange, in discussing the scheme, said that the new institution would be a business institution, club and hotel, with the object of centralizing and organizing trade coming to London from the overseas dominions. Branch offices in the various cities of the United Kingdom would be well established, and would be multiplied all over the world.

Will be Business Exchange.

The building will be an imposing one, and will include a magnificent exchange hall, equipped with every accessory for the prompt and satisfactory transaction of business; bank and safe deposit vaults open day and night; post-office, Marconi exchange department, and shipping and travel bureau. Private wires will communicate with the stock exchange, coal and shipping, wool and metal and corn exchanges, and Baltic and commercial sale rooms. Special rooms will be provided for the display of designs, models and produce. Another feature will be a Masonic temple.

The annual subscription for membership in the exchange, which will be run on a commercial basis, has been fixed for the present at five guineas for London members, three guineas for provincial members, and two guineas for colonial and foreign members.

All Under One Roof.

"So far as offices of the dominion governments are concerned," said Mr. Hastings, "they have at present their own buildings, but in ninety-nine short years it will be possible to get every dominion represented under one roof."

Among others, the Governor-General of Australia has expressed the hope that the aims of the exchange will be successful

CANADIAN BONDS IN LONDON

†London, November 10.—Changes in Canadian funds during the past week were registered as follows:—

Province of Alberta, 10-year old debentures, 1922, 92-94.
Province of Saskatchewan bonds, 92-94.
Dominion of Canada, 1909-34, 3½ per cent., 89-91.
Calgary City, 1928-37, 4½ per cent., 84-86.
Toronto, 1919-20, 5 per cent., 100-102.
Winnipeg. 1914, 5 per cent., 99,102.
Winnipeg debentures, 1916-36, 92-94.

LARGE AUSTRALIAN LOAN

*London, November 8.—The condition of a gilt-edged market is shown by the government of Western Australian loan of a million sterling fours about to be issued at 97, carrying six months' interest, due January 1st.

CANADIAN SECURITIES LISTED

*London, November 11.—The following were listed here to-day: Province of Alberta £1,000,000 four and a halves, North Saskatchewan Land Company £25,000 sixes, Forest Mills, British Columbia, £946,230 fives, Trust and Loan of Canada £141,039 fours.

PORTO RICO RAILWAY SHARES.

*London, November 12.—The Royal Securities Corporation is offering the public $500,000 7 per cent. cumulative preference shares of the Porto Rico Railways Company. Sir Max Aiken is president.

DOMINION STEEL ISSUE IN LONDON.

†London, November 13.—Arrangements are in progress for the underwriting of a Dominion Steel Corporation issue amounting to $3,500,000 5-year 6 per cent. notes to become due in 1918. The notes are to be secured by a charge on 5 per cent. Sunderland Railway and Coal bonds. The price of the issue is 97.2.

CANADA CAN GET CAPITAL

*London, November 11.—Mr. Louis G. Beaubien, a Montreal broker, now in Paris, gives me the results of his interviews with French and English financiers, and says European confidence in Canada's future is strengthened by the good reports brought back by French, German, Belgian and English bankers, who recently visited the Dominion.

They are well satisfied at the way Canada stood the test of the monetary stringency. Mr. Beaubien adds that Canada will continue to find, easily, all the capital she needs for many long years, for European capitalists and investors know no other country that offers a better field of action under the protection of an absolutely stable Government.

HUDSON'S BAY TO EXPAND STORE BUSINESS

*London, November 10.—Regarding the new Hudson's Bay Company's capital of a million sterling fives, I am authoritatively informed that the issue is in the natural course of providing for the expansion of store business which was approved three years ago at the time of the reconstruction of the board. The Calgary building is finished now and in full business, important extensions are progressing in Vancouver, which has more than doubled its capacity there, and further construction at Vancouver is about to be commenced.

The Extraordinary General Court of the Hudson's Bay Company has been convened for November 24th, when a resolution will be submitted increasing the capital of the company by the creation of 200,000 five per cent. cumulative shares of £1 each, to rank equally with those already existing.

NO NEED FOR ANXIETY.

*London, November 12.—Hon. G. H. Perley leaves London to-day, Wednesday, for Paris and the Continent.

"As for Canadian affairs generally, you may say there is no need for any anxiety about Canadian prosperity," said Mr. Perley, "Canada is all right, all the best English authorities who have studied the facts know that few countries have gone through a period of stringency with less trouble. Holders of inside properties, who include many Britishers, entertain no uneasiness.

"It is in outside subdivisions that there has been trouble, following overspeculation.

"Canadian houses engaged in legitimate business had all the money they wanted from the banks and the Americans who are in a position to know Canadian conditions have taken quite a lot of Canadian offers, such as municipal loans."

CANADIAN NORTHERN RAILWAY LANDS

Mortgage Debentures Issued in London—Sites of Three Hundred Towns Being Acquired

The £1,500,000 5 per cent. land mortgage debentures of the Canadian Northern Railway sold in London last month; are a direct obligation both as regards principal and interest of the Canadian Northern Railway Company. The debentures will be constituted a specific charge upon the whole of the debenture stock and capital stock of the Canadian Northern Town Property Company, Limited, a company which has been formed and is in course of acquiring assets at over $13,400,000, and upon the land grant of the railway company and the deferred payments on land already sold, amounting to $22,026,896, subject as regards such land grant and payments to outstanding charges for a total of $6,254,860.

Land Company's Work.

The Canadian Northern Town Property Company was recently formed for the purpose of acquiring land and developing towns at points on the Canadian Northern system, and, except for portions that have already been sold, it is acquiring the whole of the sites of about 300 towns and villages, aggregating approximately 68,700 acres. It is also acquiring valuable property in 172 other towns and villages. The 4½ per cent. debenture stock of the Town Property Company will be secured as a first charge on all the above-mentioned property and on the unpaid instalments in respect of land already sold. Pending the transfer to the Town Property Company of the assets it is to acquire, a charge will be given upon such assets by the trust deed securing the land mortgage debentures. Messrs. Davidson and McRae, the land agents of the Canadian Northern Railway Company, value, on a conservative basis, the unsold land of this company

at	$10,500,000
There is money payable in respect of land sold on which the instalments are payable within 18 months	885,834
and within three years	2,065,000
making a total of	$13,450,834

Land Grant Assets.

The land grant assets of the Canadian Northern Railway Company, which will be charged as security for the debentures, consist of:—

About 850,000 acres of land unsold, the value of which is certified by Messrs. Davidson and McRae at	$12,750,000
Instalments of principal payable on land sold on which at least the first payment has been made	6,852,445
and there is in the hands of the Trustees for the repayment of the prior mortgages and charges	2,424,451
	$22,026,896
Less—outstanding charges	6,254,860
making a net value of	$15,772,036

The security therefore for the land mortgage debentures will be:—	
The whole debenture and capital stock of the Canadian Northern Town Property Company, Limited, whose assets appear above at	$13,450,834
Surplus, as above, of land grant assets over prior charges	15,772,036
making a total of	$29,222,870
Showing a surplus over the total issue of land mortgage debentures of upwards of	£2,500,000

The London debenture issue was made at 95, and 60 per cent. was taken by the public.

COBALT ORE SHIPMENTS.

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended November 7th, 1913:—

Cobalt Lake Mines, 62,950; McKinley Darragh Savage Mines, 56,790; Crown Reserve Mines, 62,850; Penn Canadian Mines, 101,490; Cobalt Townsite Mines, 504,000; Tretheway Mines, 93,257; Coniagas Mines, 258,100; La Rose Mines, 167,010; total, 1,306,447. The total shipments since January 1st, are now 34,029,223 pounds, or 17,014 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,500 tons.

CANADIAN NORTHERN TRANSCONTINENTAL

Next Year Will See Completion—Gross Earnings Were Twenty-four and Half Millions Last Year

A second transcontinental railway between the industrial east and the fertile west is not only an event of importance to the Canadian Northern Railway Company, but marks an interesting era in the history of Canada, says the eleventh annual report of the Canadian Northern Railway Company, bearing the signature of the president, Sir W. Mackenzie, and it forecasts that by the close of the present year connection will have been established at Port Arthur with the eastern lines and that the last link in the chain—namely, the line through the Rocky Mountains will be connected early in 1914.

The results of the company's operations for the fiscal year were as follows:—

Gross earnings totalled $24,527,478, the various departments contributing these amounts, passenger traffic, $3,749,498; freight traffic, $18,561,027; express, mail, telegraph, dining and sleeping cars, interest and profits from elevators and other subsidiary companies, investments, premiums, etc., $2,216,953.

The working expenses (including taxes, etc.), were $17,503,610.57, leaving net earnings amounting to $7,023,867.90. After deducting fixed charges $5,190,924.12, there remained a surplus of $1,832,943.78. From this interest at 5 per cent. per annum paid on income charge convertible debenture stock outstanding to the extent of $988,214.49 was paid, leaving a net surplus for the year of $844,729.29.

The gross earnings show an increase of $3,417,384.84, or 16.38 per cent., and the net earnings of $892,822.79, or 15.18 per cent., over the preceding year. The working expenses were 74.64 per cent. of the gross earnings of the railway proper and including taxes 72.10 per cent. of the gross earnings from all sources, compared with 73.82 per cent. and 71.81 per cent. respectively last year.

During the year 236 miles of newly-constructed tracks were added to the system, the average mileage operated being 4,297 miles.

Land Sales Were Smaller.

Land sales during the year were 19,755 acres for $291,193.18, an average of $14.74 per acre, after making certain adjustments in respect to sales in previous years. The actual average price per acre during the current year was $15.36 per acre. This compares with 55,111 acres for $836,084.37, an average of $15.17 per acre during the preceding year. Whilst the directors have not made any special effort to sell the railway's own lands, the policy of colonizing Dominion government farm lands has been continued and over two million acres were entered upon by settlers. The effect of this is being seen in the increased movement of agricultural products of all kinds.

The marketing of grain from the territories served by the railway has commenced considerably earlier than last year and the quantity of uniformly high grade grain shipped to the Lake ports at the date of the report was very much in excess of any previous year at the same date. This early return in cash to the farmer thus produced is being reflected in increased activity in the industrial centres with correspondingly satisfactory traffic results to the company.

The earnings derived by the company from the great crop harvested in the west would have been very greatly increased if the Canadian Northern Transcontinental line was in operation.

Stock Issues Applied to Construction.

The following public issues of £1,438,356 four per cent. perpetual consolidated debenture stock and of £2,057,612 five per cent. income charge convertible debenture stock were made during the year, and the whole of the proceeds have been or are being applied to the construction, improvement and equipment of the line.

The Dominion parliament granted during the year to the Canadian Northern Ontario and the Canadian Northern Alberta Railways, parts of the Canadian Northern Railway system, a cash subsidy of $15,640,000. This subsidy and those previously granted in aid of the system have been or will be expended on construction, improvements and equipments. All moneys also received from the sale of the land grants or raised by securities have been expended in the same manner. The increase of $7,000,000 in the capital stock of the company represents the amount issued to the government of Canada pursuant to the provisions of the statute under which the cash subsidy of $15,640,000 above referred to was authorized.

Progress During one Decade.

The following statement shows in concise form the company's growth during the past 10 years:—

	1903	1913
Mileage operated	1,276	4,552
Traffic Development:		
Passenger traffic	$ 389,170	$ 3,749,500
Freight traffic	1,896,380	10,561,026
Commodities:		
Flour (sacks)	332,096	3,047,478
Grain (bushels)	12,367,110	59,380,957
Live stock (head)	23,775	239,133
Logs and lumber (feet)	85,551,000	448,351,000
Coal (1909) (tons)	326,591	1,111,865
General merchandise (tons)	173,379	1,371,927
Equipment Purchased:		
Locomotives	73	534
Sleeping and dining cars	1	76
Passenger coaches	22	376
Baggage, mail and express cars	10	135
Freight cars, all kinds	2,507	23,759

A summary of the company's equipment shows that it has the following rolling stock, etc.:—

	1913	1912
Locomotives	534	430
Sleeping and dining cars	76	64
Passenger coaches	376	307
Baggage and mail and express cars	135	99
Business cars	16	14
Freight, refrigerator and stock cars	23,759	18,675
Conductors' vans	396	257
Boarding, tool, auxiliary cars, steam shovels and snow equipment	701	594

What the Company Carried.

	1913	1912
Flour (sacks) (100 lbs. each)	3,047,478	2,854,136
Grain (bushels)	59,380,957	53,441,149
Live stock (all kinds) (head)	239,133	188,669
Logs and lumber (feet)	448,351,000	405,395,000
Firewood (cords)	233,248	227,030
Coal (tons)	1,111,865	804,803
Immigrants' effects (cars)	4,628	5,154
Building material (lime, stone, brick, sand, etc.) (cars)	57,367	53,425
Miscellaneous (tons)	1,371,927	1,203,887

The line of the Canadian Northern Ontario Railway has been connected between Toronto and Ottawa, and a regular service will shortly be established between Toronto, Ottawa, Montreal and Quebec. The completion of this section together with the section connecting with the western lines at Port Arthur in a few months will enable the Canadian Northern system to retain a large volume of traffic originating on its lines in the east and in the west, which it is now compelled to hand over to other companies, and it will also open up a large traffic producing territory, which while of first importance to the Canadian Northern Ontario Railway, will be of substantial advantage to the system as a whole.

Satisfactory progress in the construction of the tunnel through Mount Royal which is to give the lines of the Canadian Northern Railway system access to the centre of the city of Montreal was reported. It is hoped by the company that concurrently with the inauguration of a transcontinental service between Montreal and Vancouver, it will enjoy a terminal situation in Montreal second to no other railway company.

◆

MORE REASONS FOR TIGHT MONEY

Further views regarding the causes of the present money shortage have been given by Mr. J. Norton Griffiths, M.P. for Wednesbury, England, head of the large contracting firm which bears his name, and which is doing considerable work in Canada. "The scarcity of money," he says, "should not be attributed to a real money shortage. This, in fact, is not the case. In the history of banking there has never been so much accumulation of money on deposit in the principal European banks.

"If you want to get at the real cause, here it is: It is the uncertainty as to what the next two or three years will bring forth—will it be peace or war? In high diplomatic and financial circles, it is realized that something ominous is in the air. The price of Tripoli to Italy was six Dreadnoughts in the Mediterranean by 1915. The price to Austria of support by the Triple Alliance in any emergency in the Near East was six Dreadnoughts in the Mediterranean by 1915. Germany contributing her proportion of the six, the whole eighteen Dreadnoughts are either building or ready built, and will be there by 1915, and this apart from the regular defence programme of those respective countries.

"In the face of this, naturally those who are cognizant of this naval development ask themselves what does this mean? Nervousness, therefore, in the financial world exists and will continue to exist until the air is cleared."

WIDELY HELD CANADIAN PACIFIC STOCK

Nnmber of Shareholders is Probably Third Largest in America

Among American companies, the Pennsylvania Railroad and the American Telephone Company have the largest number of shareholders. Figures collected by the Wall Street Journal show that the Canadian Pacific Railway is running a close third to the second of these two. Its stockholders this year exceed in number 48,000 against 41,300 a year earlier. Another railroad property whose stockholders if marshalled together would make several complete regiments is the Atchison, but its holders are nearly 12,000 fewer than Canadian Pacific's.

Canadian Pacific Railway's Stock.

Below is a table showing average holdings of stockholders in 11 of these companies which are independent of control by other companies, except Central of New Jersey, over half of whose share capital is in the Reading's treasury, and Louisville and Nashville, 51 per cent. of whose stock is owned by Atlantic Coast Line. Only the common stock of Canadian Pacific is included in this table as that is the issue which interests investors on this continent, the preferred shares being almost strictly held abroad; the Canadian Pacific in reporting its stockholders gave the number of holders of each class of stock.

	Shareholders	Av. Shares per Holder.		
	Inc.	1913	1912.	Dec.
Atchison	14.9%	83.9%	89.9%	6.6%
*Canadian Pacific	14.6	73.7	76.0	3.0
†C. R. R. of N. J.	1.1	163.5	165.4	1.1
Del. & Hudson	2.0	64.2	65.5	1.9
Kansas City Sou.	9.8	198.2	217.7	8.9
‡L. & N.	32.1	8.4	88.6	9.2
Mo. Pacific	11.4	165.2	184.1	10.2
Rock Island Co.	16.8	338.7	395.7	14.4
Pere Marquette	§0.3	170.9	170.1	**0.4
Southern Rwy.	10.1	158.0	174.1	9.2
Texas & Pacific	2.2	311.8	318.7	2.1

*Common stock only.

†Based on 47.1 per cent. of stock, balance being owned by the Reading.

‡Based on 49 per cent. of stock, balance being owned by the Atlantic Coast Line.

§Decrease. **Increase.

Broad Share Distribution.

There is a wide spread here in the distribution of Delaware and Hudson shares as compared with Rock Island Company shares. Not many corporations show a broader share distribution than do Atchison, Canadian Pacific, Delaware and Hudson and Louisville and Nashville. It is interesting to observe that Canadian Pacific selling about 75 points above its nearest competitor in this block of four gained nearly 15 per cent. in number of owners in the last year and that each holder on the average has less than 74 shares.

Apropos of the big gain in Louisville and Nashville shareholders it must be remembered that this road issued $12,000,000 new stock just about a year ago.

◆

GRAIN GROWERS' PROFITS

President T. A. Crerar announced at the annual meeting of the Grain Growers' Grain Company that the net profit on the year's business, after paying off a loss of $30,000 on the operation of the Manitoba Government elevators, was $170,000. As the paid-up capital of the company is now $645,000, the profits for the year are more than 25 per cent. The regular 10 per cent. dividend was declared by the directors two months ago, and the money distributed among the 14,000 farmer shareholders in the three prairie provinces.

The increase in the capital stock of the company during the past year was $60,000. The volume of business which passed through its hands exceeded $50,000,000, which places it at the top of grain companies doing business in Canada, and makes it the strongest of the farmers' commercial organizations on the continent, so the president said. Mr. Crerar announced that the Manitoba government had cancelled the company's lease of government elevators in this province, to take effect next August. The company still has a cash reserve of $200,000, after incurring considerable of a loss on export business during the fourteen months since the last annual meeting.

The company expects shortly to have its own mills in operation on its own 300,000,000-foot timber limit in British Columbia, through which the Grand Trunk Pacific line has already been constructed, and expects shortly to be able to sell lumber in car lots to local associations in the prairie provinces at 25 to 40 per cent. lower than the present retail prices.

SECURITIES VALUES STILL DECLINE

Severe Break Occurred in London Last Month in Canadian and American Railways

The most striking feature of the past month in the London market was the severe break in Canadian and American railways, where there was a great amount of liquidation during October. In the case of Canadian descriptions, the weakness was probably due to the liquidation of large outstanding speculative commitments, while the American market was especially affected by the dislike in Wall Street of the new banking and currency bill.

Big Depreciation in Values.

The Bankers' Magazine of London, in its November issue, gives a compilation of market prices of 387 representative stocks, which shows an aggregate depreciation of about £56,000,000 in the month ended October 20, the exact figures being as follows:—

Aggregate value of 387 representative securities on September 21, 1913	£3,435,506,000
Aggregate value of 387 representative securities on October 20, 1913	3,379,311,000
Decrease	56,195,000

In July the current valuation of £3,397,000,000 was the lowest point touched since the present list was taken out seven years ago. In the following month there was a further decline of £11,000,000, which was followed, however, a month later by a material rally. Now, however, the present total of £3,379,311,000 constitutes an entirely fresh low record.

Further Decline in Consols.

Commenting on these figures, this authority says:—

"The further decline which has occurred in Consols and other high-class home securities was partly due to dearer money, but it was also connected with forced selling of high-class stocks by underwriters who had to take up large masses of new issues of capital.

"Foreign government securities have been directly affected by the special dullness of the Continental bourses, while a good deal of the depreciation is connected with specially severe falls in Brazilian and Mexican stocks.

"Rubber shares have established a fresh low record, our list of ten representative companies showing a decline in capital value for the month of about £370,000, these companies, having an aggregate value of £1,313,000, being now valued in the market at £4,080,000, as compared with £4,450,000 a month ago."

◆

MARINE INSURANCE AND LAKES DISASTER.

A large number of insurance companies are involved in the numerous wrecks on the Great Lakes during the recent storm. Reliable figures are not available, reports to brokers being far from complete. The Western Assurance Company, Toronto, expect their losses will be from $10,000 to $15,000. Lloyds will probably be heavy losers and also company's report, by Messrs. Dale and Company, Montreal. The disaster is thought by marine insurance men to be the worst on record on the Great Lakes.

◆

A wireless line, devoted entirely to traffic between Canada and the United Kingdom, is among the developments pending by the Marconi Company. It is hoped to complete arrangements very shortly by which the present lines from Glace Bay to Clifden will be devoted to Canada.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Oak Bay, B.C.—By-laws to the amount of $185,000 will be voted upon to-day.

Medicine Hat, Alta.—By-laws totalling $522,000 will be voted upon November 21st.

Perth County, Ont.—Up to December 2nd for $51,000 5 per cent. 10-year debentures. G. Hamilton, treasurer, Stratford. (Official advertisement appears on another page).

West Vancouver, B.C.—Up to November 25, for $40,000 5 per cent. 20-year wharf debentures. G. H. Peake, C.M.C., Hollyburn P.O. (Official advertisement appears on another page).

Souris S.D., Man.—Up to November 31st, for $5,000 5 per cent. 20-year debentures. R. M. Stevenson, secretary-treasurer. (Official advertisement appears on another page).

High River, Alta.—Up to December 10th, for $100,000 6½ per cent. 30-year debentures. G. E. Mack, secretary-treasurer. (Official advertisement appears on another page).

Outlook, Sask.—Up to December 1st for $26,600 6 per cent. 15-30-year debentures. A. Moore, secretary-treasurer. (Official advertisement appears on another page).

◆

THIS COMPANY WILL LOAN TWO MILLIONS.

The Mutual Life and Citizens' Assurance Company, Limited, Montreal, is actively engaged in lending money on first mortgage securities in Canada. The company informs *The Monetary Times* that it is prepared to lend $1,000,000 in Toronto and an equal amount in Montreal. Up to date, it has already invested over $2,000,000 in the Dominion. This Australian company is well known and reputable and has now been doing business in Canada for several months.

◆

TO MANUFACTURE CANADIAN FILMS

Monetary Times Office,
Montreal, November 12th.

If the plans of the British Canadian Film Company succeed, there will be a distinct improvement in the character of the pictures being shown in the various moving picture concerns throughout Canada. The company has been formed with an authorized capital of $200,000 and an issued capital of $150,000, the object being to establish within Canada an organization fully equipped with all the necessary costumes, instruments and plant, to stage Canadian historical scenes, as well as to make records of principal Canadian events as they take place and present them in an acceptable manner. It is the intention of the company to also manufacture films of an educational and scientific character for use in schools, or otherwise, where they can be used advantageously, both for the education of the children and adults. The company will also cater to the commercial advertising field in a somewhat similar manner.

The company has taken over the plant and equipment previously owned by a couple of the directors, who are accepting stock in the new enterprise in exchange therefor. The property consists of the old Aberdeen school, together with the lot on which it stands, and certain smaller buildings, the whole being already fitted up with storerooms, machine shop, vaults and the various rooms necessary for the storage of the costumes and the manufacture and development of the films. In addition to this has been taken over a permanent camp of five acres on the Caughnawaga reservation on Lake St. Louis.

The directors of the company are: Sir Thomas Tait, Hon. J. P. B. Casgrain, Andrew R. McMaster, K.C., A. G. Cameron, Dr. Milton L. Hersey, Prof. J. A. Dale, M.A., and Forbes Sutherland. The stock is being offered by the National Bond Company.

◆

Fish to the value of $34,000,000 were caught in Canadian waters in the last fiscal year.

The firm of Lever Brothers, Limited, soap manufacturers of Port Sunlight, near Liverpool, is issuing £500,000 of 6 per cent. cumulative preference C shares of £1 each at a premium of 5 per cent. The company was formed in 1894, with a capital of £1,500,000. It now has an authorized capital of £30,000,000 and an issued capital of £11,204,258. The proceeds of the present issue will go to provide for the extension of the business and undertakings of the associated companies. The company has a Canadian branch factory at Toronto.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Halifax Tramways Company.—The public utilities commission has filed a decision empowering the Halifax Tramways Company to issue 6,000 shares of ordinary stock at par.

The additional capital is to be devoted to extensions and the retirement of certain bonds.

This decision marks the culmination of a fight between the company and the city over the question of the former's rights to add to its capital.

Canadian Cereal and Milling Company.—Bondholders wishing to avail themselves of the benefits of the agreement are requested to deposit their bonds with the National Trust Company, Toronto, Investment Trust Company, Montreal, or the Dominion Bank, London, England, who will issue transferable certificates in exchange therefor.

Bonds must be deposited not later than November 30th, 1913. Copies of the bondholders' agreement may be seen at the office of the company and at the offices of the depositaries.

Spanish River Pulp and Paper Mills, Limited.—The following officers were elected by the board of directors of the Spanish River Pulp and Paper Mills, Limited, at a meeting held in New York:—President, Mr. W. E. Stavert; vice-presidents, Messrs. G. H. Mead, Dayton, Ohio, and T. H. Watson, Toronto; secretary, Mr. T. Gibson, Toronto; assistant secretary, Mr. Alex. Taylor; treasurer, Mr. A. H. Chitty, Sault Ste. Marie; assistant treasurer, Mr. Speed Warren; comptroller, Mr. L. Lumb.

The following are the members of the executive committee:—Messrs. W. E. Stavert, J. Frater Taylor, T. H. Watson, H. E. Talbott, G. H. Mead.

The directors will meet on the second Wednesday of every month, either at Toronto or at the location of any of the mills of the company.

Mexico Tramways Company.—The directors of the Mexico Tramways Company have authorized an issue of 1,200,000 3-year 6 per cent. notes convertible into common stock of the company at par during the currency of the notes. A special meeting of the stockholders has been called to be held on November 30 to vote upon an issue of $10,000,000 common stock to cover the convertible feature of the notes. The conversion rights of the notes call for the provision of $6,000,000 stock, but should it not be used for conversion purposes, it, together with the remaining $4,000,000, will be held in the treasury for the future purposes of the company.

The company's statement of earnings and expenses from traffic only, as advised by cable, for the month of October, 1913, in Mexican currency are:—

	1912.	1913.	Increase.
Total gross earnings	$ 586,273	$ 616,007	$ 29,734
Operating expenses	270,519	285,827	15,308
Net earnings	315,754	330,180	14,426
Gross earnings from Jan. 1	5,594,706	5,732,338	137,633
Operating expenses from Jan. 1	2,649,835	2,665,930	10,095
Net earnings from Jan. 1	2,944,870	3,066,408	121,538

Price Brothers and Company.—The cost of manufacturing paper in Price Brothers and Company's new mills is decreasing, while the company is receiving a higher rate per ton for its product. In order to supply power for operating the mills at Kenogami and Jonquiere, the company recently completed an up-to-date hydro-electric plant at Kenogami, having a maximum development of 25,000 horsepower. Electrical energy in excess of the requirements of the mills is sold to the towns of Jonquiere and Kenogami.

Owing to the grinding capacity and water power turning out better than expected, the present production of the new paper mills can be increased to a daily capacity of 200 tons of paper and 40 tons of cardboard at a small additional cost, thus making the plant one of the largest in Canada.

The following is a comparison of sales for ten months of the present fiscal year and the same period last year:—

	1912.	1913.
Ties	$ 6.419	$ 42,639
Shingles	63,713	138,214
Lumber	695,463	777,194

In these three articles, it will be noticed that the increased sales for only 10 months amount to over $190,000. The last two months of the company's fiscal year usually show better sales than any other similar period.

Mexican Light and Power Company.—The Mexican Light and Power Company, Limited, statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of October, 1913 (Mexican currency):—

	1912.	1913.	Increase.
Gross earnings	$ 808,175	$ 882,290	$ 74,115
Net earnings	598,052	645,416	47,364
Gross earnings from Jan. 1	7,324,596	7,927,260	602,664
Net earnings from Jan. 1	5,275,093	5,800,455	525,362

Illinois Traction Company.—The shareholders of the Illinois Traction Company have authorized an increase in the common capital of the company by $5,000,000 at a special meeting at Portland, Me.

The purpose of issuing additional shares is to acquire the Western Railways and Light Company, a concern similar to Illinois Traction, and which is controlled by practically the same interests.

The holders of Western are to receive one share of Illinois common in exchange for two of their own shares. As the $10,000,000 Illinois common authorized had been nearly all issued, the authorization was necessary to put through this deal and only enough common will be issued to make the exchange. Mr. J. K. McNutt represented the Sun Life Insurance Company's interests at the meeting.

Temiskaming Mining Company.—The directors of the Temiskaming Mining Company regret that the underground conditions at the Temiskaming property are too unfavorable to permit of a dividend being declared at the present time, it being thought wiser to conserve the available funds until such time as other high-grade ore can be located by the extensive development always under way, states a letter sent to shareholders. The financial statement shows the following quarterly balances, dividends being paid for the first two:—

December 31st, 1912	$274,462
Less—January dividend	75,000
	$199,462
March 31st, 1913	$216,808
Less—April dividend	75,000
	$141,808
June 30th, 1913	$250,528
September 30th, 1913	264,451

Dominion Steel Corporation.—If the Dominion Steel Corporation succeeds in getting the new money which it is arranging for in London, the dividend on the common stock will not be passed.

The figures for October output and shipments are:—Pig iron, 33,069 gross tons; steel ingots, 31,390 gross tons; rails, 16,695 gross tons; other finished steel, 7,876 gross tons; shipments, 24,132 gross tons.

The receipts of ore and limestone were heavy, amounting to 126,788 and 67,340 tons respectively, making the season's total for these materials considerably higher than ever before.

Shipments to the Great Lakes will close in a few days. The steamers Prince Rupert and Nevada are on the way to Sydney for the last cargoes of the season which will include rails, bars, nails and other wire goods.

The second quarterly statement of earnings of the corporation is given below:—

Earnings available for dividends after making provision for sinking funds, depreciation and interest on bonds and loans	$843,640.85
Provision for dividends on preference shares and preferred stock of constituent companies ...	245,000.00
	$598,640.85
One per cent. dividend on common shares	318.977.00
Surplus for quarter	$279,663 85
Add surplus for previous quarter	141,285.00
Surplus for six months	$420,948.85

ALBERTA BELIEVES IN THE VALUE OF MIXED FARMING

Making Provision for Feeding Horses, Cows, Hogs and Sheep—Half a Billion Dollars of Farm Land, Buildings, and Live Stock Owned.

The province of Alberta comprises the old territorial district of Alberta and the western part of the district of Athabaska. It was created a province in 1905. From north to south it is about 750 miles long and at its widest part it is about 400 miles wide. It has a land area of 161,872,000 acres and a water area of 1,510,400 acres, being a total area of 163,382,400 acres, which is greater than the area of either Germany or France, and about twice the area of the United Kingdom.

The population in 1901 contained within the present limits of the province was 73,022, of which 52,399, or 71.76 per cent., was rural and 20,623, or 28.24 per cent., was urban. In 1906 the population was 185,412, of which 127,379, or 68.71 per cent. was rural and 58,033, or 31.29 per cent., was urban. In 1911 the population numbered 374,663, of which 232,726, or 62.12 per cent., was rural and 141,937, or 37.88 per cent., was urban. That is to say, in 1901 the urban population as represented by incorporated cities, towns and villages, was 28.24 of the total; in 1901, five years later, it was 31.29 per cent., and ten years later it was 37.88 per cent of the total population. In 1901, 718 of every 1,000 lived on farms, as against 687 in 1906 and 621 in 1911, according to the recent census returns.

The number of farm holdings in 1901 was 9,486, of which 9,429 were holdings of five acres and over as compared with 60,353 holdings of five acres and over and 1,143 holdings of less than five acres, making a total of 61,496 holdings in 1911. The number of holdings of between 100 and 200 acres increased from 6,577 to 34,555 in the decade, while those of over 200 acres increased from 2,587 to 24,023. The average size per holding has not varied from 1901 to 1911, being 288 acres at each census period.

Improved Lands and Increasing Crops.

In 1911 of the total land area 10.96 per cent., or 17,747,739 acres, were occupied as farm lands as compared with 1.69 per cent., or 2,735,630 acres in 1901. There were, therefore, in 1911 over 144 million acres in Alberta not occupied for agricultural purposes.

The area of improved lands increased from 474,694 acres in 1901 to 4,351,445 acres in 1911, being an increase of 3,876,751 acres, or 816 per cent, in ten years. Improved lands were 2.68 per cent. of the total land area of the province and 24.52 per cent. of the area occupied as farm lands. There were, therefore, in June, 1911, 13,396,294 acres, or more than 75 per cent., of the land alleged to have been alienated for agricultural purposes, which had not been brought under cultivation.

Land in field crops increased from 188,476 acres in 1900 to 2,067,503 acres in 1910. The area under field crops in 1911 was 3,377,263 acres, an increase of 1,309,760 acres in one year. This represents an average per holding of 54 acres in 1911 as compared with an average of about 20 acres in 1901; land in orchard and nursery, which amounted to only 46 acres in 1901, had increased to 335 acres in 1911; land in vegetables was 13,202 acres in 1911 as compared with 957 acres in 1901; vineyards were represented by 2 acres in 1901 and by 20 acres in 1911; small fruits, which were included with vegetables in 1901, were credited with 66 acres in the last census.

The land under all wheat in 1910 was 879,301 acres with a total production of 9,060,210 bushels, being an average of 10.30 bushels on sown areas and of 12.15 bushels on areas harvested. The area sown to wheat for the harvest year 1911 was 305,788 acres fall wheat and 1,334,186 acres spring wheat, making a total of 1,639,974 acres, being an increase in fall wheat of 101,152 acres and of spring wheat of 659,521 acres in one year. There are increases in area and production of all cereals for 1910 over 1900, and also for 1911 over 1910. It is worthy of note that the area under spring wheat showed a greater increase for the harvest year 1911 over 1910 than it made in the ten years from 1900 to 1910. This is also true of rye and flax.

Field Crops, Fodder and Stock.

In common with the other provinces of the Northwest, Alberta is seriously beginning to make adequate provision for the feeding of animals in the winter season. In 1901 no land producing cultivated grasses was reported. The records of the last census show for 1910 149,073 acres of hay and clover and 2,592 acres of alfalfa, and these figures were increased to 162,411 acres of hay and 7,800 acres of alfalfa in 1911. In addition to 125,662 tons of cultivated hay and 5,133 tons of alfalfa, the records show that 106,849 tons of prairie hay were gathered in the census year, but as no instructions were given to enumerators regarding collecting statistics of natural hay it is probable that the foregoing figure does not represent the total quantity saved. Potatoes had an area of 20,086 acres in 1910 as compared with 23,863 acres in 1911.

For the principal grains the average yield per acre was less in 1910 than in 1900. The total value of field crops, vegetables and fruits in 1910 was $18,211,116 as compared with $2,650,499 in 1900, an increase of over 587 per cent. in the decade.

The statistics of live stock show that horses increased by 314,492; milch cows by 101,586; other horned cattle by 315,304; sheep by 46,488; swine by 191,441; turkeys by 60,782; geese by 18,063; ducks by 21,945; hens and chickens by 2,102,181. In this province as in Saskatchewan the increase in the production of sheep is most gratifying.

Value of Farm Animals.

The pure-bred animals in 1901 were represented by 559 horses, 5,024 horned cattle, 776 sheep and 613 swine, as against 4,613 horses, 9,741 horned cattle, 1,372 sheep and 4,594 swine in 1911.

The average value of horses in 1911 was $138.61, of milch cows $43.12, of other horned cattle $27.54, of sheep $5.67, of swine $8.40, as against an average value in 1901 of $49.74 for horses, of $37.63 for milch cows, of $31.53 for other horned cattle, of $3.82 for sheep, and of $5.54 for swine. The total value of all live stock in 1911 was $83,234,693 as compared with $15,774,752 in 1901.

What Farmers' Assets are Worth.

The statistics for 1910 show that 52,566 horses, 29,258 milch cows, 227,724 other horned cattle, 37,059 sheep and 158,738 swine were sold at an average value for horses of $143, for milch cows of $39, for other horned cattle of $34, for sheep of $5.81, for swine of $12.45. The total value of all animals sold in 1910 was $19,001,660 as compared with $2,127,386 in 1900, being an increase of $16,874,274, or 793 per cent., in the decade.

The value in 1910 of the total milk production of 520,627,878 pounds was $7,855,751 as compared with $546,476 in 1900.

The number of weeks of hired labor on farms in 1910 was 207,681 and the value $2,241,669, being an average wage per week of $10.79 as compared with 86,705 weeks in 1900 with a value of $695,545 and an average of $8.02 per week, being an increase in the cost per week of farm labor of 34½ per cent.

Value of Land Owned.

The total value of land owned, buildings, farm implements and live stock on hand was $489,542,304, being an average value per holding of $7,960. The gross returns to the farmers as represented by field crops, fuits, live stock sold, dairy products, animals slaughtered on the farm, wool, eggs and honey aggregated $48,056,269, an average per farm holding of $781. From these figures, before the net earnings can be arrived at, must be deducted the certain fixed charges for seeds, for feed for animals, for depreciation in buildings and farm implements and for labor and taxes.

From the returns of enumerators it is ascertained that 265,699 acres out of a total of 2,067,503 planted in 1910 did not produce a crop. But as in the other prairie provinces the averages were computed on planted areas the same plan has been followed in dealing with the figures of Alberta. The percentage of the non-productive areas to areas sown in 1910 was 15.22 per cent. for wheat, 8.10 per cent. for barley, 14.04 per cent. for oats, 28.78 per cent. for flax; mixed grains are stated to have produced a yield on every acre sown. The following table gives the statistics of areas and production both by sown areas and harvested areas for the harvest year 1910. It also shows the number of acres sown to each crop which did not produce a yield of grain, etc.

◆

SOME GOOD ADVERTISING

Life insurance companies are realizing that their advertising must reach the men of all classes. those they are asking to take life insurance. Among the companies which have adopted a style of advertising to be commended is the Imperial Life. Fifty-two advertisements, all of which make striking appeals on behalf of life insurance, and which were used in an advertising campaign commenced last spring, have been reproduced in pamphlet form. They were prepared by Mr. C. Elvins, the company's advertising manager, and reflect credit upon his work and an excellent grasp of the right idea. The advertisements deal with all the timeworn excuses of men who defer taking out policies, and give some startling examples as to the cost of this unwise delay.

VALUE OF LIFE INSURANCE

XXXVIII.

Twenty Years Hence

BY C. A. HASTINGS

Twenty years is a long time, and because it is so many men have got the idea into their heads that they are bound to keep up premiums on a policy for that period— or for whatever period their contract calls for. Such is not the case. A life office is a business concern, like any other. It is common knowledge that a fire insurance contract can be cancelled on giving the required notice but in regard to a life contract—whatever the nature of the policy may be—the assured has bound the company to carry out certain obligations in return for premiums payable annually, semi-annually or quarterly at his convenience. The company cannot cancel the contract except on grounds of fraud—whereas the assured may demand a loan, a surrender value or a paid-up policy to date and the company must comply with the stipulations in the contract—all these values are at the option of the assured; the company cannot force an assured to take any of them so long as the premiums are payable.

Changes Can be Made.

Yet again, practically any policy can be changed at any time after its issue so as to meet those needs which it has become known will arise in the future. Take the case of a man who takes out a whole of life policy for the protection of his wife and family. If his wife should pre-decease him and his children give him no anxiety as to their future, he can convert his policy into one which is fully paid-up, or even surrender it for its cash value, which together with the accumulated bonuses, would probably return him everything he has paid in in premiums—or very nearly so—so that the protection he has had would have cost him an infinitesimal amount.

For another example take the case of the possessor of an endowment assurance policy, who finds, twenty years hence, that he does not require the money to provide for himself in his old age, but recognizes it would be valuable to his wife if converted into a whole of life policy; this he can do.

Will Meet Policyholders.

I have given two typical instances of what can be done, and every first-class life office is always prepared to meet its policyholders not only in this way, but in such a spirit that the assured need not suffer any monetary loss whatever on the transaction. It is a very common mistake to postpone assurance indefinitely on the grounds of not knowing which is the most suitable plan, but it is a very dangerous mistake and no one should shoulder responsibilities when they can always be borne by institutions that have been for generations, and still will be, a refuge and a strength to everyone who has sought their protection.

* * *

SIGNS OF THE TIMES.

"The necessity of higher rates is so urgent, and the demand is so just, that I cannot believe the people of Canada and America will long resist it, and in support of the reasonableness of my belief I am glad to call your attention to the fact that increases are being allowed by the Interstate Commerce Commission on some classes of freight carried on the western roads."—Mr. A. W. Smithers at the Grand Trunk annual meeting.

"To give you an idea of how the rise in price of coal and oil would have affected us had we not been fortunate enough to make favorable contracts in advance, I may say that the rise in the market prices of coal and gas oil would have made a difference of more than $200,000 per year to us, and we would undoubtedly have had to raise the price of gas had we to pay current prices for these commodities."—Mr. A. W. Austin, at Consumers' Gas Company, annual meeting, Toronto.

* * *

It is not to be assumed that because several of the Canadian banks have attained large size, the banking resources of the Dominion are in proportion. As a matter of fact, the total assets of the twenty-five chartered banks of Canada as reported at the end of September amount to 1,554 millions, which is less than the total resources of 1,766 millions reported by the fifty-five National banks in New York City alone.—New York Financier.

TWENTY-PAYMENT LIFE INSURANCE PLAN

Description of the Policy—The Reasons for Its Popularity

BY J. B. HALL, A.I.A., A.A.S.

Perhaps there is no policy of life insurance more popular with the public or more freely sold than the twenty-payment life policy.

Why this popularity?

A brief description of this policy will suggest the reason. The twenty-payment life policy is one which grants the protection of insurance throughout the whole of life; the term of protection is not limited to a specified number of years as in the case of an endowment policy. This is the significance of the word life used in the name. The words twenty-payment indicate the other reason for its popularity; the policy is paid for by twenty annual payments. These payments, coming as they do during the earning period of life, enable the assured to purchase his protection when best able to do so. It is this limitation of payment that makes this policy different from the ordinary life policy wherein payments continue until death. The present value of the payments is the same in both cases, and the amount payable at death is the same. Limiting the number of payments necessarily increases their amount beyond the ordinary life rates.

This increase, however, involving as it does no increase, but rather a decrease in the actual cost of the protection from year to year, permits of the setting aside by the company of larger amounts by way of reserve to be drawn upon to cover the cost of protection when the premiums will have ceased. These increases in the reserve values beyond those of the ordinary life policy carry with them increased cash surrender and loan values besides making larger extended insurance values possible. The limitation of the payments, therefore, results in making the policy of greater value as a negotiable asset and introduces to a certain extent the saving or investment element.

An Opportunity for Readjustment.

Under this policy it is customary when it is issued upon the participating or with profit plan and where the surplus or profits are allowed to accumulate with the company, to afford a number of options to the assured at the end of twenty years. Circumstances often change within a period of this length, and these options give the assured an opportunity of re-adjusting his insurance or of terminating it, as may seem wise.

The return in case of surrender, where the insuring company is economically and wisely managed, is usually substantial, the surrender value consisting of the reserve, which is always guaranteed, and the surplus or savings effected by the company, being somewhat more than the amount paid in premiums. Where such a return is made, and there are companies paying back considerably more than has been paid in premiums, the assured has virtually received his protection for less than the interest upon his premiums.

Desirable Provision for Old Age.

The merits of this form of insurance are, therefore, readily seen. In the first place protection is afforded for as long as it may be required, and there is no necessity as in the case of a twenty-year endowment policy, to undergo a second medical examination at the end of the twenty years to provide for the continuance of the protection.

In the second place, the premiums are limited but moderate in amount, ranging from say, $27.45 per $1,000 at age 20 to $36.95 at age 35, and $54.10 at age 50. This policy seldom commends itself to lives beyond 50 years of age. The experience of fraternal orders has pointedly shown the hardships now extending payments into old age. There comes a time in every life when it is desired to be relieved of burdens and few relish the payments of life insurance premiums when advanced in years and with impaired earning power.

In the third place a larger saving is effected through the increased payments than is possible under the ordinary life policy, and the increased surrender value resulting makes this policy, if desired, a means of making provision for old age.

For Healthy Lives Only.

For the youth, the young man, and even the middle-aged man, there is no better policy than the twenty-payment life policy. It unites in splendid proportions the double function of life insurance, the furnishing of protection to those depending upon the assured during the time when this protection is

(Continued on page 790.)

TRANSPORTATION TROUBLES IN MONTREAL

Fight Between City and Company Prophesied—Many Proposals Are Being Suggested

Monetary Times Office,
Montreal, November 12th.

There is promise that a fight will develop between Montreal and the Tramways company in connection with the coming negotiations, in which, it is assumed, the company will ask for franchise renewals and other advantages both at Montreal and at the Quebec Legislature.

A local paper has been waging war against the company, the claim being made that it is the intention to spring a surprise, and that it is the duty of the city to place itself in a position to see that the tramways company be given no more privileges. Some of the papers seem favorable to the company, and the opposing newspaper takes particular pains to point this out. In one of these, the announcement has been made during the past few days that the tramways company is prepared to undertake the construction of an underground system to extend east and west through the downtown congested district and running northward for upwards of a mile. The claim was made that to carry out these undertakings an expenditure of possibly forty million dollars would be necessary.

Streets Are Too Congested Now.

It was argued that there was little use undertaking certain improvements and carrying out certain suggestions now being made, inasmuch as these would only involve needless expense and add to the congestion, concerning which the city was already complaining. Recently the tramways company was called upon to make certain extensions to its lines in the outskirts of the city, and the answer was that this would only make the congestion greater. The company states it is prepared to spend $5,000,000 to $10,000,000 in improvements at once, this being for track extension and improvement and for the construction of new cars. The company argues that it could operate motor buses to better advantage than anyone else, and that it would use these lines to accommodate sections of the city not now served by the street cars, and that transfers would be given from street car lines to autobus lines and vice versa. Transfers would be good between surface and underground lines.

May Ask City to Surrender Receipts.

These schemes would go hand in hand with a proposal for a straight five cent fare to any point in the city. It is understood that the company will propose that the city surrender its percentage of receipts, and that these receipts go back into improvements to the service. The company proposes that the city construct subways under the Lachine Canal, and thus obviate the many delays which now take place at that point, and that it also construct subways in other portions of the city where necessary, the company sharing in the cost of this construction.

A conference will be likely held before long between the company and the board of control, and a programme of improvements covering the next twenty-five years and involving the expenditure, it is claimed, of $75,000,000 to $100,000,000 in all placed before the city.

It is further intimated that if the city does not look favorably upon the proposals concerning the straight five-cent fare and the giving up of its proportion of receipts, the company will proceed as at present.

The matter will, it is believed, come before the Quebec Legislature in some form before long.

◆

PERSONAL NOTES

Mr. I. R. Shaneman, manager of the Merchants Bank of Canada, Hartney, Man., died at his home last month.

Sir Gilbert Parker, who recently visited Canada, has joined the board of the Alberta Loan Investment Company.

Mr. A. R. Howell, manager for Canada of the Gresham Life Assurance Society, returned to Montreal from a trip to Western Canada.

Mr. A. Bowser, of Messrs. F. B. McCurdy & Company, has been elected a member of the Montreal stock exchange. This gives Messrs. McCurdy two seats on the exchange.

Mr. Alex. Mackay, general manager of the Law Union and Rock Insurance Company, of London, England, is retiring. Mr. Mackay is in the front rank of British underwriters.

Mr. Kenneth W. Townshend, managing director of Messrs. Frith, Pardoe & Townshend, Limited, an Edmonton investment firm, was a visitor to the head office of *The Monetary Times* last week. He is making a trip in eastern Canada and Newfoundland and later will go to England on business.

BRITISH COLUMBIA AND SHEEP GRAZING

Increases in Timber Royalties—Grand Trunk Pacific Will Be Completed Early Next Year

(Staff Correspondence).

Vancouver, November 10th.

Owners of timber in British Columbia will have to face an increase of royalties. At the last session of the legislature a bill was brought down providing for an increase to take effect on January 1st, 1916, but it was laid over because of the protest of the lumbermen. Recently Hon. W. R. Ross, minister of lands in the provincial administration, and Mr. H. R. Macmillan, chief forester, made a trip through the province to get the opinions of those interested. At that time, the timber owners placed a schedule of increases before the minister, which suggested a sliding scale of advance. Last week, the whole matter was thoroughly discussed. Representatives of the government were present, some of the manufacturers, timber owners, license holders and a committee from the mountain section. Mr. Ross was not present, having been summoned to Ottawa, but his assistant became possessed of the lumbermen's side of the question.

Investments in timber in this part of Canada are United States interests. Mr. W. Kelly, a lumberman from Chicago, stated that from what he had heard satisfactory amounts of American money will be coming to British Columbia. This is also shown by the opening of offices here by Messrs. J. W. Hyde, of Jacksonville, Florida, and H. G. Clarke, of Pittsburg. They are timber brokers and have a number of branches in Amercan cities. Because of what is expected here they are locating on this coast.

Benefits from Railway Facilities.

It was thought that taking off the duty on lumber and shingles imported into the United States would not have effect here for some time, but there has been a marked increase in the shipments of shingles to the other side from British Columbia.

Mr. Collingwood Schrieber, Dominion Government engineer, on his way back from inspecting the line of the Grand Trunk Pacific, declares that the road will be completed early next year. In anticipation of through transportation facilities being afforded, a few more townsites are being put on the market. When one may get into the interior of the province by railway from Prince Rupert, it is probable that considerable development will take place. Apart from the agricultural possibilities of the northern country, there is much mineral-silver, gold, copper, beside large deposits of coal. In many cases development has proceeded under great difficulties, especially in the Babine district, and shipments of ore are nearly ready. Lumber mills are also going up gradually, the latest announced being that to be erected at Tyee, 26 miles east of Prince Rupert, where $100,000 will be invested.

Interior Lands for Grazing.

Attention is being directed to interior lands for grazing purposes, in view of the policy of the government to issue leases for land for grazing. Mr. Frank Vandecar, of Victoria, says if he can get the land he requires he will bring four thousand sheep as a start. Another applicant from Powder River, Oregon, wants 20,000 acres and will bring in 15,000 sheep. The Stump Lake Land and Cattle Company, which already has a sheep business in the province, asks for an allotment that it may extend its holdings. In the Lillooet district it is estimated that there are now 29,900 head of cattle, 1,600 sheep, and 3,200 horses. On different occasions it has been suggested that sheep raising could be followed profitably in British Columbia. In the interior, the fodder grows wild, and the climate is suitable, especially in summer. At present, large quantities of mutton are imported from Australia and New Zealand. If this could be supplied from provincial ranches it would mean quite an increase in the wealth of the province. Not only that, but the wool would be a considerable item. While British Columbia may not become a great sheep raising country like Australia, there is reason to hope that large numbers will be raised here, now that the government is making it easier for those interested to obtain land for the purpose.

"Investments," the monthly investment review of the Bankers' Magazine, New York, has been sold to Franklin Escher, for many years financial editor of Harper's Weekly, by whom it will be conducted as an independent publication. The magazine is at once greatly to be enlarged, and made representative in its field. It will aim thoroughly to cover all important developments in the world of investment and finance, presenting each month, in addition, interesting and original compilations of statistical matter.

MONEY MARKETS.

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N. Y. funds	5-64 dis.	3-64 dis.	⅛ to ¼
Montreal funds	60c. dis.	Par.	⅛ to ¼
Sterling, 60 days' sight..	8 1-16	8⅛	8⅜ to 8½
do. demand	9⅛	9 5-32	9⅜ to 9½
Cable transfers	9 3-16	9¼	9½ to 9⅝
Rates in New York—		Actual.	Posted.
Sterling, 60 days' sight ..		4.80.60	4.81½
do. demand		4.85.20	4.86

Call money in Toronto, 6 to 6½ per cent.

Bank of England rate, 5 per cent.

Open market discount rate in London for short bills, 5 per cent.

◆

BANK CLEARING HOUSE RETURNS.

The following are the figures for the Canadian Bank Clearing Houses for the weeks of November 14th, 1912; November 6th, 1913; and November 13th, 1913:—

The Medicine Hat Steel Company, a corporation that has many of the same shareholders as the Alberta Rolling Mills Company, Limited, has commenced the erection of its buildings. The steel company secured a grant of nine acres of land from Medicine Hat, together with the usual gas and water concessions. In return for this the company agreed to expend approximately $100,000 in the plant and equipment, and to employ not less than 50 men for the first two years and 75 men for the ensuing three years.

DRY GOOD SPECIALTIES FIRM REORGANIZED

With the large growth of Canada's import trade, opportunities have arisen in the Dominion for the establishment of reliable agency firms. One of these, Messrs. Newbold, Still and Company, Toronto, was started several years ago by Mr. D. Newbold in Montreal, but which for the past ten years has had its headquarters in Toronto, has recently been reconstructed, and is now carrying on business as Newbold, Still and Company, at 77 York Street, Toronto. They are representing a number of well-known European and American manufacturers of dry goods specialties, and have an extensive connection with the large wholesale and manufacturing concerns in the important centres of the Dominion.

Both partners have had a wide and varied business experience, Mr. Newbold having for many years been in business in England and also in Montreal. Mr. Still has travelled extensively in the British Colonies and on the continent, having successfully undertaken various business enterprises and is well acquainted with conditions generally.

The firm is one of the few of this character, who have undertaken to assist their clients by carrying stock to accommodate them when occasion occurs.

The firm should enjoy success, as it is their intention to keep in direct and personal touch with their patrons in all parts of the country.

◆

MONTREAL PORT'S BUSINESS

The following official returns of the traffic of the port of Montreal during the month of October have been compiled for the Harbor Commissioners: The collector of customs reports revenue from imports amounting to $36,000, a decrease of $1,000 from receipts during October, 1912. Receipts from exports amounted to $18,000, an increase of $2,000. Total revenue for the month, $54,000, as compared with $53,000 for October last year. The wharfinger of local traffic reports receipts for the month amounting to $13,223.49, as compared with $10,802.63. Adding the amounts previously received since the opening of navigation gives a total for this year to date of $356,666.52, as compared with $328,446.10 for the corresponding period of 1912, an increase of $31,641.28.

◆

CANADA STOOD THE STRAIN

"There has been a great deal of criticism of Canada, some of it quite just and moderate," said Mr. A. W. Smith at the Grand Trunk annual meeting, "and some of it, I am bound to say, of an unnecessarily croaking order. The fact is, that the world has been going through a very trying period for eighteen months, brought about by ten years of extraordinary trade activity, during which the new countries of the world have been opened up as never before, thus absorbing on an unprecedented scale liquid capital, and also by the waste of war—waste not only caused by the peoples actually fighting, but by the war preparations made by non-combatant countries. In addition to all this, there has been the haunting fear that the war might involve the bigger powers, and this fear led to hoarding of gold and curtailment of credit. Well, I think Canada may be proud and satisfied at the way she has stood the strain."

◆

ROYAL SECURITIES COMPANY CAUTIOUS..

Conditions during 1912 for the sale of securities, both in Canada and abroad, being unfavorable, the Royal Securities Corporation, Limited, undertook a limited amount of new business and maintained an extremely conservative policy. This statement is made in the company's tenth annual report for 1912, and undoubtedly the company continued this policy during the current year.

The securities on hand at book value, representing cost or less, amount to $4,547,024.55. Net earnings for the year amounted to $132,978.13, after providing for all expenses of management, for reserve funds and after setting aside the annual contribution to the officers' pension fund. After deducting the regular dividend for the year at the rate of 16 per cent. per annum, the balance was added to the surplus account.

Mr. A. R. Doble, vice-president, in the course of his address at the company's meeting, said: "Both British and Canadian investors are becoming discriminating. Unsound bond-selling devices have probably had their day. A guarantee of profit may tempt a speculator, but the investor should avoid any security which has to be sold by these methods. We never have employed, and never will employ, such means of securing business. We sell securities on full and frank information supplied to clients, and buyers will be well advised if hereafter they confine their business to houses with a similar policy."

DRINKS AND SMOKES HELP TREASURY

To Tune of Twenty-one Million Dollars—Revenue Shows Large Increases Over Previous Years

Canada's inland revenue showed an increase of $2,000,000 last year, according to the statistics of Mr. W. Himsworth, deputy minister of inland revenue.

The annual consumption of liquor, etc., per head in Canada was: spirits, 1.112 gallons, beer 7.005 gallons, wines .131 gallons, tobacco 3.818 pounds, and the revenue derived per individual: spirits $2.340, beer $.320, wines $.076, tobacco $1.462. The total figures, with comparisons, are as follows:—

	1912.	1913.
Excise	$19,306,069	$21,487,918
Ferry licenses	1,024	529
Weights and measures, gas and law stamps	163,958	171,509
Electric light	66,060	74,833
Other revenues	5,669	7,501
Methylated spirits	93,083	118,077
Totals	$19,635,863	$21,860,367

Revenue and Production.

The details of excise revenue accrued during 1912 and 1913 are herewith appended. They show that spirits and tobacco are responsible for sixteen and half millions of the total.

	1912.	1913.
Spirits	$ 8,667,666	$ 9,474,142
Malt liquor	86,756	149,437
Malt	1,716,547	1,864,525
Tobacco	8,130,776	9,192,181
Cigars	517,646	602,269
Acetic acid	11,300	10,526
Manufactures in bond	84,720	91,460
Seizures	2,319	2,062
Other receipts	90,659	102,324
Methylated spirits	93,083	118,077
Totals	$19,401,472	$21,607,003

The quantity of spirits produced during the fiscal year was 6,458,452 proof gallons, as compared with 4,784,396 proof gallons produced in the previous year. The raw material taken for use, in the production of spirits, was as follows:—

Malt, 6,637,629 pounds; Indian corn, 63,048,555 pounds; rye, 11,696,490 pounds; wheat, 3,026,065 pounds; oats, 620,594 pounds; molasses, 26,885,496 pounds. The totals for barley and rice are omitted from this return.

Manufactures and Transactions.

The foreign demand for Canadian distillery products is slightly greater than the average of the last four years, the quantities exported being as follows:—

	Proof Galls.
1908-1909	311,314
1909-1910	361,934
1910-1911	273,963
1911-1912	298,769
1912-1913	333,802

Duties were collected on 9,317 gallons ex-distillery and 4,534,785 gallons ex-warehouse of Canadian spirits, and on 27,957 gallons of imported spirits used in bonded factories, the revenue accruing therefrom, including license fees, being $8,667,666.

The following are the transactions in malt, tobacco, snuff, cigarettes and cigars during the fiscal year ended March 31st:—

At the beginning of the year there were 36,634,900 pounds of malt in Canadian warehouses, the year's manufactures totalled 118,673,161 pounds, and the consumption was 123,920,607 pounds. Imports were 984,235 pounds and exports 198,800 pounds.

Tobacco, snuff and cigarettes, which weighed 718,766 pounds, were in the warehouses at the beginning of the year, and manufactures totalled 25,703,480 pounds, of which 25,287,332 was taken for consumption, together with 19,232,231 pounds of raw leaf and 17,535 pounds of Canadian twist, and 4,519 pounds were exported.

Canada started the year with 21,940,450 cigars in her warehouses and added by manufacture 297,762,383. Of these, 294,772,933 were taken for consumption and 10,100 were exported.

◆

MAY YET BE SIX PER CENT. BANK RATE

London authorities still think a 6 per cent. Bank of England rate is a possibility before the end of the year.

INSURANCE IS FACTOR IN SOCIAL ECONOMICS

Protection Given, Thrift Encouraged and Provision Made for Dependents

As a beneficent factor in social economics life insurance may be accorded a place amongst the highest. It promotes thrift. It quickens self-denial into life. It matures youth to thoughtful provision. It crystalizes love into adequate expression. It lifts over financial crises (by policy loans and cash values) the man of affairs. It discounts death. It strips poverty of cruel thorns. It countermines crime by careful control. It furnishes funds for fruitful enterprises. It buttresses the home against the assaults of distress, poverty and crime and even in the shadow of the valley of death, it lingers to wipe away the tears of widows and orphans and, by proving to them the loving care and thought of him who has gone before, lightens their darkness by a beam of love and hope and by its monthly cheque, he, being dead, yet speaketh, states Mr. T. J. Parkes in an article on "Can Life Insurance be called a beneficent factor in social economics?" Dealing with savings Mr. Parkes says:—

"Getting hold of callow youth in its formative period, insurance provokes the habit of thrift, excites his ambition to produce a given sum in a given time—whether that sum is the yearly premium or the matured endowment—when tempted to spend unnecessarily the inexorableness of the due date of the premium furnishes an incentive to resist the temptation. The same is true of a large number of older people as witnessed by the remark frequently heard that their insurance premium is the only amount they can count on saving.

Financial Results are Great.

"The results are so great financially that in the neighboring republic one-fourth of the bonds of the best railway companies are held by the 20,000,000 policyholders of the life insurance companies, while it needs only a glance at the detailed lists of assets of our Canadian companies to prove that not only railways but traction companies, industrial companies, municipalities, school trustees and others are financed largely by the mites of the policyholders collected yearly by the efforts of our agency forces. If further proof were necessary we might point to the statement that one-seventh of the savings of the peoples to the south of us are deposited with the life insurance companies.

"Another consequence of this enforced saving—a consequence illimitable in its benevolence affecting as it does not only its immediate recipients but spreading out its life-giving beams to thousands yet unborn—another consequence is the provision thereby made for the old age of the assured or for the upbringing and upkeep of his widow and orphans. It proves again that life insurance is a mutual alliance for help in time of need, not merely or even primarily self-help but for the help of others whose dark hour of need will be illumined by the reflected light of those who have gone before.

What Partnership Policies Achieve.

"Nor must it be overlooked that the more recently exploited field of partnership or corporation insurance furnishes further facts for proving life insurance a beneficent factor in social economics. More than one large business with its ramifications affecting the families of thousands of dependent workmen and clerks has been saved from disaster or, at least, from being seriously crippled by a policy carried on the life of its executive. As an instance, Mr. F. H. Peavey, the Minneapolis grain elevator factor, whose $1,000,000 insurance paid at his death enabled the banks to furnish credit to continue the business. No insurance on his life might have spelled disaster to many a farmer scattered over the vast prairies of the west.

◆

MUST GROW MORE THAN WHEAT.

"When in Edmonton the other day," says Mr. James Carruthers, "a large farmer told me that all the grain he raised this year he would feed on his own farm, and that he figured by doing this he would make equivalent to 80 cents for his barley and 50 cents for his oats. We cannot expect that we are going to have every year such fine crops of wheat as the past season. The wheat-growing farmer is going to be in a bad position if, some year, we have a partial failure, and possibly a low grade of grain, for which he can get little or nothing for export; but if he has live stock on his farm he can feed it and be able to get back far more than if it was exported. It is a mistake 'to put all your eggs in one basket,' and this applies equally to the farmer as it does to other business enterprises."

The Royal Bank of Canada has opened a branch at Pont Rouge, Que.

MANITOBA WHEAT BEST AND CHEAPEST

So Says James Carruthers, Who Answers London Buyers' Complaint As To Prices

Regarding the cable message recently printed in *The Monetary Times* with respect to the wheat situation, stating that the price in London on Manitoba wheat had been advanced beyond what London buyers said they could pay, the facts are given by Mr. James Carruthers, the head of the largest grain exporting firm of the Dominion, as follows. The cable stated the London buyers were taking Russian wheat in place of Manitoba and attributed this to speculation in America:—

"Owing to the large crop of wheat this season," says Mr. Carruthers, "both in the United States and Canada, the fine weather we have had for threshing and delivering at country points, receipts have been enormous, and with the tightness in the money situation, dealers have been declining steadily for the past few months, and wheat, to-day is selling about 15 cents per bushel less than it was four months ago.

Values Have Advanced.

"During the past week markets have steadied and values have advanced three to four cents per bushel, as the trade is commencing to realize that Manitoba wheat around present values is cheap and worth the money, and that there large receipts cannot keep up much longer. Manitoba wheat to-day is the best and cheapest wheat in the world, is confirmed by any number of our foreign correspondents. They also say that Canada and the United States have been the only two countries pressing wheat on the market during the last few months, and that no other country can compete with our prices, Russia included.

They Want Canadian Wheat.

"The fact of the matter is, foreigners to-day would take our wheat just as readily at 10 cents per bushel more money if we did not offer it to them day after day at lower prices, and throw it at them in such large quantities. They want our wheat as there is no country in the world can produce such fine quality, but when they see our prices declining, they hold back, trying to buy it cheaper.

"The price of wheat is regulated by supply and demand, but we have been trying this year to move and market the whole Canadian crop in three and four months' time, and it has resulted, as it always will, in prices declining. With the amount of grain that our Canadian northwest is now pouring in and which will increase every year, far better results to the farmer could be obtained by taking 12 months to market it instead of rushing it out and forcing it on the foreign buyer. Canada appears to be the only country in the world where farmers rush their wheat to market as soon as it is threshed, and have no facilities in the way of granaries on the farms to take care of it.

Says Movement Is Overdone.

"While we all know that an early movement of the crop is desirable so that the country storekeeper can meet his obligations to the wholesale trade, and the farmer be in a position to pay his debts, still, I believe it is being overdone, and that the farmers of the Canadian northwest are getting, to-day, 10 cents per bushel less for their wheat than it is actually worth, based on world conditions of supply and demand, but as long as we keep offering our wheat at these 'bargain-counter' prices, the foreigners will simply sit back and wonder why we should keep offering such fine quality of wheat at such low figures, and our loss is his gain.

"If the farmers in our three northwestern provinces would go in for mixed farming instead of grain growing exclusively, it would be a partial solution of the difficulty, as they could then feed on their farms a considerable portion of what they grow. The government and railways are doing everything they can to induce the farming community to do this. and it is now up to the farmers themselves to get some stock and buildings to take care of same during the winter months. The province of Ontario 25 years ago exported millions of bushels of wheat, oats, peas, barley, etc.; to-day, they export nothing. They grow just as much, but it is all fed on the farm, and I venture to say they get at least double out of it than if they sold it for export."

◆

The London Financial Times publishes an article upon the increase of loans by Canadian banks to industrial undertakings, and asks: "Since these cannot be capitalized in London just now, how will the deadlock be broken?" The writer thinks the remedy will be found in an attempt to float loans in Canada and the United States, but these would have to be at the rate of 6½ per cent.

SHIPS BUILDING FOR PANAMA TRADE

British and German Lines Keen Rivals—North Atlantic Ports Preparing

A London cable says that the near approach of the completion of the Panama Canal is responsible for considerable activity in the shipbuilding trade both in Great Britain and elsewhere. Over 60 steamers are under construction for services through the new waterway. The itineraries of 30 companies will be adjusted to meet the altered conditions. The sharpest struggle will take place between British and German lines, though powerful rivalry is also expected from the International Mercantile Marine Company.

Seaports Setting House in Order.

North American seaports are preparing for the opening of that waterway at the beginning of 1915. From inquiries made by the Wall Street Journal, it is concluded that not less than $100,000,000 is represented in the commitments already made and under consideration, including Federal appropriations.

Public harbor improvements at Boston under the State Harbor Commission of which General Hugh Bancroft is the head, has at its disposal $9,000,000 for improving terminal facilities; $3,000,000 worth of bonds have already been sold and another $3,000,000 is to be marketed in the near future. While the opening of the canal was an important factor in this outlay, the possible canal needs are only part of a larger plan for increasing Boston's share in the foreign trade of the country both by land and by sea.

At New York.

At New York the port improvements with the canal in view are likewise part of the general policy under which the board of estimate has set aside $15,000,000 for the department of docks and ferries, of bonds representing self-sustaining dock properties. This does not, of course, include the allotment of $9,400,000 by the state of New York for canal terminals at this port, in connection with the improved barge canal connecting the lakes with the seaboard.

Canada is not making extensive preparations. The general tendency in this country seems to be one of caution, probably with a view to waiting for actual results of the operation of the canal.

◆

PROVINCES GRANT COMPANY LICENSES

The following lodge has been licensed to transact business in Canada: Grand Lodge of the Loyal Order of Moose. Head office, Toronto.

The following company has been licensed to do business in Ontario: Vermont Marble Company of the State of Vermont, U.S.A. Capital, $100,000. Head office, Peterborough, Ont.

These companies have been authorized and licensed to do business in British Columbia:—

Northwestern Novelty Company, Limited, of Alberta. Head office, Vancouver, B.C. The Victoria (B.C.) Land Investment Trust, Limited, of London, England. Head office, Victoria, B.C West Disinfecting Company of New York. Head office, Vancouver, B.C. Prudential Assurance Company, Limited, of London, England. Head office, Vancouver, B.C. The Yoho Valley Marble Development Company, Limited, of Calgary, Alta. Head office, Vancouver, B.C. Johnson Temperature Regulating Company of Toronto. Head office, Vancouver, B.C. Grand Pacific Land Company, Limited, of Winnipeg. Head office, Vancouver, B.C.

The following companies have been registered to do business in British Columbia:—

Western Wheeled Scraper Company of Aurora, Ill., U.S.A. Head office, Vancouver, B.C. Pacific Coast Steamship Company of San Francisco. Head office, Victoria, B.C.

The following company has been authorized to do business in Quebec: Panther Rubber Manufacturing Company. Head office, Sherbrooke, Que.

◆

Redcliff, Alta., carried a fire-hall by-law.

Winnipeg's civic fire insurance will be carried for the next three years by the following companies for amounts as noted: Canadian Phœnix, $75,000; Rimouski, $60,000; Midland, $5,000; London Mutual. $130,000; Millers National, $65.000; Lumber, $75,000; Central Canada, $130,000; Springfield, $150,000; National Hartford, $190.000; General, of Paris, $75,000; Montreal Canada. $60.000; Anglo-American, $100,000; Dominion, $25,000; Factories, $138,180; total, $1.278,180. At the average rate of 3.2347 the premium amounts to $41,344.89 for the three years' covering.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Hamilton, Ont.—November 7—Mr. J. Moore's residence, 11 Albert Road.

Perdue, Sask.—October 31—Schoolhouse stable. Loss and cause unknown.

Irvine, Alta.—October 31—Ogilvie Company's elevator. Loss and cause unknown.

Hull, Ont.—November 7—Mr. I. Kavanagh's residence. Loss, $100. Cause unknown.

Consort, Alta.—October 29—Mr. J. Anderson's shed. Loss and cause unknown.

Sackville, N.B.—November 3—Mr. S. Hick's residence. Loss slight. Cause unknown.

Paisley, Ont.—November 6—Rev. Little's residence. Loss, slight. Cause, chimney.

Rainy River, Ont.—October 31—Mr. F. Scobie's residence. Loss and cause unknown.

Chesterville, Ont.—November 6—Mr. F. McCloskey's barns. Loss and cause unknown.

St. Boniface, Man.—November 8—Mr. J. Machant's residence. Loss and cause unknown.

Moncton, N.B.—November 4—Capt. Edgett's residence. Loss, $300. Cause, defective flue.

Cookshire, Que.—November 3—Fire in Chemical Works. Loss, slight. Cause unknown.

Chatham Ont.—November 1—Dowsley Spring and Axle Works. Loss, slight. Cause, gasoline.

Marbleton, Que.—November 10—Mr. A. Barter's residence. Loss, $5,000. Cause unknown.

Midland, Ont.—October 31—J. Reno's ice cream store, Grise block. Loss and cause unknown.

Montrose, Ont.—November 3—Michigan Central Railway oil house. Loss and cause unknown.

North Vancouver, B.C.—November 4—City Ferry offices. Loss, $1,500. Cause. overheated chimney.

Sarnia, Ont.—November 4—Imperial Oil Company's docks. Loss slight. Cause, lighted match.

Wigwam, B.C.—October 30—Lee Lumber Company's property. Loss, $30,000. Cause unknown.

Eburne, B.C.—November 3—British Columbia North Arm bridge. Loss, $400. Cause, short circuit.

Beauharnois, Que.—November 3—Banque d'Hochelaga. Loss light. Cause, overheated stovepipe.

Parry Sound, Ont.—November 6—Mr. H. S. Knifton's gasoline launch. Loss, $900. Cause unknown.

Beamsville, Ont.—November 1—Mr. W. Wright's residence, Simcoe Street. Loss and cause unknown.

Stratford, Ont.—November 5—Canadian Allis-Chalmers, Limited, plant. Loss unknown. Cause, hot metal.

Fort William, Ont.—November 5—Colville and McLaughlin's hardware store. Loss, $100. Cause unknown.

Vienna, Ont.—November 3—Mr. Willis Reece's barns. Loss, $1,000. Partially insured. Cause unknown.

Trenton, Ont.—November 5—Lloyd Collapsible Baby Carriage Company. Loss slight. Cause unknown.

Brandon, Man.—November 6—Great West Fireworks Company's factory. Loss slight. Cause unknown.

Saskatoon, Sask.—November 4—Mr. H. D. Blonde's cottage, 1328 Avenue H North. Loss and cause unknown.

East Bolton, Que.—November 8—Mr. H. D. Thomas' barn. Loss unknown. Cause, supposed incendiary.

Dover Township, Ont.—November 3—Mr. R. Emery's barn, Concession five. Loss, $1,500. Cause unknown.

Guelph, Ont.—November 6—Guelph Motor Car Company's car. Loss unknown. Cause, gasoline ignited.

Brantford, Ont.—November 4—Mr. B. Lee's laundry, Dalhousie, Street. Loss, $300. Cause, overheated stove.

Brockville, Ont.—November 6—Dr. Gorman's cottage on Oriental Isle. Loss, $4,500. Cause, supposed incendiary.

Cowansville, Que.—November 10—Mr. R. E. Ruiter's barn. Loss, $8,000. Insurance, $1,800. Cause unknown.

Oshawa, Ont.—November 7—Mr. E. McMullen's barns, Cedar Dale. Loss unknown. Cause, supposed incendiary.

Charlottetown, P.E.I.—November 2—Mr. D. Morrison' residence. Richmond Street West. Loss and cause unknown.

Hensall, Ont.—November 4—Mr. H. Soldan's barn. Loss, $3,700. Insurance, $1,700. Hay Mutual. Cause unknown.

New Liskeard, Ont.—November 1—Mr. T. E Armstrong's residence. Loss, slight. Cause, defective chimney.

New Westminster, B.C.—October 31—Messrs. Fleming and Yeoman's shingle mill. Loss, $1,000. Cause unknown.

Woodroffe, Ont.—November 7—Mr. J. Gravelle's summer cottage. Loss, $2,000. Partially insured. Cause unknown.

Beeton, Ont.—October 25—Messrs. Aitken and Sons' flour mill. Loss unknown. Insurance, $13,000. Cause unknown.

St. Catharines, Ont.—Mr. J. Lowe's wagon shop. Loss, $40. Insurance, stock, $400; buildings, $100. Cause, incendiary.

Kingston, Ont.—November 6—Messrs. Bennet and Halligan's store. Loss, stock, $50; building, $25. Cause, dropped match.

Welland, Ont.—November 4—Mr. H. E. Boyle's barn. Loss, $700. Insurance, $200. Cause unknown; Y.M.C.A. Loss unknown. Cause, lighted candles.

Colborne, Ont.—November 6—Catholic school. Loss and cause unknown.

November 10—Windsor Hotel. Loss and cause unknown.

Ottawa, Ont.—November 6—Ottawa Electric Railway Company's motor truck. Loss, $3,000. Cause unknown; 97 Merton Street. Loss, $300. Cause, supposed incendiary.

Regina, Sask.—November 4—Mr. J. W. Holliday Edgely. Loss unknown. Cause, hot stove pipes in contact with curtains; Rex Theatre. Loss unknown. Cause, furnace set boards on fire.

Oakville, Ont.—November 4—Town Hall. Loss, $10,000. Insured. Cause unknown.

November 8—Barn and gymnasium of Appelby College. Loss, $35,000. Cause unknown.

St. John, N.B.—November 2—Mr. C. E. Colwell's building. Loss, Mr. McLennan stock, $3,700. Insured with Acadia, Western Rimouski and Scottish Union. Mr. Colwell's building, $1,200; office equipment, $1,300. Insured. Cause, defective wiring.

Melville, Sask.—October 24—Mr. H. Miller's livery stable. Loss, building, $1,000; contents, $1,500. Cause, lighted match or cigarette. No insurance.

October 27—Hotel owned by J. B. Hayes. Loss, $1,000. Cause, overheated chimney.

Calgary, Alta.—November 1—Canadian Pacific Railway's kitchen and dining-room. Loss, $2,000. Cause, overheated stove.

November 2—Heiman's millinery store, 1213 First Street W. Loss, $100. Cause unknown.

Nipigon, Ont.—November 9—Enser and Dowler block, M. Nitkin, clothier; Atwil block, J. Atwil, bakery, poolroom and residence; Salo block, D. Iosenthal, clothier; M. Nitkin, barber shop; J. Goodridge, restaurant; J. Fournier, barber shop; McKirdy, general store and residence. Total loss, $75,000. Cause unknown.

Montreal, Que.—November 4—Succession Viau, 3030 Notre Dame Street West. Loss and cause unknown; E. Kilgallen's residence, Montreal South. Loss, $1,000. Cause unknown.

November 5—Power room, Bell Telephone main exchange. Loss, about $100. Cause, crossed wires.

November 8—Animal house, McGill Univeristy. Loss and cause unknown.

Winnipeg, Man.—October 30—Messrs. Campbell Brothers and Wilson's grocery warehouse. Loss, $10,000. Cause unknown.

November 1—Avenue Block, Portage Avenue. Loss slight. Cause, spontaneous combustion; Mr. A. Nissner's residence, 92 Riverton Avenue. Loss unknown. Cause, chimney.

November 4—Great West Saddlery Company's stable, 154 McDermont Avenue. Loss, $50. Cause, supposed incendiary.

Toronto, Ont.—November 5—Mr. W. Smith's stable, 628 Bloor Street West. Loss, $25; Mr. C. H. Du Maresque, 630 Bloor West. Loss, $300. Cause, supposed incendiary; Mrs. R. Conover's residence, 18 Division Street. Loss, stock, $50; building, $30. Insurance, $1,000. Cause, children and matches.

November 6—Capt. Ward's cottage, 123 Lake Shore Avenue, Island. Loss, $200. Cause, supposed incendiary; Mr. A. Myers' residence. Loss, building, $400; contents, $200. Insurance, building, $3,000. Cause unknown; Galbraith Photo Company's shed, 239 Yonge Street. Loss, building, $100; contents, $10.

November 7—Mr. W. F. Smith's residence, 13 Saulter Street. Loss, building, $50; contents, $35. Insurance, building, $1,000; contents, $300. Cause, children and matches.

November 9—Mr. W. J. Barber's stable, rear 927 Yonge. Loss, building, $100; contents, $100. Cause, supposed incendiary; Massey Harris Company's private railway car. Loss, $5,000. Cause unknown; Merchant's Mutual Lines' freight shed. Loss, building, $300; contents, $300. Cause, defective wiring; Mr. A. S. Roger's residence, 9 Glen Avenue. Loss, building, $50; contents, $100. Cause, lamp set curtains alight.

November 10—Mr. Lester's auto, 78 Gormelly Avenue. Loss, $1,000. Cause, engine backfired; Mr. C. Moster, 230 Richmond Street. Loss, stock, $15,000; building, $200. Insured with Rimouski Fire Company. Cause unknown. Ross and Wright, Toronto, adjusters for the assured.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Hull, Ont.—October 3—Mr. G. D. Graham, 40 Buwry Street. Loss $28. Insurance $600, in Dominion and Equity.

Orleans, Ont.—October 7—Mr. J. Legault's cheese factory. Loss $2,970. Insurance $3,150, Anglo-American. Cause, furnace.

Milford Bay, Muskoka, Ont.—Mr. G. Goodhead's residence. Loss $1,060. Insurance $600, Dominion. Cause, exploded lamp.

Hamilton, Ont.—October 22—Unitarian Church, Main Street. Loss $183. Insurance $2,000, Norwich Union. Cause, dropped match.

Mount Albert, Ont.—October 3—Mr. W. Rightley's bread factory. Loss $12. Insurance $1,000, London, Liverpool and Globe. Cause, exploded lamp.

Ottawa, Ont.—October 3—Mr. Des Rosines' store, East View, Ottawa. Contents, loss, $3,940. Insurance $1,800, Anglo-American. Storefittings, loss $590. Insurance $400, Montreal-Canada.

Kelowna, B.C.—October 11—Mr. C. Clarke's dwelling. Loss $1,775. On contents, $1,925. Cause, electric wiring. Insurance on building, Queen Insurance Company, $1,500; Northern, $1,750; on contents, $2,000.

London, Ont.—October 27—London Bed and Mattress Company's factory. Loss, building, $5,300; machinery, $3,597; stock, $7,479. Total $16,376. Insurance, Canadian, $1,000; Germania, $1,000; Montreal, $1,000; St. Paul, $1,000; Norwich Union, $1,000; Rochester German, $2,000; Duquesne Underwriters, $2,000; Aetna, $2,500; Firemans, $1,500; Royal, $1,000; York, $1,000. C. D. Cory, Toronto, adjuster for companies. Ross and Wright, Toronto, adjusters for assured.

Prince Rupert, B.C.—October 18—Hotel, owned by Premier Hotel Company. Loss on building, $250; on contents, $275. Cause, defective range in kitchen. Insurance on building, American Insurance Company, $620; Canadian Fire, $1,550; Delaware Insurance Company, $1,240; Insurance Company of State of Pennsylvania, $620; Liverpool and London and Globe, $1,240; Phoenix of London, $2,790; North Empire, $1,550; Nova Scotia, $1,240; Occidental, $620; Rochester-German, $620; Union Assurance Society, $1,240; Westchester, $1,240; total, $14,570.

Quebec, Que.—October 31—Messrs. E. Belanger and Company's store. Insurance, on building, Liverpool and London and Globe, $5,000; Sun, $4,000; Guardian, $3,000; Phœnix of London, $2,000; Royal, $1,000; total, $15,000. On stock, Liverpool and London and Globe, $11,000; Guardian, $5,000; National-Union, $2,500; North British, $4,500; New York Underwriters, $2,500; Dominion, $2,500; Union, $2,000; Rimouski, $2,000; Liverpool-Manitoba, $1,500; Equity, $1,500; Ontario, $1,500; General Fire, $2,500; total, $41,500. On fixtures, etc., Guardian, $1,200; Royal, $1,000; Alliance, $200; total, $2,400. Total insurance, $58,900.

The following fires were adjusted by H. T. Hughes, Toronto:

Toronto, Ont.—September 3—Mr. H. A. Clubin, 513 Church Street, Toronto. Loss $239. Insurance $2,000. Cause, from Gibson electric fire.

September 14—Mr. J. G. Watson, Admiral Road. Loss $90. Insured with Liverpool, London and Globe. Cause, spark from chimney.

September 22—Mr. Hynes' residence, 179 Wilton Avenue. Loss $9. Insurance $1,000, Liverpool, London and Globe. Cause unknown.

September 27—Mrs. Bell's residence, 88 Jones Avenue. Loss $12. Insurance $1,400, Liverpool, London and Globe. Cause, furnace.

October 10—Mr. J. E. Webster's residence, 46 Isabella Street. Loss $23. Insurance $500, Dominion. Cause, gas and curtains.

October 14—Mr. N. G. Heyd's picture theatre, 332-4 Queen Street West. Loss, building, $558. Insurance $3,000. Furniture, loss $294. Insurance $750. Cause, defective wiring.

October 15—Messrs. Scholey Brothers' premises, Ontario Street. Loss $7,648. Insurance $5,000, Mercantile, Royal, Nova Scotia, Wellington and Metropolitan. Cause unknown.

October 25—Mrs. Woodbridge, 18 Fairburn Avenue. Loss $20. Insurance $500, London and Lancashire. Cause, dropped match.

The following fires were adjusted by J. S. Rankin, Vancouver, B.C.:

Vancouver, B.C.—September 26—Woodward Department Stores, Limited. Store, loss, $200. On contents, $9,500. Cause of fire, cigarette. Insurance, schedule on building and stock, Mount Royal Insurance Company, $2,500; Excess Insurance Company, $2,910; Lloyds, $134,102; Cornhill Insurance Company, $7,275; Provincial Insurance Company, $10,000; Pacific Insurance Company, $20,000; Stuyvesant Underwriters, $25,000; Merchants Insurance Company, $2,500; National Insurance Company, $5,000; Williamsburg Insurance Company, $5.000: United States Insurance Company, $5,000; Nassau and Duchess Insurance Company, $5,000; North River Insurance Company, $5,000; Russian Transport and Insurance Company, $6,000; Central Union Fire Insurance Company, $3,000; Boston Insurance Company, $5,000; Wilmington Insurance Company, $5,000; Firemen's Underwriters, $8,250; Indemnity Exchange, $20,000; Rhode Island Insurance Company, $5,000; New Jersey, $10,000.

THREE RIVERS OCTOBER FIRE LOSS

Three Rivers, Que., October fire losses, as reported to *The Monetary Times* by Fire Chief Berthiaune, were:—

October 2—Mr. A. Bourassa's residence, 17 St. Paul Street; owned by J. Lessieurs. Chimney fire.

October 3—Mr. P. Paquin's residence, 70 St. Cecile Street. Loss, contents $5, building $10. Insurance, stock $300, contents $1,300. Cause, electric wiring.

October 4—Mr. F. Rocheleau's residence, 244 Notre Dame Street. Loss, contents $500, building $814. Insurance, contents $500, building $1,500. Cause, defective chimney.

October 10—Messrs. Blanchette Bros.' shed, 21 Richard Street. Loss, $105; insurance, $6,200. Cause unknown.

October 14—Mr. W. Marchand's residence, 30 St. Denis Street. Owned by J. Lambert. Cause, children with matches.

October 16—Mr. A. Olivier's residence, 13 St. Alexandre Street. Owned by Mrs. H. Lajoie. Cause, oil stove explosion.

October 31—Mr. H. Plante's firewood. Cause, sparks from engine.

◆

SASKATOON'S OCTOBER FIRES

Saskatoon's October fires as reported to *The Monetary Times* by Fire Chief Heath were:—

October 5—Mr. W. H. Madden's residence; owned by Mr. Winters. Loss, $150. Cause, defective fireplace.

October 7—Mr. T. J. McCartney's blacksmith shop, 23rd Street and Wall Street. Loss, $25. Cause, hot forge.

October 11—Rear of Mr. B. E. Dutcher's premises, 123 2nd Avenue. No damage. Cause, hot ashes. Mr. Lynch's cafe, 155 3rd Avenue; owned by D. Cameron. Loss, building $5,600, contents $1,500. Insurance, contents $1,200. Insurance on buildings, $5,600, expired. 151 3rd Avenue. Loss, contents $125. Mr. R. Waite, 149 3rd Avenue. Loss, $250. Mr. G. W. Carroll, 147 3rd Avenue. Loss, $50. Cause, gasoline stove exploded.

October 12—Mr. W. Lindsay's barn, 16th Street and Avenue H. Loss, $350; no insurance. Cause unknown.

October 13—Mr. R. King's candy store, 135 20th Street East; owned by Reid & Elding. Loss, building $250, contents $30. Insurance, buildings $7,200, contents $4,000 with American Central and Mount Royal. Messrs. Haskemp & Vasberg's hotel, 3rd Avenue and 21st Street. Loss, $25, buildings. Cause, gasoline coffee urn. Canadian Pacific Railway depot. Loss, $50. Cause, electric wires. Mr. J. Charlebois, 1703 22nd Street W. Loss, buildings $2,500, contents $500. Cause, defective flue. Mr. C. R. Hill's garage, 1126 Spadina Crescent. Loss, contents $200, building $100. No insurance. Cause, carelessness with stove.

October 15—Mrs. Macdonald's residence, 537 3rd Avenue N. No damage. Cause, overheated stovepipe.

October 16—Mr. C. Garton's store, 120 20th Street W. No damage. Cause, overheated register.

October 19—Messrs. King's store. Loss, building $200, stock $1,000. Insurance, stock $800, Canadian Phœnix and Phœnix of Hartford.

October 21—Mr. Wallace's storehouse, 4th Avenue Loss, $15; no insurance. Cause, cigarettes.

October 24—Tent. Loss, $25. Cause unknown.

October 25—Mr. J. Ketchum's stable, 321 Avenue A South. Cause, straw around stovepipe.

October 26—Lee Ching's residence, rear 239 Avenue A South. Loss, $20 Cause, lamp exploded.

October 30—Mr. L. Vance's tenement block, 813 Broadway. Loss, $10. Cause, coal oil stove exploded.

BOARD TO CONTROL MUNICIPAL LOANS

Some Criticisms of the Plan Answered by Mr. Wynne-Roberts

Municipal loans in relation to city development was the subject of an address by Mr. R. O. Wynne-Roberts, consulting engineer, to the Moose Jaw Board of Trade this week. Mr. Roberts paid particular attention to the proposals to inaugurate central authorities to supervise municipal loans. Dealing with various criticisms of the scheme, the first comment was that a federal local government board would be more on the British lines than provincial boards would be. This was not correct, said Mr. Roberts, for England and Wales, Scotland and Ireland have separate boards. "Each board is generally based on the same idea with regard to the approval of schemes and the authorization of loans, but the procedure differs in some respects," he continued. "For instance, in England and Wales, few schemes, if any, are approved or loans sanctioned without holding local enquiries, but in Scotland local enquiries are held when the loans are obtained from the Public Works Loans Boards, which is a Government department. Provincial boards would be strictly on British lines.

Abstract and Concrete.

"The next comment is that the Local Government Board should be Federal because municipal loans are of national importance and not local. In the abstract this may be right, but the British North America Act of 1867 expressly conferred upon the Provincial Governments full powers with reference to municipal institutions and this was incorporated in the Sakatchewan Act of 1905. It is evident that if anything is to be done to assist the municipalities the work must devolve on the Provincial Governments. The third comment is that the consolidation of municipal loans will not be of advantage.

"Usually consolidation of acts, powers, authorities and finance tends towards greater strength and stability. With the consolidation of municipal loans the same advantage should accrue, for the large number of loans leads to competition, disadvantage and the depression in value. How municipal loans can be consolidated is a matter for careful consideration. It may be best to divide the villages, towns, and cities into classes according to population, assessment, or location. It may be advantageous to consolidate loans for specific works, for instance, reproductive works might be put into one category and non-productive class into another category, and a third into a composite class. Furthermore, public health work might be placed in one division and other works kept separate. All this is a matter of great importance, and will doubtless be fully considered by the Government or the new Board.

Impairment of Credit.

"The fourth comment is that the Government cannot guarantee the municipal loans without impairing its own credit. This question is worthy of some consideration. The new board will investigate all schemes, and when satisfied that they are satisfactory, that they are necessary, that they are adequate and reasonable, that the cost is carefully estimated, and that the securities are ample, it will approve of the schemes and authorize the loans. If the Government, through its new Board is prepared to go thus far, why not go a little further and give the investing public a guarantee to show good faith in what they pass?

"The loans which the British Local Government Boards sanction are accepted by the Public Works Loan Commissioners and the loan advanced by them. In a like manner what the Saskatchewan Board sanctions may be accepted by the Government and guaranteed. Each village, town and city will give evidence as to the assessments, liabilities, growth, properties, etc., at the enquiries, and if these are found to be satisfactory, then they are made more satisfactory by a guarantee. It will mean a double security for the investor, and it may possibly improve even the government securities. The credit of a government is intimately associated with that of the municipalities, and no government can afford to allow anything to occur which may affect either. This is the view taken by the Russian and British Governments, and this is what is developing in the United States.

Free From Politics.

"The fifth comment is that if the new Board is to be of value, it must be strict, impartial and judicious in its actions These three conditions are desirable, but care must, however, be taken to ensure that the change is not too sudden or drastic. It has taken the English Local Government Board 42 years to attain its present pre-eminent position as a controlling body. It has taken the Dominion Railway Commission some years to reach its present position. Every public utility commission has taken time to establish confidence, and it will require time and patience for the Saskatchewan Board or any board to secure full confidence and develope strength, and the stronger it becomes the more confidence it will acquire.

"The new Board will be measured by its freedom of action and its independence within certain prescribed limits. When the Dominion Railway Commissioners were first appointed, their powers were limited, but as the confidence of the public was strengthened so were their powers increased. They were appointed by a political party, which I know not or care, but they do not come within the range of party politics, nor would either party allow the Commission to be mixed up with politics. Its freedom of action and its independence within statutory limitations, are recognized and appreciated by all. In a like manner the new Board will be gauged by its impartial judgment, which villages, towns and cities will in the absence of special reasons wisely acknowledge otherwise the value of such an institution will at once be discounted.

"No Russian municipality can borrow money without fully satisfying the Government, that the scheme for which money is required is satisfactory, that the securities are ample and and that the municipality can afford the additional expenditure. The Russian Government has a large debt, most of which is financed in London. It has never defaulted in its payments and to safeguard its own credit it will not allow any municipal authority to take any risk of failure in payments."

BANK BRANCHES OPENED AND CLOSED.

During October 28 branches of Canadian chartered banks were opened and 3 closed. The following gives details of the branches opened and closed this year:—

	Opened.	Closed.
January	34	15
February	29	16

SERIOUS OBSTACLES TO PROPOSED BANK

Saskatchewan's Suggested Institution Would Have to Meet Many Difficult Problems

Editor, The Monetary Times,

Sir,—The Royal Commission appointed by the Saskatchewan Government to investigate the question of agricultural credit have recommended the formation of a co-operative mortgage association. With regard to this, I do not care to express an opinion, but I see that you and also Mr. H. M. P. Eckardt, have pointed out some of the difficulties which will, undoubtedly, arise if such a proposition is carried out along the lines suggested.

The commission has suggested that the Saskatchewan Co-operative Farm Mortgage Association establish, as soon after its foundation as is feasible, a bank with headquarters within the province, to conduct a regular banking business; such assistance to be rendered by the provincial government at the time of establishment of the bank as will enable the Saskatchewan Co-operative Farm Mortgage Association to control it in the interest of the agricultural industry.

Would Come Under Bank Act.

If this bank is to conduct a regular banking business, it must necessarily come under the operation of the Bank Act and conform to all the requirements of that act. One of the requirements is that it must have a capital stock of not less than $500,000, and it must be remembered that there is a double liability attaching to all bank shares.

In their appreciation of the banking situation in the province of Saskatchewan, the commissioners admit that the chartered banks in the province have rendered certain services, one of which is that they have pushed out into the smaller places where the business secured immediately did not yield a profit. This is, undoubtedly, true and it cannot, consequently, be expected that a new bank will be able to make profits at the outset.

On the other hand, the commissioners complain that the banks have frequently sought to dominate the policy of the business to which they have advanced credit. I think this statement is excessive. Undoubtedly, the banks have sought to guide their clients into business-like methods and a y bank which does not do so in a new and rapidly-growing province, is liable to find itself with a very heavy list of bad debts.

Another complaint is that the banks that are not controlled within the province, in a time of stress, withdraw credit facilities from the western provinces. This is only true to the extent that, in times of stress, banks are frequently obliged to limit the credits granted, but this applies not only to the western provinces, but quite as much so to all parts of the country in which they are operating.

In Times of Stress.

It is self-evident that every financial institution must act with caution during times of stress and a confining of credit within conservative lines is absolutely essential at such times.

Another complaint is that the rate of interest on loans is unnecessarily high, and that the rate of interest allowed on deposits is too low, while, in addition, it is stated that the banks seek rather to pay dividends and support expensive edifices than afford customers reasonable rates.

From these remarks one can only gather that the proposed bank is to be financed, at all events in the first instance, largely with moneys provided by the province, that it is to pay higher rates of interest on deposits and charge lower rates of interest on loans.

One of the essential requirements of a successful banking institution is able and conservative management and it will hardly appear that the programme suggested for the new bank is likely to attract management of that class. There will probably be no lack of applicants for such a position, but will the applicants have the necessary qualifications? Is it likely that a well-trained Canadian banker would care to accept the general management of a bank whose operations will necessarily be largely confined to one province; whose capital will largely be provided by provincial moneys and whose management will, consequently, be dominated by the provincial government, a bank whose policy it will be to grant higher rates of interest on deposits than those presently prevailing and charge lower rates of interest on the advances which it makes?

Some of the Difficulties.

Contrary to the prevailing public opinion, banking profits, as a matter of fact, are small and a new banking institution has a great many difficulties to encounter. New branches are likely to be a loss rather than a profit for the first years of their operation and it seems difficult to conceive that a capable banker can be secured to take charge of an institution committed to the policy above outlined.

A bank cannot grant credit facilities of any consequence until it has paid-up capital and deposits amounting to a considerable sum. Saskatchewan at the present time is not a centre for deposits as compared with the credit which is required. The loans of the chartered banks of Canada in Saskatchewan must far exceed the deposits as I think the information in the hands of the commission will, undoubtedly, show.

Double Liability Too.

It would hardly appear advisable for the province of Saskatchewan to guarantee bonds in order to make an investment in banking stock carrying a double liability and one fails to see how the farming community are to be induced to subscribe capital for the proposed bank unless the management of the bank seeks to pay dividends and it will be found impossible to pay dividends unless the new bank should charge borrowing clients a rate of interest equivalent to the rates presently charged by the existing banks. Moreover, a properly-managed bank will find it impossible to pay interest on the capital employed and at the same time raise the rate of interest to be paid on their deposits. In other words the profit made by the existing banks at their branches in the province of Saskatchewan only amounts to a moderate and reasonable return for the money employed.

Yours, etc.,

GOLD RESERVE.

Montreal, November 10th.

◆

CANADA ATLANTIC AND GRAND TRUNK RAILWAYS

The Canada Atlantic line will henceforth lose, to a great extent, the character of a local line and become one of the through links to the Northwest, and Parliament will be asked to allow the company to incorporate it with the Grand Trunk proper, which will enable them, without unduly burdening revenue, to improve the line in readiness for the additional traffic which will be thrown upon it when the Grand Trunk Pacific is opened. The Detroit, Grand Haven and Milwaukee cannot follow this course, as the line is situated wholly in the United States, but as that company has outstanding 6 per cent. bonds which mature in four or five years, the Grand Trunk expect to replace them by bonds bearing a lower rate of interest, and thus be able, without much, if any, increased charge for interest, to provide the necessary capital for improvements.

ARMSTRONG STEEL PLANT

The plant of Armstrong, Whitworth & Company, which is being erected at Longueuil, Que., for the manufacture of high-speed tools, will be roofed soon. The plant will cover an area of 35,000 square feet and contain the following departments: Raw material, crucible department, steel casting department, rolling mill, hammer mill, tempering and hardening department, twists, drills, milling cutters, taps, dies, boiler-house. The building is constructed of steel and concrete, and as soon as it is covered the company will commence to install equipment. The plant should be in operation about May 1st, 1914. The financing of this concern is being done entirely from England. The present company is already selling its products in Canada in order to create a market for the new company.

ALBERTA AND MUNICIPAL LOAN CONTROL

Alberta will probably follow Saskatchewan's lead in appointing a provincial commission to supervise municipal loans. At present the department of municipal affairs lends its approval to municipal loans, which has had the effect of assisting the municipalities to float their bonds. Hon. Charles Stewart thinks that a Federal commission, or even a commission for the whole of the West, would be too cumbersome, and that provincial commissions are what is required, though they might afterwards amalgamate. He thinks that great benefit would be derived from having a competent engineer make full inquiries into the proposed works to be undertaken by a municipality before sanction is given to the loan. The effect of this would be to let the ratepayers of the town know exactly what they are committing themselves to, which in some cases they do not know. The minister feels that the department has to face the fact that there has been a tendency towards too great optimism on the part of municipalities, with a consequent expenditure on improvements which could well have been done without for some time longer, or carried out on a more conservative scale.

◆

SUN LIFE ABSORBING HOME LIFE

As forecasted in *The Monetary Times* several months ago, the Sun Life Assurance Company is taking over the Home Life Association. Mr. J. K. McCutcheon, managing director of the Home Life Association, in an interview stated: —"That the proposition had been passed by the board of the Sun Life, but had not yet been submitted to the board of the Home Life, but would be in a few days, and he had no doubt whatever, but that it would pass and be carried into effect.

"The effect of the agreement is," said he, "that the Sun Life assumes full and direct liability on all the insurance policies and annuity contracts of the Home Life, and will issue to every policyholder and annuitant, a certificate or agreement assuming all such liability, and the policyholders will thereafter become policyholders of the Sun Life. The agreement also makes a reasonable provision for the shareholders of the Home Life.

"In the arrangement with the Sun Life, the Home Life are allowed $150,000 more for their head office building than the valuation placed thereon by the government in its assets. This helped to make good the unfortunate losses that the Home Life suffered through the failure of the National Agency and other associated companies."

Mr. R. J. McLaughlin was recently elected president of the Home Life in place of Mr. H. Pollman Evans. The absorption of the company by the Sun Life will mean, we imagine, the entire elimination of Union Life connections. Mr. McLaughlin and Mr. J. K. McCutcheon, the company's manager, are to be commended for their handling of a very delicate situation. The Home Life will now be amply protected, a collapse similar to that of the Union Life having been prevented chiefly by the efforts of Mr. McCutcheon and Mr. McLaughlin.

◆

Victoria, B.C., fire department attended 16 fires in October, and restricted the loss to less than $600. On contents the loss represented $298.25, and on buildings $275. Thirty-nine hundred feet of hose were laid, 54 gallons of chemicals used and 75 feet of ladders raised. The loss was small for the season of the year.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. SOURIS SCHOOL DISTRICT DEBENTURES.

Tenders will be received up to 6 p.m., November 25, by the undersigned for $5,000 Souris School District Debentures, dated November 31, 1912, bearing interest at 5 per cent., interest and principal payable in 20 annual instalments.

R. M. STEVENSON,
Secretary-Treasurer of Souris
School Board,
Souris, Man.

Mr. John Coles, presiding at an insurance company's meeting in London, England, said that the money lent by Great Britain to Canadian municipalities was quite safe, but that the rapid growth of the borrowing of these cities called for the creation of some central controlling body, and stated that leading Canadians concurred in this view.

ONE HUNDRED NEW COMPANIES

Armstrong-Whitworth Incorporates Canadian Company —Many Oil Concerns

This week's record of Canada's new companies is an imposing one. The new incorporations numbering no less than 109, the head offices of these companies are located in eight provinces. The total capitalization amounts to $23,520,200, the largest companies being as follows:—

Canadian Specialties Manufacturing Company, Limited, Toronto	$1,000,000
Pacific and Hudson Bay Development Company, Vancouver	1,000,000
The Mountain Spring Brewing Company, Limited, Calgary	1,000,000
Winnipeg River Power Company, Limited, Winnipeg, Man.	1,000,000
The Lake Superior Dry-Dock and Construction Company, Limited, Sault Ste. Marie	1,500,000
Vancouver Island Oil Company, Limited, Victoria, B.C.	2,000,000
British Columbia Gypsum Company, Limited, Victoria, B.C.	2,000,000
Armstrong, Whitworth, of Canada, Limited, Montreal	2,000,000

And these eight companies cover a large field, but the entire list includes everything from athletic associations to a Russian publishing company

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Prince Edward Island	2	$ 540,000
Quebec	18	4,125,000
British Columbia	22	6,610,000
Alberta	35	4,914,200
Manitoba	1	1,000,000
Ontario	19	4,720,000
Saskatchewan	9	1,360,000
New Brunswick	3	251,000
	109	$23,520,200

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Jasper, Alta.—Chateau Jasper, Limited, $100,000.

◆

CAPITAL STOCK INCREASED

The Pioneer Fox Farming Company, Prince Edward Island, has increased its capital stock from $100,000 to $190,000.

The Canadian Asbestos Company of Quebec has increased its capital stock from $60,000 to $120,000.

The Boake Manufacturing Company, Limited, of Ontario has increased its capital stock from $60,000 to $300,000.

◆

COST OF THE WORLD'S NAVIES

A return of the total naval expenditure of the United Kingdom and the other principal powers in each of the last ten years, has been issued in England as a white paper. The totals of the various countries in the first and last years of the return compare as follows, all the totals being gross, except Russia and Italy:—

	1904-5.	1913-14.
Great Britain	£41,062,075	£47,021,636
United States	20,180,310	29,498,867
Russia	11,949,906	24,249,454
Germany	10,105,000	23,039,184
France	12,382,433	20,847,763
Italy	5,000,000	10,157,846
Japan	2,102,548	9,860,812
Austria-Hungary	2,615,460	6,006,551

In the cases of Great Britain, the United States, Russia, Germany, France and Japan, the totals this year are the highest recorded. while the figures for personnel are also the highest in the list, with the exception of those of Russia, which, after being about 70,000 in 1904-5, dropped below 45,000 in 1908, and are now 52,463. The British navy numbers 146,000, the German 73,176, the United States 67,907, and the French 63,596 men.

In regard to new construction there is in the cases of Great Britain, Germany and Austria-Hungary a decrease. Great Britain leads the way with a vote of £16,101,884 (representing 236,408 tons), Russia being second with £11,844,586, nearly double the 1912 figure. Germany has voted £11,010,883, and France £8,893,064, while the United States has made a big advance with £7,258,953, against £4,226,728 in 1912-13.

NEW CAPITAL NEEDED

If Mexico Were Like Canada, Creation of New Wealth Would Be Rapid

Premier Borden in a New York speech, alluded to the fact that Canada buys from the United States 35 times as much as the United States buys from Canada, and he might have added, says a writer in the Wall Street Journal, that "our largest international trade relations are with the great Dominion to the north of us, if we except our trade relations with Great Britain the exportation of cotton. But if Canada buys 35 times as much from the United States as we buy from Canada, an almost exact reversal of trade relations is the story told of our commerce with Mexico.

United States Purchases from Mexico.

"We buy from Mexico about 75 per cent. of all the commodities exported from that country, whereas Mexico buys from us only 35 per cent., round numbers, of the commodities she imports. Yet the trade relations with Mexico were, until recent complications arose, very satisfactory.

"All of those who have given heed and study to the opportunities for international trade which the United States may have are inclined to the opinion that the time is not far distant when our greatest international commerce will be with our neighbor on the north and the republic on the south.

"For it is the firm conviction that sooner or later the semi-anarchy that pervails in Mexico will be ended, so that there may be no more interruptions of our trade relations with that republic there is in our trade relations with Canada.

New York on the Outlook.

"It is the opinion in financial circles in this city that, even though there is readjustment of business to the new tariff within a year, and though an adequate banking and currency law be placed upon the statute books, nevertheless, in view of world conditions, several years will have passed before normal and healthful financial conditions can be established.

"There must be large increases of new wealth and of fresh capital. Our trade relations with Canada will serve this end to some extent and will also be of avail to Canada.

"If Mexico were only as peaceful and prosperous as is Canada the creation of new wealth and of fresh capital would more speedily be accomplished."

◆

STRAIN ON CREDIT REACTS ON INDUSTRY

Mr. Asquith, in his Guildhall speech this week, admitted that there were signs on the horizon portending an inevitable slackening in the volume and velocity of the tide of trade. There had been initiation almost everywhere of costly schemes, of social reform, and in addition to the waste of wealth and human material in actual warfare, there had been an unprecedented addition both on land and sea of apparatus of organized destruction. All that imposed a dangerous strain on the taxable capacity and credit of the nation, which must react on the springs of industry and on general progress and material well-being. Was it not time for statesmen and every man of business to take counsel together to secure a more sane and more fruitful appropriation of the common resources of mankind?

◆

BORROWING ON LIFE POLICIES

At a recent meeting of the Pittsburg Life Underwriters' Association, the subject of loans on policies by life insurance companies were ably presented with a view of urging upon the underwriters' association the necessity of checking the practice. It was pointed out that the borrowing habit from protective funds of dependents of the insured were rarely ever paid back. An investigation was made by the Fidelity Mutual Life in its various offices and these findings are the result:—

1. That a great many borrowing policyholders would not borrow if the thought were not suggested to them.

2. That the full value often is borrowed when a less amount would suffice.

3. That inability to meet a current premium is often the primary reason for seeking a loan—a course altogether unnecessary.

4. That agents, cashiers and head office attaches have it within their power materially to reduce the number and amount of new loans by the intelligent application of tact and good salesmanship.

◆

The Woodstock, Ont., ratepayers have passed a by-law to loan $12,000 to the Fort Wayne Oil Tank and Pump Company.

October 29th, 1913.

NORTHERN CROWN BANK

Head Office, Winnipeg

DIVIDEND No. 14

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid-up capital stock of this bank has been declared for the six months ending November 29th, 1913, and that same will be payable at its banking house in this city and at all its branches on or after the **second day of December** to shareholders of record of the fifteenth day of November, 1913.

By order of the Board.

ROBERT CAMPBELL,
General Manager.
Winnipeg, October 21st, 1913.

UNION BANK OF CANADA

DIVIDEND NO. 107.

Notice is hereby given that a dividend at the rate of eight per cent. per annum upon the Paid-up Capital Stock of this institution has been declared for the current quarter, and that the same will be payable at its Banking House in this city, and also at its branches, on and after Monday, the first day of December next.

The transfer books will be closed from the 17th to the 30th of November, 1913, both days inclusive.

The Annual General Meeting for the election of Directors and other general business, will be held at the Banking House in the city of Winnipeg on Wednesday, the 17th of December, 1913. The chair will be taken at 12 o'clock noon.

By order of the Board,
G. H. BALFOUR,
General Manager.
Winnipeg, October 21st, 1913.

NEW WESTMINSTER AFTER INDUSTRIES

(Staff Correspondence).

New Westminster, B.C., November 10th.

A proposal is being put before the public bodies of New Westminster that the city purchase a tract of land available to water and rail transportation, and lease it for industrial purposes for a term of years at a rental per annum which would provide sinking fund, interest on bonds, interest on improvements necessary to supply water or other public utilities and to recoup the city for loss of taxes if the property is removed from the assessment roll. The industrial commissioner, who makes the suggestion, points out that it would be better than bonusing, and would have a tendency to increase the value of property in the immediate neighborhood. The cost of the sites to bona fide manufacturers would not be great, and would obviate the heavy initial drain on the resources of young companies trying to make a beginning.

New Westminster's figures for October show gratifying increases, as compared with the same month last year. Advances are shown in postoffice receipts, building permits, and timber office receipts.

◆

The Dominion government have under contemplation a bill providing for a co-operative credit banking law applicable to all the provinces, providing simple machinery for the incorporation of co-operative banks in each and every province of Canada.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

PROVINCIAL SECURITIES AND BRITISH TRUSTEE LIST.

(Continued from page 767.)

not as high as that of states whose stocks are available for trustees.

"For instance, while Ontario four per cents. stand at 93, the similar security of Tasmania commands its par value. It would not necessarily follow, however, that if the former were made a trustee stock its market value would be seven points higher than it now is. The extension of the list would only tend to bring about depreciation in all varieties of trustee stocks, and, while the Canadian provincial securities would probably appreciate to some extent, a shrinkage in the value of existing trustee stocks would be unavoidable. Then there is the question: Would an improvement in their credit cause the Canadian provinces to borrow more freely? If that was its result, it would not be an unmixed blessing. At present they can satisfy all their reasonable requirements on terms which cannot be described as onerous. As long as they can do that, while resenting an apparent slight, they cannot very bitterly complain."

◆

TWENTY-PAYMENT LIFE INSURANCE PLAN

(Continued from page 775.)

required, no matter how long this time may be, and the making of some provision for the old age of the assured should he survive.

It must not be overlooked, however, that none but healthy lives with a good family history can readily obtain a policy on this plan extending as it does throughout the whole of life, and for this reason it is wise to enter when young and in good health. In life insurance it is indeed true that what is worth doing it worth doing now, and in no personal undertaking are delays likely to prove more costly. Life, at best, is uncertain, and time and tide wait for no man. There is many a widow down on her knees with the scrubbing brush, and many an one trying to make ends meet in divers other ways, simply because the husband allowed procrastination to do its work.

MORE GOLD FROM ONTARIO

Up to the end of September Ontario's production of silver for the year was $12,967,138, an increase of $259,312. In the same period the value of Ontario's gold output jumped by $2,163,692, reaching a total of $3,281,027. Of this amount all but $174,777 came from the mines in the Porcupine area. Cobalt is still pre-eminent as a silver producer, 21,956,561 ounces of a total of 23,171,536 ounces coming from that camp.

The production of all other metals and minerals with the exception of pig iron and cobalt ore showed an increase. The totals are given by the bureau of mines as follows:—

Product.	Value.		Increase or decrease.
Gold, ounces	$3,281,027	Inc.	$2,163,692
Silver, ounces	12,967,138	Inc.	259,312
Copper, tons	1,311,681	Inc.	169,605
Nickel, tons	3,825,633	Inc.	457,196
Iron ore, tons	314,590	Inc.	213,306
Pig iron, tons	5,792,022	Dec.	259,956
Cobalt ore, tons	12,917	Dec.	44,697
Cobalt and nickel oxides, lbs.	290,597	Inc.	113,811
Lead ore, tons	3,000	Inc.	3,000

At the annual meeting of the Royal Trust Company the members of the old board were re-elected. The vacancy on the board caused by the death of Mr. James Ross remained unfilled, and, it was stated, may remain unfilled for some time. No financial statement was issued, as the company is a closed concern. The board consists of the Rt. Hon. Lord Strathcona and Mount Royal, G.C.M.G. (president), H. V. Meredith (vice-president), Sir H. Montague Allan, R. B. Angus, A. Baumgarten, A. D. Braithwaite, C. B. Gordon, Hon. Sir Lomer Gouin, E. B. Greenshields, C. R. Hosmer, Sir W. C. MacDonald, Hon. R. MacKay, A. MacNider, David Morrice, Sir T. G. Shaughnessy, K.C., V.O., and Sir William C. Van Horne, K.C.M.G.

BRITAIN WATCHES BRITISH COLUMBIA

Premier Says Credit Is On Solid Foundation—Developments Proposed

The credit of British Columbia stands to-day on a more solid foundation than it has ever rested on before. This was Sir Richard McBride's assertion on his return from London and eastern Canada.

"We have the natural resources and our plans for developing our latent wealth by building railroads and turning our potential forests and fisheries into tangible assets are meeting with the approval of those who are vitally interested in our future, the investors who have subscribed for the loans which have built the foundations.

"British Columbia to-day suffers from growing pains, a necessary corollary to her natural development. What the province needs to-day is less spineless pessimism and more faith in ourselves. We must gird our loins for the struggle and believe in our future greatness.

Problem of Municipal Loans.

"The question of municipal loans, which was rapidly assuming an intricate problem, was fully traversed with Mr. John Burns," said Sir Richard, "which led to a discussion of the possibilities of discussing a modified form of the Local Government Act in British Columbia, or at least some of its more prominent provisions."

The story recently printed that negotiations were proceeding with the officials of the Chicago, Milwaukee and St. Paul Railroad and of the Standard Oil Company for a railroad from their present terminus through Vancouver to Alaska was denied by the premier.

Britain is Watching.

With regard to the disturbances at Nanaimo and the coal mining districts, Sir Richard said that the outbreak was watched with peculiar interest in Great Britain.

Sir John Wolfe Barry, engineer for the proposed Second Narrows bridge, was seen by Sir Richard McBride in London and discussed the question of bridge construction with him. The provincial cabinet will discuss the proposal that the province take over the proposition of the building of the Second Narrows bridge from the inter-municipal company of Vancouver within a short time, added Sir Richard.

The following companies in Canada have changed their names:—

The Lyon Gas Saving, Limited, to the Solex Company, Limited. The Real Estate Corporation of Canada, Limited, to Reliance Securities Corporation, Limited.

The following companies in Ontario have changed their corporate names:—

Weber's, Limited, to B. W. Moore Company, Limited. The Methodist Union to the Methodist Union of Toronto. Miller, Limited, to the Dominion Brass Corporation, Limited

◆

LAND COMPANY'S DIVIDEND DEFERRED

The directors of the North Saskatchewan Land Company, Limited, have announced to the holders of the 6 per cent. 30-year sterling bonds the deferring of the interest payment due on the 1st prox. They state as follows: The financial depression which has obtained in Western Canada during the past year has greatly restricted the sale of farm lands, and has also seriously interfered with the collection of payments for lands previously sold. The credit usually extended to settlers by banks and loan companies has this year been much curtailed, and in consequence the company, like all companies dealing in Western farm lands, has found it necessary in many cases to assist the settlers by granting delays for the payment of instalments on land purchases. As the result of reduced sales and interference with collections, the company is obliged to take advantage of the provisions of the trust deeds, whereby the payment of interest due on November 1st, 1913, was made conditional upon the company realizing from the sale of its lands sufficient money for that purpose. Notwithstanding the temporary reduction in sales, prices of farm lands have been well maintained. The harvest in Western Canada this year has been uniformly good, and this should assist materially in relieving the present situation and in attracting settlers. With the resumption of normal conditions the directors anticipate that the company will be in a position to pay the interest in question at an early date.

BOND PROPOSALS IN SASKATCHEWAN

Burnaby Meets Financial Obstacles—School Commissioners and Bond Interest

The following are some of the private bills of which notice has been given to the Saskatchewan legislature:—

Prince Albert—An act to empower the municipality to increase the amount of debentures to provide for the construction of certain hydro-electric works to $2,000,000; to increase the rate of interest to 6 per cent., and to extend the time necessary for the completion of the undertaking.

Saskatoon—An act to validate by-law No. 573, raising the rate of interest on an issue of registered stock from 4½ to 5 per cent., and an act to invalidate by-law No 675, creating a debt of £161,098-3-3 by the issue of registered stock.

Estevan—An act to validate a by-law to provide $25,000 by debentures for the building of manufacturing establishments, and for the purchase of sites.

Duck Lake—Act to authorize a bonus of $3,000 and grant of five acres of land and exemption from taxation to the Duck Lake Milling Company.

Burnaby's Debentures.

Reeve McGregor reported to the Burnaby municipal finance committee that the Royal Bank of Canada had declined to make any further advance on the $600,000 already loaned to Burnaby on the hypothecated debentures, amounting to $1,716,000; but as the municipality had still bonds to the amount of $325,000 under the council's control and about $175,000 unpaid taxes, the reeve suggested that a delegation wait upon the bank officials in Vancouver with a view ot securing a further advance on the additional security.

A communication had been received from the Royal Bank of London to the effect that the London financial market was not now favorable for the sale of bonds. There had been an offer of 85 for Burnaby 6 per cent. treasury certificates, which was not accepted.

The Roman Catholic school commissioners of Ville Emard, a municipality which has been taken into Montreal city, is reported to have defaulted on its school bond interest for the second time within twelve months.

On the occasion of the first default the bondholders entered suit against the commissioners, obtained judgment and in due time collected. From all indications that method of procedure will be followed again.

When the municipality was taken into the city the Roman Catholic school commission of Ville Emard did not amalgamate with the Montreal Roman Catholic school commissioners.

About the intrinsic value of the bonds there appears to be no doubt in the minds of the bondholders. That the interest has been passed is due, it is claimed, is entirely to mismanagement. It is urged by holders of such securities that legislation should be obtained compelling school commissions of annexed municipalities to come under the direct influence of the Montreal school commission.

Hamilton's Financial Statement.

A financial statement issued by Hamilton's city treasurer's department shows that over three-quarters of a million dollars has been spent in local improvement work so far this year, and the prospect is that that amount will be brought to $800,000 before the end of December. The exact amount spent is divided as follows:—

Sidewalks and curbs	$130,316.66
Sewers	157,004.11
Roadways	486,481.38
Advertisements	362.50
Street openings	1,211.00

Messrs. A. E. Ames & Company, of Toronto, have prepared a diagram showing fluctuations in the average market price of fifty listed bonds over a period of years. From it is seen that present prices are nearly as low as they were in the panic time of 1907. An up turn has commenced.

Edmonton Gets Money.

Edmonton has received the final instalment on its debentures from Messrs. Kleinworth, London. The payment amounted to $2,000,000, and completed a total payment of $9,135,000. The city's financial worries for the present year are ended.

◆

PARRY SOUND MAY GIVE OPTION

No satisfactory bids were received for Parry Sound, Ont., issue of $50,000 6 per cent. debentures. Though the options given, or to be given, are at 98⅜.

◆

The latest revised list of industries located in Medicine Hat shows employment of about 3,500 hands, with an annual payroll of nearly $4,000,000.

MANITOBA BONDS FOR GOOD ROADS

Expenditures in Ontario—Bond Sales Over Counter—United States Capitalists Will Purchase Bonds

"There is no province in Canada that enjoys a more creditable financial position than does Manitoba," said Sir Rodmond Roblin at Minnedosa, Man. He also remarked:—"That it is the settled policy of the government to inaugurate a good roads policy that will make for the betterment of the highways of this country, that will be of advantage to the people, and that will be a further evidence of the progressiveness of the province of Manitoba. We will introduce at the next session an act of parliament authorizing an expenditure on capital account of $2,500,000 for the purposes of the improvement of rural highways."

Ontario and Good Roads.

The special committee of the county of Wentworth, Ont., appointed to draft a report to the Ontario highway commission, suggest in part as follows:—

"We find the following conditions existing; the amount of money expended for construction and maintenance of the council highway system, including the cost of machinery necessary to maintain the system in the present unsatisfactory condition to be $92,360 and $120,072 respectively, or a total of $212,432, during the years 1908 to 1913, inclusive.

"We therefore recommend the council to strongly urge upon the Ontario highway commission the absolute necessity of providing some financial assistance to be expended toward the maintenance of highway construction under the government regulations."

Suggests Board of Five Members.

Discussing the control of municipal finance at the Regina board of trade, Mr. F. J. James favored a board of five members, one an expert in municipal law and finance, one an experienced municipal engineer, another an expert in accounting, combined if possible with a knowledge of urban real estate values. These three would be on salary while the other two members who would act in an advisory capacity would be paid fees for their attendance. The municipalities should be willing to bear the cost of supporting such a commission.

Sold Bonds Over Counter.

Vancouver, B.C., has just completed the sale of the issue of $100,000 over the counter to local investors. Chatham, Ont., sold $33,000 out of $48,000. St. Thomas, Ont., sold $114,161 also to local investors.

Mr. F. Dean, of the firm of Messrs. Terry, Briggs and Slayton, Toledo, who has visited western Canada, suggests that United States capital will buy more bond issues than hitherto.

◆

DEBENTURES AWARDED.

Assiniboia, Man.—$272,000 5 per cent. 20-years, to Messrs. Stewart and Walker.

Neepawa, Man.—$7,028 5 per cent. 20-years, to Messrs. A. E. Ames and Company, Toronto.

Simcoe, Ont.—$25,000 5 per cent. 30-years, to Messrs. A. E. Ames and Company, Toronto.

Medicine Hat Schools, Alta.—$150,000, to Messrs. Murray, Mather and Company, Toronto.

Manitou Man.—$30,000 6 per cent. 20-years, to Messrs. W. L. McKinnon and Company, Regina.

St. Vital, Man.—$32,256 5 per cent. 20-year, to Messrs. Murray, Mather and Company, Toronto.

Essex County, Ont.—$16,000 5 per cent. 20-years, to Messrs. Wood, Gundy and Company, Toronto.

St. Boniface S.D., Man.—$103,000 5 per cent. 20-year, to Messrs. Murray, Mather and Company, Toronto.

◆

Cable advices received in Toronto state that the Privy Council has reversed the judgment of the Supreme Court of Canada and decided that succession duty may not be levied on personal property situated outside the Province. This decision will have a serious effect on Ontario revenues.

"Canada's duty is to develop her natural resources, so as to cement east to west, making a united Dominion, pulsating with commercial and intellectual life from Atlantic to Pacific, making her not only a source of strength to, but the dominating influence in that Empire whose flag encircles the globe."—Hon. W. H. Hearst, Ontario's minister of lands, forests and mines, in an address at Ottawa.

HOW NATIONS FINANCE

These are days for observing closely the signs of the times. Of the important ones, are Canada's loan and trade figures. How significant are exchange operations was indicated by Sir Edward Holden in a recent speech. His illustrations were Canada and other leading countries. Explaining how exports pay for imports and taking as an example wheat shipped from Canada to England, Sir Edward pointed out how the firm in Canada who purchases and ships the wheat on account of the buyer in England, having received the bill of lading for the wheat, draws a bill of exchange on the buyer, which he sells. In technical terms, this is selling exchange, and the shipper of the wheat in Canada is the seller of exchange. Thus, when a bill is drawn against an export and sold to a banker, he uses the proceeds by drawing bills on London, which he sells to the importers. In this way, the bills drawn against exports provide the means through the banker for paying for imports.

The total imports of merchandise into Canada last year amounted in round figures to $650,000,000, and the total exports to $350,000,000. To the extent, therefore, of $350,000,000 her imports were paid for by her exports, leaving a balance of $300,000,000 to be paid in some other way. In addition to this import balance, Canada has to pay a large sum every year amounting at the present time to about $75,000,000 in respect to interest on money borrowed. The total amount, therefore, to be paid otherwise than by means of exports was $375,000,000. How is this done? By borrowing in London through the issue of stock, Canada creates credit balances there against which she sells exchange to importers, thus settling the before-mentioned balance of $375,000,000.

The imports and exports of the United Kingdom ten years ago amounted to about $4,400,000,000. Its imports and exports last year amounted to about $6,725,000,000, being an increase of about $2,325,000,000. As these imports and exports are financed by means of bills of exchange, an enormous increase has taken place in these bills in the last ten years. Sir Edward explained how a foreign bill of exchange does its work. Take as an example jute shipped from India. The jute is carried from India to London on the money which the merchant in India has obtained on a bill of exchange from the banker in India. In other words, the jute is carried on borrowed money. When the jute arrives in London it is sold and the proceeds of the sale are used to pay the holder of the bill. This explains how the bill is used in respect to the export of jute from India. On the other hand, cloth, say, is shipped from Manchester to India, for which the Indian importer pays in rupees.

How does the Manchester merchant receive the proceeds of this cloth? He receives back in sterling the amount of the bill which he drew on India, less commissions, postages and stamps. The first of these two bills brings the jute from India to Manchester and the second carries the cloth from Manchester to India.

When Sir Edward Holden gave a lecture to Liverpool bankers some years ago, he showed in the simplest way what a bank really is, making use of the illustration of an isosceles triangle. Consider for a moment that the right side of this triangle represents debit balances; then consider that the left side of the triangle represents credit balances. So long as confidence exists a banker might increase his loans ad libitum, which means that the right side of the triangle might be elongated indefinitely. If, therefore, trade became brisk, loans would be increased and credit balances would be increased. If, on the other hand, trade contracted we should expect loans to be contracted, and, consequently, credit balances would be contracted. If, therefore, the loan or right side of the triangle is elongated, the credit or left side of the triangle must also be elongated, and vice versa. Liquid resources are represented by the base of the triangle, which must increase in a certain ratio to the increase of the two sides. Should a crisis come, in all probability customers might as a last resource want to draw out gold. Therefore it is of the greatest importance that every banker should hold a certain proportion of gold.

CANADA'S EXCELLENT CREDIT

A writer in the London Financial Times draws attention to States of the neighboring Republic which have repudiated debts. The article is in the form of an open letter to President Wilson, and was suggested apparently by a Washington criticism of Mexico and its finances. The writer points out the fact that while the United States Government insists that Central and South American republics must not shelter themselves behind the Monroe Doctrine in order to evade their obligations to bondholders, there are no less than nine of the United States which have repudiated their debts and refused to make any settlement whatever; namely, Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and West Virginia, whose defaulted debts are estimated to amount to upward of $250,000,000. On the other hand, the sole defaulter in Spanish America is the financially embarrassed Republic of Honduras. The excuses put forward by the defaulting States for their conduct, the Financial Times says, may be dismissed as being of the usual type offered by dishonest debtors.

The letter proceeds: "You may, sir, with truth, argue that these defaulting States of the Union over which you preside, are so far as concerns their own internal affairs, independent bodies; but the argument applies with a good deal more force to the republics of South and Central America. If, then, the United States Government is resolved, in the words of ex-President Roosevelt, to see that the Spanish-American republics 'act with decency and pay their debts,' it appears to us that on the principle of the text 'Why beholdest thou the mote that is in thy brother's eye, but considerest not the beam that is in thine own eye?' The authorities in Washington should see to it that the same rule be first observed in the United States.

"The eleventh amendment to the constitution of the United States precludes private citizens of America or any other country who are creditors from bringing the defaulting States into court. If the United States government will not permit the Spanish-American republics to shelter themselves behind the Monroe Doctrine in order to evade payment of their debts, it is still more incumbent on it to see that its own States should not be allowed to misuse the eleventh amendment of the constitution in order to do precisely the same thing."

Canada's nine provinces, which can be compared roughly with the States to the south, have never repudiated their debts. To date, each provincial government enjoys remarkably high credit in the world's money markets. The Dominion government's credit, too, is excellent. Sir Frederick Taylor, in a recent interview, stated that the securities of our federal government are in a class by themselves, and an enviable one, too. Examining the records of Canadian municipalities they too give a better account of themselves than the nine States mentioned. Only on rare occasions have Canadian municipalities encountered difficulty in the matter of bond interest and in all cases, the trouble was adjusted almost immediately. These are pleasing facts for these days when, on account of the shortage of capital, credit is subjected to microscopic examinations. There is no desire to emphasize the financial lapses of the States, but it is good to know the manner in which Canadian governments, Dominion, provincial and civic, have placed their credit on a sound foundation and have kept it there for nearly half a century.

THE TRUTH IS GOOD.

The organized campaign in Germany and Austria against Canada is not likely to work any great harm to the Dominion. The day has passed when thinking people take any stock of idle stories, such as those being printed by Dr. Heindl in German papers. The Doctor, apparently, does not understand the rapidity of growth, largely through the medium of immigration, in this new country. For instance, he says that railways have made the building of townships a fine art, their managers taking a pencil in hand making a few dots on the map and, high presto, new towns! He continues: "The railway is built into a middle wilderness in a single night. Construction gangs disappear and the line lies lonely and forsaken on an endless prairie. Next morning's train brings speculators and a land auction begins for the surface where nothing but here and there is a wooden post. Purchasers, however, see visions of skyscrapers and underground traction systems, some streets marked down for a retail district, and immediately prices asked are fifty to seventy, and even one hundred dollars a foot. The speculation fever rises to madness.

"Next day the speculator sits in his office tent writing an advertisement that 'the town is the backbone of Canada.'

"If there are trees the advertisement reads, 'Come to the centre of the lumber industry of Canada.' If treeless, it is called 'wheat lands.' If it could not grow potatoes the land agent says 'it is famous for its parsley.'"

This all makes amusing reading to the untravelled of old countries who point with pride to a few rows of new houses built in their town "during the past few years" In Canada, existing cities and towns must grow fast and new towns must be built in a twinkling to accommodate new citizens. Toronto, for instance, is adding to its population at the rate of 30,000 a year. Places on the prairies which were unknown a few years ago, are thriving towns to-day, the centre of wheat growing and mixed farming. As for speculation, that will occur always and in all lands where barter is known. If it is not in land, it is in stocks, or oil, or wheat, and so on. Even Germany has not been free from speculative gambols.

Dr. Heindl probably never will understand that the man who writes the advertisement that his town is "the backbone of Canada," really believes what he writes. The faith of the Canadian in his own community is one of Canada's greatest national assets. All those little backbones make a big one. The town in which the Canadian lives, the town where his bread is buttered, is the centre of the universe, as far as he is concerned. That may be exaggerated faith, but it takes men with a measure of exaggerated optimism to break the channel for the constantly increasing tide of immigration from all other countries. If Dr. Heindl were to spend a few years in western Canada, and cease to grind axes, he would probably have a much higher opinion of our country, its work and its future. Germans living in Canada have, and we call them Canadians.

HOW CAN EGGS BE MAILED?

Inventors and other experts are continually springing their ideas upon *The Monetary Times*. Here is a real chance for their constructive ability. It would make glad the heart of Dr. A. D. Melvin, chief of the Bureau of Animal Industry, at Washington, if he is sent an egg container that will make possible the shipment of eggs by mail. Dr. Melvin is in search of such a container as will permit the shipment of eggs direct from the farm to the consumer through the parcel post. He is said to be anxious as any householder to break down the rising cost of the breakfast table.

THEY SAY

If we write of quiet times, they say we are pessimistic, and if a bright picture is painted, we "do not see the dark spots." If we criticize a Tory government, we are hopeless Grits, and if a Grit government gets a critical word, they say we are dyed-in-the-wool Tories. When we support the banks, they say we are "an organ," but when the banks are asked to effect a reform, they say we are the "friend of the people." If we print "Small Change," they say it is undignified for a great financial paper, and when we omit it, they say our pages are dry as dust. When we have a good word for western Canada—which is often—the west purrs approval and the east says we are getting a trifle radical. When we reprove the west—which is seldom—the west sniffs contempt and the east "notes a change of attitude." Because we eschew politics, they say we "have no backbone," and when we analyze high finance, we have too much backbone, to say nothing of nerve. If we pay a compliment to Regina, some one cries "What's the matter with Moose Jaw?" and if Moose Jaw is mentioned kindly, the call comes "Did you never hear of Edmonton?" If we write a life insurance article, they say we "have no technical knowledge," and when we ask a life insurance man to write it, he says "Do it yourself." If we publish an unpleasant truth, they say "there was no necessity to do it—and, even if it were correct," we should not have printed it. When we give statistics, they say there is no need for so many figures, and why don't we publish illuminative articles, and when we do, they say there are "not enough statistics." The stock broker says there is insufficient market news and the fire insurance man wants to know if underwriting is not the greatest business in the world and what is a stockbroker anyhow? If the paper is a few hours late, they say they can teach us how to run a paper and they say, yes, that's it, they say.

SMALL CHANGE

Anyhow the Privy Council will tell us what the companies' case decision really means.

CANADA TAKES GOLD FROM BANK OF ENGLAND

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

SPANISH RIVER ISSUE.

*London, November 14.—£300,000 6 per cent. two and three-year sterling notes of the Spanish River Pulp Paper Mills are being underwritten for immediate issue at 96.

CANADA TAKES LONDON GOLD.

*London, November 14.—Yesterday's withdrawal of £200,000 in gold from the Bank of England for shipment to Canada was unexpected in the market here. Some financial editors call it quite a new feature in international movements, which is possibly due to the operation of the new Canadian Bank Act. It is understood the shipment was made by the Royal Bank.

General banking circles do not, however, regard it as important. They say that Canada at this time frequently draws gold from New York, but the New York exchange on London being just now rather below gold par, the usual New York operation has been transferred to London.

Shipment was made direct from London to Canada.

It is quite possible that the operations will be repeated though it is impossible to say whether for large or small amounts.

CANADIAN REAL ESTATE IN ENGLAND.

*London, November 14.—Commissioner Roland, of Winnipeg, is assuring the British journals that the Winnipeg and western real estate situation is generally quite sound and that he expects the best results here from the developments of the home reunion movement.

Mr. T. H. Ingram, vice-president of the Canadian National Investors, Limited, Vancouver, says that he finds, despite the warnings and the collapse of the boom in near suburban lots, that much Canadian property is being offered in London for which there is no justification whatever, and he urges that no suburban lots should be offered here. Only inside properties with permanent improvements all round should be offered.

Answering recent aspersions upon Vancouver's activity, Mr. Ingram quotes a Vancouver authority for the admission that many people left Vancouver during the past six months, but that they had been mostly people that Vancouver was well rid of, and were made up of kerbstone brokers, real estate speculators and people of that sort, who brought nothing into the place and took out more than they should.

SITUATION IN LONDON.

*London, November 14.—The financial situation here and its effect on Canada is explained as follows in the Canadian Gazette:—

"A little further improvement has taken place in the money market as regards the rate for loans, for discount of bills and in the matter of gold imports and exports, but no substantial change for the better is in prospect.

"At the present time the Mexican complication is the principal cause of anxiety, since the acting president of Mexico remains unyielding and it is difficult to see how the Washington policy can now be diminished, while if it is persisted in armed interference must apparently be the consequence, which may be the most serious.

"In the meantime the financial necessities of great would-be borrowers is increasing. This week we have had Western Australia offering £1,000,000 4 per cents. at 97, and on behalf of Roumania, Messrs. Schroeder offered £1,980,000 4½ per cent. bonds at £90 1s. 10d. per bond of £99. For China, La Banque Industrielle de China contracted for a loan of £6,000,000, which will be offered in Paris."

CANADIAN ISSUES LISTED

*London, November 20.—Application has been made to list Vancouver city £401,200 4½ per cents. and Edmonton city £1,068,000 5 per cents.

SOME NEEDFUL CRITICISM.

*London, November 15.—The Financial Times publishes an article forecasting further heavy Canadian loans in London by the provinces, municipalities and industrial concerns.

Regarding the latter the Financial Times says:—"Unfortunately half a dozen or more of Canada's industrial flotations in London have given bitterness to the English investor. These flotations were made during optimistic youth and the new financial generation in the Dominion of smart young men, who saw the apparent industrial salvation in amalgamations and incidentally fat promotion profits for themselves.

"These incidents proved hurtful to Canadian industrial credit, but there are now many watch dogs in Canada keeping an eye on these same young men and any of their kind who may also develop financial swelled heads and ideas as to bulky pockets."

CANADA'S MORTGAGES IN DEMAND.

*London, November 15.—Canadian corporation companies generally report improvement this week and a good demand for 8 per cent. first mortgages of Winnipeg, Calgary and Vancouver. One firm reports placing $80,000 this week. The mortgages are mainly from $2,000 to $10,000.

Realty branches report increased enquiries, but all concerning city property; also fair sales of fruit farms in British Columbia are reported.

An advertisement is appearing in the Financial News, which is regarded as strange. It reads:—"Canadian settling in London, having realized on properties in Vancouver, intends investing $600,000 in London freehold. Realty agents ignored."

Attempts to discover the identity of the advertiser by mail remain unanswered.

MORE ABOUT MONTREAL LOAN.

*London, November 18.—Montreal's new loan, underwritten yesterday, for £1,500,000 in four and a halves at 98⅜, redeemable in 1953, is accepted here as more of a consolidation of the existing debt than the contraction of fresh obligations.

The great English banker, Sir Edward Holden, says that the very extent to which Canadian imports exceeds her exports must necessitate further borrowing for some time to come. This being so, the market sees the wisdom of the new issues to keep the city's floating indebtedness within moderate dimensions.

This makes the third Montreal loan presented this year, the total of the three being $21,800,000. The two preceding loans were issued at 100, and were quoted immediately before the present issue at 3¼ above the price of the new loan.

CANADIAN NORTHERN REPORT.

†London, November 19.—The Financial Times, in discussing Canadian Northern Railway finances, in its main editorial to-day remarks that it is a little difficult to say whether its recent huge sums have been wisely expended, as the accounts, in addition to being none too detailed, lack certificate by an independent firm of accountants. "The support which the company has been able to obtain both from provincial and Dominion governments," says the Times in conclusion, "is illustrated especially by the big cash subsidy voted last year, is the strongest point in its favor, since it must otherwise be admitted that the system has hitherto been worked on rather a slender margin of profit beyond fixed interest charges."

**Montreal Star* cable.

†Canadian Associated Press cable.

ALBERTA AND MONTREAL ISSUES—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

TROUBLES OF FISHERIES COMPANY

Stormy Meeting of Canadian Company Organized and Run By English Capital

*London, November 7.—At an extraordinary general meeting of the British Columbia Fisheries, Limited, yesterday a committee of shareholders was appointed at the suggestion of the board to confer with the directors as to what steps should be taken to continue the business. Sir George Doughty, M.P., said he estimated $250,000 would suffice to enable the company to earn substantial profits.

Despite what had happened, said Sir George, who presided, he still was convinced they had a great property. If anything, his confidence in the Pacific Fisheries had been strengthened by what he had learned by his connection with the company and the experiments it had carried on; and he knew no business in which money could be invested with more certain prospect of substantial returns. Under the circumstances, he wished to ask the shareholders whether they were disposed to allow circumstances over which the directors had no control to prevent them reaping a splendid profit upon the money they had already invested.

The following resolution was adopted with one dissentient: That a committee of the shareholders be appointed to enquire into the position of the company and to confer with the board as to the course to be adopted to secure a continuation of the business of the company with or without amalgamation with other concerns.

*London, November 8.—Sir George Doughty, M.P., presided to-day at a crowded and animated meeting of the British Columbia Fisheries, Limited.

The whole debenture holders decided to put the concern into the hands of a receiver.

The meeting accepted Sir George Doughty's proposal to appoint a committee of investigation.

Answering press criticisms, Sir George maintained that he and his son and fellow-directors had played a straight game.

Neither he nor his son received a penny of salary.

He admitted that the plant had cost far more than the original estimate, but the company, now arrived at a cost of $300,000 had the best fishery station in the world.

Sir George suggested that $250,000 be raised by new debentures among the present shareholders.

The immediate difficulty arose from the refusal of the banks to make further advances.

Several shareholders criticized the heavy expenditures on the plant.

CANADIAN GOVERNMENT TREASURY BILLS ISSUED.

The Monetary Times understands that a line of Dominion government one-year treasury bills has been placed in London on a 4⅝ basis.

ALBERTA TO ISSUE STOCK.

The Monetary Times learns that Alberta has practically arranged for an issue of £1,500,000 stock in London, for the purpose of retiring treasury bills outstanding.

WANTS LINEN INDUSTRY IN MANITOBA.

*London, November 18.—Commissioner Roland, of Winnipeg, is endeavoring to persuade capitalists here that opportunities exist for creating in the west a flax and linen industry.

It is urged that Canada's present importation of $4,000,000 worth of binder twine, linen fabrics, yarns and threads is quite unnecessary if Canada developed an industry and ceased to burn the two million tons of flax straw produced annually in Manitoba, Saskatchewan and Alberta.

BRITISH COLUMBIA FRUIT SECURES HIGHEST AWARDS.

*London, November 17.—British Columbia's exhibits of fruit, which arrived last week, won the highest awards and gold medals at Edinburgh and Sheffield on Saturday and on Wednesday.

There will be a special display at Bristol on December 2 by the Royal Horticultural Society of London, when W. E. Scott, British Columbia deputy minister, will have charge of the exhibit.

MONTREAL LOAN OVER-SUBSCRIBED

†London, November 20.—The new Montreal city loan has been over-subscribed ahead of time. The Montreal loan is now quoted at half to one premium.

SHOULD HELP SITUATION

*London, November 20.—The result of the Montreal loan is regarded as a compliment to Montreal as well as to the sponsors, and should be helpful to the whole Canadian situation.

At the present juncture the margin between success and failure of the present moment is generally so narrow that a fractionally higher price might easily have resulted in a fiasco.

TO AVOID INCOME TAX

†London, November 20.—Many holders of Canadian investments avoid paying English income tax by having dividends payable in Canada. Development of this idea is announced by the Butters Salvador Mines, registering the concern as a Canadian company. Big dividends have hitherto been paid, and shareholders not resident here have objected to paying an income tax on the whole of the profits. The Court of Appeal a few months ago held that insurance companies' investments outside of Britain were liable to income tax.

OIL COMPANY TO BE WOUND UP

†London, November 20.—Directors of the Standard Oil Company of Canada faced a noisy body of shareholders today. The company has property from which it is proposed to supply several towns in Eastern Canada with natural gas, but owing to a recent lawsuit by a shareholder the company finds its funds exhausted. Bernard Britain, who has recently paid four visits to the company's properties, gave a decidedly hopeful account of the possibilities if further capital was forthcoming. The shareholders, after a lot of wrangling, decided to wind up the company with a view to its reconstruction.

◆

Over 15 miles of cars were handled each day by the Canadian Pacific Railway at Fort William, or 465 miles of cars handled during the month of October. With the cars of the Grand Trunk Pacific and the Canadian Northern Railways added to that of the Canadian Pacific mentioned, the Canadian head of the lakes handled probably twice those figures quoted above, or approximately thirty miles of cars per day.

A city comptroller has been recommended for Edmonton. He will be given complete charge of the accounting end in the city's business, and directed: (a) To keep books which will indicate all expenditures authorized by council; (b) To see that the accounts are kept in strict conformity with the authorization of council. (c) To see that no unauthorized expenditures are made. (d) To see that all appropriations and account keeping be standardized. (e) To see that all payments are audited by his department before being made. (f) To see that all accounts are operated under thoroughly approved and most up-to-date commercial methods; and (g) That cost-keeping be an essential part of the system.

SASKATCHEWAN'S CREDIT COMMISSION HAS A WORD

About the "Howl of Calamity From Self-Constituted Advisers of the East"

The following letter protesting against an editorial in *The Monetary Times* of November 1st, under the heading "Saskatchewan's Drastic Proposals," has been received. The signature it bears is A. F. Mantle, honorary secretary of the Agricultural Credit Commission of Saskatchewan. We assume, however, that Mr. J. H. Haslam, chairman of the commission, was consulted when the latter was drafted.

"You state that for ten farmers to combine to obtain a mortgage loan of $5,000 for which all of them are liable, the money to be raised on the credit of the province, is by no means co-operation in its strictest sense. This sentence contains at least three misstatements, which is scarcely to be commended in a Canadian financial journal purporting seriously to discuss the findings of a Canadian commission on an important aspect of Canadian finance.

"1. It has never been suggested that ten farmers shall all be liable for a loan of $5,000. Sections 7 and 10 together of the commission's recommendations make it clear that the suggestion was that borrowers or members be organized into local groups each comprising at least ten members the aggregate of whose loans should be at least $5,000.

"2. It is not proposed that the money be raised on the credit of the province. It is specifically recommended that the funds be raised on mortgage bonds issued by the association. Surely bonds based upon first mortgages received as security for loans not exceeding 40 per cent. of the value of the farms have some intrinsic value independently of the provincial guarantee! If not, what security is behind the $65,000,000 already loaned in a similar way, and what security is behind the provincial guarantee itself which depends solely upon the legislature's power to tax these same lands?

"3. For farmers to combine in the manner and for the purpose suggested is co-operation in its strict sense. Co-operation is variously described as, operating with others for a common end, to labor in conjunction to promote the common advantage, to unite in promoting the same object. Do you contend that what would be co-operation were there no provincial guarantee ceases to be co-operation when that guarantee is used to supplement local effort? If not, just what do you mean?

First to Approve Each Other.

"You say the Saskatchewan proposal makes local associations of ten members united on the basis of joint and several liability for the mortgage loan. In brief, the businesslike, progressive farmer in the circle of ten, will have to share the undesirable results arising from the lack of responsibility in a ne'erdowell. I will admit, if you like, that the wording of section 7 of the commission's recommendations is not altogether happy, but, when considered in conjunction with the other sections does it justify the deduction you make from the execrable sentence in which you re-state it? Seeing that the members of a local group are first to approve each other, and that the group is to be formed by mutual consent, has the businesslike, progressive farmer not a good opportunity to see that he co-operates only with farmers like himself and not with the ne'erdowell?

"In a vain attempt to elucidate an elementary detail of financial organization you sink further into the mire of loose expression by saying in explanation of the Commission's recommendations as to the contingent liability of a member.

"In other words, if his share of the mortgage is $1,000 and something goes wrong with one of the other members, his liability is limited to $1,500. May I assume that by something going wrong you mean that a member has defaulted in the payments due under the terms of his mortgage and that the mortgaged property when disposed of by the association has failed to yield sufficient to pay off his indebtedness to the association? If so, let me point out that the Commission's recommendation is that, in such an unlikely eventuality, the liability of another member of the group to which the defaulter belongs be limited to $500, if his loan is $1,000, and not that it be $1,500.

Co-operative Elevator Company.

"Your next group of misstatements concern the Saskatchewan Co-operative Elevator Company. You say that the amount of the company's government guaranteed credit has now grown to many millions, and there is no reason why it should not expand very much further. The first statement shows you to be indifferent to fact when you desire to create a false impression, and the second shows you to be lacking in ordinary business sense when considering a farmer's organization. The Saskatchewan government does not now and never has guaranteed credit to the Saskatchewan Co-operative Elevator Company to the extent of many millions.

"Moreover, there is one very good reason why such guarantee as the government may have given will not expand very much further. That reason is that some financial institutions, unlike some financial journals, apparently, know a satisfactory balance sheet when they see one and appreciate dealing with a concern that is efficiently managed and is doing an increasing business along legitimate lines. The Saskatchewan Co-operative Elevator Company never had a smaller proportion of its credit guaranteed by the government than it has to-day.

How Much Government Finances.

"Your logical conclusions based on the above misstatements is what one might expect—positive nonsense. The fact, of course, is that the Saskatchewan government finances the crop of the province to the extent at present of exactly $1,301,499.39, which is the amount at present outstanding of the loans made to the company for construction purposes on the security of a first mortgage on all its elevators and the hypothecation of part of its uncalled subscribed stock. The company's business is expanding so fast that this amount may be increased somewhat from time to time, but repayments of principal will to an increasing extent offset any further loans. And I presume that in the strict sense for which you stickle, such an expenditure invested in permanent buildings even if for grain handling purposes is not regarded as part of the financing of the crop. If such be the case then the Saskatchewan government does not actually finance one bushel of the crop and the day of your logical conclusion must indeed be far distant.

"It is not necessary that I pursue this analysis of your statements any further. Enough has been said to show conclusively to any fair mind that your article is misleading and unfair. So long as western provincial governments confine their guarantees to the bonds of a railway company owned in and operated from Toronto they may guarantee bonds by the tens of millions of dollars and no concern for the provincial credit is shown by the financial press of Eastern Canada. Presumably they are then looking further afield than the provincial arena of politics and votes. But once let a western government even receive a report in which it is recommended that the provincial credit be used in a well-considered way and to a well-controlled extent to help relieve the basic industry of the province from a great handicap and, even before that government has time to announce whether it will seek to give effect to the recommendations, a howl of calamity and warning goes up from our mentors and self-constituted advisers in the east. Logical conclusions are drawn and we are solemnly assured that the new scheme will undoubtedly strain the credit of the province to the utmost.

Cart Before the Horse.

"What does your smug assurance that if proper co-operation among the farmers could be obtained by long-term mortgages at low rates of interest, *The Monetary Times* would be the first to give its hearty support to the scheme, mean? The scheme you purport to be discussing has no such object. Have you not put the cart before the horse? The scheme certainly is intended to secure long-term credit at a lower rate of interest by means of proper co-operation, and I fancy that if you only understood its provisions you would give it your hearty support.

"Your insinuation that if the commissioners gave proper attention to matters in Europe, they found that this desirable condition existed where there was not only a borrowing class but also a lending class in the same community, is surely premature, pending an opportunity at least, on your part, to read their full report. It might be answered with, if *The Monetary Times* gave proper attention to matters in Saskatchewan it would find that more than the unthrifty farmers are rightly growing tired of paying excessively high interest rates for mortgage credit. I should not care to so reply, however, for the event will prove that the commissioners did give proper attention to matters in Europe while there is already abundant proof that *The Monetary Times* has not given proper attention to matters in Saskatchewan.

European Governments do It.

"Moreover it is interesting to note in passing that the commissioners did not find in Europe that the desirable condition (of proper co-operation brought about by long-term mortgages at low rates of interest—which, presumably, when interpreted, means long-term mortgages at low rates brought about by proper co-operation!) existed only where there was not only a borrowing class but also a lending class in the same community. This is usually the case, but Danish land mortgage bonds, for instance, are issued in Berlin at the same time as in Copenhagen and find a ready market in Germany. And European governments, too, are not afraid of straining their credit by supplementing their huge war loans with substantial assistance to agricultural co-operative credit institutions, extending in some cases even to a government guarantee of their bonds! When you read the report, you will find that one callous government even has the temerity to compel the bank that has the right of note issue to turn over to agricultural loaning institutions a definite proportion of the profits it derives from that privilege."

(We are pleased to publish the above letter. Readers of *The Monetary Times* who desire further information on the subject may obtain the official synopsis of the Commission's report by applying to the secretary at Parliament Buildings, Regina. Our views of the Commission's proposals, proposals which we still consider will not help the credit of Saskatchewan, were expressed in mild language. Naturally there will be a difference of opinion regarding those views. One or more of the commissioners apparently have an idea there is a necessity for a gallant knight errant in the economic arena to rescue the long suffering Lady Saskatchewan from the grip of the money ogres of eastern Canada. And nothing can stop a knight errant. If Saskatchewan has made up its mind to try the proposals of its agricultural credit commission there is little necessity for discussion. All new communities have financial measles at some time or other. Invariably they overlook the fact that other communities have shown the same symptoms, took the same cure and experienced the same results. As for the management of the Saskatchewan Co-operative Elevator Company, we agree it is excellent and we have a high appreciation of the abilities of Mr. C. A. Dunning, its manager.—Editor, *The Monetary Times*).

◆

HOME LIFE TRANSFER.

The Home Life directors have approved unanimously the agreement by which the company is taken over by the Sun Life. President McLaughlin says that owing to the recent fortunate liquidation of certain speculation assets placed upon the books during the illness of Mr. McCutcheon, the managing director, the Home Life shows an improvement in its affairs by $250,000. "We expect every shareholder will receive 100 cents on the dollar," adds Mr. McLaughlin.

◆

INSURANCE COMPANIES.

The following insurance companies have been registered to do business in Alberta:—

Firemen's Insurance Company of Newark, N.J. Guarantee Company of North America. Great West Life. Merchants Casualty Company of Winnipeg, Man. London Assurance Corporation. London and Lancashire Guarantee and Accident Company of Canada. General Accident, Fire and Life Assurance Corporation, Limited, of Perth, Scotland. British Dominions General Insurance Company, Limited, of London, England. Northern Life. Royal Insurance Company, Limited. Royal Exchange. Hudson Bay. British Northwestern Fire. American Central. Protective Association of Canada. Liverpool and London and Globe Insurance Company, Limited. Commercial Union. Palatine Insurance Company, Limited. Guardian Accident and Guarantee Company. Saskatchewan Insurance Company. Central Canada. Alberta-Canadian. North-West Fire. Imperial Life. London and Lancashire Fire. Monarch Life. Yorkshire Insurance Company, Limited. Continental Fire. Scottish Union and National. Insurance Company of the State of Pennsylvania. Guardian Assurance Company, Limited. Phœnix Assurance Company of London, England. Confederation Life Association. Nova Scotia Fire. Law Union and Rock. Union Assurance Society. Limited. Crown Life Insurance Company. Germania Fire. Equitable Fire and Marine. Mount Royal Assurance Company. London Mutual Fire. Norwich Union Fire. Security National. Federal Life. Saskatchewan Life. British Columbia Life. Dominon Fire. Canadian Casualty and Boiler Insurance Company. Niagara Fire Insurance Company of New York. Lumber Insurance Company of New York. Sun Insurance Office. British American Assurance Company. Excelsior Life. Phœnix Insurance Company of Hartford, Conn. Firemen's Fund Insurance Company. Dominion Life. Queen Insurance Company of America. Factories Insurance Company. Westchester Fire. Northern. Ocean Accident and Guarantee Corporation, Limited. L'Union Fire Insurance Company, Limited.

INSURANCE AND GREAT LAKES WRECKS

Heavy Losses for Marine Underwriters Raises Rate Question—Life Insurance Claims

A Canadian Associated Press cable from London says that considerable misgivings have arisen among London underwriters in connection with the Canadian gale. They feel that in adopting the present rates on vessels trading on the Canadian lakes they have not taken into account the possibilities of such serious gales as that which has just taken place. Roughly their loss is estimated at $1,500,006, but judging by later cables, this figure may be considerably increased.

Early Estimates of Losses.

Insurance underwriters have given the following preliminary estimates of losses in the big storm:—

Value of cargoes	$1,000,000
Value of ships	2,500,000

	Cost.	Insurance.
The Wexford	$107,000	$100,000
The Turret Chief	130,000	125,000
The L. C. Waldo	250,000	200,000
The Charles S. Price	350,000	350,000
The Northern Queen	175,000	150,000
James Carruthers	400,000	275,000
The Edwin F. Holmes	350,000	300,000
The G. J. Grammer	300,000	300,000
The A. E. McKinstry	150,000	150,000
The Acadian	170,000	170,000
The H. B. Hawgood	325,000	300,000
The Regina	160,000	160,000
The Howard M. Hanna	350,000	300,000
The schooner Sephie	8,000	6,000
The Matthew Andrews	375,000	325,000
United States lightship No. 82	100,000	80,000
Tug Martin	15,000	8,000
The Nottingham	250,000	200,000
The John A. McGran	225,000	225,000
The Leafield	20,000	175,000
The Argus	350,000	325,000
Steam barge Butters	100,000	....

Eighty per cent. of the insurance is divided between English and American insurance companies.

Insurance Losses are Divided.

The marine insurance losses are divided pretty equally between London and New York. Some German underwriting concerns which became interested in lake shipping, being tempted by the profits of recent years, have also been badly hit.

Valuable westbound cargoes of miscellaneous merchandise have disappeared with the Northern Queen and several other Canadian vessels. In the eastbound ships the present indications are that at least 1,000,000 bushels of grain have been lost, to say nothing of the great number of ore and coal cargoes involved. A large quantity of linseed is afloat, the shipments having been accelerated in view of the approaching close of the water transportation season.

Large Proportion was Uninsured.

Owing to objection on the part of shipowners to the rates charged by the underwriters, many shipowning concerns on the Lakes lately have let their fleets go uninsured. In consequence, of the sum of $8,500,000, value of lost and vessels in distress, at least two and three-quarter million dollars represent property uninsured. Of this latter over $1,000,000 worth is known to be destroyed, and the loss falls directly upon the shipowners.

The American-owned freight steamers are insured 75 per cent. with insurance companies and 25 per cent. under an inter-insurance arrangement conducted by the Great Lakes Protective Association. This organization, beginning with 5 per cent., increased its line last year to 25 per cent. of the values, being induced to make this increase by what they considered very successful results in their own behalf in working out various reforms in the loading and discharging of vessels and in the supervision and regulation of masters.

Life Insurance Claims.

A suggestion is made by Captain James B. Foote, manager of the Marine Department of the Toronto Vessel and Insurance Agency, in connection with the disaster of the lakes. He advises that the authorities at the various places where victims' bodies are taken from the waters should insist upon each being immediately photographed for identification purposes. Many of the bodies, he considers, will be buried before identification has been established. It would be quite possible to get good photographs of the men, which might be the means of identifying the unfortunates even months hence, and would be almost essential in establishing claims of life insurance.

SASKATCHEWAN'S LAND BANK

New Scheme Should Replace Many Existing Mortgages To Be of Any Great Value

H. M. P. ECKARDT

The Saskatoon Phœnix takes exception, in an editorial on November 4th, to some of the statements and arguments used by the writer in the article on "Saskatchewan Land Bank's Bonds" appearing in the October 25th issue of *The Monetary Times*. In the first instance exception is taken to the statement that "every farmer who joins a local association is to be responsible for the borrowings of his fellow-members." With reference to this the editor of the Phœnix quotes article 10 of the recommendations of the commission. Article 10 says: "That the liability of the individual member, whether as member of the local association or as member of the Saskatchewan Co-operative Farm Mortgage Association, in respect of any obligation incurred or losses suffered, or in any other respect whatever, be limited to an amount not more than fifty per cent. greater than the amount of his loan."

I submit in reply that the limitation of the member's liability as above described makes no great difference.

The essential point is that every farmer joining the local association and borrowing by means of it becomes liable to an extent, for the borrowings of his fellow-members. A farmer who, by hard work and careful expenditure, has raised himself to a position of comparative comfort will not lightly subject himself to liability for the borrowings of other farmers in his own or another district, even if his liability were confined to 25 per cent. or 15 per cent. of his own co-operative borrowing. Fifteen per cent. of a $3,000 loan is $450—quite a respectable amount. Perhaps most of the best farmers will prefer to pay a little more in the way of interest to the loan companies and other lenders, and thus confine their liability to the amount of cash received by them.

Experts Have Sometimes Made Mistakes.

If the farmers generally have full confidence that the loans made by the associations will all be perfectly good and that all obligants will faithfully carry out the obligation to pay, they would be more disposed to accept the responsibility for making good the losses. But it is doubtful if the commission, or any other body created by the provincial government, can make them have such confidence. Everybody knows that the loan and mortgage companies having the longest and widest experience in the Western field, and having the services of the most expert inspectors and appraisers, sometimes make bad loans. And it is probable if the operations of the co-operative associations have any important scope at all, that they will meet with serious losses.

The editor of the Phœnix reminds us that "membership in the association is dependent upon not only mutual approval, but upon approval by the central commission, a condition which, so far as it is humanly possible, eliminates those who will not carry out the obligation to pay." Careful reflection on this feature of the programme suggests the thought if the associations so conduct their business as to escape bad loans it may be through practices or regulations which will have the effect of deterring the majority of good farmers from taking advantage of the facilities they offer. "Mutual approval" of an application made to a local association seems to imply that the existing members must consent before the application is sent away to be passed upon by the central body. The local members could not well consent or approve, unless they had the details of the applicant's position. And it will doubtless be repugnant to many prospective borrowers to have to submit their affairs to all the neighbors.

Article 15 of the recommendations is "that loans be limited to 40 per cent. of the central commission's valuation of the property to be mortgaged." This is another safeguard against bad loans which in its working out may tend to confine the benefits of the scheme to a limited class. Much depends on the nature of the valuations put upon the land by the central commission. It would be possible to so overvalue the land that a loan up to 40 per cent. of the value thus set would represent a much larger per cent. of the real value.

If we assume that the central commission will keep their valuations strictly down, then it seems to follow that only those farmers who can finance themselves through borrowing up to 40 per cent. of the value of their farms can derive benefit from the plan. Now, it can be said that the farmers who are most in need of assistance have loans outstanding, as a rule, to 50 per cent. and more of the value of their farms. These men could not qualify for the cheap loans.

Must Replace Mortgages on Large Scale.

With respect to my statement that a tremendous financial operation would be required to replace at once the existing 7 per cent., 8 per cent., and 9 per cent. mortgages with new mortgages to the association at a lower rate, the Western newspaper says the association is not bound by the terms of the proposed scheme to advance all the money that may be demanded in any given time. The bond issues of the association are to be determined annually by agreement between the provincial government and the association.

While the London money market is in its present condition it is quite safe to say that an inconsiderable amount of existing mortgages will be replaced by the cheap loans. The provincial governments are finding it difficult enough just now to borrow moderate sums at high rates for pressing requirements. But at the same time it should be borne in mind that in any district or locality the new scheme cannot confer any benefit of importance on the farmers unless it replaces existing mortgages on a large scale. If it essays to do that, financial operations of magnitude must be attempted in London; if it does not attempt to replace existing mortgages on an extensive scale, perhaps there will be only five or six farmers in each district having the benefit of the cheap loans. The small loans made to them could have no possible effect on the rates generally paid by the farmers in these localities.

◆

DIVIDEND INCREASE.

The Hamilton Provident and Loan Company Society has declared a dividend of 4 per cent. for the last half-year of 1913, payable January 2, 1914. This puts the stock on an 8 per cent., instead of 7 per cent. basis.

◆

SHORT TERM DEBENTURE ISSUE.

In order to place itself in a better cash position, the Canadian Jewellers, Limited, will make an issue of debentures, the directors being authorized to issue three-year debentures to the extent of $150,000 in the denominations of $100, $500 and $1,000, at the price of 95. The debentures will carry interest at the rate of 7 per cent.

The attention of the minister of the interior has been called to the fact that certain promoters are inaugurating an extensive stock selling campaign, especially at Calgary, Alta., based largely on a proposed power development project on the Bow River within the city precincts, or a very short distance from Calgary, says an Ottawa dispatch. As no authority has been or is likely to be given for a power development within the district in question, stock in any company has no value whatever in so far as a power project on the Bow River within the limits of the city of Calgary is concerned.

MORE CONFIDENCE IN MONEY CENTRES

Reports From England, France and Germany—Mr. Hosmer Speaks of Canadian Situation

Monetary Times Office,
Montreal, November 19th.

"It seems to me," said Mr. Charles R. Hosmer to *The Monetary Times*, "that the pessimistic attitude is altogether too prevalent just now and that, moreover, it is altogether unjustified by the actual situation. The Balkan war had a disturbing effect, not so much, perhaps, because of the actual waste of life and property as because of the fear that the European nations would be drawn into the trouble and there would be a general flare-up. But that war is an old story and it is time that Europe should be getting over its effects.

Indications show that Europe has put the war behind it. First of all we had the improved financial situation in Germany and then we had the report a few days ago that Paris is again beginning to feel cheerful. We have also had evidences from England of a similar character, the bank statement being of a favorable nature for the time of the year. A week ago, also, we found that New York was well supplied with money and advices show that call money was available there the other day at 2½ per cent., while time money was in the vicinity of 4½ per cent. We also have the statement of financial writers that the supply of money is likely to show an increase from this forward and some do not hesitate to say that there will actually be a plethora of money in New York in a short time.

Much Money Released in Canada.

"Turning to our own country, we have but to look at the amount of grain being shipped out over the Canadian Pacific and other railways to be convinced that the amount of money which is now being released must be enormous, and, we know that such is the case. Exports of grain and grain products have been heavy and farmers have undoubtedly been liquidating their indebtedness. Up to the present this has not been showing to any marked extent in the bank statements, but all that will come in due course."

Upon being asked how this should affect the financial situation, he said:—"Naturally, it should have the effect of easing it. The crop of the west has added its value to the wealth of the country and the situation is just that much relieved. Of course it is not all surplus, inasmuch as a considerable quantity had already been spent and was due by way of debts, but the situation has nevertheless been relieved to that extent.

Declining Tendency of Money Rate.

"Of much promise for the future," he added, "is the recent tendency of the rate for money to decline. So long as money is scarce and hard to get and rates are high, such as has been the case now for months past, there is little or no disposition on the part of the public to purchase stocks or to go in for new undertakings. Those who have surplus funds can employ them very advantageously in other ways—such for instance as in short and well secured loans to industrial companies or in other directions in which money is required. As soon as the supply of money increases, however, and loans can be obtained at lower rates, surplus funds find their way in large quantity into securities which are giving a liberal return. The result is that prices of stocks advance.

"It need cause no surprise if in the near future money becomes considerably more plentiful. Well informed financiers abroad predict that such will be the case and such development will be welcome to Canadians."

◆

HOLLAND COMPANIES IN CANADA.

Taking effect on December 1st, there will be a change of management of the Netherlands Transatlantic Mortgage Company. Mr. L. D. Fortuyn, who has been temporarily in charge of the Amsterdam office, is returning to take up his duties in Winnipeg, while Mr. J. Mees goes back to Holland to resume the management there.

The Netherlands Financial Corporation for Canada has recently been formed in Amsterdam, Holland, with capital $800,000, of which $160,000 has been subscribed and fully paid. The managing directors of this company are:—Mr. L. D. Fortuyn for Winnipeg and Mr. J. Mees for Amsterdam, both of whom are managing directors of the Netherlands Transatlantic Mortgage Company. The company will start business on January 1st, 1914, with offices at 402 Northern Crown Bank Building, Winnipeg. The business of the company will be the discounting of agreements and general transactions in real estate.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Twin City Rapid Transit Company.—Twin City gross earnings for October were $758,964, against $689,499 in October, 1912, an increase of $69,464.

Granby Consolidated Mining and Smelting Company, Limited.—The company has given up its option on the Mount Andrew Mine, property is located at Kasaan Bay, Prince of Wales Island, Alaska. The property was under lease in 1905-1908 to the Britannia Smelting Company, Limited, and in 1909, it was leased to Mr. S. Lichtenstadter.

Mond Nickel Company.—The Mond Nickel Company has added to its holdings in the Sudbury district by purchasing the Levack properties.

The owners of these properties were Messrs. R. J. Tough, Rinold McConnell and James Stobie. The property has an area of 1,600 acres and is located about 30 miles of Sudbury.

Canadian Venezuelan Ore Company.—"Output at present," said Mr. F. P. Jones, the president, on his return from the company's property, "is running about 500 tons a day, but this will arise to around 1,000 tons next month. Shipments are being made steadily, but we have been more concerned with installation of the new plant than with shipments. With some eight vessels under charter to carry the ore from the Orinoco to Philadelphia, and the output of the mine sold well ahead, the outlook is satisfactory. From 450 to 500 men are employed at the property, and we have no labor troubles of any kind."

Superior Portland Cement Company.—Upon the application of J. L. McIntyre, of Guelph, creditor for $29,260, Mr. Justice Latchford, at Osgoode Hall, Toronto, made an order for the winding-up of the Superior Portland Cement Company, Limited, of Orangeville. The Union Trust Company were appointed interim liquidators, with a reference to the Official Referee, Geo. Kappele, K.C. The company was incorporated in September, 1892, with a nominal capital of $500,000, of which $400,000 was subscribed and paid up. Owing to difficulties the company made an assignment on November 5 last. According to the statement of assets and liabilities submitted, the shareholders will lose practically all they have put into the concern. The liabilities are $607,626, which includes the share capital, $100,000 in debentures, debts due, bills of exchange and overdraft at bank, $102,150. The assets were stated to be equal to the liabilities, but these include $80,000 spent in organizing the business of the company, $80,000 cost of installing plant, now estimated to be worth $150,000, and some $27,000 miscellaneous.

Calgary Brewing and Malting Company.—For the first half of the current fiscal year the gross sales of the Calgary Brewing and Malting Company show an increase over the corresponding period last year of over 27 per cent., and is the result of a steadily increasing demand for the products of the company. Last year the gross sales for the first half-year bore a similar increase over the figures for 1911, viz.:—

	1911.	1912.	1913.
April	$ 73,539	$100,825	$149,088
May	82,758	112,681	141,418
June	109,734	141,186	164,664
July	99,475	141,892	171,209
August	84,165	126,085	148,336
September	72,837	98,484	142,366
Totals	$522,508	$721,153	$917,082

The Calgary Brewing and Malting Company is one of the largest companies of its kind. It owns and operates cold storage plants, hotels and other properties at various points throughout the western provinces, including Edmonton, Calgary, Regina, Medicine Hat, Moose Jaw and Saskatoon.

It must be remembered that the company does not derive its revenue entirely from the manufacture and sale of its products.

Its assets at the end of the last fiscal year amounted to $3,420,072, of which amount $1,126,290 consisted of mortgages and notes taken as security for loans and advances made. In every case the actual value of the mortgaged properties is approximately 40 per cent. in excess of the actual loan.

CANADA AND BRITISH TRUSTEE LIST

Difficulties Are Not Insurmountable—Amplification of Treasury Regulations Would Open the Door

In *The Monetary Times* last week, were printed comments of the London financial press, regarding the desire to have included in the British Trustee List, Canada's provincial securities. The editorial of the Financier was answered by two letters, signed "Canadian" in that paper. We have a good idea of the identity of the writer, who is thoroughly posted on the subject and whose words carry considerable weight. Here are the letters:—

"In common with many Canadians, I have read your article in to-day's issue with much interest. No one can take any exception to the first paragraph, which states the position very fairly; and, as you say, the case for the inclusion of Canadian Provincial securities in the British Trustee List is admittedly a strong one.

"In the second paragraph, however, there are two statements somewhat open to question, which I think ought to be noticed. You state quite accurately that the Provincial Governments are able to comply with two of the conditions or regulations laid down by the Treasury under the Act of 1900. You go on to quote the third condition, but the quotation is inaccurate. It reads, as you put it, that any Colonial legislation which is likely to be injurious to the stockholders, or to involve a departure from the original contract in regard to the stock, would properly be allowed. Of course, it should be disallowed. Although the provinces cannot comply with that condition, they have made a suggestion by which the same result could be attained.

Regulations can be Altered.

"Then you go on to say that the provinces cannot, therefore, obtain what they require until the law has been altered. The regulations are not included in the Statute bearing upon the question. The Act provides that regulations may be made by the Treasury, and the regulations you have quoted are the consequence. If regulations can be made under the Act, they can presumably be altered; and there seems to be no reason, in law, why some modification should not be made in the regulations to meet the case of the Canadian Provinces—if there is any desire to do so.

"It is—to put it mildly—an injustice that the privilege of having their securities available for trustee investment should be denied to provinces like Ontario, Quebec, Manitoba, British Columbia, and the others, while it is freely given to the States of the Australian Commonwealth, and to nearly all the Crown Colonies throughout the Empire.

What Would be Included.

"Many of your Canadian readers will learn with disappointment that the Financier, which has always devoted much attention to Canadian interests, and is popular in the Dominion, is "confident that the grievances of the Canadian Provinces could not be redressed at the present time without inflicting some injury on the holders of existing stocks." That, of course, is only a matter of opinion after all, but surely the best answer to the statement is found in the remark made in another portion of the article that the Canadian Provincial loans do not exceed £20,000,000. (I doubt if more than £13,000,000 would be affected if the suggestion were carried out), and that such an addition to the list of eligible Trustee stocks would be a small one—smaller, indeed, than the additions which are automatically made to it every year by the issue of further securities of the Trustee class."

To Modify Regulations.

Commenting on this letter, the Financier says:—

"Our correspondent states that our suggestion that the grievances of the Canadian Provinces could not be redressed without inflicting injury on the holders of existing Trustee stocks is a matter of opinion. At that we must leave it. Perhaps, when financial conditions have improved, the authorities will be able to carry out our correspondent's suggestion that some modification should be made in the Treasury's regulations to meet the case of the Canadian Provinces. Our estimate of the amount of Canadian Provincial loans outstanding was taken from *The Monetary Times* pamphlet, which states that nearly $100,000,000 of British money is invested in the securities of the Provincial Governments of Canada."

Position Clearly Explained.

The second letter of the correspondent follows:—

"It occurs to me that I may with advantage amplify my letter of yesterday a little in order to make the present position of the matter quite clear.

"It is admitted that the Provinces of Canada are not able to comply, for the reasons given previously, with the third condition of the Treasury regulations, relating to the investment of Trustee funds in Colonial securities. That regulation provides that 'the Colonial Government shall place on record a formal expression of their opinion that any Colonial legislation which appears to the Imperial Government to alter any of the provisions affecting the stock to the injury of the stockholder, or to involve a departure from the original contract in regard to the stock, would properly be disallowed,'—i.e., by the Imperial Government, which has power of disallowance in connection with the legislation of the self-governing Colonies and of the Crown Colonies. The provinces are not in a position to make the statement in question, in view of the fact that the Imperial Government has no veto over the legislation of the Provinces of Canada—that power being vested in the Government of the Dominion. That is the only reason which prevents the Provincial Governments giving the stipulated assurance. What they have done, however, is to make it clear and beyond question that they are quite willing to place on record their opinion that any legislation coming within the terms of the Treasury regulations would properly be disallowed by the Dominion Government.

Is a Genuine Grievance.

"If, therefore, the Treasury regulations could be amplified by the addition of the words 'by the Dominion Government,' or some other suitable formula, after the sentence 'would properly be disallowed' it seems to me that it would meet the case and enable the difficulty to be overcome. If that suggestion should not be satisfactory the Provinces of Canada have declared that they are prepared to act upon any other suggestion that may be made for dealing with the situation.

"The amount involved is not large. I am aware that *The Monetary Times* pamphlet states that about £20,000,000 of British money is invested in the securities of the Provinces of Canada. It should be borne in mind, however, that several millions of that indebtedness is in the form of bonds, which are not eligible for Trustee investments in any circumstances. If the request of the provinces were acceded to, it is not likely that more than about £13,000,000 of securities would be added to the Trustee list—an amount which would not affect the position as it is to-day to the slightest extent.

"It seems a thousand pities that some steps cannot be taken to remove what is certainly a genuine grievance on the part of the great provinces which form the Dominion of Canada."

◆

FINANCIAL INSTITUTIONS AND CRISES.

Addressing the Institute of Bankers in London, England, Viscount Goschen referred to the condition of the financial world and the state of the money market. He pointed out that with supply of capital a craving had been stimulated which it was difficult now to satisfy. Another cause for the great demand for money was the spirit of restlessness which was abroad. A great development in foreign countries and colonies of railways and enterprises needing capital was taking place, but one which had been accompanied by a spirit of haste. Governments—all governments—seemed to think that they must crowd all manner of public works into as short a time as possible. It had followed that there had not been sufficient new capital to go round and to satisfy the demands made for it by new countries in process of development and countries where commercial enterprise is active. Then the war in Eastern Europe dislocated trade and caused a great demand for money. The result had been that new issues had followed one another in such discomforting haste that the digestion of the market had been upset and caused weakness and depression, for which a rest was only needed to restore its strength. There was one feature to which they might look with satisfaction. Last century they were accustomed on an average to a financial crisis every 10 years, always attended by some failures; but was it not a little remarkable that although they had passed through times of trouble since then, times when it appeared as if Europe was on the brink of war and stocks from abroad had been thrown on this market to be sold at panic prices, yet they had not been attended by any serious failures? Might not this be largely attributed to the financial institutions, which had acquired such power in the world of finance that at the moment when credit appeared to be inflated and speculation unhealthy, they were able to restrict credit for other than legitimate trade purposes?

◆

Exports of toys from the United States amount to less than $1,000,000 per annum and have somewhat declined in recent years. Most of those exported however, go to English-speaking countries, the $828,518 worth exported during the past fiscal year going chiefly to England, Canada, Australia and New Zealand; the next largest exportations went to Germany, Cuba, the Philippine Islands, France and Japan.

ROOT AND FODDER CROPS

They Will Bring $187,000,000 This Year, Says the Latest Government Estimate

Root and fodder crops.	Estimated yield.	Estimated value.
Potatoes	76,720,000 bushels.	$ 37,379,000
Turnips	73,090,000 bushels.	20,103,000
Hay and clover	10,050,000 tons.	114,789,000
Fodder corn	2,436,300 tons.	11,273,500
Alfalfa	251,700 tons.	2,895,600
Sugar beets	161,000 tons.	959,000

The above are figures sent to *The Monetary Times* by the Census and Statistics office, Ottawa, regarding estimates of the areas, yields and values of root and fodder crops. The statement also states the area sown to fall wheat for next year's harvest, the proportions of ploughing completed this fall, and the acreage summer fallowed in 1913.

The total area under root and fodder crops (potatoes, turnips, mangolds, etc., hay and clover, alfalfa, fodder corn and sugar beets) is placed at 8,693,000 acres, and the total value of the products from this area at $187,399,100. These figures are provisional, as finally corrected returns, based on the Census of 1911, will be available for publication at the end of the year. The average yields per acre for the Dominion are reported as 165.85 bushels for potatoes as compared with 172.19 bushels last year, 354.12 bushels for turnips and other roots as compared with 402.51, 1.32 ton for hay and clover as compared with 1.47 ton, 8.64 tons for fodder corn as compared with 10.26, and 2.44 tons for alfalfa as compared with 2.79. It will be recalled that last year's wet season was especially favorable for roots and fodder crops.

Good Quality of Crops.

In quality all these crops are marked as about 90 or above 90 per cent. of the standard, excepting fodder corn, which is 85.

The potato yield is highest in New Brunswick, 244 bushels. and lowest in Ontario, 119 bushels. The area estimated to be sown to fall wheat for the crop of 1914 totals 1,006,700 acres, as compared with 1,086,800 acres, the area estimated to have been sown in 1912 for 1913. This represents a net diminution for the five provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia of 80,100 acres, or 7.37 per cent. Ontario, where nearly seven-tenths of the crop is grown, remains practically stationary, the estimated total reduction being only 2,000 acres from 696,000 acres. There is a diminution of 1,100 acres in the two provinces of Manitoba and British Columbia, offset by an increase of 6,000 acres, making 78,000 acres in Saskatchewan. The bulk of the reduction is, therefore, in Alberta, where the acreage is estimated as 229,000 as against 312,000, or a decrease of 83,000 acres—nearly 27 per cent. Correspondents attribute this decrease to the excessive amount of winter killing of fall wheat during the last three years, in consequence of which many farmers have given up this crop altogether. The condition of fall wheat for all Canada averages 93.74 per cent. of a standard, Manitoba and Saskatchewan showing the best condition with 95 and 96 points, respectively.

Fall Ploughing and Summer Fallow.

The percentage of fall ploughing completed compares well with last year, when, however, the conditions were exceptionally unfavorable. The percentage ranges from the lowest of 30 in Saskatchewan to the highest of 70 in Quebec. In Manitoba and Alberta the respective percentages are 58 compared with 27 last year, and 44 compared with 24.

As compared with 1912, all the provinces devoted a smaller area to summer fallowing excepting Prince Edward Island and the three Northwest provinces, where the increased percentages are from 2 to 5.

◆

SUB-STANDARD LIVES AND EXISTING TABLES

Professor Whitney, associate actuary of the New York Insurance Department, in a paper before the Actuarial Society of America at Boston, showed that it is possible in the case of any sub-standard life to find an equivalent standard life, provided the age and the rate of interest are changed in a certain way. It is, therefore, possible to extend to sub-standard lives the formulas, tables and methods for standard lives. The method was applied in the paper to the calculation of premiums for an excess mortality of 25 per cent., 50 per cent., 75 per cent., and 100 per cent., and for one of the overweight groups for which statistics have been given in the second volume of the recent medico-actuarial mortality investigation. The method of least squares and an alternative graphical method were proposed for the quantitative determination of the particular sub-standard features of the lives to be treated. It is believed that the method, in addition to its use in treating sub-standard lives, will be valuable in the case of group insurance.

CANADA HAS MADE UNEXAMPLED PROGRESS

But It Is Small in Comparison With Future, Says Paish —Need for Caution, Though

Canada for a long time to come will have to depend upon foreign capital, almost entirely upon British capital, for the major portion of the capital supplied to Canada comes from the United Kingdom. So said Sir George Paish in an address to the Canadian Club in New York. "I was delighted to hear Mr. Foster (the acting premier of Canada) say that the United States had provided £20,000,000 for the development of Canada," he continued. "You will, I am sure, be interested to know that the Mother Country, of which you are all so proud, has provided Canada with a sum of considerably over £400,000,000.

Capital for Railways.

"You all know that the Mother Country has supplied almost the entire capital needed for construction of the railways of Canada, and that the prosperity of Canada has resulted mainly from the construction of those railways. The opening up of those vast lands in the West, and the cultivation of that great wheat area are bringing to Canada an amount of wealth difficult to calculate. I remember when I was here on the occasion of my last visit four years ago, the wheat production of Canada was only about one-half of what it is to-day. And we are now looking forward to Canada producing wheat possibly for the people of the United States, but certainly the greater part of the wheat we ourselves need in the Mother Country.

Loaned to Supply Food.

"You will appreciate that the investments of the United Kingdom in Canada are not entirely philanthropic. We put our money there for the purpose, first of all, of getting interest upon it. But underlying that is this point, that we put our money into Canada in order to supply the British people with the food they need for their subsistence. I need scarcely say that we also put our money in other countries for the same purposes. You will, perhaps, be interested to know that the greater part of the capital provided for the construction of railways in all the young countries of the world is supplied by the investors of the United Kingdom. It is essential for the welfare of our people that we should do so.

Britain Provides the Capital.

"I think the amount of capital we have provided for railway construction in the agricultural countries of the world is £2,000,000,000, a very great sum, but it is upon the supply of food that the prosperity of the Mother Country depends, and it is of the greatest importance that we should supply capital for the development of Canada, Argentina, Brazil—indeed, of all countries, I would say, even of the United States, for the purpose of insuring for ourselves the food and raw material we need. The fact that the United States sells to Canada so great a quantity of goods is in part due to the fact that British capital flows so freely into Canada. Briefly expressed, the position in the United Kingdom is as follows: We supply the capital, America in large measure supplies the goods, and Canada obtains the advantage.

"During the last two years, Canada has made unexampled progress, but I think the progress is small in comparison with the progress Canada is going to make in the future. Perhaps for a few years it may be necessary for Canada to go rather slow, but that will prove to be only a period of recuperation and of preparation for a much greater advance in the future."

◆

SASKATCHEWAN'S INCREASED REVENUE.

The following is a comparative statement of the revenue received by Saskatchewan's provincial secretary, Hon. W. F. A. Sturgeon, for the fiscal years 1911 and 1912:—

Source of Revenue.	1911.	1912.
Corporation tax	$62,930	$95,422
Railway tax	63,972	65,972
Companies	27,349	51,448
Foreign companies	35,542	43,830
Insurance	....	34,040
Marriage licenses	7,894	9,736
Auctioneer licenses	2,755	6,205
Pedler licenses	1,000	1,275
Motor licenses	13,040	34,645
Moving picture licenses	1,513	9,950
Libel and slander	246	230
Provincial certificates	136	209
Refunds	....	177
Totals	$216,377	$353,139

An increase of $136,762 for the past 12 months is thus indicated.

VALUE OF LIFE INSURANCE

XXXIX.

Insurance and Agriculture

BY C. A. HASTINGS

The man who works in a city, or whose work goes on steadily year by year, has no difficulty in estimating his expenditure, because he is earning a fixed income and can put aside a proportion of his earnings. He is in a splendid position in comparison to the man who is engaged in agricultural pursuits, and who has to depend upon climatic conditions—to the possible absolute disappearance of profit for a whole season. For a farmer to be successful he must be a business man, as well as understand the science of farming. More perhaps than in any other form of livelihood, a farmer must sink a considerable portion of his profits in his farm each year in the hopes of further profit in the coming year. Every farmer runs the danger of a bad year, and it is his duty to lessen this risk, so far as his dependents are concerned, and this can only be done by life insurance.

A life insurance policy means the immediate creation of an estate for the family. In previous articles, it has been pointed out, that a policy—chosen with care—represents a sound investment as well as being absolutely stable. It does not take a long time before the policy can be used as security, and a farmer very often requires financial assistance after a bad season. I am dealing with the case of a farmer who wishes to be progressive, and to succeed he must have some knowledge of financing as well as the science of farming.

Speaking generally, many farmers mortgage property and stock in order to raise a loan, which is more or less permanent. Now this loan is different to the loan made in a city which is profitable and necessary. When a farmer raises a loan, he is merely "getting out of the frying-pan to get into the fire." And still worse than this, he does not experience this extra burden.

I will take an example—"A" is earning his bread and butter on his farm and is doing well, for the returns, after paying for expenses, goes to the credit of "A's" family. Now then, "A" has a bad season, perhaps two, he mortgages portions or all of his property and dies before the mortgage is paid off. The wife has now to hire a man of experience who will not work for the mere wage of a laborer—neither will he work as early or as late as the dead farmer: then there is the interest payable on the mortgage—these outgoings have to be met before the wife and family get anything at all. Now supposing "A" had a life policy in force, large enough to meet the mortgage, the wife and family would then have the property unencumbered. Then they will have a better opportunity to derive a living. Of course, one so often hears: "It is hard enough to meet working expenses, let alone life premiums." It is quite true that it is most difficult sometimes to show a profit; but then, if it is difficult for the breadwinner, how much more difficult it is bound to be for the wife and family.

Life insurance is not a luxury; nor is it an expense—but it is a duty, and man has only got to put himself in his family's position and then it will not take him long to realize how simple—how advantageous it is, and how he can really and truly prove himself unselfish.

◆

PROPHETS ARE BUSY WITH CANADA.

Statisticians of the United States government assert that by the time Canada has a population of 25,000,000, and is able to export foodstuffs and other commodities to the amount of $1,000,000,000, a year, the United States will have a population of 150,000,000 and be in need of every eatable animal, and every bushel of wheat and other grain and of potatoes, every pound of butter and every dozen eggs that the Canadians can sell it.

Professor L. E. Horning, addressing the Canadian Club at London, Ont., the other day, predicted that at the end of this century Canada would have a population of 96,000,000 people, and said that for Canadians and Canada the greatest problem was how we should conduct ourselves for the next 25 years in our national life.

The International Mausoleum Company, Limited, Toronto, which has paid four quarterly dividends of 2½ per cent. each, has disposed of its territorial rights to the Quebec Mausoleum Company, Limited, for the province of Quebec and east thereof and to the Western Mausoleum Company, Limited, for the province of Manitoba and west thereof.

COMPANIES RECENTLY REGISTERED.

The following company has been registered to do business in Manitoba:—

Mutual Life and Citizens' Assurance Company, Sydney, Australia.

The following companies have been registered to do business in Alberta:—

Spencer Grain Company, Limited, Winnipeg, $100,000. Western Provincial Lands, Limited, Prince Albert, $1,000,000. Financieele Maatschappij Voor West-Canada (Western Canada Finance Company), Te Rotterdam, Rotterdam, $100,000.

The following companies have been registered to do business in Saskatchewan:—

The Western Canadian Advisory Board, Limited. Stewart Sheaf Loader Company, Limited.

The following company has been registered to do business in Quebec:—

The National Trust Company, Limited, of Toronto, head office, Montreal, Que.

◆

COMPANIES INCREASING CAPITAL.

The following companies in Alberta have increased their capital stock:—

Lowry's, Limited, from $50,000 to $250,000. Killam Curling Club, Limited, from $1,500 to $3,000. The Yellowhead Pass Coal and Coke Company, Limited, from $1,000,000 to $5,000,000. Edmund's Limited, from $10,000 to $50,000.

The following companies in Saskatchewan have increased their capital stocks:—

Liverpool and Canadian Realty and Investment Company, Limited, from $20,000 to $50,000. Johnson and Company, Limited, from $15,000 to $40,000.

The following companies in Canada have increased their capital stock:—

Security Realities, Limited, from $100,000 to $200,000. The Canada Paper Company, Limited, from $20,000 to $120,000.

The following companies in Quebec have increased their capital stock:—

Traders Company, from $50,000 to $60,000. The Canadian Asbestos Company, from $60,000 to $120,000.

The following company in Ontario has increased its capital stock:—

The Renfrew White Granite Company, Limited, from $180,000 to $250,000.

◆

SASKATCHEWAN COMPANIES AND THEIR FUNCTIONS.

The following is a classification of the companies in active operation in Saskatchewan during the fiscal year endin March 1st, 1913:—

Land companies are most numerous there being 241 of them. General stores number 89 elevator and milling companies 62 and lumber companies 50. The other companies are classified as below according to the registrar of joint stock companies:—

Athletic associations, 4; aerated water, 6; automobiles, 16; builders' supplies, 16; buildings, 44; brick and clay products, 18; brewing, 5; butchers, 1; boots and shoes, 2; bakers, 1; brushes, 1; bankers, 2; baseball, 2; contractors, 31; country clubs, 3; cement, 3; clothing and outfitting, 6; cemeteries, 2; creameries and dairies, 9; cartage, 8; cigars and tobacco, 1; drugs and stationery, 14; dipsomaniac home, 1.

Exhibition, 1; electric supplies, 4; fuel, 18; financial, 23; fruit, 6; furniture, 7; foundries and metal works, 21; fibre, 5; gravel and sand, 7; gas burner, 1; grocers, 8; hotels, 24; hardware, 22; harness and leather goods, 5; hospitals and sanitoria, 4; investment, 22.

Implements, 14; ice, 7; insurance, 6; jewellers, 3; live stock, 2; laundries, 9; lighting, 15; liquor, 12; marble workers, 1; medicinal water, 1; mining, 9; market gardens and nurseries, 3; mutual fire insurance, 4; musical, 2; manufacturing, 7; navigation, 1; office specialty, 1.

Printers and publishers, 26; pianos, 1; paints and oils, 3; plasterers, 1; packing and canning 4; plumbing, 3; rinks, 37; ranching and farming, 17; recreation, 14; restaurants, 1; scales, 1; soap, 1; telephone, 23; turf clubs, 11; tent and mattress, 3; traction engines, 1; theatres, 10; threshing, 1; typewriters, 1; vehicles, 1; warehousing, 10; wire fencing, 1; woodworkers, 1.

SEEKS CONNECTION WITH TRUST COMPANY

An experienced Western mortgage and trust man seeks a connection with a reputable company in Winnipeg, Saskatchewan, or Alberta. He is thorough, conservative and up-to-date in work and systems; could take charge of a loan department, collections, or books.

DEBENTURES AWARDED

Wilkie, Sask.—$13,000 15-years, to Messrs. W. L. McKinnon & Company, Toronto.

Souris, Man.—$40,000 6½ per cent. 30-years, to Messrs. Terry, Briggs & Slayton, Toledo.

Manitoba.—Komara S.D., $1,5000 6 per cent., 10 instalments; Kreuzburg S.D., $1,500 6 per cent., 10 instalments; Lowe Farms S.D., $3,500 6 per cent., 20 instalments; Lowland S.D., $1,000 7 per cent; Uno S.D., $2,200 6 per cent., 20 instalments, to Messrs. C. H. Burgess & Company, Toronto.

ONTARIO CROPS

The following crop bulletin, based on the reports of 2,000 correspondents, sent in during the first week of November, has been issued by the Ontario Department of Agriculture:

Fall wheat has been a most satisfactory crop, both as to yield and quality. While the straw was rather short, it was clean and bright.

Reports indcate an enlarged acreage, every fall wheat district promising to share in the increase. Notwithstanding the rather dry conditions at the time of sowing, the soil, as a rule, proved to be in good tilth for a seed bed, and the young fields at present are described as looking strong and promising. Only a few complaints have been made of injury from Hessian fly or other insects. Seeding ranged from the last week of August into the third week of September, the bulk of the crop being got in during the first twelve days of the latter month.

The spring wheat crop has now a comparatively small acreage in this province. Where grown it was a good average crop, both as to yield and quality.

BAD YEAR FOR HOTELS.

Monetary Times Office,
Montreal, November 19th.

The annual meeting of the Windsor Hotel took place at Montreal on Tuesday. During the past few days shareholders of the Windsor Hotel have been feeling somewhat pessimistic over the situation, it having been necessary to drop the half-yearly dividend of 5 per cent. for the last half-year, although it was only about a year ago that talk was heard to the effect that the profits of the company were so large that the directors thought of issuing a stock bonus.

The predictions which were made to the effect that there was dissatisfaction in connection with the management of the Windsor Hotel and that a change would take place in the directorate at the annual meeting were not justified in the result of the meeting, the directors having been returned by a vote of 8,000 to 1,000. Considerable criticism was indulged in, however, and an effort was made to have the financial affairs of the company given more publicity.

The Windsor Hotel seems to have made a better record than most of the large hotels. The past year, has been an unusually hard one, so far as hotels are concerned, travel has fallen off and a large proportion of the best hotels in the country, both in Canada and the United States, have had to report losses, so that the reduction in the dividend on Windsor Hotel stock to 5 per cent., from the previous 10 per cent., has some excuse.

The gross profits of the company were about $900,000 and net profits approximately in excess of 9 per cent. An appropriation of $200,000 was also taken from surplus profits to be expended on betterments.

The capital stock amounts to $1,500,000 and besides this the company has a issue of $600,000 4½ per cent. bonds. Shareholders may form some idea of the value of their assets by recalling the fact that the company owns upwards of 90,000 feet of land in one of the most favorable locations in the city of Montreal, to say nothing of the building and equipment.

The Royal Bank of Canada has opened branches at Big Valley, Alberta, and Warsaw, Ont.

FARMERS NOT HOLDING WHEAT

Western Provinces Have in Hand About Half As Much As They Had This Time Last Year

According to the report of the Northwest Grain Dealers' Association, covering the three prairie provinces, up to November 8th, the estimated amount of wheat still held by farmers, yet to market, totals 47,500,000 bushels, compared with 87,500,000 bushels last year at that date. The following are the figures issued by the association:—

Estimated Yield of Grain.

	Acres.	Bush. per acre.	Bushels.
Wheat	10,531,000	17	179,027,000
Oats	5,470,000	40	218,800,000
Barley	1,115,000	29.5	32,892,500
Flax	1,106,000	10.6	11,723,600

Wheat Situation on November 8th.

	Bus., 1913.	Bus., 1912.
Wheat inspected to date	76,911,600	45,667,000
In store at country points	19,900,000	19,300,000
In transit, not inspected	4,600,000	4,300,000
Marketed at Winnipeg	60,000	30,000
Allow for feed, seed and country mills	30,000,000	
Total	131,411,600	
Balance in farmers' hands to market	47,556,000	87,500,000
Oats inspected to date	18,760,000	8,756,000
Barley inspected to date	6,680,000	3,534,000
Flax inspected to date	3,700,000	2,475,000

The indications are that over 90 per cent. of the wheat crop will be contract grade—that is, 1, 2 and 3 northern.

Wheat Yield Placed Low.

The association places the wheat yield somewhat low, at 179,000,000 bushels, which is an average of 17 bushels to the acre.

Wheat inspected is almost double what it was last year on November 8, being 77,000,000 bushels, against 46,500,000 in 1912.

PRICES CONTINUE UPWARD

The Department of Labor index number of wholesale prices stood at 136.8 for October, 1913, as compared with 136.0 in September, and 135.0 for October last year. Corn, peas, Ontario barley, hay and bran were higher, but wheat, flaxseed, western oats and barley were lower. Cattle and beef were higher, but hogs and hog products continued to decline. All dairy products were higher except cheese. Fresh Canadian fruits and potatoes advanced but imported fruits, beans, onions and caned vegetables were lower. Record prices for jute and the highest price for cotton since 1911 raised the level of textiles. Copper, brass and lead were up, but steel, tin, quicksilver and silver were lower. Brooms were steeply up. Rope and raw rubber declined. In retail prices, meats, eggs, milk and butter were higher, but there was a general decline in potatoes as the crop came on the market. Beans, flour, rolled oats and sugar showed weaker tendencies, while evaporated apples and coal were upward. As above stated, the general effect of the month's changes was to send the level distinctly higher.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended November 14th, 1913:—Penn Canadian Mines, 51,600; O'Brien Mines, 85,940; McKinley-Darragh-Savage Mines, 84,040; La Rose Mines, 224,090; Nipissing Mines, 120,510; Cobalt Townsite Mines, 396,000; Tough Oakes Mining Company, 57,101; total, 1,019,281. The total shipments since January 1st, are now 35,048,504 pounds, or 17,524 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

The department of marine and fisheries will call for tenders within a few days for the largest and most modern equipped ice-breaker that has ever been put in commission in this or any other country. It is to be used exclusively for the St. Lawrence route. The condition governing the awarding of the contract is that the vessel must be built in Canada.

BRITISH COLUMBIA'S AGRICULTURAL NEEDS

Australia and New Zealand Visited by Commissioner—Sunlight Soap Acquires Factory

(Staff Correspondence.)

Vancouver, November 15th.

Australia and New Zealand are ahead of Canada in only two things, as far as agriculture is concerned, these being a greater development of the co-operative system and government loans to farmers, thinks Mr. Alexander Lucas, M.P.P., a member of the commission, appointed by the provincial government to enquire into agricultural development in those countries, who has returned this week from the Antipodes, where he went personally to investigate conditions.

People have not been going into agriculture in British Columbia as extensively as anticipated, and the government appointed the commission to see if anything could be done in the way of encouragement. The co-operative system was taught these countries principally by a Canadian, Prof. J. A. Ruddick, Dominion dairy commissioner. They have many co-operative cheese, butter and bacon factories, which Mr. Lucas thinks are good for the farmer. In addition to the practical and technical education given students at agricultural colleges, when a young man has completed the course he is given advice in buying a farm and in seeing that his money is properly invested.

Twenty-Seven Thousand Loans.

The system of advancing money to farmers has been in existence for years and has worked satisfactorily. The rate charged is one per cent. more than the government has to pay for it. In eighteen years in New Zealand, out of 27,000 loans, aggregating $65,000,000, there were only thirty-five foreclosures. It is not improbable that a recommendation dealing with loans will be included in the report by Mr. Lucas, since he sees no reason why the principle could not be applied here. In the Antipodes, most of the money needed is got from post-office deposits, debentures being issued as security. That being the case it is more of a matter for federal action instead of provincial. Brief reference was made by Mr. Lucas to the expansion of general trade between Canada and Australia. Merchants are anxious to do more business with the Dominion, and he is confident that some reciprocal arrangement can be entered into that will be of benefit to both countries.

Sunlight Soap Interests Acquire Properties.

The Royal Crown Soap Company, in which Sir William Lever, of the Sunlight Soap Company, has a controlling interest, has purchased 600 feet of waterfrontage in Burnaby, and that the present business located in Vancouver will be quadrupled when the plant is erected on the new site. Coupled with this is also the announcement that Sir William Lever has bought control of the soap factory of Messrs. W. J. Pendray and Sons, Victoria. The British-American Paint Company, also a Pendray concern, will remain under the same management as at present.

That the lower mainland is steadily expanding is shown further by the decision of the British Columbia Packers' Association, which will erect a cold storage plant at Steveston, which is so far advanced that the plans are completed and tenders are in, arrangements being held back until the site was secured. In addition to the cold storage business to be done by the association, there will also be a large amount of shipping.

Indications such as these show the need for the docks now under construction both on Burrard Inlet and the Fraser. Construction at New Westminster has so far progressed that the dredge is now filling in behind the bulkheads. At Vancouver the Great Northern dock has made good progress, and preliminary arrangements are now in hand for the building of the Dominion government dock.

Mr. J. J. Hill, of the Great Northern, during his visit to the city, along with other officials of that railway said present conditions are only temporary. Times of depression, he maintains, are bound to occur, especially in a country that is developing rapidly, but they will pass.

◆

The following rural telephone companies have been incoroporated in Saskatchewan:—Grand Bend Rural Telephone Company, Limited, Weyburn, $300; Hillsdale Rural Telephone Company, Limited, Simpson, $200; Tantallon Rural Telephone Company, Limited, Tantallon, $440; Durham Rural Telephone Company, Limited, Wolseley, $130.

MOOSE JAW GRINDS MUCH FLOUR

Milling Plants and Output—Mixed Farming—Railways Give Service

(Special Correspondence.)

Moose Jaw, November 18

Moose Jaw in 1901 began to take on the appearance of a thriving town, the population then being 1,500, which has increased, until this year, 1913, the population is 30,000. The Canadian Pacific Railway have there their grand divisional point for Saskatchewan, and the investment represents over $5,000,000. This company employs 2,500 men in and around Moose Jaw, and the monthly pay roll amounts to over $250,000 per month. They have 52 miles of trackage in the Moose Jaw yards, these being the third largest individually owned yards in the world.

As a grain and milling centre, Moose Jaw's position is in the heart of the greatest wheat belt of North America. During the year of 1912 there was a total of 8,184,446 acres of crops in Saskatchewan, and from this 237,278,814 bushels were harvested. This year the provincial government estimates the total crop will be 20 per cent. in excess of that of last year. To meet the increasing demands of the graingrowers, the Dominion government are erecting interior storage grain elevators in Moose Jaw at a cost of $1,000,000, these will have a capacity of 3½ million bushels of grain. In such surroundings Moose Jaw is the natural flour milling centre of central western Canada.

Chief Milling Companies.

The Robin Hood Mills Company, Limited, have a plant in Moose Jaw, and are turning out 2,300 barrels of flour per day, and 500 barrels of oatmeal. Besides this they have a porridge oats plant, cornflakes plant, grain drying plant and their own cooperage for making flour barrels.

The Moose Jaw Flour Mills Company are now erecting a plant to have a daily capacity of 1,500 barrels of flour. This plant will be in operation in the early spring.

The International Linseed Company are erecting a flax mill and have taken out a building permit to the amount of $750,000. Their plant is being erected on the ground immediately adjoining the government elevators. This mill, when completed, will have a daily capacity of 8,000 bushels of flax. Electric power is supplied to these industries by the city at from 1½ to 1¾ per k.w. hour.

Mixed Farming is Extending.

The Canadian Pacific Railway and the Grand Trunk Pacific have, during the past year, entered the city and are now giving a limited service to the citizens. Moose Jaw street railway company are now operating on 12 miles of trackage, giving a service to all the central parts of the city. The building permits for the month of September, this year, amount to $2,000,000, this being the highest figures ever reached for any one month.

Mixed farming is being taken up and with success. Vegetables, which it was thought could not be raised profitably in this country are now grown and large profits are accruing to the farmers growing them.

To the investor Moose Jaw presents a field worth investigating.

◆

ROYAL BANK'S STATEMENT.

The Royal Bank has issued a statement showing its financial position as at October 31, 1913. It reflects an increasingly strong position of the institution. The figures are as follows:—

Liabilities.—Capital paid up, $11,560,000; reserve fund, $12,560,000; undivided profits, $610,219.36;; notes in circulation, $12,799,134.29; deposits, $140,674,870.27; due to other banks, $2,648,367.16; bills payable (acceptances by London branch), $1,153,364.97; acceptances under letters of credit, $267,841.05; total, $182,273,797.10.

Assets.—Cash on hand and in banks, $30,596,734.17; deposit in the central gold reserve, $2,000,000; government and municipal securities, $3,692,169.36; railway and other bonds, debentures and stocks, $14,624,107.31; call loans in Canada, $8,815,085.98; call loans elsewhere than in Canada, $8,471,459.64; deposit with Dominion government for security of note circulation, $578,000; total, $68,777,556.46. Loans and discounts, $107,005,179; liabilities of customers under letters of credit as per contra, $267,841.05; bank premises, $6,133,220.59; total $182,273,797.10.

A branch of the Dominion Bank has been opened at the corner of Gladstone Avenue and Fernwood Road, Victoria, B.C., to be known as Spring Ridge branch, Victoria, B.C.

GOLD FROM ONTARIO MINES

Production Is Increasing—New Siderite Process Being Tried at Magpie Mine

There was a decrease in production in only two of the metals mined in Ontario during the first nine months of this year, these being pig-iron and Cobalt ore. Substantial increases were made in the other leading metals and metalliferous substances, particularly in gold, as is shown by the following returns made to the Ontario Bureau of Mines:—

Product.	Quantity.	Value.	Increase or Decrease.
Gold, ounces	159,962	$3,281,027	+ $2,163,692
Silver, ounces	23,171,536	12,967,138	+ 259,312
Copper, tons	9,237	1,311,681	+ 169,605
Nickel, tons	18,233	3,825,633	+ 457,196
Iron ore, tons	143,979	314,590	+ 213,306
Pig-iron, tons	440,954	5,792,022	— 259,956
Cobalt ore, tons	71	12,917	— 44,697
Cobalt and nickel oxides, lbs.	740,089	290,597	+ 113,811
Lead ore, tons	882	3,000	+ 3,000

The production of gold is chiefly from Porcupine where the Hollinger and Dome are the leading mines. The latter is adding 400 stamps which will double its milling capacity. Porcupine Crown and McIntyre Porcupine also contributed considerable bullion. The total yield from the Porcupine mines was $3,106,250, leaving $174,777 as the product of outside areas. These were Long Lake (Canadian Exploration Company), Swastika (Swastika Mining Company), Kirkland Lake (Tough-Oakes), Larder Lake (Goldfields, Limited), and Sturgeon Lake (Northern Gold Reef).

Greater Production of Silver.

The production of silver was slightly greater, both in ounces and value, than for the same period last year. The number of producing mines was 31, 27 being in Cobalt proper, 1 in Casey Township, 2 in Gowganda, and 1 in South Lorrain. Nipissing led with a total output of 4,387,765 ounces, followed by Coniagas with 2,662,678 ounces. La Rose with 1,903,345 ounces, and Cobalt Townsite with 1,826,422 ounces. Kerr Lake, McKinley-Darragh, Buffalo and Crown Reserve were also well up. Of the product 10,512,396 ounces were in the shipments of ore, 6,184,271 in concentrates, and 6,444,099 in bullion. By camps, Cobalt proper yielded 21,956,561 ounces, Casey 607,212 ounces, Gowganda 342,380 ounces, and South Lorrain 234,613 ounces; silver in auriferous ores, 30,770 ounces.

Nickel, Copper and Iron.

The production of nickel and copper was in excess of that of any previous 9 months. There was raised 535,265 tons of ore and smelted 569,898 tons. The Bessemer matte product was 34,243 tons, the estimated contents of which were 18,233 tons nickel and 9,237 tons copper. The Canadian Copper Company remains the principal producer, but the new and well-equipped smelter of the Mond Nickel Company at Coniston which is now in operation, will doubtless increase that company's output.

There were five iron ore mines in operation, namely, the Helen and Magpie, Moose Mountain, Bessemer and Belmont. The Canada Iron Corporation concentration plant at Trenton is now at work on ore from the Bessemer and Childs mines. At the Magpie mine the roasting plant is treating siderite from which it expels the carbonic acid gas and sulphur, thus producing a first-rate article for the blast furnace. If the process proves commercially successful, it will turn to account an immense quantity of sideritic material, hitherto but little regarded as a possible source of iron.

Four blast furnace companies produced 11,967 tons less pig-iron than was made during the corresponding term of 1912, and the average value per ton declined from $13.36 to $13.16. At Port Colborne the new furnace of the Canadian Furnace Company, a subsidiary concern of the Buffalo Union Furnace Company, was blown in on 27th September. The plant has a capacity of 300 to 325 tons of pig-iron per day.

The output of cobalt and nickel oxides, being refined by-products of the Cobalt silver ores, is steadily increasing, and had a value $176,786 greater than in the first 9 months of last year. A bounty is paid by the Ontario Government of six cents per pound on the metallic contents of refined cobalt oxide and nickel oxide.

The Great-West Life Assurance Company has opened offices at Brandon, Manitoba, under the care of Mr. R. H. Wright, district inspector.

AUDITOR ON TORONTO RAILWAY DEAL

Estimates of Results Under High-Class Commercial Management—Basis of Calculations

Toronto in October retained the services of Mr. John MacKay, the well-known and capable auditor to advise the city upon the financial and general merits of the proposed purchase of the electric properties and franchises of the Toronto Railway and Electric companies for $30,000,000.

He says in his report just issued, the Toronto Electric Light system, if purchased for $8,000,000 and amalgamated with the civic hydro system, will more than take care of its debt and the presumptive enlargements and replacements of the system. At the end of 30 years there will be a surplus of $11,000,000, or, if the city wishes to have no profit from the lighting and power system, it may reduce its rates from time to time. These reductions would amount to 6 per cent. in 1925 and to 14 per cent. in 1943, or the last year of the debenture period.

Mr. MacKay points to the various material advantages which would accrue from a consolidation of the two power services, and adds:—"In my opinion the competing power and resources of the Toronto Electric Light Company are quite equal to any strain that the hydro-electric system may place upon it. In the final analysis therefore, I think that lower rates will in the long run follow from consolidation than could by any possibility be obtained without it."

Will be Accumulated Surplus on Railway.

With regard to the Toronto Railway purchase, the auditor figures that, if the property is bought and the proposed extensions made, providing an ideal system throughout the city by 1921, there will be in that year an accumulated surplus of $11,500,000. This can be used as a sinking fund to retire all but half a million dollars of the bonds devoted to the buying of the company's so-called intangible assets. In giving these figures, Mr. MacKay says he has provided for a system which in 1921 will cover 283 miles of single track. He also has provided for turning into the civic treasury the same percentage of the railway's gross receipts as now prevails under the existing franchise. This item, he says, would amount to $13,000,000 during the period.

If the railway property be not bought, Mr. MacKay asserts, an adequate extension of the present system of civic car lines will involve an accumulated deficit of $3,750,000 in the year 1921. Since, therefore, by buying the railway and amalgamating the systems, the city will by 1921 have got back all but $500,000 of its outlay on the intangible assets. Mr. MacKay figures that of the two propositions—to buy or not to buy—the former had a financial advantage of $3,250,000, figured as of July 31 last. As of December 31 next, this would be reduced to $3,000,000 precisely.

Must have High-Class Commercial Management.

The chief assumptions on which Mr. MacKay bases his calculations are:—Continuation of normal industrial conditions, a monopoly of traction in the city, competent management, freed from all municipal or political influence or interference; satisfactory interpretation of the prevailing Niagara power contracts to be bought, a satisfactory new contract when the present contracts expire, the issue of the purchase payment bonds at par, subject to recall at par; the issue of all further bonds at a price not costing more than 5 per cent. and subject to recall at par. Mr. MacKay says in comment:—

"I am unable to measure or allow for bad or mediocre management. The city must choose between high-class commercial management, with the results indicated herein, and inferior management, with losses I am not competent to measure. But unless it chooses the former it should abandon the proposal."

FUTURE OF THE WORKING CLASSES

Mr. Roger W. Babson has just issued in America a little book, entitled "The Future of the Working Classes." It contains a simple statement of what Mr. Babson describes as the most important economic law, well understood and continually used by the great financiers, but which for self-evident reasons has not been taught to the people. The first part of the book deals with the strife between the working classes and vested wealth. The second section treats particularly of the strife between England, France and Germany. The closing chapters of the book suggest the possible solution and give the writer's conclusion that the working classes have only one chance to become prosperous. Mr. Babson tells what that chance is.

"The Future of the Working Classes," by Roger W. Babson. American edition published by Babson's Statistical Organization, 6 Congress Street, Boston. Price, 50 cents. including postage.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Lyn, Ont.—November 7—Star cheese factory. Loss and cause unknown.

Guysboro, N.S.—November 3—Glebe House. Loss and cause unknown.

Lucknow, Ont.—November 7—Mr. T. Agnew's residence. Loss and cause unknown.

Galt, Ont.—November 12—Mr. S. E. Stewart's store. Loss and cause unknown.

Gore Bay, Ont.—November 13—Mr. J. Bell's residence. Loss and cause unknown.

Carp, Ont.—November 10—Mr. J. A. Evoy's residence. Loss and cause unknown.

Bristol, N.S.—November 10—Messrs. Burrows and Reinhart. Loss and cause unknown.

Bridgeburg, Ont.—November 11—Phipp Street school. Loss unknown. Cause, stove.

Ottawa, Ont.—November 14—Windsor Hotel. Loss, $1,500. Cause, overheated motor.

Lions Head, Ont.—November 5—Mr. Pedwell's mill. Loss, $30,000. Cause unknown.

Port Dover, Ont.—November 1—Mr. A. Bellbeck's residence. Loss and cause unknown.

Amherst, N.S.—November 7—Chapman House, Church Street. Loss and cause unknown.

Lakefield, Ont.—November 7—Mr. R. C. Strickland's residence. Loss and cause unknown.

Yarmouth, N.S.—November 6—Mr. I. Murray Trask's auto. Loss, $700. Cause unknown.

Mahone Bay, N.S.—November 7—Mrs. I. Adam's residence. Loss, $1,000. Cause unknown.

Braeside, Ont.—November 7—Mr. J. Gillie's barns and stables. Loss, $2,000. Cause unknown.

Aylmer, Que.—November 1—Mrs. D. Violin's residence, Brook Street. Loss and cause unknown.

Grandview, Man.—November 10—Elevator of Grain Growers Company. Loss and cause unknown.

Cumberland, B.C.—November 13—Canadian Collieries' sawmill, etc. Loss, $40,000 Cause unknown.

Fairville, N.B.—November 14—Mr. J. Malloy's residence, Main Street. Loss unknown. Cause, upset lamp.

Gladstone, Man.—November 4—Mr. A. Dowdney's farm. Loss, $1,000. Cause, supposed lantern exploded.

Budbrooke, Thetis Island, B.C.—November 3—Captain Cleve Justice's house. Loss and cause unknown.

Sydney, N.S.—November 7—Mr. G. Wambolt's residence. Loss, $9,500. Partially insured. Cause unknown.

Yarker, Ont.—November 18—Mr. D. B. Bowman's store. Loss, $11,000, partially insured. Cause unknown.

Dixon, Ont.—November 10—Mr. Bowman's cheese factory. Loss unknown. Cause, supposed incendiaries.

Beamsville, Ont.—November 10—Mr. H. Whitten's residence. Loss unknown. Cause, overheated furnace.

Conquest, Sask.—November 2—Mr. R. Kemp's barn, etc., south of Conquest. Loss and cause unknown.

Port Arthur, Ont.—November 13—Mr. G. Dulmage's residence, 25 Jean Street. Loss, slight. Cause unknown.

Brockville, Ont.—November 11—Mr. A. Smart's residence, Hartley Street. Loss, $10,000. Cause unknown.

Blenheim, Ont.—November 7—Pere Marquette Coal Company's coal hoist. Loss, $50,000. Cause unknown.

Calgary, Alta.—November 9—Mr. R. McKnight's residence, 316 Carlton Street. Loss, $25. Cause, hot ashes.

St. Genevieve de Gifford, Que.—November 13—Two residences. Loss, $5,000, partially insured. Cause unknown.

Prince Albert, Sask.—November 13—Mr. H. Randall's residence near Goschen. Loss, $1,000. Cause unknown.

Lumsden, Sask.—November 13—Mrs. Bartz's restaurant and Mr. J. Meral's harness store. Loss and cause unknown.

East Burnaby, B.C.—November 2—Mr. W. T. Beasley's residence, Fifteenth Avenue. Loss, $1,500. Cause unknown.

Theodore, Sask.—November 6—Mr. W. I. Bucknam's stack of grain, etc. Loss unknown. Cause, dropped cigarette.

Moncton, N.B.—November 8—Mrs. Seaman's store, Hebert Building. Loss, stock, $1,000; building, $100. Cause unknown.

Sherbrooke, Que.—November 12—Mr. J. Gagne's residence, Belvidere Street. Loss, slight. Cause, child with matches.

Tangier, N.S.—November 15—Mr. J. Mason's store. Mr. J. W. Mason's house. Ice house and fish plant. Loss and cause unknown.

Portage la Prairie, Man.—November 7—Mr. J. H. Waind's farm, two and a half miles north of the town. Loss and cause unknown.

Edmonton, Alta.—November 13—Star Pantorium, 611 Fourth Street. Loss, $2,000. Cause, probably gasoline. Rear 169 Martin Street. Loss and cause unknown.

St. Thomas, Ont.—November 15—Hamilton & Stott block. Loss, $8,000, by Messrs. Houston & Company. Pere Marquette offices, St. Thomas Business College and Messrs. Hamilton and Stott. Cause unknown.

Carlyle, Sask.—November 13—Porteous Bros.' tinsmith's shop, etc. Losses: Porteous Bros., $20,000, with $11,000 insurance; Geo. Beatty, $1,000, no insurance; James Cutler, $4,000, fully covered. Cause, live coal.

Chilliwack, B.C.—November 13—Henderson Block. Loss, building, $8,000. Insurance, $5,000. Occupants, Mr. Chapman, $2,000; Mr. R. A. Henderson, $1,000. Losses unknown. Lillie Grocery Company, the Parker Clothing Store, W. R. Gilbert Company, drygoods and Carlson, tailor.

Saskatoon, Sask.—November 3—Mr. J. T. Bland's residence, 1326 Avenue H North. Loss, contents, $150; building, $250. Insurance, $450. Atlas Insurance Company. Cause unknown.

November 4—Mr. W. McKay's barn, 117 Avenue P South. Loss, $100. Insurance, $300. Continental Company. Cause, children playing with matches.

Montreal, Que.—November 10—Canadian Underwear Company, 309 Notre Dame West. Loss, $500. Cause unknown.

November 12—151 Dufresne Street. Loss and cause unknown; 26 Agilda Street, Longue Pointe. Loss and cause unknown; Dominion Iron Bound Box factory, Levis and Notre Dame Streets. Loss, $3,000. Cause unknown; 467 Stewart Avenue Outremont. Loss, $1,000. Cause unknown.

Vancouver, B.C.—November 3—P. C. McKenzie's residence. Loss and cause unknown.

November 17—Business section. Losses, total, $300,000. Ontario Lamp and Lantern Company, stock, $30,000. Insurance, $30,000. Total loss; Chambers Brothers, stock, $6,000. Insurance, $6,000. Total loss; Donkin and Company, stock, $15,000. Insurance, $15,000. Total loss; Imperial Varnish Company, stock, $40,000. Insurance, $40,000. Total loss; Hot Point Electric Company, stock, $10,000. Insurance, $10,000. Total loss; Mussens, Limited, stock, $15,000. Insurance, $15,000. Total loss; David Spencer, Limited, stock, $45,000. Insurance, $45,000. Loss unknown, mostly groceries; Kelly and Douglas, stock in building affected, $150,000. Insurance, $150,000. Loss unknown; Gault Brothers, stock, $300,000. Insurance unknown. Loss unknown, but mostly cause by water; F. Nicolas and Company, Limited, offices destroyed. Insurance unknown. Loss unknown.

Toronto, Ont.—November 11—Mr. S. Carruther's residence, 67 Richmond Street. Owned by A. Carrick. Loss, $25 contents. Insurance, $500. Cause unknown.

November 13—Mr. M. Adamson's shed, 377 Yonge Street. Owned by Boulton Estate. Loss, building, $25; contents, $50. Cause unknown; Mr. C. Ling's store and dwelling, 209 Brock Avenue. Loss, contents, $25. Cause, overheated stove; Toronto General Hospital, Nurses' wing. Loss, contents, $15; building, $50; Mr. G. B. Smith's residence, 454 Sherbourne Street. Loss, building, $100; contents, $25. Cause, mice and matches.

November 15—Mr. Hamilton's residence, 390 Danforth Avenue. Loss, building, $5; contents, $25. Cause, children and matches; Mr. W. B. Clark's residence, 157 Dovercourt Road. Loss, buildings, $50; stock, $50. Cause, gas stove exploded; Mr. H. Haig's shed, 68 Jackman Avenue. Loss, buildings, $150; contents, $20; Mr. Walker's shed, rear 621 Carlaw Avenue. Loss, $150. Cause, supposed incendiary; 20-24 Rochdale Road, Earlscourt. The houses were owned by Mr. and Mrs. William Bullock, No. 20, a store and living apartments. Loss, $2,000. Insurance, $300; Mr. and Mrs. A. Wilson,. No. 22, damage, $1,200. Insurance, $400; Mr. and Mrs. Maisongard, No. 24, damage, $1,000. No insurance.

November 16—Shed, rear 108 Browning Avenue, owned by Mr. J. O. Rielly, 58 Colborne Street. Loss, $75. Cause, supposed incendiary; Stanley Barracks. Loss, $50. Cause unknown.

◆

Stratford has rejected a by-law to spend $20,000 on new fire apparatus, and another to guarantee the bonds of the Avon Hosiery Company.

The earnings of the Dominion Park Company, Limited, for the year amounted to $206,302, which, after deductions for operating expenditure, bond interest, dividends and various writings off, was sufficient to leave a balance of $34,394 to be carried forward to surplus account.

VANCOUVER'S OCTOBER FIRES.

The total damage by fire in Vancouver for October was $15,083; the insurance loss was $14,378, leaving the property loss above insurance $660. The total value of property involved was $375,600. 8,700 feet of hose was laid at fires and 1,123 gallons of chemical was used. There were 45 alarms during the month divided as follows:—Fires where damage occurred, 18; smoke scares, 4; false alarms, 4; chimney fires, 4; bush fires 3; small fires where no damage occurred, 11; fires outside city limits, 1. A complete list of fires where damage occurred follows:—

October 1st—Telephone alarm at 6.57 a.m. to 1304 Jervis Street, owned and occupied by A. R. Waterfall. Fire in wall behind range in the kitchen caused by clothes on line over the range catching fire. Blaze confined to kitchen. Damage, $101, covered by insurance. Telephone alarm at 1 p.m. Small fire on roof at 330 Union Street caused by sparks from chimney. Building owned by D. McNarr and occupied by D. F. Fonk and used as a dwelling. Damage, $10, covered by insurance. Alarm from Box 131 at 7.10 p.m. Fire in three-story brick building at the S.W. corner of Powell and Princess Street, owned by M. Whitman and occupied by William Pugh and used as a rooming house. The fire started in the basement in the rubbish chute and was evidently caused by a lighted cigar being thrown down the chute. The blaze broke out on the three top floors before being extinguished. Damage, $175, covered by insurance.

October 2nd—Telephone alarm at 4.36 p.m. Small fire on roof of barn in rear 1173 Haro Street, caused by an electric light wire, which led into the house, falling on roof of barn. Building owned and occupied by D. K. Campbell. Damage, $5. Telephone alarm at 6 p.m. to the 3500 Block William Street, where a frame wood-shed and wood-pile was destroyed. Fire caused by sparks from stump pile on street. Shed and contents owned by W. Brown. Damage, $300.

October 4th—Telephone alarm at 1.15 p.m. to 666 Broadway W., owned and occupied by J. M. Park. Fire in kitchen on the second floor caused by an explosion of shellac when Mrs. Park was sealing a hole in cork of shellac bottle with candle grease. Damage, $350, partly covered by insurance.

October 9th—Alarm from Box 1329 at 12.45 a.m. Fire in two-story vacant house at 2135 Seventh Avenue W., owned by W. R. Stephenson. The blaze started in the garret in the east side of the house and was evidently caused by electric wires, the building being almost destroyed before the fire was extinguished. Damage, $1,648, covered by insurance.

October 12th—Telephone alarm at 10 p.m. Small fire in kitchen at 1967 Venables Street caused by a defective chimney. Building owned by Trites, Limited and occupied by W. Irvin and used as a dwelling. Damage, $22, covered by insurance.

October 14th—Verbal alarm at 9.10 p.m. to 811 Seymour Street, where a two-story frame dwelling was on fire. The blaze evidently started from sparks from the kitchen range and had a good start when the fire apparatus arrived, but was quickly brought under control. Building owned by W. Labelle and occupied by Miss McKee and used as a rooming house. Damage, $1,284, covered by insurance. Alarm from Box 31 at 11.05 p.m. Fire in Wray and McKee's clothing store at 21 Hastings Street W., owned by H. A. Jones. The blaze apparently started in a clothes cleaning room in the rear of the store and was caused by sparks from a stove which had been left burning. Considerable damage was done to the stock by smoke. Building occupied by stores and rooming house above. Damage, $4,106, covered by insurance.

October 17th—Telephone alarm at 7.45 p.m. to the Connaught Hotel, 435 Pender Street W. Fire in floor of kitchen caused by an over-heated range. Building owned by William Walsh and occupied by Passerina and White. Damage, $200, covered by insurance.

October 19th—Telephone alarm at 4.10 a.m. to 971 Main Street, owned by Mr. Andrews and occupied by the Great West Smelting and Refining Company. Small fire under wharf caused by a defective base under melting pots. Damage, $5.

October 20th—Telephone alarm at 7.50 p.m. Fire in Taxi Cab No. 6336 in rear of 824 Pender Street W., caused by backfire in carburettor. Machine owned by Bailey and Stitch. Damage, $100.

October 21st—Alarm from Box 137 at 12.57 a.m. Small fire in three-story frame apartment house at 1778 Powell Street, owned and occupied by T. Isone. The blaze started in a woodshed at the side of the building and ran up the wall, and was apparently caused by a cigar being thrown from an upstair window. Damage, $100, covered by insurance.

October 23rd—Telephone alarm at 7.24 p.m. to 1075 Granville Street, a one-story brick building occupied by McBurney and Taylor and used as a shoe store. Small fire in rear of store, caused by an overheated stove setting fire to some curtains. Damage, $405, covered by insurance.

October 25th—Telephone alarm at 11.03 a.m. Small fire in rear of Lee and Wood's wall-paper store at 523 Broadway W., caused by some floor wax catching fire when being heated on a gas burner. Building owned by A. M. Forbes and used as stores and apartments above. Damage, $68, covered by insurance.

October 26th—Alarm from Box 12 at 2.35 a.m. Fire at 634 Granville Street owned by William Dick and occupied by Miss R. D. Bernard and used as a millinery store. The blaze was evidently caused by an electric iron being left turned on causing an explosion of leaking gas, considerable damage being done to the contents of the store. Damage, $5,301, covered by insurance.

October 30th—Telephone alarm at 4.18 p.m. Fire in two-story frame building at 412 Columbia Avenue, owned by H. A. Jones and occupied by The Greek on the second floor and N. Janes on the main floor and used as a fruit store and restaurant. The blaze started in the ceiling over the range and was caused by a defective vent pipe. Damage, $858, partly covered by insurance.

The total number of alarms was 45; false alarms, 4; chimney fires, 4; value of property involved, $375,600; loss, $15,038; insurance paid, $14,378; loss above insurance, $660; hose laid at fires, 8,700 feet; chemical used, 1,123 gallons.

◆

FIRE INSURANCE COMPANIES AND PREVENTION

Commissioner Preus, of Minnesota, recently quoted the following figures as having been furnished by the National board of fire underwriters to show what the fire insurance companies belonging to the National board expended during the year 1912 for the lessening of fire waste:—

National Board of Fire Underwriters	$ 130,000
National Fire Protection Association	18,500
Underwriters' Laboratories	113,500
State Fire Marshals	289,000
Support of fire departments through State tax	1,700,000
State Fire Prevention Associations	150,000
Salvage Corps	900,000
Total	$3,301,000

The commissioner also quoted an estimate by a well-known company manager that six million dollars are annually being expended by the stock companies for fire prevention purposes. During 1912 the premiums received by fire insurance companies were approximately $290,000,000—of this amount 2.07 per cent. was expended for fire prevention. Again, the expenses of the companies were, in round figures, in 1912 approximately $120,000,000—5 per cent. thereof being expended for fire prevention. "I believe and dare to assert," said the commissioner, "that the fire insurance interests have done more for fire prevention than both the great assured and the politician."

◆

SHERWIN-WILLIAMS REPORT

Net earnings of $558,562.80, equal to 18.62 per cent. on the preferred stock and 8.71 per cent. on the common stock, were shown in the annual report of the Sherwin-Williams Company of Canada, Limited. Earnings for the year, providing for depreciation and bond interest, amounted to $763,346.35, an increase over the previous year of $166,432.21.

After writing off $64,600 for depreciation and $140,186.55 bond interest, net earnings were shown to be $558,562.80. A special reserve account has been set up, and $100,000 transferred to it out of last year's profits.

The amount carried to surplus is $248,562.80, which, added to $300,000 carried over from last year, makes a total surplus of $548,562.80.

Reserves and surplus now amount to $936,287.37.

Although 8.71 per cent. was earned on the common stock, no dividends were paid, because it is the company's policy to add to the reserves until a certain stated amount is reached.

◆

"The great business and financial depression which hangs over the North American continent to-day is due to railway persecution. This is the great fog, and all other causes are trivial. The population and legislatures of the United States have driven many of their main railroads to the verge of bankruptcy and yet there is no country in the entire world which was served with such good railways or such low and reasonable rates. All this persecution has risen on a false foundation, wherein a few blatherskites have taken things in their own hands and made deplorable conditions for both the public and the railways."—Sir William Van Horne, at Toronto.

ONTARIO INDUSTRIES TO BEAR COMPENSATION BURDEN

Provincial Government Receives Commissioner's Final Recommendations

A draft bill on workmen's compensation was submitted to the Ontario legislature in April. The investigating commissioner, Sir William Meredith, has since been analysing the various objections to that measure. His final report is now complete and has been handed to the Ontario government. If this is adopted the workman of Ontario will be insured against accidents, from minor hurts that keep him from work more than seven days, to death itself, and against disease arising from the industry in which he is engaged. This insurance will give him or his dependents compensation equal to 55 per cent. of his earning power, and will be turned over to him through the agency of a government board that will be given all the power needed to see that by no mischance, by no industrial failure, will his compensation be lost to him.

If he is the employe of a railway, navigation, telephone, or electric light company his employer must compensate him for any injury out of individual resources upon the direction of the board. If engaged in any of the scores of industries not covered by the schedule his compensation will come from a fund raised by assessments upon the employers according to their hazard grouping.

Suggests Collective System.

The commissioner has thus decided that only through a collective system by which all industries of a certain class are jointly liable for injuries to their workmen will the injured man be protected, but that with the big corporations, such as railways, telephone companies, and similar public utilities that are not to the same extent subject to callapse, compensation may be borne by the employer individually, subject to such safeguards as the board may at any time consider necessary.

Sir William intimates that there is no logical reason why farm hands, domestics and employes of wholesale and retail establishments should be excluded, but doubts whether the state of public opinion would justify such a comprehensive scheme.

Finally, for the workman or workwoman who does not come within the many classes specified, who is not in a position to collect insurance under either the individual or collective system—for the clerk, the domestic and the farm hand, the new law will wipe out those stumbling blocks that in common law have in the past stood between the injured person and justice—"assumption of risk," "contributory negligence" and "common employment."

Better Suited to Ontario's Requirements.

After considering the views of the Canadian Manufacturers' Association, which leaned to the Washington state system, and of the workmen who favored the English plan, the commissioner finds that the German system is more suited to the Ontario requirements than either. With the English individual system he considered there was not sufficient security for the workman.

Referring to the criticism of the experts that the German system of levying only sufficient to meet compensation payments from year to year with a reserve for times of catastrophe or trade depression meant a rolling up of the burden on the employer of the future, Sir William suggests that he is not convinced as to how far the German system affords a safeguard against these dangers, and for that reason lays down no hard and fast rule as to the reserve to be maintained, leaving that to the judgment of the board with the government as an added judge.

◆

PAY HIGH FOR SHORT TERM LOAN.

In order to meet certain pressing liabilities in the nature of liens and charges on some of the properties, etc., $3,000,000 8 per cent. registered secured notes of the British Canadian Lumber Corporation, Limited, have been offered in London at 95 per cent. Repayment is to take place on December 31, 1916, at 107 per cent., or previously at the same price, in whole or in part, at the corporation's option, on three months' notice. The company was formed early in 1911, and for that year paid the dividend on its preference shares publicly subscribed, but for 1912 there was no distribution on either class of shares, profits having been seriously prejudiced by adverse market conditions and the destruction of one of the company's mills, since replaced.

There were 2,268 motor licenses issued in Saskatchewan during the last fiscal year and 138 motor cycle licenses.

WORKMEN'S COMPENSATION; BENEFIT AND DISABILITY

Problem to Determine Schedule—Four Classes of Relief

The first and most obvious quantitative problem that one meets in the framing of a compensation law is the determination of a schedule connecting the amount of the benefit with the degree of disability, writes Professor A. W. Whitney, of the New York insurance department. It is of the utmost importance that this schedule should fit industrial needs. If social insurance is to be the powerful instrument that we hope in doing away with poverty, relief must be applied where it is most needed; there must be no waste. And that means that such a schedule must be founded on a sociological analysis of the needs of the worker.

Relief in Four Ways.

The relief will for the most part fall into four classes: (1) medical and surgical aid at the time of the accident, (2) payments during temporary disability, (3) payments for permanent disability, (4) payments in case of death.

In theory at least, the first and second of these are not difficult to analyze. What is needed is obvious, although there may be practical difficulties in the accomplishment. In the first case it is evident that humanity demands that the worker should have whatever relief is necessary to put him back into working condition, so far as that is possible, and it seems reasonable to suppose that such treatment will also turn out in the long run to be most expedient for the employer.

Percentage of Wages.

In the second case what is needed is evidently such a percentage of his wages as will be sufficient to support the worker and his family pending recovery and return to work. The California schedule gives, in the first case, reasonable medical and surgical aid for a period not to exceed six months, and, in the second case, 65 per cent. of wages during the period of temporary disability, with, however, a waiting period of two weeks to discourage malingering.

In the third and fourth cases, however, it is not so immediately obvious what the situation demands, even were the case not complicated by the compromise that must be made between what is desirable and what, at least at present, is possible.

◆

TRUST AND LOAN COMPANY OF CANADA.

The annual report of the Trust and Loan Company of Canada for the six months ended September 30th, 1913, shows net profits for that period of £62,182, and after carrying to the reserve fund the moiety of profits over 6 per cent. per annum on the paid-up capital of the company—viz., £22,091, the amount at credit of revenue, including £2,757 brought forward from March last, was £42,848. Out of this amount the directors have written down the cost of issue of debenture stock by £12,197 placed £1,500 to the special reserve account (bringing the amount of this fund to £105,000), and provided £961 for income tax, leaving a balance of £28,189 available for distribution.

The directors have decided to distribute out of this balance of £28,189, an interim dividend at the rate of 9 per cent. per annum for the six months, free of income tax, on the paid-up capital of the company, leaving a balance of £1,189 to be carried forward. During the period embraced by these accounts the statutory reserve fund has been charged with £4,945 for depreciation in the value of investments. This fund now amounts to £352,026, compared with £336,169 on March 31st, being an increase of £15,857.

The company has authorized capital of £5,000,000, of which £3,000,000 is subscribed and £600,000 is paid up. There is a statutory reserve of £352,026 and a special reserve of £105,000. While the company's head office is in London, it has an excellent organization in Canada, consisting of the following officers:—Capt. R. D. Macdonnell, chief commissioner, Winnipeg; Col. L. Edye, commissioner, Montreal; J. Campbell, Esq., commissioner, Regina; E. R. Whitehead, Esq., assistant commissioner, Winnipeg; R. C. Young, Esq., assistant commisioner, Montreal.

The following are the directors of the company:—The Hon. Sidney Peel, president; Sir Vincent Caillard, vice-president; the Lord Stratheden and Campbell; Frederick Henry Scott; Russell Stephenson; Fred W. Stobart; J. H. Newcomb; Capt. R. D. Macdonnell (resident in Canada).

The company's statement will prove very satisfactory to the shareholders. The Trust and Loan Company of Canada has an excellent reputation.

SCHOOL DISTRICTS AND BOND PAYMENTS

Saskatchewan Government Issues Circular—Western Cities' Public Utilities

The following circular letter which has been sent by the Saskatchewan government to officials of school districts in the province which have defaulted in regard to their debenture coupons:—

"The department of education is advised that your district is in default in respect of its debenture coupon. I am directed to state in connection therewith that it is of the utmost importance to the credit of your district and of all school districts in the province issuing debentures that your debenture coupons be paid promptly when due, as default in only a few cases seriously affects the standing of this class of securities in the judgment of investors. It is probably only necessary to point out this fact to your board to induce a special effort to clear up any overdue debenture payments. The department realizes that it has been difficult to obtain funds this year from any source. On the other hand the minister has been assured by general managers of banks having branches in Western Canada that accommodation is available for school districts when funds are required to meet payments on debentures. Kindly attend to the matter at an early date and advise the department what settlement your board is able to make."

May Deal With Three Banks.

Members of the Calgary's finance committee are considering a proposal to have the three public utilities of the city financed hereafter by separate local banks, each utility to be conducted independently instead of being lumped as are now.

Fort William's civic improvement for the present year will total close to $900,000, which includes, extensions to water lines, sewerage and sewerage disposal, road work, extensions to street railway, telephones and electric light.

Edmonton to Vote on Gas Supply.

There are now prospects that Edmonton citizens will be supplied with natural gas. The city council have closed provisionally with one of three gas offers submitted, and have decided to submit to the ratepayers for ratification an offer from the Pelican Oil and Gas Company to deliver gas to the city at the city limits at a cost of 15 cents per thousand feet. There will also be submitted to the ratepayers at the same time an alternative proposition authorizing the expenditure by the city of $100,000, or as much of this sum as may be necessary, in prospecting for gas nearer the city than the Pelican field.

There being no signs of an early sale of school debentures, the Victoria board of school trustees at its regular monthly meeting determined that no further contracts for the construction of new schools shall be let.

◆

COMPANIES CHANGING NAMES.

The following companies in Ontario have changed their names:—

The National Boxes, Limited, to the National Paper Goods Company, Limited. J. R. Shuttleworth and Sons, Limited, to Shuttleworth-Carew, Limited. The Commercial Land Company, Limited, to Commercial Realty Investments, Limited. Woods-Norris, Limited, to Norris-Patterson, Limited.

The following company in Quebec has changed its name:—

Massicotte and Freres Incorporated to Gagnon and Massicotte Incorporated.

The following companies in Alberta have changed their names:—

The William Sugarman Company, Limited, to B. Lauer and Company, Limited. Smith and Whitney, Limited, to Whitney and Company, Limited. The Arrow Lakes Canning Company, Limited, to the Lakes (B.C.) Canning Company, Limited.

The following companies in Manitoba have changed their names.—

Land Corporation of Canada, Limited, to Canadian Land Corporation, Limited. The Canadian Credit Men's Association, Limited, to the Canadian Credit Men's Trust Association, Limited.

◆

At the annual meeting of Brantford Life Underwriter's Association, the officers for the ensuing year were elected as follows:—Mr. L. E. Percy, president; Mr. F. J. Reid, vice-president; Mr. D. Thorburn, secretary; Mr. L. W. Wood, treasurer; executive committee, Mr. John Burbank, with the president and vice-president.

WESTERN ALBERTA'S OIL AND GAS

Commercial Value of Strike Is Not Yet Proved—Geological Survey Is Investigating

The Geological Survey has received a sample of the oil recently struck in No. 1 well, of the Calgary Petroleum Products Company, situated at Black Diamond, sixteen miles west of Okotoks, Alta. This oil was struck at a depth of about 1,560 feet. It is what is technically known as a "white oil," being transparent and of an amber color. It is phenomenally light for a natural mineral oil, having a specific gravity of about 62 Baume. Evidently it consists largely of gasoline. In fact it has been successfully used in its raw state in place of gasoline in an automobile.

"White oils" are rarely found in quantity. They would appear to be the result of filtration through clay strata, under pressure, of the lighter portions of ordinary petroleum. That this has occurred in the present instance is made probable by the fact that at a higher horizon in this well a flow of gas of 2,000,000 feet a day, was struck. This gas is also peculiar in the large amount of gasoline in contains. It probably represents a further stage in the process of filtration.

Commercial Value Is Unproved.

The amount of oil present has not yet been determined, so that the commercial value of the strike is still unproved. If the amount of gas encountered in the higher level is any criterion, this may prove to be the exceptional case and a considerable quantity of oil, for a "white oil," be obtained.

Whether oil is present in large quantities or not, the strike is of importance as the "white oils" are usually found only in the vicinity of large bodies of the ordinary petroleum. Thus it is an excellent indicator.

Mr. D. B. Dowling, of the Geological Survey, who visited the well shortly before the strike was made, reports that the well is located on an anticline, in shales of the Pierre Formation, and that the oil was encountered in underlying Belly River beds.

To Study Geology of District.

On either side of the anticline overlying Edmonton beds are exposed. Going eastward, therfore, the covering will rapidly thicken. Westward toward Moose mountain, according to the work of Mr. D. D. Cairnes of the survey, the formations are folded into a number of anticlines bringing lower formations to the surface, and in Moose mountain faults are encountered. Between this vaulted ground and the well are several anticlines where prospecting for oil might be undertaken. These anticlines probably run in the direction of the main structural lines, that is, roughly parallel to the mountain ranges. Mr. D. B. Dowling, of the Geological Survey is now in the field, having been commissioned by the director to examine the well and make a study of the geology of the district.

◆

LIFE INSURANCE AND THE BRIDE

Several states in the Union have adopted laws providing for a physical examination of the prospective bridegroom and a refusal of the marriage license to all who fail to pass. But securing a certificate of health, and presenting it to the interested parties is a rather uncanny affair, says Elbert Hubbard.

Altogether it involves a degree of publicity that is rather embarrassing for quite a number of people concerned.

Nature works by indirection. She gets the thing she wants by going after something else.

In this matter of eugenics let us take a lesson from the dame.

My suggestion is that every man, before the marriage ceremony is performed, comply with one little requirement.

That is, let him present to the prospective bride an insurance policy on his life.

The size of the policy he can fix himself. The amount will mirror his financial status, not his love. Let it be for a minimum of, say, one thousand dollars, with no limit to the ante on the maximum.

A life insurance policy implies the health of the individual, and all medical examiners will understand and appreciate the importance as well as the import of "a bridegroom's policy."

An insurance policy puts the whole thing on a gracious, graceful and generous ground.

Another branch of the Bank of Nova Scotia has been opened in Havana to be known as Monte Street branch, under the management of Mr. Antonio Martin.

Russell KNIGHT

Our ambition was, and is to-day, to make the RUSSELL-KNIGHT the final type of motor car on the market. We were content to spend years and a great deal of money to make certain that the RUSSELL would be the most advanced car of the time. We wished to perfect what was already conceded an advanced product.

We could have placed upon the market a car that would have compared most favorably with our competitors, yet we waited—waited until our ambition could be realized, rather than give to eager purchasers a car that was incomplete in any detail.

We have refined and improved our car, until to-day our owners speak as these have written. (Their names and addresses can be secured from any Russell Branch or Agent.)

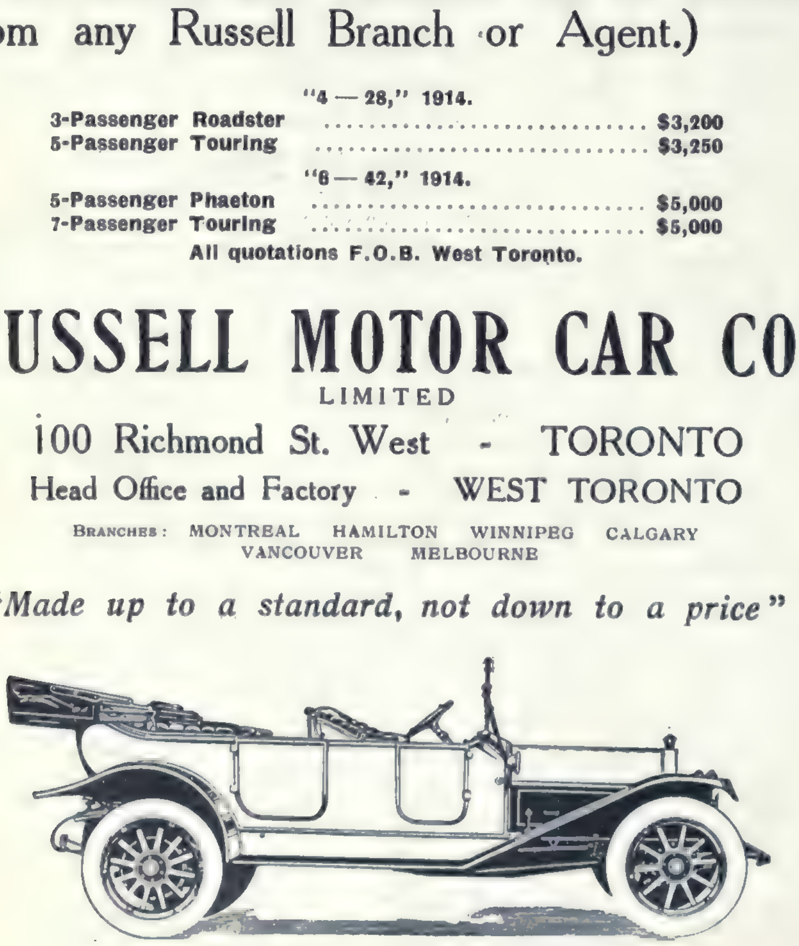
"Made up to a standard, not down to a price"



No. 1.

Toronto, August 22, 1913.

Russell Motor Car Co.,
Ltd., City.

Gentlemen:

With reference to the Model "28" touring car purchased by me from you on April 1st. I have now driven this car over 2,500 miles with every satisfaction.

The self-starter has never failed to start the car. It is both efficient and very powerful.

The electric lights and horn have also worked splendidly.

The heating system under the rear seat has been used on night trips, and added very greatly to the comfort of the rear-seat passengers. The second wind-shield is invaluable.

I consider the lines of the car and its general finish extremely beautiful.

This is the third Russell car I have had. The springs are excellent—I have ridden in a great number of other more expensive cars, but have yet to find one that rides so comfortably.

Up to the present time the car has not cost me a dollar for repairs, nor have I had any difficulty with it on the road.

Yours very truly,

(Name on request.)

No. 2.

Hamilton, Ont.,
October 22, 1913.

Russell Motor Car Co., Ltd.,
24-26 Charles Street,
City:

Gentlemen:

I have just returned from a 1,300-mile motor trip, and I want to express to you my entire satisfaction with the way my "Russell" car made the trip. I have paid practically no attention to its mechanism, and as I let my chauffeur go two or three weeks ago, I naturally hesitated somewhat about undertaking such a long trip alone.

However, the car ran perfectly, and aside from a little tire trouble we had no difficulty the entire trip.

The car seems to be very easy on tires. With but one exception, all my tires have gone over 5 000 miles before we even had a puncture.

It is easy-riding, noiseless, and powerful. We took all the hills through the Berkshires on high, although some of them were quite steep and long. We have covered over 8,000 miles, and the car runs as well to-day as it did at the start.

Wishing you every success in building a purely Canadian car, I am,

Sincerely,

(Name on request.)

DEBENTURES FOR SALE

$100,000 DEBENTURES FOR SALE.

TOWN OF HIGH RIVER, ALBERTA.

Sealed tenders addressed to the undersigned, will be received up to December 10th, 1913, for the purchase of $100,000 6½ per cent., 30-year Waterworks and Sewerage Debentures of the Town of High River.

By-law authorizing confirmed by Special Act of Alberta Legislature, 1913.

May be issued in one series repayable in equal annual instalments of principal and interest coupons attached; or separate series for instalments of principal due each year with coupons attached for annual payments of interest thereon.

Highest or any tender not necessarily accepted.

GEO. E. MACK,
Secretary-Treasurer.

Box 306, High River, Alta.

COUNTY OF PERTH DEBENTURES.

Tenders will be received by the undersigned up to 2 o'clock p.m., on Tuesday, the 2nd day of December, 1913, for $51,000 of County of Perth Debentures, payable in ten years and bearing interest at 5 per cent.

GEO. HAMILTON,
Treasurer.

Stratford, Ont., November 10th, 1913.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

FIRE INSPECTOR—Position as such wanted by a man of six years' experience as Inspector. Excellent record, references and good connection. Box 275, *Monetary Times,* Toronto.

Subscription rights to the new issue of Montreal Power stock expired this week, and except for a few belated returns the payment of the first instalment of 25 per cent., or $425,000 on the $1,700,000 had been completed.

The Canadian Autobus Company, of Montreal, of which Mr. Duncan McDonald is president, has formerly offered to build an underground railway for Montreal in addition to running the autobus service on the streets.

CANADA'S NEW COMPANIES

Forty-three Corporations With Fourteen Millions Authorized Capital Have Been Incorporated

The special interests of various provinces are reflected in the weekly list of Canada's newly incorporated companies. Quebec's list includes a steamship company and manufacturing concerns.

Fur and oil are the resources of New Brunswick, which are represented. British capital being interested in the oil flotation. Ontario contributes land, exploration, mining, and canning companies, also one designated the Baffins Bay Company, while manufacturing companies are most prominent in Manitoba's quota, and British Columbia is shown to have granted charters to logging and exploration companies.

Three companies are interested in the brass and bronze industry, two of them having capital of over $1,000,000.

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	Number of companies.	Capitalization.
Manitoba	8	$2,355,000
British Columbia	6	760,000
Quebec	13	2,730,000
New Brunswick	2	3,250,000
Ontario	14	4,955,000
	43	$14,050,000

It will thus be seen that the new incorporations number forty-three, and that the head offices of these companies are located in five provinces. The total capitalization amounts to $14,050,000. The largest companies being as follows:—

Trent Valley Canners, Limited, Trenton, Ont.	$1,000,000
Trust and Realty Company of Canada, Limited, Toronto	1,000,000
J. Robinson, Limited, Winnipeg	1,000,000
Northwestern Brass, Limited, Winnipeg	1,000,000
The Ore Extension Mining Company, Limited, Hamilton, Ont.	1,500,000
Canadian Bronze, Limited, Montreal	2,000,000
Atlantic Oilfields, Limited, Fredericton, N.B.	3,000,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Welland, Ont.—The Hungarian Club, V. Subosits, L. Molar, J. Kalamar.

Ottawa, Ont.—Western Social Club of Ottawa, P. Joyce, A. Boutet, L. T. Lortie.

Woodstock, Ont.—Blair Brothers, Limited, $100,000. B. Blair, J. C. Blair, A. Blair.

Arthabasca, Que.—The Arthabasca Cigar Company, $15,000. T. Maheu, H. Pepin, A. Maheu.

Saint Sylvere, Que.—Saint Sylvere Company, Limited, $20,000. A. Brunelle, E. Mailhot, H. Deshais.

London, Ont.—Ontario Furniture Company, Limited, $50,000. C. E. Keene, O. G. Keene, N. H. Keene.

Fredericton, N.B.—Atlantic Oilfields, Limited, £600,000. A. J. Gregory, J. J. Fraser Winlow, J. B. Gregory.

Bridgeburg, Ont.—The Purifico Company, of Canada, Limited, $40,000. C. W. Diffin, C. A. Diffin, G. Tait.

Breslau, Ont.—Breslau Wood Products Company, Limited, $25,000. J. H. Dixon, E. H. Dedels, A. Becker.

Walkerville, Ont.—Fisher Motor Company Limited, $600,000. C. F. Garaghty, F. E. Fisher, F. W. Vollans.

Hamilton, Ont.—The Ore Extension Mining Company, Limited, $1,500,000. L. R. Lupton, D. Fretz, G. Laws.

Trenton, Ont.—Trent Valley Canners, Limited, $1,000,000. B. H. L. Symmes, G. W. Morley, M. L. Gordon.

St. John, N.B.—Gaspé Fur Farmers, Limited, $250,000. E. Robinson Machum, A. H. Chipman, F.A. Dykeman.

Montreal Indoor Tennis Club, Limited, $20,000. W. G. Pugsley, G. G. Hyde, G. Williamson.

◆

SASKATCHEWAN AND RIGHTS OF MORTGAGES

A Winnipeg correspondent writes *The Monetary Times*:—"I am not much interested in the proposed co-operative loaning. It is so impracticable that it is hardly deserving of space. The proposal that half a dozen farmers should endorse a neighbor's application and guarantee, to some extent, the repayment of his loan is absolutely fatal to the scheme. We have the greatest difficulty in arranging loans to old men of seventy and upwards to get one of their children to join in the mortgage. There are two or three applications on my desk at present, which seem likely to fall through because the boys will not help the old man, and we are reluctant to give a loan to an aged farmer.

"Of much more importance to both borrowers and lenders is the constant interference by the legislature with the rights of mortgagees. The subject deserves a thorough investigation."

DIVIDEND NOTICE

CANADIAN PACIFIC RAILWAY COMPANY

Head Office, Winnipeg

DIVIDEND No. 14

Notice is hereby given that a dividend at the rate of six per cent. per annum upon the paid-up capital stock of this bank has been declared for the six months ending November 29th, 1913, and that same will be payable at its banking house in this city and at all its branches on or after the **second day of December** to shareholders of record of the fifteenth day of November, 1913.

By order of the Board.

ROBERT CAMPBELL,
General Manager.

Winnipeg, October 21st, 1913.

THE HOME BANK OF CANADA

NOTICE OF QUARTERLY DIVIDEND

Notice is hereby given that a Dividend at the rate of Seven per cent. (7%) per annum upon the paid-up Capital Stock of this Bank has been declared for the three months ending the 30th of November, 1913, and that the same will be payable at its Head Office and Branches on and after Monday, 1st December, 1913. The Transfer Books will be closed from the 16th to the 30th November, 1913, both days inclusive.

By order of the Board,
JAMES MASON,
General Manager.

Toronto, October 23rd, 1913.

APPRAISAL COMPANY REORGANIZED

The business of the Dominion Appraisal Company has lately been reorganized, and Mr. J. W. A. Miller, late senior partner, is now carrying on the business under the original name and at the old address, 47 Wellington Street, Toronto. Mr. Miller has been in the appraisal business for several years, both in the United States and Canada.

◆

BANK OF MONTREAL'S PROFITS LARGER

The Bank of Montreal's annual report shows that after deducting charges of management and making provision for all bad and doubtful debts, the profits for the year amounted to the satisfactory sum of $2,648,402, as compared with $2,518,408 for the previous year.

The bank's position is strong as regarding its quick assets. Current loans in Canada and elsewhere show a large increase, amounting to about $16,000,000, and the items of current loans and discounts and municipal loans are made separate, the former at $128,935,567 and the other at $5,227,905, the previous year's total being $118,000,000.

Deposits were increased by $2,300,000. During the year there was distributed dividends and bonuses of $1,920,000. This constitutes a record. The balance of profit and loss carried forward is larger than last year, being $1,046,217 compared with $802,814 a year ago.

This creditable statement in view of existing world financial conditions is proof of the sane and conservative administration of this bank.

◆

There will probably be a government bill next session to restrict the capitalization of stock companies.

The steady growth of traffic on the Intercolonial Railways has made it necessary to take up the question of more yard room and additional facilities at St. John, N.B. The Intercolonial Railway authorities are endeavoring to meet the conditions by an extension of the tracks for the better convenience of the traffic at the wharves just below the Eastern Steamships Company's berth. Larger expenditure will be made at the main Intercolonial Railway yards north of the depot and there is also suggestions of the erection of a new union station in that vicinity. A steady increase in railway traffic has been noticeable at St. John for a number of years.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Nelson, B.C.—The ratepayers passed the by-law to purchase the Nelson Coke and Gas Company's plant for $50,000.

Winnipeg, Man.—By-laws for schools, public utilities, hospitals, etc., totalling $2,680,000, will be voted upon December 12th.

Perth County, Ont.—Up to December 2nd for $51,000 5 per cent. 10-year debentures. G. Hamilton, treasurer, Stratford. (Official advertisement appears on another page).

Sault Ste. Marie, Ont.—The by-law to grant a bonus of $20,000 a year, for 20 years, to the newly-organized Lake Superior Drydock and Shipbuilding Company was carried.

High River, Alta.—Up to December 10th, for $100,000 6½ per cent. 30-year debentures. G. E. Mack, secretary-treasurer. (Official advertisement appears on another page).

Chatham, Ont.—December 15 has been fixed as the date for voting on the Somers Brothers Match Company by-law. Probably the Canadian Concrete Products Company and the industrial site will be submitted on the same date.

THE RECOGNIZED AUTHORITY ON CANADIAN SECURITIES 1913

THE
Annual Financial Review

The Annual Financial Review is a carefully revised summary of facts regarding securities listed on the Montreal and Toronto Stock Exchanges, and of other prominent Canadian companies.

It includes the Current Annual Statements of Companies; the highest and lowest prices of stocks and bonds on both Exchanges for each month for ten years; number of shares sold each month for the past fifteen months; rate of dividends paid for past years, and other important items in the history of the different Companies, such as increases in capital stock, particulars of franchises, when bonds are redeemable, dividends payable, together with a mass of other facts.

It comprises 700 pages of solid information, well printed in a clear and concise manner, and is neatly bound in full cloth. The work is invaluable, not only to financial institutions, but also to the general investing public.

THE value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

RECORD OF TRADE DISPUTES

The Department of Labor reports that the industrial situation from the standpoint of the number of trade disputes in existence, was better in October than at any time during the year. The loss of time to employees through trade disputes actually commencing during that month was small, and in all there were only eight disputes in existence, this number including those already in existence at the beginning of the month, and those which commenced during October. On no occasion during the present year has the number been as small as this; the next best record being in September when eleven disputes were reported. About 3,657 employees were directly and indirectly involved in the disputes of the month. About 70,000 working days were lost through strikes and lockouts during October as compared with 83,380 during September, and 98,000 in October, 1912. As in the previous months the most important dispute was that of coal miners on Vancouver Island. It is difficult to estimate the loss of time through this dispute, as it is probable that the strikers obtain work from time to time in other localities and that other men are taken on by the operators concerned. An estimate would show about 2,000 men out of work directly as a result of this dispute during October.

SHORT-TERM FINANCING

Canadian industrial corporations have been among those who have made use of short-term notes during the current year. This form of financing raises some serious problems, and these will be discussed in the forthcoming *Monetary Times Annual.* The primary object of the short-term note is usually to tide over tight money times. It is thought better to pay a high rate of interest on a loan for one, two or three years with the possibility of obtaining a better rate on a long-term loan later. Sometimes, however, it may prove to be a better policy to make the long-term loan, when it is at all possible, even in times of stringency. There is a danger, too, of companies in financial difficulties getting deeper in the mire, and delaying the inevitable evil day by the issue of short-term securities. These securities must not be considered a remedy for all financial ills.

A striking example of what penalties sometimes have to be paid for this form of financing, is seen in the issue of $3,000,000 of three-year notes of the British Canadian Lumber Corporation, Limited. The issue was made in London at 95 and the company will have to pay 8 per cent. interest per annum on the face value of the notes, which is 100. In addition, it agrees to redeem the notes at 107. In short, for every $95 the company obtains, it will pay $24 in interest and $107 in principal. That is a cost of $36 on every $95 borrowed for three years, which is nearly 12½ per cent.

Again, the issue of £300,000 2 and 3-year notes in London at 96 by the Spanish River Pulp and Paper Mills gave purchasers, what is described in a cable message printed on another page, as "the enormous yield of £8 7s. 10d., allowing for forfeit on redemption."

To what an extent short-term notes have been utilized in the United States is shown by some striking figures given by the New York Journal of Commerce. The outstanding bond and note obligations of the leading railroad and industrial corporations of the United States which mature and must be paid or renewed before the end of 1916 amount to nearly a billion dollars—to be exact, $953,206,011. Of this total, $45,897,000 must be met before the end of the current calendar year, while the remainder is distributed over the next three years as follows: 1914, $474,583,381; 1915, $318,758,400; 1916, $113,967,230. In appraising these figures it should be borne in mind that the short-term financing to be reckoned with for the years 1915 and 1916 has not yet reached anything like the volume it will unquestionably finally assume, for there is no telling what amount of one or two-year notes may be issued in the interim.

It will be observed that the aggregate of maturing note issues is considerably larger than that of bond maturities, illustrating how extensively corporations have resorted within the past few years to short-term flotations in preference to bonded debts of longer maturities because of the refusal of capital to undertake long-term commitments. A striking example of this tendency is in the case of industrial maturities for 1916, the bonds amounting to only $850,000, while the note issues aggregate $22,387,000.

Investments in short-term notes have become a form of American hoarding. Money is timid; it will not invest in enterprise that means national progress; it will take no risks and seeks employment where the principal must be repaid within a year or so.

Commenting on these figures, our contemporary says: "There is a feeling of uncertainty about the future which has much to do with this situation, but if capital were plentiful and seeking investment, as it was fifteen or twenty years ago, it would have to accept lower rates for long terms or lie idle, and prosperous corporations would not be offering high rates for loans which would have to be taken up, renewed or converted in a short time. The fact is that great armaments, public loans and recent enterprises which require much capital from which no immediate return can be expected, have so depleted the supply of capital that it is not to be had on the old terms, and development and progress are under a check on account of past extravagance and waste. At the same time, and partly as a result, there is hesitation and a doubtful situation, aggravated by the menace of political schemes, especially in the United States, the consequences of which cannot be foreseen."

ABOUT THE CANADA PROVIDENT

Several inquiries have reached *The Monetary Times* regarding the position of the Canada Provident Assurance and Investment Company. During the winding-up proceedings of the Union Life Assurance Company the affairs of the Canada Provident will be investigated to the extent to which the Union Life liquidators are entitled. The Canada Provident Life Assurance Company was originally licensed to do business in Manitoba on July 28th, 1902, and remained licensed until December 31st, 1912, when it produced evidence of the fact that it had never transacted life insurance business in that province and that it had transacted only the business of loaning moneys. The securities held by the provincial treasurer of Manitoba were returned and the license cancelled. The legislature of Manitoba, in 1911, assented to an amendment of the company's act of incorporation, converting the company into an investment company instead of an insurance company. By an act of the legislature, therefore, it was changed from an insurance company to an investment company.

A reader of *The Monetary Times* for some time past has endeavored to obtain a financial statement of the company for the year ended March, 1913. Despite his persistent efforts and his approach, either in person or by correspondence, of various officers and directors of the company, he has failed to obtain the desired figures on behalf of the shareholders he represents. A loan of $340,000 was made not long ago by the Union Life to the Canada Provident. The value of that loan will probably be determined during the course of the Union Life inquiry.

ONTARIO AND WORKMEN'S COMPENSATION

The proposed workmen's compensation bill for Ontario is likely to be the subject of continued protest by capital. How far-reaching it is and how far it recognizes labor is perhaps best illustrated by the comment of a labor leader, that it was a pretty good measure but not entirely satisfactory, or words to that effect. Sir William Meredith, who was appointed special commissioner by the Ontario government to report on this question, has submitted his final draft. He recommends the German principle of compulsory mutual insurance, with some modifications. In his report Sir William states that the workman will suffer under the new law to the following extent: (1) Loss of wages for seven days, if disability does not last longer; (2) pain and suffering for injury; (3) outlay for medical treatment; (4) loss of 45 per cent. of wages while disability lasts. All that the employer bears is the 55 per cent. of the injured party's wages while off duty. The burden which the workman is required to bear he cannot shift upon the shoulders of anyone else, but the employer may, and no doubt will, shift his burden upon the shoulders of the community, or, if he has any difficulty in doing that, will, by reducing the wages of his workmen, compel them to bear part of it.

The contention that it is unfair to require the employer to pay more in the way of compensation than the workman would have received, taking into account his old age, is disposed of by showing that he loses all the advantages that would have been his in the way of promotion, for his recompense is based on the wage he received at the time of his injury.

The bill is made to provide for a modification of the common law in which it is a term of the contract of service that the servant takes upon himself the risks incidental to his employment (risk rule) and that this risk includes that of injury at the hands of his fellow-servants. The unfairness of this doctrine is recognized by both the province and the Dominion in the enactment of employers' liability acts which have slightly modified it. The new act entirely abrogates it as based on the assumption that the wages a man receives are to include compensation for the risks incidental to his employment. When a workman is guilty of contributory negligence, with the employer also negligent, the employer is not liable no matter how slight the part of the injured man. In the new bill, contributory negligence will not be a bar to compensation but will be taken into account in the settlement.

To say the least, the bill places serious burdens upon capital. No one should object to legitimate compensation in the case of real accidents and to proper legislation therefor, but the Ontario proposals seem to leave serious loopholes for a workmen's compensation manufacturing industry. New capital is said to be timid just now in entering Canada. The Ontario bill will not relieve its timidity.

THE KNIGHTS AT THE ROUND TABLE

Once upon a time, there were two Winter Ports, two railroad-steamship corporations, a Dominion government, some people, and much politics. The sun was shining, the birds were singing and politics were chirping, when lo and behold, one of the corporations changed its mind about one of the Winter Ports, and that Winter Port stood up and loudly did protest. It trekked to Montreal and saw Sir Tom, who said, "Business is business." It trekked to Ottawa and saw Sir Bob and Sir Frank and maybe the other Sir Bob. These said also that business is business, and that some business is more awkward business than other business. Winter Port, with the name and the composure of a Saint, went to the lunch counter, and thought it over. He then trekked home again. Sifting the Montreal and Ottawa arguments, he concluded that though business is business, it did not help the cause. Meantime, brother Winter Port, to whom we are often told to go, smiled audibly. But the saintly one commenced to hatch schemes and telepathed Ottawa that while business is business, politics, it should be remembered, are also politics. Sir Bob and Sir Frank and maybe the other Sir Bob, noted, nodded significantly and signalled for Sir Bill and Sir Dan. These all chatted of midsummer subsidy solicitude, political crumbs, Winter Ports, and squaring things.

And it came to pass that the Royal Teds forsook their first chosen Winter Port for the complaining Saint, while the Royal Ladies remained, as was their wont, with the goodly John. Thus did the Knights at the Round Table turn storm into sunshine, while they cracked a particularly hard nut.

IS IT A RISKY HABIT?

A reader of *The Monetary Times* writes that during his recent travels in Western Canada, he found many offices altogether unoccupied during the lunch hour. Desks, papers, books were left to the mercy of the first caller. "It is obvious that this is a risky habit," he adds. Naturally, the average man should have more respect for his brother than to call at lunch time, but the man that might call may find the noon hour a convenient time to make the absentee feel very uncomfortable. The westerner may have a reason for leaving his office on his business coat sleeve during lunch hour, for the daws to peck at. If so, the reason would be interesting.

WHO?

Apropos of the Union Life inquiry, one of the questions as yet unanswered is, Who goes to jail?

STAGE SETTING

The Toronto Harbor Board's alternative transportation scheme was a well-guarded secret. The chief mistake is that it was not hung on Mayor Hocken's Christmas tree, with the Harbor Board as Santa Claus, Home Smith as the smiling guardian, Thomas Church meantime standing by, crying insistently for the little toy trumpet near the yellow candle at the top.

BEFORE AND AGAIN

In 1907 and 1908, Canada was in the throes of trade quietness and tight money. In 1909, came substantial relief which continued through 1910 and 1911 and 1912. In 1913, the economic pendulum took a backward swing. It may be towards the end of 1914 before the country is gleefully rubbing palms again. Then the glad days will come once more, during 1915, 1916, 1917 and 1918. Perhaps in 1919 and 1920 slack times may prevail again. If not, then a year sooner or later, for they must come. Canada should recognize the inevitability of trade depressions and financial stringencies. They come periodically. With the recognition of that fact, it may be easier to carry the embarrassment without an eternal grouch and blue ruin trimmings. Besides which, as old timers will tell, the depressions of modern times are light compared with the panics and crises of olden days. The world's financial institutions seem to have learned the knack of letting us down gently. These are consolations which we may take with the inevitable.

SMALL CHANGE

And, Wilson says to Huerta, says he!

* * * *

Anybody can be an optimist in good times.

* * * *

And it doesn't help matters to call them short-term Williams.

* * * *

The financial dyspeptics will not let us even give a faint cheer at Montreal's success in London.

* * * *

"London's cheerful week end," says market report, indicating that the bears are not kicking so much.

* * * *

Montreal paper in a few lines spelled Sir Thomas Tait—Tait, Ttit and Tail, a penalty for a simple name.

* * * *

It seems to be established that in tight money times, even if accounts are not paid, one can auto, hobble and tango.

* * * *

Said the office boy, hearing of honey production in Ontario, "It's wonderful how that negro problem travels."

* * * *

Washington observatory reports that it heard the Eiffel tower clock tick. No need to go that far to hear of tick.

Four and a half tons of gold were received at Montreal last week, but as yet the soup ticket distribution idea has not been announced.

* * * *

Having done it to British Postmaster-General Samuel, now watch Sir Rodmond Roblin lick one of those stickless Canadian stamps.

* * * *

Five hundred and forty-four million eggs are in cold storage raising the cost of living. If they would only hatch, cluck and crow under the window of the egg combine!

* * * *

Even the brightest commercial promises among the rising generation will have misgivings about Ottawa trade report from Melbourne regarding a new tanning material.

* * * *

Arctic ptarmigan having arrived at Prince Albert, severe winter is predicted. Meantime, at the end of November, Port Arthur reports residents enjoying balmy breezes via verandah.

* * * *

These are days when the gentlemen who give the impression that they move from one point to another in tissue paper and cardboard box, have to don overalls and get acquainted with work.

* * * *

Letter comes to *The Monetary Times* from Mexico City asking for names of those interested in orange imports. It is good to know that its bitter brother fruit is not the only Mexican export.

* * * *

Hon. Louis Coderre, minister of mines, has decided not to allow prehistoric remains to be exported from Canada. So we will have to stand the same old supply and style of Ottawa bluebooks.

* * * *

Another British exhibition train for Canada is announced. If the idea keeps going, our transcontinental expresses will spend most of their time on sidings watching the exhibition trains go by.

* * * *

Sir William Van Horne says that corporations have "bigger, cleaner, whiter souls than any individual walking on the earth to-day." All the same, we are not sure that we like the corporation soul kiss.

* * * *

As consolation in these tight money times, consider the poet who says "Whereunto is money good? Who has it, wants not hardihood; Who has it not, has trouble and care; Who has had it, has despair."

* * * *

Wealthy young Belgian in Toronto complains of lack of amusement in Canada. He spent some weeks in the West passing time by riding around as a cowboy. A case for Sanford Evans' pick and shovel cure.

* * * *

While waiting for tight money to back out gracefully, it is interesting to note London dispatch stating that woman's new figure is to be inverted pear shape, the change probably being due to short apple crop.

* * * *

Mrs. R. B. Potts, Hamilton, wanted to impress upon the Ontario Agricultural Association last week the importance of the back yard as a reducer in the high cost of living—which is a change from its use as a factor in the low cost of gossip.

TORONTO IS MAKING AN ISSUE IN LONDON

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

LATEST WORD FROM LONDON

RUSH OF NEW ISSUES ON THE MARKET.

(Central News cable to *The Monetary Times.*)

London, November 28.—On the whole the stock markets have exhibited a fair amount of strength during the past week, the tone has been satisfactory and operators in the financial district are making their preparations for the month end in distinctly good spirits. Money has been temporarily scarcer and the Bank of England has lent money freely at heavy discounts.

There has been an appreciable reduction in discount quotations; in fact, the rates for bills have been easier than for weeks past owing to expectations of a reduction in the continental bank rates. The end of the week finds the stock market resting after buoyancy based on increasing investment from centres where there has been a slacking in industrial activity. The expectations are that the Bank of England receipts of South African bar gold this week will not exceed $4,500,000. The outlook in the labor world is distinctly brighter.

Canadian securities may be said to reflect the success of the Montreal loan, but brokers assert that the recovery of this group must begin from the top and that it will not include utilities just yet. The rush of new issues continued, amongst those successfully underwritten this week being the Toronto £1,200,000 4½ per cent. loan.

DEMAND FOR MONTREAL ISSUE

*London, November 25.—The city of Montreal new four and a halves continue in good investment demand. They yield four pounds eleven shillings per cent. at the present price, one premium for cash and 1⅛ for special settlement.

LONDON MARKET IMPROVEMENT

*London, November 25.—It is regarded as a good sign of improvement in the market that the British Government is finding borrowing much easier. The average rate for £1,500,000 six months treasury bills, for which tenders were received by the Bank of England yesterday, is four pounds one shilling per cent.; the finest current discount rate for six months bills is 4⅝ per cent.

SPANISH RIVER PAYS HIGH

*London, November 21.—The high, almost unprecedented, price paid for Spanish River Company's fresh loan excites much comment. The new £300,000 second mortgage, two and three-year sixes, issued at 96, gives purchasers the enormous yield of eight pounds seven shillings and ten pence, allowing for forfeit on redemption.

COMMENT ON MONTREAL LOAN

*London, November 21.—The Daily Mail notes the prospectus published to-day which gives no indication of the circumstances under which such expensive borrowings are necessary.

While congratulating Montreal city on the success of her latest loan, financial writers express fear that such a result will cause another flooding of the market by corporations anxious to borrow money.

It is pointed out that the terms to the investor for the Montreal issue were exceptionally favorable, and its success was almost a matter of course. There is no doubt, though, that much scrip floating about the market has recently been absorbed by genuine investors.

HUDSON'S BAY INCREASES CAPITAL

Adds One Million Sterling—Shareholders Ask Some Questions

†London, November 24.—The Hudson's Bay Company shareholders to-day resolved to increase the capital by one million sterling by the creation of two hundred thousand five pound five per cent. shares. Preference is offered to existing shareholders.

Lord Strathcona, who attended the meeting, but whose speech was read for him, said that the million sterling capital subscribed in July, 1912, had, with three hundred thousand pounds of land sale proceeds, been expended in strengthening the fur trade and reorganizing the store business. It had been advisable to erect a depot at Edmonton to be in a better position to supply customers throughout the district. Sites purchased for the erection of new stores or the extension of existing ones had involved an expenditure of £341,900. While much of this outlay had necessarily been so far unproductive, it was a source of gratification to be able to state that the estimated present worth of these sites shows a considerable increase over the prices they were purchased at.

In the Land Department.

In the land department, considerable expenditure on drainage and road-making had been guaranteed. In connection with the subdivision of Edmonton the undertaking given by the company to execute work was in a great measure the means of securing satisfactory prices at which sales were effected in the subdivision, and which, when completed, will have the effect of still further enhancing the values of property remaining within the subdivision area. The expenditure so far incurred in recent undertakings was £815,382. It was estimated that the completion of the programme will involve a further sum of £750,000 in addition. During the same period, the capital engaged in extending the fur trade and sale shop business had been increased £1,010,000.

Not Entering New Places.

Robert Ward, for the shareholders, expressed fear that the company was erecting buildings which would not prove to be in business centres of growing cities. Sir Thomas Skinner, replying, denied any fear of this. The company's knowledge was up-to-date, and Mr. Ward's was evidently antique. How many years was it since Mr. Ward was in Victoria?

Mr. Ward:—"Three."

"Oh, you would scarcely know the place now," said Sir Thomas, who added that the company had no idea of going into districts they had not already occupied.

Another shareholder asked if the board could give any reason for the present depression in Canada.

"They have been doing in Canada what we have been doing: they have been going too fast," was the reply.

The increase of capital was unanimously approved.

COMPLIMENT FOR VANCOUVER

*London, November 21.—The Times' Finance Editor commends what he calls the city of Vancouver's good resolution, as explained by Mayor Baxter, and hopes the condition of the London market will induce other municipalities to follow Vancouver's excellent example in submitting a no money by-law at their January elections unless absolutely necessary.

MAY CAUSE MARKET FLOOD

†London, November 21.—While congratulating Montreal city on the success of the latest loan, financial writers express the fear that such a result will cause another flooding of the market by corporations anxious to borrow money. It is pointed out that the terms to the investor for the Montreal issue were exceptionally favorable, and success was almost a matter of course. There is no doubt, though, that much scrip which had been floating about the market has recently been absorbed by the genuine investor.

CRITICS OF CANADA—INVESTORS SHY—LONDON CABLES

(The following Central News cables and letters are exclusive in Canada to The Monetary Times. Canadian Associated Press and Montreal Star cables are printed by special arrangement. "The best London cable service of any Canadian financial journal.")

SHY INVESTORS STAY THAT WAY

After Turn of the Year, They May Come Into Open—Montreal Loan

(Central News letter to *The Monetary Times.*)

London, November 18th.—The Stock Exchange improvement made further important headway after the dispatch of my last letter, but markets have now turned somewhat irregular, and while there are still features of cheerfulness, the general forward impulse for the moment has been lost. This has been due chiefly to two causes. The Mexican situation again intruded itself—as it has done recurrently for several weeks past—as a factor of caution, though at the time of writing it is once more reported to have brightened. Secondly, conditions in the money market are very firm. The result of these two influences has been that the general widening in Stock Exchange operations, which had been looked for, as the result of the recent demonstrations of cheerfulness, has not taken place. There has been more investment indeed. Bankers have encouraged this, not because they do not find money very usable, since with deposit rates at 3½ to 3¾ per cent. and call money fetching 4 to 5 per cent., it is clear that they do—but because a development of the investment movement will, it is intelligently anticipated, have the effect of preparing the ground for the flotation of various new capital issues, and bankers are naturally anxious that these latter should take place, as soon as they can be handled with safety, because in this way the banks are lightening their own loads by affording industrial and other clients an opportunity to capitalize their floating indebtedness. Investment business must almost certainly continue to expand during the next few months. Not the least significant feature of the recent moderate increase in real buying orders has been that they have emanated largely from manufacturing districts, where the slowing down of trade continues to set balances free. But how rapidly or how gradually the growth of this class of business will develop, is a matter regulated by so many influences, both local and external, that it is impossible to be dogmatic about it.

To Encourage Investors.

However prepared bankers may be to encourage shy investors to come out into the open, the former have evidently nothing to gain and perhaps a good deal to lose by allowing any considerable increase in speculative business at the present juncture. That may be expected to come later, perhaps, after the turn of the year. But in the meantime, this may be held partly accountable for some diminution in the decision of markets. Recent cheerful demonstrations in many departments were mainly in the nature of balons d'essai on the part of professionals, and the conclusions, which the latter appear to be called upon to draw. are that the public is still halting in its opinion with regard to participation in "bull" operations, while the banks do not feel that they have any sound reasons to urge upon clients that they should abandon their caution in this respect. Apart from Mexico, and money, general influences can only be described as favorable just now.

As to Montreal Loan.

The underwriting commission on the Montreal loan, is 1½ per cent., and it is significant that while the issue price of 98½ is 1½ below that of the two previous emissions, which were offered at par, it is well in advance of the quotations, at which it was being rumored in September the loan might be offered. These estimates ranged from 95 upwards, and were, of course, current at a time, when a state of indigestion existed in the market here for most Canadian securities.

Holders of 5 per cent. debentures of the Forest Mills of British Columbia, many of whom possess their stock, because they were holders in the Dominion Sawmills and Lumber Company, which went into a receivership, have been cheered somewhat by statements that a report will shortly be issued by the London committee of the new undertaking and that the general purport of this document will be satisfactory. Holders of these debentures are not receiving any interest, which until 1917 is only payable out of profits. The present price is nominal at 10 to 20, but stockbrokers are advising holders not to sell in view of improving conditions.

CANADIAN BANK LOANS TO INDUSTRIES

They Are Challenged and Defended in London—Underwriters Continue Caution

(Central News letter to *The Monetary Times.*)

London, November 19th.—There is no material change to note in general conditions in the London financial district since my last letter. A certain amount of seasonable uncertainty continues to exist regarding the monetary outlook, but acute fears in this connection are no longer entertained. The general view is that the current month will not be by any means a smooth or easy period in Lombard Street, but that the market will pass through it without encountering any serious difficulty.

Rumors of an impending Mexican moratorium are chilling, but have failed to upset sentiment, while the resumption of loan operations by colonial and foreign borrowers has not yet reached proportions calculated to revive uneasiness on that head. Nevertheless, while it is clear that underwriters are only feeling their way cautiously, it is undoubtedly significant that important flotations have been resumed so comparatively soon after the recent decision was reached to suspend underwriting altogether for a time.

At the time that decision was made known, it was generally believed that it would continue in force up to the end of the year. The appearance of a £1,000,000 West Australian 4 per cent. loan and London's participation in the new £8,000,000 Roumanian 4½ per cent. loan to the extent of nearly £2,000,000 proves this belief to have been ill-founded, and we are, therefore, forced to the conclusion that, although quotations for new loan scrips remain at moderate discounts in a large majority of cases, underwriters have been able to lighten themselves of a portion of the burden, with which they were recently left, more quickly than they anticipated.

Attitude of Banks.

There has been a good deal of discussion one way and another lately about the attitude of Canadian banks, which have considerable loans outstanding with various Canadian industrial undertakings. Perhaps it is the troubles of some of the latter companies which have served to keep the matter to the front as a subject of discussion, and in any case the topic is an interesting one. The London Financial Times discussed the matter at length in a recent issue, pointing out that annual reports lately issued show that bank loans in many cases stand at a much higher level than a year ago. The increase is attributed in some directions to a growth of many companies' indebtedness to the banks under the "building loans" item.

How Long Will It Stay?

As to how long this difficulty will persist it is impossible to say. Europe must at any rate feel for some time to come the after effects of the destruction of assets, occasioned by the Balkan war, and the long train of financial readjustments which those military operations have left in their wake. The London Financial Times, however, states that it is obviously impossible for the Canadian banks to go on indefinitely increasing their financial operations in this particular direction, without incurring risk, and asks how the apparent deadlock, which has been reached, will be broken. The suggested answer is that while monetary conditions in London in 1914 are expected to be much more comfortable than for some time past, and, therefore, the financing of certain classes of effort should be much easier.

In this situation, it is thought that endeavors may be made to effect bond issues in the Dominion and in the United States, and since this class of security, both in Canada and the States, has been on a 6 per cent. basis for some time, such a movement, if it were to develop, might have to be on 6½ per cent. lines. Canadian banking representatives locally express dissent from such a possibility, and pin their faith to an increasing improvement in the general situation in the Dominion bred of the season's harvest.

IS YOUR HOUSE IN ORDER?

Some Important Matters for Every Business Man, Illustrated by Several Striking Incidents

[The following are extracts from an article by Mr. Peter Clark Macfarlane, and reprinted here by special arrangement with Collier's Weekly, in which it was first published. Copies of the article, as printed below, may be obtained by life insurance managers and agents upon application to the head office of *The Monetary Times*. State how many are required.—Editor, *The Monetary Times*.]

"Death comes rather suddenly to one's neighbors at times. You remember, for instance, the man you met last Tuesday afternoon at the club. He was a delightfully companionable chap. You were surprised to discover that he lived in your own block. Each of you laid plans to pursue the acquaintance of the other. That, as I said, was on Tuesday. On Saturday, as you were cranked up to motor out to the links, there was a funeral in the block that held up your car for a minute. Six bareheaded men were carrying something out from the brown front half a dozen doors below your own, The delay irritated you. Funerals should be regulated, you reflected, so they could not block the streets. Just as much to fill the interval of waiting as anything else, you ask your chauffeur whose funeral it was, and he asked the policeman, and the policeman, judging by your chugging six cylinders that you were somewhat, asked the hackman. The hackman inquired of the undertaker's assistant. For a wonder the undertaker's assistant knew whose funeral he was conducting, so that the name of the deceased came back to you. It was that of your newly-made friend. Tuesday you clinked glasses with him at the club. Saturday his funeral got in your way.

"Appendicitis? Yes, or a bad heart, or a quick pneumonia or a blood clot. There are plenty of exits. Just think! Every week some friend or acquaintance trickles out of life. Think again. It might have been your new acquaintance who was motoring to the links and it might have been your funeral that got in his way.

Dying is an Easy Thing.

"Dying is such a ridiculously easy thing! You are in your library. The door is open. You can hear the piano strumming in the living room. The children are playing in the hall. The telephone bell rings. The piano stops. You hear your wife's voice soft and melodious, answering the telephone. You are dimly conscious of all this, but your attention is centred upon what you are reading. Abruptly you feel a touch of pain and a sickening sensation as if some of the machinery staggered, as if the mainspring in your breast had suddenly run down. The lines of print wabble and knock into each other. Large white spots appear upon the page. The light seems to sputter and then go out. . .

"The paper is lying on the floor now. One of your hands swings idle and empty for a moment and then is still. Your chin is on your breast. Your eyes are half closed. The light is really still shining, but you do not see it, for it was your life that sputtered and went out.

"The voice is gone from the telephone. The piano is strumming again. The children are singing now. It is ragtime, but you do not protest. You know nothing of it. You are gone. And the people of the home do not know that you are gone. They are laughing and talking and singing. By and by some of them will come tiptoeing in to speak to father; but he will not hear them.

Did You Make a Will?

"And now that you are gone, in what condition did you leave your family? Did you make a will? Does it represent exactly what you wish to be done with your property? Did you have any life insurance? Is it payable to the persons to whom you want it to go? Have you any money in the banks? Do you know that, though you may have large sums on deposit, unless you have made a will or some other legal provision to guard against the contingency, your wife cannot touch a penny of that money until the estate has been administered and tedious legal processes gone through with? She is moneyless, and is dependent upon friends or upon the professional lenders, even perhaps the loan sharks." . .

Citing examples where wills were not made, Mr. Macfarlane continues:—

"Now, what ought these perfectly well-meaning people to have done? Quite obviously they ought to have reflected that the issues of life are uncertain, and they should have provided against them. With these examples in mind, would it not be well for you to make an immediate appointment with your lawyer? Go and sit down with him. Project your mind into the situation upon the day after the funeral and ask your attorney how to build a bridge from now till then over which your properties and moneys may pass safely into the hands of those you wish to receive them.

"Mention was made a moment ago of life insurance. At this tick of the clock it is almost axiomatic that the man who has no life insurance is a bad housekeeper. The poor man cannot afford to be without it and the wealthy man dare not. The man, who, having a family and perhaps a business dependent upon him, does not protect one or both with life insurance is a gambler. He is betting on the red to win; but there are just as many black pockets as red ones, as well as some that are neither. Therefore red loses oftener than it wins every day, and there is one day when it is sure to lose! In that day what are your wife and children going to do and what is your business going to do? The advantages of carrying life insurance are so obvious and the disadvantages of not carrying it are so much more obvious that it seems hardly necessary to urge it upon anyone. Yet I am going to cite two cases to show that it is necessary to urge it.

How Some Men Gamble.

"One of these was a business man on the Pacific Coast. He had a business which with him at the head of it was worth $400,000. It could probably have been sold for that amount. It was incorporated, but he owned all the stock except the nominal allotment to the necessary directors. He made lots of money, but he spent much on the extension of his business, and he spent liberally, almost lavishly, upon himself and his family. His business was earning him the income from half a million, and he lived as if it were half million of Government bonds and all he had to do was to cut the coupons, instead of as if it were a growing bush that sun and frost could wither. Some years he lived a little faster than his business grew, and that put him in the hole. But he continued spending, depending on expanding a little faster the next year and possibly curbing his personal expense account a trifle till the two should run neck and neck again. In fact, this man was just like millions of other Americans to-day above him and below him in the financial scale. He was eating his cake while it was still so hot it burned his fingers. Yet he would have resented a charge that he was wasteful, improvident, or gambling in futures. As a matter of fact, it was the chance of life with which he gambled. That is the gamble which every man takes who goes without life insurance. He carries the risk alone instead of letting a million other men carry it with him.

What Carelessness Cost.

"And this gambler lost. His nerves broke down. But for months he fought on, directing his enterprises from his bedside. But the business, too, seemed to get a case of nerves. It also became ill. At the end of a few months the tiller ropes began to slip through the sick man's slackening fingers. He saw that the business was going down without his active directing genius, and he saw, too, that he was going down. Death was gibbering at him from every corner of the room. He had overspent, depending upon a long life to repay. This was legitimate, though imprudent, if the man were well. In his present condition it was a dangerous drag upon the business and fatal to the man. In two weeks more he died—worried to death.

"They buried him from a home that cost $60,000, but upon the purchase price of which it was discovered he had paid $10,000. The widow, to get her rights out of the business, found it necessary to sue. The combined fees of the lawyers were $15,000. After litigation, which consumed a year or more, the widow received, over and above the lawyers' fees, about $65,000, instead of the $400,000 she would have had but for the fact that her husband was a very bad housekeeper. Had his house really been in order, there would have been no overdraft, and he would have had at least $200,000 in life insurance. As it was, he had no such anchor to windward, and his recklessness, I almost say foolhardiness, robbed his estate of a round quarter of a million of dollars. His wife, with eight children, all minors, lost that quarter of a million. She, of course, had to give up the $60,000 house, and must look forward to the education of her children and maintaining herself through life out of this pitiful residue of what might have been a noble estate. To those who have much less, $65,000 may seem a very generous fortune, but to the widow and children who might have had $400,000, and who had been living at a $25,000 a year clip, it seemed like hardship, and it is difficult to see how they can escape reproaching at times the memory of the husband and father for his carelessness. . . . .

"There have been a few stories in fact and many in sobby fiction telling how a gambler has placed his little child upon the table, or even brought his submissive wife into the room and wagered child or woman against another man's gold. The man who plays the game without life insurance is betting his wife and his children that he will live to make a fortune for them."

VALUE OF LIFE INSURANCE

XL.

Instalment Policies

BY C. A. HASTINGS

Until recently all life policies had one possible flaw, but this can easily be avoided by means of an instalment policy, such as I am about to describe in this article. I will first of all point out the flaw, and that is that the effect of life insurance has been to place sums of money in the hands of inexperienced people, usually women, who—during their husbands lifetime have never had occasion, or even opportunity, to deal in financial affairs or to get acquainted with any financial market. Most men endeavor to avoid foolish or inexperienced trustees, who might rob his insurance provision of its value by indiscreet investments.

The instalment policy is usually sold to men of 40 and upwards, and its workings are best explained by an example.

Will Purchase Monthly Income.

The approximate annual premium of $470 for a man aged 45, will purchase for his beneficiary a monthly income, the first instalment payable at his death, of $100 per month for a period of fifteen years: in other words, the beneficiary receives all told the sum of $18,000, and even should the insured live another twenty-five years, he has only paid in—on this basis—$9,400 in instalments, not to mention profits—which should be at the rate of 1½ per cent. per annum, if proper choice is made, making an addition to his policy of about $5,250. Of course anyone can apply for any income he wishes, according to his means, and for any period he likes.

It will readily be seen by intelligent readers that such a policy obviates the need of a widow or daughter having to refuse a loan to Tom, Dick, or Harry.

Contract is Trusteeship.

Furthermore, this contract embodies all the normal benefits of other contracts, yet at the same time it is a trusteeship. If the life, whose example I have taken, dies after making the first payment, his widow or whoever may be the beneficiary, enjoys the benefits immediately. So, in this manner, the amateur capitalist is spared the dangers of investment and the capital itself is absolutely guaranteed against depreciation.

A man may lose a fortune and recover it, but not so a widow. She has never had the necessary training, and apart from this, why should any man burden his widow with financial responsibilities he has not imposed on his wife? Many men leave an ample estate, but surprisingly few keep it. The means has been described above whereby man can assure its perpetuity, and, whatever else happens, it is sufficient to keep Home together.

◆

LAKE STEAMSHIP BOND ISSUE.

A block of $135,000 6 per cent. first mortgage serial gold bonds of the Canadian North-West Steamship Company, Limited, of Port Arthur is being offered by Messrs. Peabody, Houghfeling and Company, Chicago. The bonds are issued for the purpose of refunding the present floating debt and supplying additional working capital. They are secured by a first mortgage upon all the property of the steamship company including specifically its four steel freight steamers, Neebing, Paipoonge, George A. Graham and Atikokan now in successful operation upon the great lakes. During 1912, with two of its steamers in operation only part of the season, the company earned net $54,168.94. Based upon the record of the company up to October 1, 1913, the net earnings are estimated for the present year at $65,000, or over eight times the maximum annual interest charge.

The Canadian North-West Steamship Company is a Canadian corporation with offices in Toronto and Port Arthur. The company operates four steamers on the Upper Lakes between Port Arthur and Georgian Bay ports. These steamers carry grain in spring and fall and coal, iron ore and pig iron in the summer months. During the winter the vessels produce a substantial additional income from the storage of grain.

◆

The directors of the West Kootenay Power and Light Company have declared a dividend of 1¼ per cent. for the quarter on the common stock, payable December 1st to shareholders of record November 24th. This places the stock of the company on a 5 per cent. per annum basis against the 4 per cent. heretofore paid.

The
Tight Money
Question

From every angle

WILL BE DISCUSSED IN

THE MONETARY TIMES
ANNUAL

"If you buy anything, you pay in paper or in tokens representing values. If you sell anything, you receive similar representatives, but you neither eat money, nor drink it, nor wear it; it always continues to exist and does not diminish in quantity or in value, so where is it?"

So writes a contributor to the forthcoming Annual. He analyses these questions in his own way while many other writers will deal with the all-important tight money problem.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Bank.—The Dominion Bank will pay 14 per cent. in 1913, as it did in 1912. The policy of paying a 2 per cent. bonus in the final quarter, which commenced last year is being carried out again this year. The regular quarterly dividend of 3 per cent. and a bonus of 2 per cent. has been declared, payable January 20, to shareholders of record, December 20

Jupiter Mines Company.—At a special general meeting of the shareholders of Jupiter Mines Company, it was proposed by Mr. Jas. Pearson of Toronto, and unanimously decided, to issue at least $50,000 in 6 per cent. bonds, running for eight months, the price to be 80 per cent. of parity. These bonds are to be offered to shareholders pro rata to their holdings in denominations of $50 and over. It is expected that shareholders will meet the company's obligations, and probably supply sufficient funds to do certain further work suggested by Mr. P. A. Robbins in his report on the property. The meeting adjourned until December 15.

A. MacDonald Company.—The Dominion Bond Company has made its first payment to Mr. Alex. MacDonald, under the new agreement regarding overdue amounts in connection with the transfer of the business of the A. MacDonald Company.

The proposal of the bond company made some time ago was that it should pay Mr. MacDonald $200,000 during November, $200,000 and interest charges on or before December 5, and $300,000 during the next three years.

In accordance with this understanding and new contract into which Mr. MacDonald entered, there was due $100,000, and this sum was paid in cash.

Consumers' Gas Company.—The Consumers' Gas Company should reduce its dividends instead of increasing the price of gas, is the opinion of city auditor Walter Sterling, whose annual report of the audit of the company's books for the year ended September 30th, was made public yesterday.

"It is a question," remarks the city auditor, "whether the public will be prepared to submit to an increase in the price of gas merely to maintain the maximum rate of dividend which may be exacted."

The rate of the annual dividend has been 10 per cent. for some years. Mr. Sterling mentions that the gas company enjoys a valuable franchise in the free use of Toronto's streets for the laying of its mains, and the only benefit which the citizens derive is in the lowering of the price of gas.

CANADIAN NORTHERN'S BUSY MONTH.

The Canadian Northern Railway's October statement of earnings and operating expenses shows the following results:

	1913.	1912.	Increase.
Gross earnings	$2,687,100	$2,351,200	$335,900
Expenses	1,683,000	1,645,900	37,100
Net earnings	1,004,100	705,300	298,800
Mileage in operation	4,520	4,297	223

MONTREAL'S TRANSPORTATION SUITORS

They Press Their Suits to Acquire Franchise—What the Offers Include

Monetary Times Office,
Montreal, November 27th.

Montreal seems to be in the position of having two large competitors for the privilege of supplying it with improved systems of transit. Recently some of the terms were made known which the Montreal Tramways Company were prepared to offer. These included offers to construct certain subways and underground roads in the more congested portions of the city, as well as underground systems from the centre of the city to certain of the more populous sections situated some distance therefrom. The company also asked for the privilege of operating an autobus service and the proposal was that there would be transfer privileges between the autobus service and the underground system and the surface lines. The company proposed to charge a straight 5 cent fare, ask for a 40-year franchise and the guarantee of its mortgage securities by the city covering the cost of underground subways and the reduction in the present percentage of earnings paid to the city to 4 per cent. of all gross earnings.

What the Bus Company Proposes.

The Autobus Company's proposal is to build seven or eight miles of subway to serve the heaviest line of traffic at an estimated cost of $20,000,000. The conditions of the offer were that the city was to get half the profits and was also to own and control the subway proper, and it was proposed that the construction of this subway would be done under the supervision of the city and company jointly. The company would furnish all the capital for plant, construct cars, power house, lighting, ventilation and equipment, totalling about 33 per cent. of the cost. The company would receive a 30-year franchise, to be subject to a referendum of the people of Montreal. The fare would be 5 cents, subject to revision by expert arbitration every 10 years; transfers to be given to and from the subway in terminal zones, these transfer privileges to be subject to revision every five years.

At End of Franchise Period.

In both offers certain provisions are made by which the city may take over the property of the company at the end of the franchise period. The two companies are apparently strong rivals of each other and are displaying considerable aggressiveness. Between the two it would seem that the city should be assured of a favorable deal. Fears have been expressed that the matter will be taken to Quebec where the city may be over-ridden, but the premier's attitude indicates that any proposals brought to him must bear the city's approval.

The suggestion of the Autobus Company is that the city should provide and own the subways, the cost of which subways being, presumably, in the vicinity of $13,000,000. The general manager of the Autobus Company says that the company is preparing a statement for the purpose of showing results of the operations of subways in a number of other places. The Autobus Company is a new company and is merely in the process of organization, not having yet begun its service, and no buses having even yet arrived in Canada.

LLOYDS BANK WOULD PLACE EDMONTON BONDS

Lloyds Bank will place a loan of £1,000,000 for the city of Edmonton, unless anything unforeseen happens, stated Mayor Short at a public meeting.

PRUDENTIAL TRUST COMPANY

The Prudential Trust Company, Limited, which is now located at 9 St. John Street, Montreal, has compiled an artistic and practical booklet explaining its various activities. It includes a map of the central business section of Montreal. A postcard to this company will bring the booklet with any desired information.

A special train left Edmonton for Chicago consisting of 22 cars of choice beef cattle billed to the union stock yards there. These cattle had been assembled from Tofield and neighboring district.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Saint Marie, Que.—November 23—Village. Loss, $250,000. Cause unknown.

Hearne, Sask.—November 5—Mr. A. Conley's store. Loss and cause unknown.

Rosedale, B.C.—November 7—Mr. Lamarch's residence. Loss and cause unknown.

Bell Island, N.S.—November 8—Mr. R. T. Rent's store. Loss, $600. Cause unknown.

Mitchell, Ont.—November 18—Mr. H, Biarman's barns. Loss, $6,000. Cause unknown.

Lindsay, Ont.—November 17—Messrs. Flavelles' egghouse. Loss and cause unknown.

Cookshire, Que.—November 14—Mr. C. W. Taylor's residence. Loss and cause unknown.

Three Rivers, Que.—November 14—Wabasso Cotton factory. Loss, $1,000. Cause unknown.

Souris, P.E.I.—November 12—Mr. W. L. Dingwell's premises. Loss and cause unknown.

Simcoe, Ont.—November 22—Mr. G. Makinson's residence. Loss, $900. Cause unknown.

Oak Lake, Man.—November 18—Mr. W. C. Smith's barn. Loss, $6,500. Cause unknown.

Amherst, N.S.—November 16—Pugsley Block, Eddy and Victoria Streets. Loss and cause unknown.

Port Arthur, Ont.—November 15—Mr. N. McGoldrick's store, Park Street. Loss and cause unknown.

Ottawa, Ont.—November 17—Mr. J. J. Ralph's stable, 201 Rideau Street. Loss and cause unknown.

St. Anne des Plaines, Que.—November 20—Mr. J. Blouin's residence. Loss and cause unknown.

Moose Jaw, Sask.—November 17—Mr. G. Strong's barn, Elbow district. Loss, $7,500. Cause unknown.

Saskatoon, Sask.—November 12—Mr. J. F. Cairns' store. Loss, contents, $50. Cause, carelessness.

Port Coquitlam, Ont.—November 10—Mr. R. C. Welch, Dewdney trunk road. Loss, $1,500. Cause unknown.

South Hull, Ont.—November 17—Mr. R. Maxwell's residence, Mountain Road. Loss, $300. Cause unknown.

Brighton, Ont.—November 21—A. A. Wade's Central Hotel stables. Loss, $5,000. Insurance, $1,500. Cause unknown.

Point Escuminac, N.B.—November 17—Messrs. A. & R. Loggie's freezer barn and cookhouse. Loss and cause unknown.

Millbrook, Ont.—November 20—Mrs. Stevenson's barn.
November 21—Mr. W. Shaw's stable. Loss and cause unknown.

St. Andrew's, N.B.—November 14—Mr. H. Russell's house and barn. Loss, $2,000; insurance, $800. Cause unknown.

Hamilton, Ont.—Rear 343½Macnab Street North. Loss unknown; cause, supposed incendiary. 123 Kenilworth Avenue. Loss and cause unknown.

Vancouver, B.C.—November 14—1243 Fifteenth Avenue East. Loss and cause unknown. Mission Electric Fixture Company. Loss and cause unknown.

Edmonton, Alta.—November 14—Progressive Shoe Repairing Store, 549 Fifth Street. Loss and cause unknown. Shed, 1284 Fifth Street. Loss and cause unknown.

Brantford, Ont.—November 15—Isolation hospital, Mount Hope. Loss and cause unknown.
November 21—3 Spring Street. Loss unknown. Cause, upset lamp.

Quebec, Que.—November 18—Charlifour Sawmill, Prince Edward Street. Loss, $2,000. Cause, unknown.
November 21—J. B. Renaud & Company's store. Loss, $14,000; insured. Cause unknown.

Victoria, B.C.—November 15—Mr. J. Angus' residence, 474 Garbally Road. Loss, $75. Cause, overheated stovepipe.
November 16—Mrs. Perrier's residence, 1535 Davie Street. Loss, $75. Cause, defective chimney.

Montreal, Que.—November 19—Mr. S. E. Porter's store, 142 St. Catherines East. Loss, $8,000. Cause unknown.
November 20—Mr. M. Grignon's residence, 439 Mentana Street. Loss and cause unknown. Building on Desjardins Street. Loss, $2,000. Cause unknown.
November 21—Store, 1859 St. Catherine Street. Loss, $500. Cause unknown.

St. Catharines, Ont.—November 15—Messrs. Brennan & Son's store. Loss, nil. Building valued at $5,000; stock, $2,700. Insurance, building, $2.400; stock, $2,000. Cause unknown.
November 18—Mr. H. Wise's planing mills. Loss, building, $25. Loss contents unknown. Insurance, building, $2,000; contents, $7,500.
November 20—Shed on Queen Street. No loss.

Pincher Creek, Alta.—November 23—Business section. Losses:, Hudson's Bay Company, building, $9,000, stock $3,000; insurance, $30,000. F. S. Blake, building, $3,500; insurance, $1,500. Langton's livery, building, $5,000; insurance, $3,000. J. E. Shoultz, stock, $1,000; no insurance. M. D. Gray, stock, $600; insurance, $400. Mrs. Lynch, milliner, stock, $800; no insurance. J. Monoghan, shoe store, stock, $3,000; no insurance. Partial losses, all insured: I.X.L. Blacksmith Company, loss $500. Jacksons Brothers, $500. Dr. G. S. Mills, $400. A. C. Kemmis, law office, $1,000. Total loss, about $30,000. Cause unknown.

New Westminster, B.C.—November 1—Mr. J. Armstrong's residence. Cause, chimney. No loss.
November 3—Rev. Dunn's residence. Chimney fire.
November 6—Mr. J. Fraser, 102 10th Street. Loss slight. Cause, children and matches.
November 9—La Lung's stable. No loss. Cause, tramps.
November 14—Mrs. C. E. Lewis' residence, 26 Dickenson Street. No loss. Insurance, $700. Cause chimney. Mr. C. E. Salter, 211 Regina Street. Chimney fire. Insurance, $1,000. Pacific Coast Company. Mr. J. Suims, Ewen Avenue. Loss, building, $15; contents, $50. Cause unknown.

Toronto, Ont.—November 18—Mr. J. Solway's residence, 110 Oxford Street. Loss, building, $35; contents, $75. Cause unknown. Mr. O. Lominsky's residence, 90 Massey Street, owned by Mr. R. H. Graham. Loss, building, $500; contents, $125. Cause, unknown. Mr. H. Biddell's garage, 271 Euclid Avenue. Loss, building, $75; contents, $200. Cause, match stepped on, ignited oil.
November 21—Messrs. Conger & Lehigh Coal Company, 2 Gladstone Avenue. Loss, $25. Cause unknown.
November 22—Mr. H. Mandlebone, 99 River Street. Loss, building, $60; contents, $140. Cause, stove ignited clothing. Dr. Smyth's residence, 263 College Street. Loss, building, $500; contents, $250.
November 24—Messrs. S. Bedame and W. Scatcherd, 2 Don Mills Road, stables. Building, $100; horses, etc., $375 Cause, unknown.
November 25—Mr. L. Huddard's shed, 154 St. Helen's Avenue. Loss, $100. Cause, lamp exploded.
November 26—Mr. J. H. Hewitson's residence. Loss, contents, $50. Cause unknown.

◆

CANADA'S GROWING TRADE

Canada's trade figures for the twelve months of the past fiscal year and for 1911-12, compare as follows:—

	1911-12.	1912-13.
Total imports	559,320,000	692,032,000
Total exports	$315,317,000	$393,232,000

◆

PERSONAL NOTES.

Mr. Aubrey Fullerton, assistant secretary of the Dominion Securities Corporation, has been transferred to the London office of the corporation.

Mr. Watson Griffith, industrial commissioner of Brandon, has been selected by the Dominion government to visit British West Indies as a special commissioner of the department of trade and commerce.

Mr. James Thom has been elected to the board of the Crown Trust Company to fill the vacancy caused by the resignation of Mr. G. M. Bosworth. Mr. S. H. Ewing takes the vice-presidency in place of Mr. Bosworth.

Mr. J. M. Stuart, member of the institute of chartered accountants of British Columbia, the institute of accountants and actuaries of Glasgow, Scotland and certified public accountant Minnesota, U.S.A., has opened an office at Vancouver, B.C.

Lieut.-Col. E. G. Shannon, commanding 52nd Regiment, Prince Albert, Sask., and for the past six years local manager of the Canadian Bank of Commerce, has resigned his position with that institution and on December 1st will become a partner in the financial brokerage firm of A. W. Nelles and Company, the new firm to be known as Nelles and Shannon.

Mr. C. H. Easson, formerly general manager of the Bank of New Brunswick, which recently was absorbed by the Bank of Nova Scotia, is made manager of the main Toronto branch. Mr. H. A. Flemming, who has been local manager, is made manager of the Halifax branch. Mr. W. Cook is to be manager at Aylesford, N.S., and Mr. W. E. Wolfe to be manager at Welland, Ont.

TORONTO AND ELECTRIC COMPANY DEAL

Report of Manager Couzens is Favorable to the Proposed Purchase

Manager H. H. Couzens of the Toronto hydro-electric commission, has submitted his report on the proposed purchase of the Toronto Electric Light Company's property, etc., by the city of Toronto, in connection with the suggested acquisition of the Railway Company. The report favors the purchase by the civic authorities.

Mr. Couzens says that only some of the economies resulting from amalgamation can be estimated. Leaving out "other very definite and tangible perpetual savings" that he cannot put in figures, he estimates the assessable economies at $200,000 a year, cumulative and perpetual. These savings would take care of a debt of $3,250,000 and pay it off in 30 years, and hence Mr. Couzens deduces that the price asked by the company for its franchise is entirely reasonable. By the Ross report the company's physical assets were valued at $6,132,754, leaving the difference of $1,867,246 as franchise value.

"In the event of it being decided to effect the consolidation," Mr. Couzens suggests that "the whole business of the Toronto Electric Light Company, including that outside the city limits, be secured at the same time."

Safeguarding Power Supply.

Safeguarding an uninterrupted supply of power is deemed of paramount importance. The company's steam reserve plant has a capacity of 11,500 kilowatts, while the construction of a 10,000-kilowatt steam reserve is being considered by the hydro system. Neither of these, independently, could carry either system's maximum load in the event of a breakdown on the Niagara lines, but the two together could assume the whole load of either system. Thus, under an amalgamation, if one Niagara line broke down there need be no interruption, the combined system being served by the steam reserve and the other Niagara line. Mr. Couzens also thinks it would be feasible to provide for coupling together the two generating systems at the falls, so that power from both generators could, in an emergency, be sent to Toronto over one transmission line.

He figures on securing the first fruits of consolidation with the hydro in from 12 to 18 months. And after consolidation is effected, he says, "all savings are perpetual and progressive, whereas any costs that may be placed on the consolidated undertaking to cover interest and sinking fund on the difference between the purchase price and the value to the consolidated system, continue only for a limited period of time."

Covered by Future Savings.

Mr. Couzens also says:—"At the end of 30 years the city will not only have paid for the assets of the company, but, due to the depreciation allowance, will be in possession of a new plant and an accumulating fund calculated on a basis of purchasing a similar plant of equal capacity at the end of the useful life of the new plant." Elsewhere, his comment is, "The increased capital expenditure required from time to time in order gradually to bring the two separate schemes, as they extend for some years to come, into one definite undertaking, should be amply covered by the future savings arising directly from consolidation, after providing for all other charges."

No account has been taken by Mr. Couzens of what he terms "aesthetic problems and sentimental considerations," but he points out that the control of the entire situation, "whereby the best engineering scheme can be adopted without regard to the question of expediency, which is inseparably associated with present conditions," would be an invaluable factor for betterment.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended November 21st, 1913:—McKinley-Darragh-Savage Mine, 63,410; Dominion Reduction Company, 64,500; Cobalt Comet Mine, 75,138; Right-of-Way Mine, 80,520; Peterson Lake S. C. Mine, (Seneca Superior Ore), 79,334; Cobalt Lake Mining Company, 103,570; Cobalt Townsite Mine, 326,700; Penn-Canadian Mine, 137,560; La Rose Mines, 247,200; total, 1,177,932. The total shipments since January 1st are now 36,226,436 pounds, or 18,113 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 20,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons

---

CO-OPERATIVE ELEVATORS PROFITS

Saskatchewan Company Has Chain of Nearly Two Hundred Elevators

Profits amounting to $167,927 are shown in the annual statement of the Saskatchewan Co-operative Elevator Company, Limited.

The profit and loss account shows that the revenue for the year totals $600,923.61, while the expenses total $423,996.75. The largest item on the debit side of the account is $175,942.76, representing station expenses and supervision. Head office salaries account for $47,186.04, interest on loans $31,786.67, while $31,349.88 is allowed for depreciation on elevators, office furniture and fixtures. Commissions received during the year total $103,041.99, grain accounts have brought in a revenue of $334,106.44, storing and handling charges $163,685.18.

Assets Nearly Million and Three-Quarters.

The assets of the company, as indicated in the statement total $1,709,487.57; the elevators alone representing $1,289,928.87 of this total. Of the share capital of $2,000,000 authorized, $1,514,350 has been subscribed, and of this $227,152.50 has been paid. The loan from the Saskatchewan government, inclusive of interest, totals $1,205,843.44.

It was also decided at the annual meeting to declare a dividend on the paid-up capital of 8 per cent., and in addition to this a portion of profits to the extent of $3 a share, to be applied to the increase of paid-up capital of each shareholder.

Mr. J. A. Maharg is president of the company and his efforts, together with Mr. C. A. Dunning's efficient management have had much to do in achieving these results.

"The problem of financing a rapidly-growing concern with such a small paid-up capital has always been the greatest problem confronting the directors," states their report, and adds:—"A review of the financial history of the company will give our shareholders an idea of the great importance of keeping our financial position and requirements always in mind.

Borrowed from Banks.

"Practically all the money used for purchasing and handling grain must be borrowed from banks, and it must be borne in mind that our requirements have increased from half a million dollars in 1911 to two millions in 1912, and in 1913 will probably reach 2½ million dollars. The problem of financing can be readily understood when the foregoing figures are compared with the amount of paid-up capital shown in the balance sheet, which does not exceed two hundred and fifty thousand dollars. Of course each year of financial success experienced by the company adds to its financial standing and places it in a stronger position to control the grain trade of the province in the interest of the farmers."

During the year which closed on July 31st, 12,899,030 bushels of grain were handled by the elevators, 4,384,635 bushels of which were purchased by the company and 8,514,395 bushels special binned for farmers, the number of elevators operated being 137. The commission department of the company at Winnipeg handled 8,515,037 bushels of grain on commission, and also sold for the elevator department 4,246,649 bushels of the company's purchased grain.

"The construction department this year erected 50 new elevators, and has also undertaken the remodelling of several of the purchased elevators.

The support accorded the system is indicated by the following receipts:—3¼ million bushels with 46 elevators in 1911, 13 millions with 137 elevators in 1912, and up to date in 1913, with 192 elevators operating, over 13¼ million bushels, which indicates that a higher average per elevator will be recorded this year than ever before.

INTERESTING VOLUME ON STATISTICS

Giffen's Statistics is a comprehensive volume by a well-known world authority, and deals with the meaning and objects of statistical records. The chapters include, Population, Government, Manufacturing, Railway, Financial, and other returns. The construction of tables is also dealt with.

Indeed, the book is, as its author states, "An account of the principal facts established in each branch of statistics and of the principal controversies and questions which the different branches of statistics have been used to discuss."

Statistics, 1898-1900.—By the late Sir Robert Giffen, $3.50. Macmillan Company of Canada, Limited, Toronto.

QUEBEC'S SATISFACTORY BUDGET

Financial Statement of Provincial Treasurer is Indicative of Progress Made

A total ordinary revenue of $8,382,737, a total ordinary expenditure of $7,612,161.66, a total extraordinary expenditure of $341,823, and a surplus of $428,752 of ordinary revenue over both ordinary and extraordinary expenditure were the announcements with which Quebec's treasurer, the Hon. P. S. G. Mackenzie, opened his budget speech, in which he summed up the results of the financial operations of the province during the fiscal year ended on June 30th last.

The increase in the service of the public debt, said Mr. Mackenzie was mainly accounted for by the payment of the first half-year's interest on the good road's loan. The increase in public works, extraordinary, had been principally expanded for the freeing of toll bridges and toll gates and that in agriculture upon the additional aid given to agricultural societies, farmers' clubs, fruit growing, the dairy industry, etc.

The proceeds of the good road's loan, Mr. Mackenzie reported were expended as follows:—

Paid municipalities before proceeds of loan received, $121,609; paid to same from proceeds of loan in addition to above amount, $1,768,097, making a total of $1,889,706 paid them to date; total payments to government roads to date, $411,523; which make the total payment $2,301,229 to this time or an excess of $370,660 over the proceeds of the loan.

Revenue in Excess of Estimates.

With respect to the current year, Mr. Mackenzie said that the legislation of last session would entail an additional expenditure of about $300,000 over his estimate, the principal item of this increase being a $112,515 for interest and sinking fund of the good road's loan, and about $125,000 for the abolition of turnpike roads and toll bridges. Besides this, there would be $42,500 for interest to be provided for on a temporary loan of £300,000. It was probable that additional amounts would also be required in excess of present appropriations, for which supplementary estimates would be submitted. The ordinary and extraordinary expenditures for the period between July 1 and November 17 of the current year had been $219,159 more than the same expenditure for a like period last year. On the other hand, the prospects of a revenue largely in excess of the estimates were encouraging. The ordinary revenue from July 1 to November 17 of this year was more than $750,000 in excess of the ordinary revenue for the same period of the last fiscal year.

Mr. Mackenzie estimated the ordinary revenue for the year ending June 30th at $7,777,956, and the ordinary and extraordinary expenditures at $7,439,534, which would give an estimated surplus of $338,421. He remarked, however, that the estimated expenditure would necessarily be increased by the amounts required to meet the interest and sinking fund on whatever further loans might be contracted under the Good Roads Act, 1912, which would, however, be compensated in the receipts to the extent of the collection of the municipal contributions of 2 per cent. The government might also be called upon to make certain expenditure for the abolition of toll roads and bridges. It would be necessary during the course of the year, by a further issue under the Good Roads Act, to provide for the cost of that expenditure.

With respect to the time of any further flotation, as he had already stated, the government would be guided by the condition of the money market.

Must Proceed with Progress Policy.

Following a reference to the interprovincial conference, Mr. Mackenzie concluded:—

As the province cannot stand still in any event, we must proceed with our policy of moral and material progress. To borrow for the purpose of paying for great capital expenditures, such as the construction of the roads, railway and other great public works, is perfectly justifiable and expedient, but our revenues should be sufficient to meet our increased interest charges as well as the increased and steadily increasing expenditure incurred in connection with all the great spending departments of the government. To accomplish this task within the compass of the revenue without unduly adding to the burdens of the people, especially upon those the less able to bear them, has always been and always will be the aim and policy of the prime minister."

◆

In 1911 the value of Alberta's dairy products amounted to $10,283,016, compared with $546,476 in 1901. The increase represented by these figures shows that dairying has come to the front as a close competitor with the grain-growing business, which produced crops in 1911 to the value of $16,978,944, compared with 1901. when the total grain production was valued at $2,618,420.

LIFE OFFICERS AT CANADA'S "HARTFORD"

Discuss Taxation of Life Insurance Premiums—New Officers

The Canadian Life Officers' Association held its annual meeting at the home office of the Mutual Life of Canada at Waterloo, which is becoming known as Canada's "Hartford," owing to the various insurance companies' head offices being located there, in response to an invitation of the retiring president, Mr. Geo. Wegenast.

At the afternoon session the principal subject discussed was the taxation of life insurance premiums. In regard to the question of taxation of life companies' premium income, the net result of the conference indicated a unanimous feeling that life insurance taxation, more particularly in Quebec, should be more consistent and uniform and less burdensome to policyholders. The concerted effort which will be put forth on behalf of the relief of the policyholders it is believed will bear fruit.

Taxation of all kinds, when levied on the premiums in particular directly increases the cost of the policy or reduces the results under the policy. This in many cases becomes a great hardship to the insurer of small means, particularly of the laboring classes.

New Member to be Admitted.

At the request of Dr. H. Rogers, chief medical director of the New York Life Insurance Company, and chairman of the medical index bureau committee, the association has been asked to take over the supervision of the library bureau interchange system for Canada. The assistant secretary, Mr. W. G. Reburn was delegated to take charge of the work.

Application for membership to the association has been received from the Mutual Life and Citizen's Assurance Company, Limited, of Australia. In accordance with the by-laws of the association, Mr. A. B. Wood, gave notice that he would move at the next meeting that the Mutual Life and Citizen's Assurance Company, Limited, of Australia, be admitted to membership.

The newly-elected officers are:—President, T. B. Macaulay, F.I.A., F.A.S.; first vice-president, A. Bissett; second vice-president, G. A. Somerville; honorary secretary-treasurer, D. E. Kilgour; assistant secretary-treasurer, W. G. Reburn. Executive committee, the officers and Messrs. Geo. Wegenast, J. E. Kavanagh, A. R. Howell, Col. W. C. MacDonald and J. F. Weston.

Well-known Officials Present.

The following were present:—Messrs. L. Goldman, managing director, North American Life Assurance Company; Col. W. C. Macdonald, secretary and actuary, Confederation Life Association; G. A. Somerville, general manager, Manufacturers Life Insurance Company; Geo. B. Woods, president, Continental Life Insurance Company; A. N. Mitchell, general manager, Federal Life Assurance Company; Alex. Bissett, manager for Canada, London and Lancashire Life and General Assurance Association, Limited; A. B. Wood, actuary, Sun Life Assurance Company; F. G. Cope, assistant secretary, Sun Life Assurance Company; W. A. P. Wood, actuary, Canada Life Assurance Company; D. E. Kilgour, actuary, North American Life Assurance Company; J. B. McKechnie, actuary, Manufacturers Life Insurance Company; E. Marshall, general manager, Excelsior Life Insurance Company; J. F. Weston, general manager, Imperial Life Insurance Company; J. G. Richter, manager, London Life Insurance Company; A. R. Howell, manager for Canada, the Gresham Life Assurance Society; John Milne, Northern Life Assurance Company; J. G. Parker, associate actuary, Imperial Life Assurance Company; A. H. Selwyn Marks, secretary, Crown Life Insurance Company; L. A. Stewart, manager for Canada, United States Life Insurance Company; Thos. Hilliard, president, Dominion Life Assurance Company; R. A. Mannings, Royal Insurance Company; Geo. Wegenast, managing director, Mutual Life of Canada.

GUARANTEE COMPANY OF NORTH AMERICA BUILDING

The building of the Guarantee Company of North America is one of Montreal's latest modern business blocks. A descriptive booklet has been prepared dealing with its attractive features. A copy of the pamphlet the company will forward to applicants.

◆

The Canadian Bridge Company has been awarded contracts for four bridges on the Eastern part of the Transcontinental. The price is $90,469. The Maritime Dredging Company will construct a breakwater at Mace's Bay, N.B., for $11,823.

Additional Cable News

(Continued from page 833.)

RESULT OF DOMINION STEEL ISSUE

†London, November 24.—Fifty-two per cent. of the Dominion Steel new six per cent. issue has been left with the underwriters.

CONTRACTS FOR WINNIPEG WATERWORKS

*London, November 22.—English contractors have received advance notice of the proposal of the administrative board of Greater Winnipeg to call for tenders early in 1914 for the Shoal Lake waterworks, costing thirteen and a half million dollars. The plans are on view at the Canadian Chamber of Commerce here.

ENGLISH EXHIBITION TRAIN FOR CANADA

*London, November 22.—The famous English construction firm, the Metropolitan Carriage Wagon and Finance Company, have offered to construct a British manufacturers' exhibition train to tour Canada, send it across the Atlantic and re-erect it at Montreal. Some manufacturers are already booking space in the train, though all arrangements are in a very elementary stage.

SPANISH RIVER NOTES COST HEAVILY

†London, November 21.—Spanish River Pulp and Paper Mills, Limited, which operates at Espanola, Ont., offers today six per cent. two and three-year sterling notes, averaging to yield over 8¼ per cent. The Daily Mail remarks that these are extremely onerous terms for the company, which gives no indication of reasons for the borrowing except that the proceeds will repay outstanding loans and provide further capital.

SASKATOON IS FLOATING LOAN

†London, November 24.—Saskatoon City is about to float a five per cent. loan of £169,700 at 93. Exactly a year ago Saskatoon borrowed £400,000 on a five per cent. basis at 99½. This was subscribed ahead of time, and rose to two per cent. premium, at which price it remained until a few months ago, when it dropped to the present price of 97.

†London, November 25.—The city of Saskatoon new issue prospectus for £169,700 of 5 per cent. at 93 shows that the offer is not made directly for the city, but for those who have purchased the stock outright, the terms not being stated. The Morning Port remarks that, while the issue is a fair investment, the stock is not likely to be very readily saleable.

TORONTO TO MAKE NEW ISSUE.

†London, November 27.—The Canadian Associated Press learns that the new city of Toronto loan of £1,200,000 4½ per cent. bonds will be floated almost immediately at 97½. Toronto's last application here was in January, when the issue was a 4 per cent. one at 92½.

Opinion here at the time was that Toronto acted advisedly, as 4 per cent. loans were completely out of favor. The fact that only 15 per cent. of the loan was taken by the public justified this opinion. This loan is now quoted at 90-92.

The quarter-million Alberta treasury six months' loan has been placed at 5¾.

The Bank of Montreal announces that Saskatoon's 5 per cent. issue at 93 has been subscribed ahead of time.

◆

One of the surprising things which he had experienced in New York was the comparatively small number of inquiries received there from Canadians, said Mr. J. Joyce-Broderick, His Majesty's Consul at Amsterdam, in an address to the Canadian Club, Toronto. Canadians seemed not to be cognizant of the fact that the consular service was as much at their service as any part of the British Isles, and the speaker made an appeal to those present to make use of the service in every possible way; he had been authorized to say this on behalf of the British Government and his colleagues, "and you may use us whenever and wherever it is to your advantage to do so."

TORONTO'S TRANSPORTATION SCHEMES

The following summarizes the plan for street car service for Toronto, pending the expiration of the Toronto Railway Company's franchise as proposed by the Toronto Harbor Commission:—

	Double-track miles.	Estimated cost.
Essential radial railways	25.46	$13,197,525
Surface line extensions	23.05	1,786,000
Totals	48.51	$14,983,525

TELEGRAPH BUSINESS HAS INCREASED

Monetary Times Office,
Montreal, November 27th.

All the telegraph and cable companies operating in Montreal are understood to be doing more business than at this time last year. This will surprise many who had assumed that the telegraph companies would be among the first affected by a general slowing down in stock exchange and general business. An official of one of the companies states that in a period of real depression, such as in 1907, telegraph tolls are one of the first expenses which most concerns try to cut down. This year, although some houses have been economizing in the matter of telegrams and cables, the majority of the larger houses have been increasing their tolls, and the net result has been a substantial increase in the receipts of telegraph and cable companies operating in Canada. It is understood that the Great North-Western Telegraph Company's receipts for October were from 15 to 17 per cent. in excess of those last year, and that every month in 1913 thus far has shown an increase over the corresponding month last year. The Anglo-American Cable Company has also been showing increases in earnings, largely as a result of the plan adopted about a year ago of receiving messages at a greatly reduced rate for delivery any time within the following twenty-four hours. This department is a success.

◆

POWER COMPANY ADDS NEW SUBSIDIARY

Monetary Times Office,
Montreal, November 27th.

The Sherbrooke Railway and Power Company has acquired the Burrows Falls Power Company, of Ayers Clift, Quebec. This company controls the commercial lighting and power business as well as the municipal lighting in Ayers Cliff.

The Sherbrooke Company now also owns: The Eastern Townships Electric Company, which has the lighting and power business of Eustis, Capelton, Waterville, Compton and North Hatley; the Stanstead Electric Company, controlling the business of Stanstead, Rock Island, and Beebe; the Lennoxville Light and Power Company, controlling the business at Lennoxville and Huntingdon, and the International Electric Light Company, controlling the business of Derby Line, Vt., and Beebe Plain, Vt. These systems are connected by a main transmission line from the Sherbrooke Company's power plant in Sherbrooke. The line is over 35 miles in length. Although each company has its own small power development, the Sherbrooke Company supplies all the current from its central, large hydro-electric power in Sherbrooke.

The statement of the gross and net earnings of the company for the four months from July 1st to October 30th, 1912 and 1913, is as follows:—

	1912.	1913.	Increase.	Per cent.
Gross earnings ..	$43,396.01	$51,201.63	$7,805.62	17.9%
Operating expenses	25,575 05	29,094.16	3,519.11	13.7%
Net earnings ..	$17,820.96	$22,107.47	$4,286.51	24.0%

In the earnings this year will be included power contracts with the Canadian Brakeshoe Company for 700 horse-power, the Canadian Connecticut Cotton Mills, Limited, for 500 horse-power, and the Panther Rubber Company for 150 horse-power, the total being 1,350 horse-power; this will be increased by small contracts to 1,500 horse-power. The company expects that the majority of these contracts will be in operation during the next three or four months, increasing the net earning power of the company without materially increasing the operating expenses.

◆

The activities of Montreal city's pure food department during 1913 resulted in the destruction of approximately 1,000,000 pounds of various foodstuffs unfit for human consumption.

CHARTERED BANKS ARE "MARKING TIME"

Circulation is Greater and Deposits in Central Gold Reserve Increase—Current Loans Are Slightly Less Than in September

	October, 1912.	September, 1913.	October, 1913.	Year's inc. or dec.	Month's inc or dec.
Deposits on demand	$383,814,572	$381,737,513	$389,856,507	+ 1.5	+ 2.1
Deposits after notice	640,097,928	621,249,585	621,511,207	— 2.9	+ .04
***Current loans in Canada**	879,676,655	903,717,013	900,159,736	+ 2.3	+ .39
Loans to municipalities	....	37,465,383	37,846,369	......	+ .99
Current loans elsewhere	41,300,588	46,402,913	58,171,884	+40.8	+25.3
Call loans in Canada	73,959,866	70,047,291	71,118,255	— 3.8	+ 1.5
Call loans elsewhere	101,186,983	86,639,411	93,346,810	— 7.7	+ 7.7
Circulation	110,696,877	111,075,519	118,234,359	+ 6.8	+ 6.4

*Including loans to municipalities.

The above are the principal changes in the Canadian bank statement during October. Generally, the statement indicates a "marking time" in a cautious way on fairly comfortable ground. Its features are circulation in excess of capital, a 100 per cent. increase in the central gold reserve over the previous month, a slight increase in loans to municipalities, gains in current loans abroad and call loans at home and abroad, and a small decrease in business loans in Canada.

Canadian Loans for a Year.

The following table shows the trend of the Canadian loans accounts for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—October	$879,676,655	$73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69,982,540
June	899,260,009	68,642,377
July	901,550,453	67,991,255
August	899,132,894	67,233,983
September	903,717,013	70,047,291
October	900,159,736	71,118,255

Current loans in Canada decreased in October by about $3,000,000 or 0.39 per cent. They are about $21,000,000 greater than a year ago. The October total was exceeded only twice in the past 13 months. Call loans in the Dominion are roughly $1,000,000 or 1.5 per cent. higher than in September. The high mark during the past 13 months was reached in October, 1912, when domestic call loans totalled $74,000,000.

Loans Record of Four Years.

The following table shows the expansion of loans at home and abroad, during the past four years:—

October.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909 ..	$579,837,956	$37,311,103	$56,996,065	$129,964,353
1910 ..	679,820,039	41,269,126	64,561,641	103,279,774
1911 ..	768,492,008	36,962,543	69,088,467	88.722,640
1912 ..	879,676,655	41,300,588	73,959,866	101,186,983
1913 ..	900,159,736	58,171,884	71,118,255	93.346.810

Current loans in Canada have practically doubled in four years. They have shown a gain every year of approximately $100,000,000, striking testimony to the extension of bank credit to legitimate business. Current loans elsewhere, chiefly in London and New York, do not increase so rapidly and are in considerably smaller amount. Last month, they amounted to $58,000,000, the highest October total in five years. Call loans in Canada are $1,000,000 greater than in September and $3,000,000 less than a year ago. Call loans abroad have fluctuated considerably, have never exceeded $150,000,000 and last month were down to $93,000,000.

Deposits at Home.

The following table shows the course of domestic deposits accounts for the past thirteen months:—

	On demand.	After notice.
1912—October	$383,814,572	$640,097,928
November	376,829,372	635,810,703
December	379,777,219	632,641,346
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608
June	362,769,928	622,928,969
July	356,585,196	621,347,388
August	358,321,925	619,032,847
September	381,737,513	621,249,585
October	389,856,507	621,511,207

Demand deposits were higher in October than in any month during the past thirteen. They were $6,000,000 or 1.5 per cent. greater than a year ago and during October increased 2.1 per cent. After notice deposits are 2.9 per cent. less than a year ago, but show a slight increase of 0.04 per cent. over September's figures.

The deposits record for the past five years is given in the following table compiled by *The Monetary Times*:—

October.	On demand.	After notice.	Total.
1909	$250,968,487	$480,837,606	$ 731,806,093
1910	280,838,612	549,016,725	829,855,337
1911	331,953,562	586,451,045	918,404,607
1912	383,814,572	640,097,928	1,023,912,500
1913	389,856,507	621,511,207	1,011,367,714

Total deposits are still maintained above the billion dollar mark. Both demand and notice deposits have made good records during the past few years.

Note circulation was increased during October to within nearly $1,000,000 in excess of the paid-up capital. The central gold reserve, against which the banks can issue notes, is a new factor in the situation. The deposits in the reserve increased during October from $4,023,000 to $7,373,000. Municipal loans in July were $43,000,000. In September they had been reduced to $37,000,000 and last month they showed a small increase, about $300,000.

GRAIN GROWERS SHOW GROWTH.

A successful year's working is shown by the annual statement of the Grain Growers Grain Company, Limited. Profits were to the extent of $170,236. There was added to the reserve $96,609, the general reserve now being $152,575, and the special reserve is shown as $20,424. The company's assets are as follows:—Investments, including stocks and shares, real estate, elevator building, stocks of grain, etc., the value of which is $1,371,152.

When this progressive company commenced business in September, 1906, the subscribed capital was $25,000, and the paid-up capital $5,000, with 1,000 shares allotted. In June last, there were 32,500 shares allotted, capital subscribed amounted to $809,950, paid-up capital was $645,361. In its operations practically 30,000,000 bushels of grain were handled in comparison with two millions during the first year of its activities. This is evidence of the aggressive and businesslike policy of President T. A. Crerar, the officers and directorate, and must be satisfactory to all interested.

◆

WHAT CANADA EXPORTS

The value of the exports of Canadian produce in the last two fiscal years is as follows:—

	1911-12.	1912-13.
Produce of mine	$41,324,000	$57,442,000
Produce of fisheries	16,704,000	16,336,000
Produce of forest	40,892,000	43,255,000
Animals and their products	48,210,000	44,784,000
Agricultural products	107,143,000	150,145,000
Manufactures	35,836,000	43,692,000
Miscellaneous	111,000	97,000

TWENTY-PAYMENT LIFE PLAN

Some of the Options and Privileges Which Attach to This Popular Form of Life Insurance

BY J. B. HALL, A.I.A., A.A.S.

In a recent issue of *The Monetary Times*, I referred briefly to those fundamental features of the 20 Payment Life Policy which make it an attractive medium for providing complete protection. It will be of interest to mention some of the options and privileges which attach to this form of insurance.

In common with the majority of other plans of life insurance, this policy contains that most valuable of privileges, the "Automatic Non-forfeiture" or "Extension" clause, which operates to prevent the lapse of the policy through temporary oversight or inability to pay the premium when due. This feature, which practically every company incorporates in its policies, illustrates the thoughtful manner in which companies look after the interests of their policyholders, and is in marked contrast with the practice of fraternal orders and assessment companies, where failure to pay voids the contract.

Then, too, there is the surrender privilege which enables the assured to terminate his policy, if necessary, and obtain in exchange either a fully-paid-for life policy or a specified sum in cash.

Value of Loan Privilege.

The loan privilege, while sometimes abused, is also of incalculable value. The loan values are set forth plainly in the policies, and are practically payable on demand. The year, 1913, has tested this privilege almost to the limit, for during this protracted period of money stringency, the demand for policy loans has been large, and the value of a life policy as a business or personal asset has been amply demonstrated. Contrast again the weakness of a fraternal policy, which is entirely worthless as a negotiable asset.

The foregoing privileges become available to the assured, usually after the payment of three annual premiums. I had almost overlooked the "Extended Term Assurance" feature, whereby the assured is permitted to surrender his policy and obtain in exchange a term policy, fully paid up, granting protection for a specified time.

Where the policy is a participating one, and it is usually wise to select such a one, other advantages become apparent. This word "participating" is almost self-explanatory, and in the meantime I will consider it so, although it is my purpose in a later article to deal exclusively with this one topic. It will here be sufficient to say that "participating" implies the participation by the assured in the surplus or savings left from the premiums after the cost of the protection has been met and the required reserve set aside.

How Surplus May be Taken.

This surplus may be taken in any one of a number of different ways:—

1. It may be withdrawn annually in the form of cash. The option is not offered by all companies, and for many reasons is not the most desirable in the policyholder's own interest.
2. It may be distributed every five years, and taken either in cash, in the form of an addition to the sum assured, thus increasing the protection, or it may be applied towards reducing future premiums.
3. It may be allowed to accumulate in the hands of the company for a period of ten, fifteen or twenty years, or even longer, as may be the wish of the assured. With many companies this method implies the "tontining" of the surplus. This means that those who survive the selected period share among them the surplus earned on those policies which terminate during the "tontine" period, while those who drop out or die, get no surplus whatever. There is a certain element of gambling in this method which make it open to certain objections, and besides the assured does not always understand just what the method implies. It has, however, certain advantages, among them being the tendency to prevent premature and unwise termination of the policy by surrender. Some companies, however, have discarded this "tontine" feature, and, while affording those advantages which are peculiar to an accumulation policy, do away with the risk to the assured of losing the surplus through premature death.

In other words, if the assured lives to the end of the selected period of say 20 years, he receives all the surplus saved in connection with his policy, and if he should die during the 20 years his estate, receives in addition to the face of the policy all surplus earned up to the time of death. This is perhaps the best method of utilizing the surplus for, besides increasing the amount of the protection, it enhances the value of the policy at the end of 20 years, and stimulates the saving function which is inherent in all participating policies. In either case the options available at the end of the accumulation period are much the same, and afford every reasonable facility for adjusting the insurance at that time.

In the first place where the period is one of 20 years the assured has the right to continue the policy for so long as he may desire without paying any more premiums, and he may dispose of the accumulated surplus of the 20 years by withdrawing it in cash, by using it to buy additional insurance, or by purchasing with it a life annuity. Whatever course he decides upon, it must not be lost sight of that so long as he may continue, his policy continues to create surplus which he may withdraw in cash every five years, or utilize as he may otherwise decide. This is a most important feature since it tends to further cheapen the cost of the insurance thus increasing the advantage over the non-participating form of insurance.

In the second place the assured has the right to terminate his policy entirely, and to accept in exchange either cash or a life annuity. The cash consists of both reserve and surplus, and in any carefully managed company exceeds to an appreciable extent the amount paid in premiums.

Interest of the Assured.

It would make this article too lengthy to recite the other minor options afforded by this policy in common with others. It is sufficient to say that the whole trend of present-day policy contracts is in the interest of the assured, and every privilege and advantage is afforded him which tends to make his policy a real and durable asset, something which can be relied upon to afford absolute protection at a minimum of cost. Every facility is supplied to the assured to enable him to hold his policy and no unfair advantage is taken where stress of circumstances make continuance impossible. The life insurance company of the future, the one which will live and prosper, is the one which keeps its policyholders' interests ever to the front; the one which is performing a real and lasting service to the individual and to the state.

CANORA OFFERS CHEAP SITES

At a recent meeting of the Canora, Saskatchewan, board of trade, a proposal was submitted by Mr. C. R. Graham, whereby the board of trade has been given control of over $100,000 worth of trackage property located within the town limits, and to be held by the town as an asset to be disposed of at a nominal price of $1 per acre to manufacturers, wholesalers and public institutions desiring to locate there. The proposition was unanimously accepted by the board of trade, and plans are already being made for a comprehensive advertising campaign whereby they will endeavor to place their claims as a distributing centre before eastern manufacturers and distributors.

The position of Canora as a distributing centre in the west has been greatly hampered owing to the high prices asked for industrial sites. The new arrangement, together with cheap electrical power, low rate of assessment, and an abundant supply of pure soft water, which is to be brought from Crystal Lake, will place Canora on an equal footing with many of its competitors in bidding for industrial capital.

◆

CANADA DRAWING GOLD.

Because of the sharp fall in Montreal exchange on New York, early in the month, it was pointed out that there was likely to be an extensive movement of gold to Canada on the present occasion. Usually the decline in Canadian exchange does not come until toward the end of a month, as the banks there begin to draw on their balances for window dressing purposes. But lately there has been quite an extensive accumulation of credits on the New York market for account of Canadian bank, growing out of the sale of grain bills there, that New York drafts have been sold rather freely in Montreal, says the Wall Street Journal. The shipment of some gold from London to Canada a week or so ago disclosed the unusual drift of credits in favor of the Dominion. The fact that a city of Montreal loan of $7,500,000 has lately been brought out in London, contributed to the present movement.

Before the end of the month, the chances are that considerably more gold will be sent to Canada before the demand here is satisfied. Money is fairly tight all over the Dominion at present, and the state of the money market in New York indicates that funds can be spared for Canada's requirements.

The withdrawals of $2,600,000 gold for Canada last week bring the total shipments so far this year up to $8,450,000. From this must be deducted $1,800,000 of gold that was brought from Canada to New York last July, when Canadian funds were moving in that direction, and, as a result, Montreal exchange on New York stood at as high a premium as it is at a discount just now. A further $2,250,000 was drawn on **Tuesday.**

WHERE DID HUNDRED THOUSAND GO?

Question Arises at Union Life Inquiry—How English Capital Was Tempted

The Union Life inquiry was resumed on Monday and on Tuesday afternoon was adjourned until December 10th. Mr. H. Pollman Evans, formally president of the company, was on the stand. He told of the relations of the various allied corporations in connection with large losses sustained by the Union Life before its failure. The disappearance of $100,000 of the moneys obtained from British investors by the Union Life Assurance Company through the circulation of an optimistic prospectus and the fact that the company paid $340,000 of the English capital to obtain $176,000 worth of Home Life Assurance Association stock was brought out at the investigation. Mr. C. A. Masten, K.C., representing the government, elicited the fact that the prospectus issued for circulation in the United Kingdom showed only the gross assets of the company, and that with the exception of the government reserve fund no other liabilities were shown. It also transpired that the London advisory board were not consulted by the management of the Union Life when the moneys of the British shareholders were invested.

Some Union Life Loans.

Of the first payment of English capital received, $50,000 of the amount went to discharge the debt of the Colonial Loan Company, of which the British investors knew absolutely nothing. When asked why this was not made known to the British public, Mr. Evans stated that the British prospectus did not purport to give a statement of the company's affairs in that way.

It was also learned that to float the stock issue and secure the sale of £157,000 worth of stock, it cost the Union Life £22,272 for the services of a London broker. There was expended for friendly articles in a financial journal £2,000, and a British Viscount, and another London society gentleman received £105 each for their assistance in assisting in floating the issue. This was floated by the London brokerage house on the understanding that they would receive a percentage of the amount sold, and that if the affair was a failure they would receive £7,500 worth of National Agency bonds.

All the Directors Knew.

The statement made by Mr. Symons that he did not believe that the directors of the Union Life were aware of some of the investments made by Mr. Evans was flatly denied by the latter. He said that the directors were conversant with all business done by the company, and that although some of the investments did not appear in the minutes of the meetings, the board were well aware of them.

The string of corporations controlled by Mr. Evans and his associates and used by him to finance the Union Life, or financed by the latter company, and their present standing, are as follows:—

The Union Life Assurance Company, now in liquidation; estimated loss about $1,200,000; contracts re-insured by the Metropolitan Life; policyholders who did not reinsure will receive a dividend of about 60 or 70 per cent.; stockholders not expected to receive any return.

These in Liquidation.

The National Agency Company, now in liquidation, parent company of the Union Life, will probably pay nothing to creditors, debentureholders, or shareholders.

The National Land, Fruit and Packing Company, now in liquidation; attempt now being made to reorganize; unless reorganization successful, loss will be almost $500,000.

The Imperial Loan Company; application has now been made for winding-up of company; dividends are uncertain.

The Canada Provident Investment Company, still operating, owes the Union Life $340,000; officers state company has no tangible assets which can be realized upon.

The Home Life Assurance Company, business reinsured by the Sun Life recently; policyholders fully protected, and company expected to make substantial, if not entire, returns to shareholders, with the exception of the block owned by the National Agency, which was disposed of to cover a debt of $10,000.

Some Other Companies.

The Stratford Building and Loan Association, still in business; debentures worth $200,000 held by the Union Life, but company has small tangible assets to meet payment.

The Agency Land and Security Company, still in business, and still controlled by Mr. Evans.

The National Credit Clearing Company, still in business, and controlled by Mr. Evans, owes the Union Life $6,700; assets said to consist of shares of the allied chain of corporations.

MUNICIPALITIES TO ECONOMIZE

Burnaby's Treasury Certificates May Go to United States House—Port Arthur's Departmental Returns

Burnaby, B.C., has made satisfactory progress in their negotiations for the disposal of the entire issue of $1,250,000 in 3-year treasury certificates to a Toledo, Ohio, financial house, subject to the approval of their solicitors.

Estimates for the forthcoming municipal year are in many instances in active preparation. *The Monetary Times* thinks those who are responsible for these expenditures, should follow a policy of care and economy.

No Money By-laws.

Vancouver's financial condition was discussed by Mayor Baxter and the chairmen of the standing committees at a luncheon of the Progress Club. The mayor made the announcement that no money by-laws would be submitted to the ratepayers at the election on the second Thursday in January in view of conditions in the London market. In this, he has secured the unanimous approval of the aldermen, and is also backed up by the city's fiscal agents, Messrs. Brown, Shipley and Company, London. Sewer work in various parts of the city next year may be needed, but when this is required the by-laws will probably be voted upon.

Alderman Hepburn, chairman of the finance committee, made the interesting statement that the city had a balance of $358,000, and while this would not be sufficient to carry it through to the end of the year, the overdraft would not be more than $300,000 or $400,000. The city's estimated revenue had been $300,000 more than what was actually received. All the treasury notes in London had been retired and an overdraft of $2,000,000 left by the last council had been wiped out.

Port Arthur's Expenditures.

That the different departments in Port Arthur are well within the estimates prepared at the beginning of the year is shown by a report submitted by city treasurer Gurney for the first nine months at the meeting of the city council. In the finance department the expenditures were $48,302.01 and the estimates $60,999. The fire, water and light department showed that $38,488.78 had been spent in keeping up the fire fighting equipment of the city and the street lighting, while the estimate was for $51,996. The board of works had expended $31,927.41 and the estimates were for $48,000. The license, police and relief committee expended $17,799.22 and received $15,105.52.

An effort will be made by Mayor Allan and the city officials to convince Hamilton city council that it will be a mistake to float $3,000,000 by debenture next year, as will be the case if the people carry all the schemes it is proposed to put before them.

AMONG THE LIFE UNDERWRITERS' ASSOCIATIONS.

One of the best meetings ever held by the Life Underwriters' Association of Toronto; took place last week when nearly a hundred attended. There were four ten-minute addresses dealing with the four steps in salesmanship—namely, approach, interest, creation of desire and the closing of business. These were dealt with by Messrs. F. H. Richardson, F. R. Shants, J. B. Hall and W. E. Nugent. An actual canvas of a prospect for life insurance was then given, Mr. A. L. Boyd being the seller and Mr. L. J. Lugsdin the buyer. Mr. Lugsdin raised all the old objections to taking further life insurance, about which every field man knows, but Mr. Boyd overcame these difficulties with excellent arguments. The chief criticism of his canvass was the method of his approach, which was a trifle too involved and did not get down to the real talking point soon enough. Mr. Taylor, vice-president of the association presided in the absence of Mr. T. B. Parkinson, president. Mr. A. H. Vipond, Montreal, and Mr. George Williams, also addressed the meeting.

Certain persons have been representing themselves as life insurance agents, and have been accepting premiums from persons taking out life insurance, which has led to a resolution being passed by the Saskatoon Life Insurance Underwriters' Association to the following effect:—"That this association do publish in the local daily papers the names of the members of the Saskatoon life underwriters' association in good standing, together with the company they represent."

The Edmonton Life Underwriters Association have been using the following advertisement in the papers issued in that city:—"When you buy life insurance from a non-resident agent you are at a disadvantage. He's here to-day and gone to-morrow. The resident agent is here ready to stand behind his contract. He spends in Edmonton the commission produced by the transaction. He can meet your insurance requirements, so be well advised and buy it from a resident agent."

T. C. BOVILLE,

Deputy Minister of Finance

OIL COMPANIES' CAPITALIZATION

Incorporation is Active in Western Provinces—Large Electrical Companies

Oil companies are the feature of Alberta's incorporations and account for about one-third of the total capitalization of all the following incorporations:—

This week's new incorporations number 83; the head offices of these companies are located in five provinces. The total capitalization amounts to $19,959,000, the largest companies being as follows:—

Alberta Hydro-Electric Company, Limited, Calgary	$1,000,000
Electrical Properties, Limited, Montreal	1,000,000
The Herron Elder Gas and Oil Development Company, Limited, Calgary	1,500,000
Montreal Hippodrome, Limited, Montreal........	1,500,000
United Oil, of Alberta, Limited, Calgary....	2,500,000
Alpha Mortgage and Investment Corporation, Limited, Vancouver, B.C.	5,000,000

Grouping these new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Quebec	14	$ 3,439,000
Saskatchewan	15	865,000
Ontario	11	695,000
British Columbia	14	6,635,000
Alberta	29	8,325,000
	83	$19,959,000

The following is a list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Red Deer, Alta.—Red Deer Curling Company, Limited, $20,000.

Bassano, Alta.—The Mail Publishing Company, Limited, $10,000.

Radisson, Sask.—Radisson Milling Company, Limited, $50,000.

Prince Rupert, B.C.—North Pacific Iron Mines, Limited, $600,000.

Canmore, Alta.—Georgetown Trading Company, Limited, $10,000.

Biggar, Sask.—The Erickson Hardware Company, Limited, $10,000.

Lamont, Alta.—The Russian Mercantile Company, Limited, $50,000.

Anglesey, B.C.—The Walhachin-Anglesey Canneries, Limited, $50,000.

Fort Steele, B.C.—Fort Steele Waterworks Company, Limited. $20,000.

Medicine Hat, Alta.—The Redcliff Gas and Oil Company, Limited, $300,000.

Lake Lenore, Sask.—The Lake Lenore Farming Company, Limited, $20,000.

Prince Albert, Sask.—The Prince Albert Printing Company, Limited, $50,000.

Lacombe, Alta.—The Middle West Construction Company, Limited, $50,000.

Leamington, Ont.—A. C. Stewart, Limited, $40,000. A. Gilmour, A. Cochrane, W. C. Johnston.

Chapleau, Ont.—Chapleau Cottage Hospital. J. J. Sheehan, W. C. Guthrie, V. T. Boughton.

Regina, Sask.—The Beta Apartments, Limited, $50,000. Waldie, Lockerbie & Turner, Limited, $20,000.

Fort Erie, Ont.—Sherry-Hunt Enterprises, Limited, $40,000. A. R. Sherry, W. E. Hunt, G. L. Needham.

Saskatoon, Sask.—Saskatoon Taxi Cab Company, Limited, $50,000. The Edgar Company, Limited, $20,000.

Windsor, Ont.—McNaughton-McKay Electric Co., Limited, $40,000. A. McKay, J. R. McNaughton, F. H. Boyer.

Rock Island, Que.—Stanstead Fur Farming Co., Limited, $20,000. F. W. D. Mellon, B. F. Butterfield, A. J. Bissonnette.

Chatham, Ont.—The Gulf Shore Silver Black Fox and Fur Company, Limited, $45,000. J. H. Adams, E. T. Chamard, J. E. D'Anjou.

Saint Joseph de Beauce, Que.—La Compagnie de Beton de Saint Joseph de Beauce, $15,000. I. Dallaire, M. A. D. Brassard, L. P. Dallaire.

Saint-Anne de Beaupre, Que.—Compagnie Manufacturiere de Saint-Anne de Beaupre, Limited, $20,000. A. Brunelle, F. Jacot, B. Boucher.

Victoria, B.C.—Monk, Monteith & Company, Limited, $300,000. Canadian and Northwestern Steamship Company, Limited, $100,000. Portland Island Development Company, Limited, $100,000.

Hamilton, Ont.—East Hamilton Home Builders, Limited, $100,000. C. S. Walters, J. J. Markham, T. Crompton. Brantford Heights, Limited, $40,000. R. M. Johnston, E. S. Kennedy, J. A. Warner.

Swift Current, Sask.—Great West Properties, Limited, $85,000. The Swift Current Bedding and Manufacturing Company, Limited, $50,000. The Swift Current Concrete Products Company, Limited, $50,000.

Moose Jaw, Sask.—H. France & Company, Limited, $100,000. Tuxford Hotel Company, Limited, $10,000. The Barnett Farms, Limited, $200,000. The Boyes Farms, Limited, $100,000. The Electro-Polygraph Advertising Company, Limited, $50,000.

Edmonton, Alta.—Reno Billiard Hall, Limited, $25,000. Coalondyke Coal Mining Company, Limited, $200,000. Paddle Valley Ranch, Limited, $25,000. McSporran & Company, Limited, $50,000. Ferguson & Hogg, $25,000. Peace River Landing Brokers, Limited, $30,000. The Western Apartments, Limited, $50,000. Gowan & Company, Real Estate Department, Limited, $10,000.

Vancouver, B.C.—Angelus Studio, Limited, $10,000. Consolidated Contractors, Limited, $250,000. Alpha Mortgage and Investment Corporation, Limited, $5,000,000. Hammond Sawmill Company, Limited, $100,000. Maclennan Construction Company, Limited, $25,000. Federal Cedar Mill Company, Limited, $20,000. E. W. Stark Tire Company, Limited, $10,000. Balfour-Guthrie Warehouse Company, Limited, $50,000.

Toronto, Ont.—Pecol Share Corporation, Limited, £20,000. J. A. Bush, E. Brooker, R. Rowe. Simplex Sales Company, Limited, $50,000. G. Ruel, R. H. M. Temple, S. P. Briggs. Blodgett Reinforced Safety Tube Company, Limited, $100,000. W. H. Cook, G. B. Jackson, A. I. Shortt. Stockbridge, Limited, $100,000. L. F. Black, G. D. Walters, H. A. Hall. The Toronto Auto Repair and Garage Company, Limited, $40,000 W. B. Proctor, J. A. E. McDonell, J. H. Sharman. The Canadian National Trotting and Pacing Harness Horse Association. O. B. Sheppard, W. J. Cowan, G. Pepper.

Calgary, Alta.—The Eagle Oil Company, of Calgary, Limited, $10,000. Sorensen Stock Company, Limited, $10,000. The Independent Oil Company, Limited, $250,000. Standard Oil Fields of Alberta, Limited, $650,000. United Oil of Alberta, Limited, $2,500,000. Sentinel Oil Company, Limited, $150,000. West and Brown, Limited, $100,000. Great Northern Oil and Development Company, Limited, $200,000. The Herron Elder Gas and Oil Development Company, Limited, $1,500,000. Investors' Guarantee Association, Limited, $50,000. The Pacific Oil and Refining Company, Limited, $500,000. Mountain House Oil Company, Limited, $100,000. The Deep-Well Oil and Development Company, Limited, $200,000. The Western Pacific Oil Company, Limited, $250,000. Alberta Hydro-Electric Company, Limited, $1,000,000.

Montreal, Que.—Amalgamated Realties Company, Limited, $100,000. G. V. Cousins, A. H. Elder, F. J. Laverty. Henderson & Smyth, Limited, $150,000. D. P. Gilmour, F. G. Bush, G. R. Drennan. Montreal Realty Investments, Limited, $50,000. L. A. David, L. J. M. Dugas, L. E. A. d'Argy-Mailhiot. The International Specialties Company, Limited, $50,000. L. N. F. Cypihot, L. A. Cyr, L. Talioreti. Montreal Hippodrome, Limited, $1,500,000. E. Bouchard, J. Donaghy, T. Leblanc. Electrical Properties, Limited, $1,000,000. C. A. Pope, G. Barclay, W. B. Scott. La Societe Nationale d'Immeubles, Limited, $300,000. A. Mignault, P. Cousineau, S. Godfroi Laviolette. La Mont Royal, Limited, $20,000. J. Godbout, J. A. Groleau, J. B. A. Martin. White Smelting and Refining Works, Limited, $20,000. J. W. Richards, J. A. T. Richards, P. du H. Richards. Montreal Builders, Limited, $140,000. H. N. Chauvin, G. H. Baker, H. E. Walker. Gadbois, Limited, $45,000. J. P. Gadbois, M. J. Gadbois, J. Boule.

A delegation representing four of the milling companies of Canada, the Ogilvie, the Lake of the Woods, the Western Canada, and the Maple Leaf, waited upon Hon. Geo. E. Foster, Minister of Trade and Commerce, on Tuesday, and urged that some action be taken to remove the discrimination which at present exists between the ocean freight rates on wheat and flour exported from Canada. The members of the delegation claimed that during the past year a good export business had been ruined by the discriminatory rates in favor of the raw product charged by the steamship companies.

THEY CALL IT ACCIDENT NEUROSIS

Effects of the German Compensation Act Upon National Character—Ontario Proposes to Copy

Editor, The Monetary Times,

Sir,—From newspaper extracts regarding the Ontario Workmen's Compensation draft bill, it would appear that Sir William Meredith was so greatly impressed by the German law that he has modelled this bill on the same lines. If this is the case then I fear that Sir William has confined his study to the German act itself, and has not given any consideration to the injurious effect which that Act is having on the German national character. Their medical men declare that it has produced a veritable disease which is undermining the character of the entire German working population. It is called accident neurosis, and is described as a mental obsession on the part of insured persons who have become convinced that they are entitled to the benefits allowed by the Act. German medical men and other serious observers declare that the workmen's insurance is cruel to the working classes, because it is, in the most insidious and deceptive way, sapping the energy and self-respect of the working people.

Period of Incapacity Increased.

When a man's vitality has been lowered as the result of an accident and his mind is in a morbid condition, there comes to him the alluring prospect that if he could only continue in a partially disabled condition, the state would provide for him. Paradoxical as it may seem, workmen's compensation in Germany is now regarded as an injury to the public health. There is an unreasonable and an inordinate desire for insurance pay, and the right to the longest compensation has become a settled conviction in the minds of the working people.

The result has been that the periods of incapacity for stated accidents has increased more than six-fold. In Denmark, where the law does not provide for a continuing allowance, over 93 per cent. of observed cases of accident neurosis are cured, while in Germany the proportion is less than 10 per cent. If the German act has had such a disastrous effect upon the sturdy German character (and this can be easily proved) surely we in Canada, especially in the premier province of Ontario, should not enact similar legislation, which can scarcely fail to have the same ruinous influence upon the character of those whom it is intended to benefit.

Cost of Insurance.

Further, there is scarcely the shadow of a doubt that in a few years the cost of insurance under such an act as is proposed would greatly exceed the cost under any other form of compensation. In my opinion a good workmen's compensation act, with proper safeguards to protect the injured workmen's interests and enable him to secure what he is entitled to receive, without the interference of greedy and unscrupulous lawyers, would be far better for the workmen, for the employers and for the public generally than any form of State insurance that could be devised.

Yours, etc.,
J. E. E. Dickson,
(Canadian manager, Law, Union and Rock
Insurance Company.)
Montreal, November 25th, 1913.

◆

SAYS COMMISSIONER HAS RATES HOBBY

The National convention of insurance commisioners of the United States are investigating the Independent Order of Foresters. Mr. A. E. Stevenson, of Port Huron, Mich., brother of the Supreme Chief Ranger, has issued the following statement in regard thereto:—

"The true inwardness of the entire situation that the commissioners have created is that Mr. Ekern, of Wisconsin, and his actuary, Mr. Anderson, have a particular plan in their own minds that all societies should adjust their rates upon, and it has become a hobby with them.

"If the members of our society were all young men the plan would be very good, but we have 16,000 members over sixty years old. This plan would drive them out because, when they reached the age of about 65 years, some of them would be forced to pay as high as $20 a month in dues on a $1,000 policy.

"In our orders members at present stop paying when they are 70 years old, and draw a disability benefit. Under the plan we have adopted for these members who joined prior to 1899 when the rates were adjusted for members joining after that time, the greatest assessment made against old members is $200 on $1,000 policies. The member can pay this now if he wants to, or he can let go with accrued interest at 4 per cent., and it will be taken out of the policy at maturity."

DISCRIMINATION AGAINST EASTBOUND FREIGHT

Chairman Drayton, of Railway Commission, Presents Report on Ocean Rates

In his report on ocean freight rates to the Dominion government, Mr. H. L. Drayton, chairman of the board of railway commissioners, finds that a discrepancy exists between the treatment of the westward and the eastward movements of traffic. The westbound rates in effect are known in advance, the eastbound ones vary from week to week. The steamship companies justify this on the ground that the volume of westbound traffic is small in comparison with the accommodation available, whereas in eastbound traffic the volume of goods from time to time presses sharply on accommodation.

Dissents from Principle.

This principle, Mr. Drayton observes, in effect is that the greater volume of traffic should bear the higher rate, and he dissents from it. He also regards the higher charges and uncertainty as peculiarly hard on Canadian exporters, whose goods are of low value in comparison with the space occupied and the cost of transportation.

He finds the charge that the increased charges have absorbed the British preference unproved. He holds, however, that where there is close competition between British and foreign goods, the higher rates tend to lessen the purchases of British goods. He also finds that there is a virtual absence of competition. On these grounds he strongly urges the holding of an investigation.

Fixed by Independent Body.

The chairman also, while recognizing the difficulties of control, and admitting that in certain respects ocean transportation differs from land traffic, holds that maximum rates should be fixed by an independent body.

It is probable that the Dominions Royal Commission, of which the Hon. George E. Foster is a member, will sit in Canada in August, 1914, to consider the subject. The commission also may hold an earlier sitting in London to take evidence on it. Mr. Drayton hints that it may issue an interim report on ocean rates.

As the question had been referred to the Dominions Royal Commission, the British government could not, join in another investigation when this commission had charge of the subject.

◆

LIFE INSURANCE IN JAPAN.

The undermentioned is the present status of the life insurance business in Japan as it stood at the end of 1912, together with the statement of business done during the same year:—

1. Number of companies	33
2. New business in 1912	Yen 230,201,573
3. Assurances in force at end of 1911	826,120,957
4. Gain in assurances in force over previous year	143,721,301
5. Premium income for 1912	31,778,348
6. Total income for 1912	37,932,211
7. Claims paid in 1912	7,977,473
8. Expenses of management in 1912	9,363,442
9. Total reserve at end of 1912	101,437.095
10. Assets ditto	116,523,606

Besides the above, the business of the four foreign life insurance companies doing business in Japan, two of which the Sun Life and the Manufacturers Life are Canadian, is reported as follows by the government insurance bureau. The figures are for 1910, those for 1911 not yet being published by the government:—

1. New business in 1910	Yen 11,002.497
2. Assurances in force at end of 1910	53,849,866
3. Gain in assurances in force over previous year	6,565.504
4. Premium income for 1910	3,136.436
5. Claims paid	673.672

A comparative observation of the individual business of the leading life insurance companies in Japan for 1912 can be made by the above tables.

◆

A Cleveland dispatch says that American Marine Underwriters have announced they will insure Great Lakes ships sailing in December at 1 per cent. for vessels loaded prior to midnight December 4, and sailing not later than midnight December 5. For ships loaded prior to midnight December 7 and sailing before midnight December 8, the risk will be carried at 1½ per cent. The English underwriters are expected to meet the rates published by American companies.

DEBENTURES FOR SALE

$100,000 DEBENTURES FOR SALE.

TOWN OF HIGH RIVER, ALBERTA.

Sealed tenders addressed to the undersigned, will be received up to December 10th, 1913, for the purchase of $100,000 6½ per cent., 30-year Waterworks and Sewerage Debentures of the Town of High River.

By-law authorizing confirmed by Special Act of Alberta Legislature, 1913.

May be issued in one series repayable in equal annual instalments of principal and interest coupons attached; or separate series for instalments of principal due each year with coupons attached for annual payments of interest thereon.

Highest or any tender not necessarily accepted.

GEO. E. MACK,
Secretary-Treasurer.

Box 306, High River, Alta.

A few salient facts about a country, described by a United States business man as "the only country that has proved good enough for Americans to emigrate to," and which, by the way, they are doing at the rate of over a hundred thousand each year, are set forth in a tasteful brochure issued by Messrs. Anderson, Lanney & Company, the well-known financial firm of Regina, and who will forward copies to anyone interested in the growth and development of Saskatchewan and its capital city.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including **Wednesday, the 31st of December next,** for the right to cut pulpwood on a certain area situated on the Metagami River, in the District of Temiskaming.

Tenderers shall state the amount they are prepared to pay as bonus in addition to the Crown due of 40c. per cord for Spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor in Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into an agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, September 17th, 1913.

SUGGESTED VANCOUVER CHAMBER OF COMMERCE.

(Staff Correspondence.)

Vancouver, November 24th, 1913.

Men interested in the Vancouver Progress Club and in the progress of the city, have proposed that a chamber of commerce be organized, the proposal being to absorb all other public service bodies in greater Vancouver, and thus centralize the work. A committee will meet the Vancouver board of trade and other organizations to discuss the matter of general amalgamation. While it is believed this move is a good one, it is radical and means the practical retirement of the board of trade, which has long been an institution in Vancouver. If all energies can be centralized a good work can be accomplished. The club had an expert on commercial club work, Mr. H. V. Chase, give an address, and he strongly advised a scientific commercial organization, with experts in charge of the various bureaus or departments.

Second Mortgage Fifty-year Bonds of the Mexican Light and Power Company, Limited, will be paid on and after that date at the Canadian Bank of Commerce, Toronto, New York and Montreal, and at the Bank of Scotland, 30 Bishopsgate, London, E.C., England.

Dated this 27th day of November, 1913.

For THE MEXICAN LIGHT AND POWER COMPANY, LIMITED.

W. E. DAVIDSON,
Secretary.

SASKATCHEWAN'S VALUABLE CROP

The government of Saskatchewan states that the grain harvest this year will be valued at $110,000,000, of which $71,000,000 is represented in wheat, and $25,000,000 in oats. The total production was 243,500,000 bushels, of which 122,369,000 bushels was wheat, 110,210,000 bushels oats and 9,279,000 bushels barley.

MONTREAL AND PANAMA CANAL

Mr. R. Stanley Dollar, of San Francisco, recently visited the Montreal Harbor Commissioners and stated that he had tendered for the supply of 35,000,000 feet of timber for the new harbor works at Toronto, the same to be delivered in 1915. He had come to Montreal to see what the facilities were for securing water carriage for the timber from San Francisco, via Montreal to Toronto. Mr. Dollar has previously sent timber by water to Eastern Canada, but he has had to ship it round Cape Horn, so that the facilities offered by the opening of the Panama Canal should mean a large saving in the cost of transportation in the future.

INDIA CONTINUES TO HOARD GOLD

India is taking measures to promote gold deposits in banks at a lucrative rate of interest, in order to arrest the burying of gold treasure as silver has been buried in India for more than 100 years.

Sir George Paish estimates for the Wall Street Journal that the record for the present calendar year will show another $100,000,000 of gold buried in India—lost to the civilized world of the present time as though it were thrown into the ocean.

In each of the two preceding years, or for 1912 and 1911, more than $100,000,000 of gold disappeared into India, a total for the three calendar years to 1914 of more than $300,000,000 of gold lost to the world.

It is no longer safe to talk about the output of South African gold as the cause for rising prices, when another arm of the British Empire is burying 60 per cent. of the gold South Africa is producing. Sir George Paish believes that we have turned the corner in commodity prices and that we are now in for a recession in commodity values.

AUTOMOBILE INSURANCE HAZARDS

As an illustration of the risks run by insurance companies in connection with automobile hazards, a recent decision given by Mr. Justice Archer in the Superior Court of Montreal is of considerable interest.

With several other school boys a little lad got on the running board of an ice waggon and either fell off or was pushed off by some of his companions, thereby sustaining a fracture of one leg. Action was then taken by the father of the child against the owner of the ice waggon for a sum of $1,900 for damage sustained through the injury to the lad, the father pleading that his son had been run over by the rear wheel of the automobile, notwithstanding the fact that the weight of the vehicle was between seven and eight thousand pounds. It would seem to have been obvious that if such a thing had happened the boy's limb would have been crushed to a pulp. Notwithstanding this, suit was brought for the amount named. The case of the proprietor of the ice waggon was defended by the Imperial Guarantee and Accident Insurance Company, who proved that the chauffeur had done his full duty by stopping the vehicle once in going a distance of one hundred yards from the office to the garage, and driven the children away. However, when he started again several of the children jumped on the second time, and in either getting on or falling off before the garage was reached one of them was injured as described. The action for damages was dismissed with costs, but as the father of the child is a poor man it is not likely that the insurance company's costs can be recovered.

A fact that stands out in connection with the case is, that if the insurance company had not been able to prove that the chauffeur had compelled the children to get off his vehicle, the company would probably have been compelled to pay damages and costs in the case, as the law seems to be that in dealing with children it is not only necessary to use words to forbid any action which may endanger their safety, but that if necessary force must be used to compel obedience. No doubt this fact will be remembered not only by insurance companies, who may have similar cases to settle, but also by the owners of automobile and motor trucks generally.

ONTARIO FIRE LICENSE CANCELLED

The Superintendent of Insurance states, "that the license of the Ontario Fire Insurance Company authorizing the transacting of the business of fire insurance in Canada, has, under the provisions of Section 41 of the Insurance Act, 1910, been cancelled, and that under the provisions of the said section a modified or conditional license has been granted to the company to permit of the collection of premiums in respect of existing policies of insurance."

BANKING SYSTEM WAS SAFETY VALVE

In an article on the business reaction in Canada, Mr. H. M. P. Eckardt says:—
